DBS BANK (HONG KONG) LIMITED

REGULATORY DISCLOSURES

1 INTRODUCTION

The information contained in this document is for DBS Bank (Hong Kong) Limited (“the Bank”) and is made pursuant to the Banking (Disclosure) Rules (“BDR”), Part 6 of the Financial Institutions (Resolution) (Loss-absorbing Capacity Requirements – Banking Sector) Rules (“LAC Rules”), and disclosure templates issued by the Hong Kong Monetary Authority (“HKMA”).

Basis of preparation

For regulatory reporting purposes, the Bank computes key regulatory ratios on a combined basis including the Bank and its overseas branch, unless otherwise specified.

For the purposes of calculating its risk-weighted assets (“RWA”), the Bank uses the Internal Ratings-Based (“IRB”) approach for the majority of its credit risk exposures and the Standardized approach for those exempted from the IRB approach. The Bank uses the respective Standardized approaches for operational and market risks.

The numbers in this document are expressed in millions of Hong Kong dollars, unless otherwise stated.

2 KEY PRUDENTIAL RATIOS AND KEY METRICS

2.1 KM1 – Key Prudential Ratios

The following table provides an overview of the Bank’s key prudential ratios which were calculated in accordance with the following Rules, where relevant, issued by the HKMA.

- Banking (Capital) Rules (“BCR”)
- Banking (Liquidity) Rules (“BLR”)

Footnote:

1 Pursuant to the Banking (Capital) Rules and Banking (Disclosure) Rules effective from 1 January 2025.

The capital ratios remained stable in the third quarter, mainly due to net profit accretion, which was offset by dividend distribution.

Other commentaries for the quarter explaining significant changes in the above metrics, if any, have been included in subsequent sections of this document.

Footnote:

- The LAC disclosures for the Bank commences from 31 March 2025 in accordance with the LAC Rules, accordingly the prior periods' metrics are not applicable.*
- The subordination exemptions under Section 11 of the Financial Stability Board ("FSB") Total Loss-absorbing Capacity Term Sheet ("TLAC Term Sheet") do not apply in Hong Kong under the LAC Rules.*

In the third quarter of 2025, Internal LAC risk-weighted ratios remained stable. The decrease in Internal LAC leverage ratio was mainly due to a higher exposure measure during the quarter.

29	Total	226,988	228,046	18,158

Footnote:

¹ Minimum capital requirements correspond to 8% of the RWA.

The risk-weighted assets decreased during the quarter was mainly driven by market risk.

3.2 CMS1 – Comparison of Modelled and Standardized RWAs at Risk Level

The following table provides the comparison of the RWA calculated under model-based approaches approved by the HKMA against the RWA calculated under full standardized approaches.

In HK\$ millions		As at 30 September 2025			
		(a)	(b)	(c)	(d)
		RWA

8	Total	176,527	50,620	227,147	295,331

The difference in the RWA calculated using model-based approaches and the RWA calculated using full standardized approaches was largely due to credit risk for corporate exposures.

5 LEVERAGE RATIO (continued)

5.1 LR2 – Leverage Ratio (continued)

In HK\$ millions		(a)	(b)
		As at 30 September 2025	As at 30 June 2025
Disclosure of mean values			
28	Mean value of gross assets of SFTs, after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables	64,278	47,682
29	Quarter-end value of gross amount of SFT assets, after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables	69,816	44,413
30 & 30a	Total exposures based on mean values from row 28 of gross assets of SFTs (after adjustment for sale accounting transactions and netted amounts of associated cash payables and cash receivables)	557,914	557,636
31 & 31a	Leverage ratio based on mean values from row 28 of gross assets of SFTs (after adjustment for sale accounting transactions and netted amounts of associated cash payables and cash receivables) (%)	8.7	8.7

The difference between the mean value and the quarter-end value of gross SFT assets was mainly driven by the increase of reverse repo transactions. The difference has no material impact on the leverage ratio.

The decrease in leverage ratio was mainly driven by dividend distribution and balance sheet growth during the quarter.

6 LIQUIDITY

The Bank complies with the minimum requirement of Liquidity Coverage Ratio (“LCR”) on a daily basis, in accordance with the Banking (Liquidity) Rules issued by the HKMA. The Bank is required to maintain an LCR of not less than 100%.

LCR aims to ensure that a bank has an adequate stock of unencumbered High Quality Liquid Assets (“HQLA”) to meet its liquidity needs for a 30-calendar day liquidity stress scenario. Banking (Liquidity) Rules stipulates the range of liquid assets that qualify as HQLA, as well as the applicable haircuts for each category. Net cash outflows are computed using the standardized 30-day cash flow rates defined in the same notice. The amounts after the application of haircuts or 30-day cash flow rates are reflected in the “Weighted value” column of the tables below.

The Bank seeks to ensure that its LCR remains above the specified regulatory minimum requirements. This is achieved by:

1. Establishing internal early warning triggers and thresholds based on observed movements in LCR over time;
2. Monitoring and managing the LCR closely to ensure it stays within established boundaries; and
3. Strategically managing the liquidity risk arising from the balance sheet structure.

REGULATORY DISCLOSURES

6 LIQUIDITY (continued)

The Bank has maintained a healthy liquidity position in the third quarter of 2025, with LCR being well above regulatory requirement. Quarter-on-quarter, the outflow arising from short-term interbank borrowing increased, which had led to the decrease of average LCR.

(i) Composition of High Quality Liquid Assets

The Bank holds a pool of unencumbered HQLAs that is readily available to meet cash flow obligations under stress scenarios, as defined in the LCR rules. These liquid assets consist predominantly of Level 1 HQLA, including mainly Hong Kong exchange fund bills and notes, other government debt securities and balances with central banks. This is supplemented by covered bonds issued by reputable financial institutions.

(ii) Concentration of funding sources

The Bank strives to develop a diversified funding base with access to funding sources across retail and wholesale channels. Customer deposits form a sound funding base and serve as the main source of funding for the Bank. It is complemented by a well-diversified book of wholesale funding, including but not limited to interbank money market borrowing and the issuance of certificates of deposit. For more information on the Bank's funding strategy, please refer to section 20.1.3 of annual regulatory disclosure for the year ended 31 December 2024.

(iii) Derivatives exposures

The Bank actively manages its over-the-counter ("OTC") and exchange-traded derivative contracts, which comprise mainly of currency, interest rate and bond futures, foreign exchange forwards, interest rate and cross currency swaps, and foreign exchange options. Collaterals may be required to be posted to counterparties and/or the exchanges, depending on the daily mark-to-market of these derivative positions. The Bank's largest counterparty for OTC derivatives is the Bank's parent company.

(iv) Currency mismatch

Customer deposit in Hong Kong, largely denominated in Hong Kong Dollar ("HKD") and United States Dollar ("USD"), is a major funding source for the Bank. The Bank make appropriate use of swap markets for the deployment of surplus funds to meet customer demand for loans.

(v) Centralisation of liquidity management

The Bank seeks to manage its liquidity in a prudent manner to ensure that its liquidity obligations would always be honored under normal and adverse circumstances. The Bank centrally manages its liquidity position and provides funding support to its overseas branch for the lending growth.
