Dah Sing Bank, Limited
Regulatory Disclosure Statement for the interim period ended 30 June 2020

Purpose and basis of preparation

The information contained in this Regulatory Disclosure Statement (the “Statement”) is for Dah Sing Bank, Limited (the “Bank”) and its subsidiaries (together the “Group”) to comply with the Banking (Disclosure) Rules (“BDR”) (Cap. 155M) and does not constitute statutory financial statements.

These banking disclosures are governed by the Bank’s disclosure policy, which has been approved by the Board. The disclosure policy sets out the governance, control and assurance requirements for publication of the document. While the Statement is not required to be subject to external audit, it has been reviewed and verified within the Bank in accordance with the Group’s governance processes over financial reporting and policies on disclosures.

According to the BDR, disclosure of comparative information is not required unless otherwise specified in the standard disclosure templates.

Except where indicated otherwise, the financial information contained in this Statement has been prepared on the basis of regulatory scope of consolidation specified by the Hong Kong Monetary Authority (“HKMA”) to the Bank. The subsidiaries of the Bank which are excluded from the regulatory scope of consolidation are set out in “Basis of consolidation” section under Part IIA below.

Dah Sing Bank, Limited
Regulatory Disclosure Statement for the interim period ended 30 June 2020

Part IIA. Composition of regulatory capital

Basis of consolidation

The capital adequacy ratios as set out in Template KM1 represent the consolidated ratios of the Bank computed on Basel III basis in accordance with the Banking (Capital) Rules (the “Rules”) and the transitional arrangement set out therein.

In the calculation of the consolidated capital adequacy ratios, the Bank and those subsidiaries consolidated in the calculation have adopted the standardised (credit risk) approach for the calculation of the risk-weighted amount for credit risk. The Bank and its subsidiaries have adopted the basic indicator approach for the calculation of the risk-weighted amount for operational risk, and the standardised (market risk) approach for the calculation of the risk-weighted amount for market risk.

Only the Bank is subject to the minimum capital adequacy requirement under the Hong Kong Banking Ordinance. Banco Comercial de Macau, S.A. (“BCM”) is subject to Macau banking regulations and Dah Sing Bank (China) Limited (“DSB China”) is subject to China banking regulations.

Note:

- (a) Subsidiaries within the category of "financial sector entities" as defined by the Rules.

In calculating the consolidated capital adequacy ratio as at 30 June 2020 under the Basel III basis, the portion of the aggregate significant investments in Common Equity Tier 1 capital instrument issued by financial sector entities not subject to regulatory consolidation and exceeded the 10% concessionary threshold was deducted from capital base. The amount within the 10% concessionary threshold was risk-weighted.

- (b) Subsidiaries engaged in property investment or are inactive.

In calculating the consolidated capital adequacy ratio as at 30 June 2020 under the Basel III basis, the Bank risk-weighted the cost of investments in these subsidiaries and did not deduct the investment costs from its capital base on the basis that the total cost of investment does not exceed 15% of the Bank's capital base as at the immediately preceding calendar quarter-end date.

Elements where a more conservative definition has been applied in the BCR relative to that set out in Basel III capital standards:

Row No.	Description	Hong Kong basis (HK\$'000)	Basel III basis (HK\$'000)
9	Other intangible assets (net of associated deferred tax liability)	58,252	58,252
	<p><u>Explanation</u></p> <p>As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights (MSRs) may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI's financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 9 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.</p>

18	Insignificant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
	<p><u>Explanation</u></p> <p>For the purpose of determining the total amount of insignificant LAC investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the Monetary Authority that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business.</p> <p>Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.</p>		
19	Significant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-

Notes to the template (Continued)

Row No.	Description	Hong Kong basis (HK\$'000)	Basel III basis (HK\$'000)
39	Insignificant LAC investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
	<p><u>Explanation</u></p> <p>The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant LAC investments in AT1 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 39 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.</p>		
54	Insignificant LAC investments in Tier 2 capital instruments issued by, and non-capital LAC liabilities of financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold and, where applicable, 5% threshold)	-	-
	<p><u>Explanation</u></p> <p>The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant LAC investments in Tier 2 capital instruments and non-capital LAC liabilities may be smaller. Therefore, the amount to be deducted as reported in row 54 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 54 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.</p>		

Remarks:

The amount of the 10% thresholds mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

Template CR2: Changes in defaulted loans and debt securities

The table below provides information on the changes in defaulted loans and debt securities, including any changes in the amount of defaulted exposures, movements between non-defaulted and defaulted exposures, and reductions in the defaulted exposures due to write-offs as at 30 June 2020 respectively:

		(a)
		Amount (HK\$'000)
1	Defaulted loans and debt securities at end of the previous reporting period (31 December 2019)	934,402
2	Loans and debt securities that have defaulted since the last reporting period	214,472
3	Returned to non-defaulted status	(27,316)
4	Amounts written off	(27,564)
5	Other changes (mainly being settlement, repayments and effect of foreign exchange rate changes)	(104,352)

Template CR3: Overview of recognized credit risk mitigation

The following table presents the extent of credit risk exposures covered by different types of recognized CRM as at 30 June 2020:

		(a)	(b1)	(b)	(d)	(f)
		Exposures unsecured: carrying amount (HK\$'000)	Exposures to be secured (Note) (HK\$'000)	Exposures secured by recognized collateral (HK\$'000)	Exposures secured by recognized guarantees (HK\$'000)	Exposures secured by recognized credit derivative contracts (HK\$'000)

4	Of which defaulted	125,507	617,240	603,792	13,448	-

Note: Amounts reported under column (b1) represent exposures which have at least one recognized CRM (collateral, financial guarantees, or credit derivative contracts) associated with them.

The allocation of the carrying amount of multi-secured exposures to different forms of recognized CRM in columns (b), (d) and (f) is made by order of priority, starting with the form of recognized CRM expected to be called first in the event of loss, and within the limits of the carrying amount of the secured exposures.

Part IV. Counterparty Credit risk (Continued)

Template CCR5: Composition of collateral for counterparty default risk exposures (including those for contracts or transactions cleared through CCPs)

The following table presents a breakdown of all types of collateral posted or recognized collateral received to support or reduce the exposures to counterparty default risk exposures as at 30 June 2020 in respect of derivative contracts or SFTs entered into, including contracts or transactions cleared through a CCP:

	(a)	(b)	(c)	(d)	(e)	(f)

Total	-	405,141	-	2,699,608	1,987,201	2,069,796

The increase in value of collateral received and posted under SFTs was due to the increase outstanding repo transactions.

¹ For “Collateral used in SFTs” reported in columns (e) and (f), the collateral used is defined as referring to both legs of the transaction. For example, an AI transfers securities to a third party, which in turn posts collateral to the AI. The AI should report both legs of the transaction in the template; on one hand the collateral received is reported in column (e), on the other hand the collateral posted by the AI is reported in column (f).

² “Domestic currency” refers to the AI’s reporting currency (not the currency / currencies in which the derivative contract or SFT is denominated).
