Introduction

Purpose

The information contained in this document is for Hang Seng Bank Limited ('the Bank') and its subsidiaries (together 'the Group') to comply with the Banking (Disclosure) Rules ('BDR') made under section 60A of the Banking Ordinance and the Financial Institutions (Resolution) (Loss-absorbing Capacity Requirements – Banking Sector) Rules ('LAC Rules') made under section 19(1) of the Financial Institutions (Resolution) Ordinance ('FIRO').

These banking disclosures are governed by the Group's disclosure policy, which has been approved by the Board. The disclosure policy sets out the governance, control and assurance requirements for publication of the document. While the Banking Disclosure Statement is not required to be externally audited, the document has been subject to independent review in accordance with the Group's policies on disclosure and its financial reporting and governance processes.

Basis of preparation

Except where indicated otherwise, the financial information contained in this Banking Disclosure Statement has been prepared on a consolidated basis. The basis of consolidation for regulatory capital purposes is different from that for accounting purposes. Information regarding subsidiaries that are not included in the consolidation for regulatory purposes is set out in the 'Basis of consolidation section' in this document.

For loss-absorbing capacity ('LAC') disclosures, the basis of calculating the Group's LAC and Risk weighted asset ('RWA') is in accordance with the LAC Rules.

The information in this document is not audited and does not constitute statutory accounts.

The Banking Disclosure Statement

The Group's Banking Disclosure Statement at 30 June 2023 comprises Pillar 3 information required under the framework of the Basel committee on Banking Supervision ('BCBS'). The disclosures are made in accordance with the latest BDR and the LAC Rules issued by the Hong Kong Monetary Authority ('HKMA').

According to the BDR and the LAC Rules, disclosure of comparative information is not required unless otherwise specified in the standard disclosure templates. Prior period disclosures can be found in the Regulatory Disclosures section of our website, www.hangseng.com.

The Banking Disclosure Statement includes the majority of the information required under the BDR and the LAC Rules. The remainder of the disclosure requirements are covered in the Group's 2023 Interim Report which can be found in the Investor Relations – Financial Statements section of our website, www.hangseng.com.

Structure of the regulatory group

Basis of consolidation

The basis of consolidation for financial accounting purposes is in accordance with Hong Kong Financial Reporting Standards ('HKFRS'), as described in notes 1 and 4 on the condensed consolidated financial statements in the 2023 Interim Report.

The basis of consolidation for regulatory purposes is different from that for accounting purposes. Subsidiaries included in the consolidation for regulatory purposes are specified in a notice from the HKMA in accordance with section 3C(1) of the BCR.

Subsidiaries not included in consolidation for regulatory purposes are securities and insurance companies that are authorised and supervised by regulators and are subject to supervisory arrangements regarding the maintenance of adequate capital to support business activities comparable to those prescribed for AI under the BCR and the Banking Ordinance. The capital invested by the Group in these subsidiaries is deducted from the capital base subject to certain thresholds, as determined in accordance with Part 3 of the BCR.

There are also no subsidiaries that are included within the regulatory scope of consolidation but not included within the accounting scope of consolidation as at 30 June 2023.

For all subsidiaries included in both the accounting and regulatory scope of consolidation, the same consolidation methodology is applied at 30 June 2023.

The Group operates subsidiaries in different territories where capital is governed by local rules and there may be restrictions on the transfer of regulatory capital and funds between members of the Group.

The Group may need to maintain a regulatory reserve to satisfy the provisions of the Banking Ordinance and local regulatory requirements for prudential supervision purposes. As at 30 June 2023, the Group is not required to restrict any reserves which can be distributed to shareholders as the impairment allowance for Stage 1 and 2 loans and advances to customers exceeded the expected regulatory reserve balance.

There are no relevant capital shortfalls in any of the Group's subsidiaries which are not included in its consolidation group for regulatory purposes as at 30 June 2023.

A list of subsidiaries not included in consolidation for regulatory purposes is shown below:

Table 2: List of subsidiaries outside the regulatory scope of consolidation

	Principal activities	As at 30 Jun 2023	
		Total assets*	Total equity*
		HK\$m	HK\$m
Hang Seng Investment Management Ltd	Fund management	308	271
Hang Seng Investment Services Ltd	Provision of investment commentaries	9	9
Hang Seng Securities Ltd	Stockbroking	1,593	749
Hang Seng Insurance Co. Ltd and its subsidiaries	Retirement benefits and life assurance	181,493	11,684
Hang Seng Qianhai Fund Management Co. Ltd	Fund raising, fund sales and asset management	208	190

* Prepared in accordance with HKFRS

The approaches used in calculating the Group's regulatory capital and RWA are in accordance with the BCR. The Group uses the advanced internal ratings-based ('IRB') approach to calculate its credit risk for the majority of its non-securitisation exposures. For collective investment scheme ('CIS') exposures, the Group uses the look-through approach ('LTA') to calculate the risk-weighted amount. For counterparty credit risk ('CCR'), the Group uses the standardised (counterparty credit risk) ('SA-CCR') approach to calculate its default risk exposures for derivatives and the comprehensive approach for securities financing transactions ('SFTs'). For market risk, the Group uses an internal models ('IMM') approach to calculate its general market risk for the risk categories of interest rate and foreign exchange (including gold) exposures and the standardised (market risk) ('STM') approach for calculating other market risk positions. For operational risk, the Group uses the standardised (operational risk) ('STO') approach to calculate its operational risk.

Table 4: CC1 – Composition of regulatory capital (continued)

Notes to the template:

Elements where a more conservative definition has been applied in the BCR relative to that set out in Basel III capital standards:

	Hong Kong basis	Basel III basis
As at 30 Jun 2023	HK\$m	HK\$m
10 Deferred tax assets (net of associated deferred tax liabilities)	442	117

Explanation

As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realised are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III.

The amount reported under the column 'Basel III basis' in this box represents the amount reported in row 10 (i.e. the amount reported under the 'Hong Kong basis') adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for Mortgage servicing rights ('MSRs'), DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities and other credit exposures to connected companies) under Basel III.

Remarks:

The amount of the 10% threshold mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

Total capital ratio increased by 1.9 percentage point (p.p.) compared with the position at December 2022. It is a combined effect of an increase in total capital and a decrease in total RWA.

The increase in total capital of HK\$0.6bn was mainly driven by:

- an increase of HK\$2.5bn from profits for the first half of 2023, net of dividends distributed and AT1 coupons paid; partially offset by
- an increase of HK\$1.0bn CET1 deduction arising from excess of total EL amount over total eligible provisions under the IRB approach; and
- a decrease of HK\$0.9bn in reserves.

Total RWA decreased by HK\$68.5bn, arising from credit risk RWA which decreased by HK\$69.7bn. The decrease in credit risk RWA was mainly driven by a drop in total loan size and lowering the risk-weight floor of residential mortgage loans under advanced IRB approach.

Countercyclical capital buffer ratio

The CCyB is calculated as the weighted average of the applicable CCyB ratios in effect in the jurisdictions in which banks have private sector credit exposures. The Group uses country of business as the basis of geographical allocation for the majority of its credit risk and risk country for market risk, which is defined by considering the country of incorporation, location of guarantor, headquarter domicile, distribution of revenue and booking country.

1 The jurisdictional CCyB of Hong Kong used in the calculation of CCyB requirement has been 1.0% since 31 March 2020. The jurisdictional CCyB of other countries used in the calculation of the CCyB requirement ranged from 0% to 2.5% at 30 June 2023.

2 This represents the sum of RWA for the private sector credit exposures in jurisdictions with a non-zero countercyclical buffer rate.

3 The total RWA used in the computation of the CCyB ratio in column (c) represents the total RWA for the private sector credit exposures in all jurisdictions to which the bank is exposed, including jurisdictions with no countercyclical buffer rate or with a countercyclical buffer rate set at zero. The CCyB amount in column (e) represents the Group's total RWA multiplied by the AI-specific CCyB ratio in column (d).

Total RWA used in the computation of CCyB ratio decreased by HK\$65.8bn in the first half of 2023, mainly due to a drop in loan size.

Credit Risk

Credit quality of assets

Tables 15 to 16 present information on the credit quality of exposures by exposure category and changes in defaulted loans and debt securities on a regulatory consolidation basis. For further detail on the credit quality of IRB and STC exposures, refer to Tables 23 to 24 and 26 respectively.

The loans covered in these tables are generally referred to as any on-balance sheet exposures included as credit risk for non-securitisation exposures, covering exposures to customers, banks, sovereigns and others. Cash items and non-financial assets are excluded.

¹ The categorisation of ECL accounting provisions into regulatory category of specific and collective provisions follows the treatment specified in the completion instruction of the HKMA Capital Adequacy Ratio – (MA(BS)3) return. According to the completion instructions, the ECL accounting provisions classified into Stage 1 and Stage 2 are treated as collective provisions, while those classified under Stage 3 are treated as specific provisions. Provisions made for purchased or originated credit-impaired financial assets, under which any changes in lifetime expected credit losses will be recognised in the profit and loss as an impairment gain or loss, are treated as specific provisions.

5 Other changes	¹ (3,452)
6 Defaulted loans and debt securities at end of the current reporting period (30 Jun 2023)	25,901

¹ Other changes included repayment and foreign exchange movements.

The increase in defaulted loans and debt securities in the first half of 2023 was mainly from China commercial real estate loans, partly offset by the repayments and write-offs of defaulted loans during the period.

Impaired loans and advances to customers are those loans and advances where objective evidence exists that full repayment of principal or interest is considered unlikely. Specific provisions are made after taking into account the value of collateral, in respect of such loans and advances. For customer loans and advances, where the industry sector comprises not less than 10% of the Group's total gross loans and advances to customers, the analysis of gross impaired loans and advances and allowances by major industry sectors based on internal categories and definitions used by the Group is as follows:

Table 17: Credit-impaired exposures and impairment allowances by industry

Loans and advances to customers

Tables 19 to 21 analyse the loans and advances to customers by geographical locations, by industries, and by which are overdue and rescheduled on an accounting consolidation basis. The accounting consolidation basis is different from the regulatory consolidation basis as explained in the 'Basis of consolidation' section of this document.

The following analysis of loans and advances to customers by geographical areas is in accordance with the location of counterparties, after recognised risk transfer.

Table 19: Gross loans and advances to customers by geographical location

The difference of total gross loans of HK\$2m represents the Bank's loans and advances to the Group's subsidiaries which are outside the regulatory scope of consolidation.

The analysis of gross loans and advances to customers by industry sector based on categories and definitions contained in the 'Quarterly Analysis of Loans and Advances and Provisions - (MA(BS)2A)' return submitted to the HKMA is as follows:

Collateral includes any tangible security that carries a fair market value and is readily marketable. This includes (but is not limited to) cash and deposits, stocks and bonds, mortgages over properties and charges over other fixed assets such as plant and equipment. Where collateral values are greater than gross loans and advances to customers, only the amount of collateral up to the gross loans and advances is included.

BANKING DISCLOSURE STATEMENT (unaudited) (continued)

Loans and advances to customers that are more than three months overdue and their expression as a percentage of gross loans and advances to customers are as follows:

Table 21: Overdue loans and advances to customers

As at 30 Jun 2023	HK\$m	%
Gross loans and advances which have been overdue with respect to either principal or interest for periods of:		
- more than three months but not more than six months	5,380	0.59%
- more than six months but not more than one year	3,246	0.36%

- covered portion of overdue loans and advances	6,506	
- uncovered portion of overdue loans and advances	7,457	
- current market value of collateral held against the covered portion of overdue loans and advances	8,744	
Rescheduled loans and advances to customers	2,876	0.32%

Collateral held with respect to overdue loans and advances is mainly residential properties and commercial properties. The current market value of residential properties and commercial properties were HK\$2,591m and HK\$5,785m respectively.

Loans and advances with a specific repayment date are classified as overdue when the principal or interest is overdue and remains unpaid at period-end. Loans and advances repayable by regular instalments are treated as overdue when an instalment payment is overdue and remains unpaid at period-end. Loans and advances repayable on demand are classified as overdue either when a demand for repayment has been served on the borrower but repayment has not been made in accordance with the demand notice, or when the loans and advances have remained continuously outside the approved limit advised to the borrower for more than the overdue period in question.

Rescheduled loans and advances to customers are those loans and advances that have been rescheduled or renegotiated for reasons related to the borrower's financial difficulties. This will normally involve the granting of concessionary terms and resetting the overdue account to non-overdue status. Rescheduled loans and advances to customers are stated net of any advances which have subsequently become overdue for more than three months and which are included in 'Overdue loans and advances to customers'.

The amount of repossessed assets as at 30 June 2023 was HK\$78m.

Overdue and rescheduled amounts relating to placings with and advances to banks and other assets

There were no impaired, overdue or rescheduled placings with and advances to banks, nor overdue or rescheduled other assets as at 30 June 2023.

Off-balance sheet exposures other than derivative transactions

The following table gives the nominal contract amounts and RWA of contingent liabilities and commitments. The information is consistent with that in the 'Capital Adequacy Ratio – (MA(BS)3)' return required to be submitted to the HKMA by the Group. The return is prepared on a consolidated basis as specified by the HKMA under the requirement of section 3C(1) of the BCR.

For accounting purposes, acceptances and endorsements are recognised on the balance sheet under 'Other assets'. For the purpose of the BCR, acceptances and endorsements are included in the capital adequacy calculation as if they were contingencies.

^ Provisions in this table represent the eligible provisions as defined under Division 1, Part 6 of the BCR which include the regulatory reserves for general banking risks and the impairment allowances reported under IRB approach.

EAD post-CRM and post-CCF and RWA decreased by HK\$112.0bn and HK\$54.3bn respectively in the first half of 2023 driven by a decrease in debt securities holdings and a drop in loan size.

EL increased by HK\$1.9bn in the first half of 2023 primarily due to an increase in stage 3 provision.

Counterparty credit risk exposures

Counterparty default risk exposures

CCR arises from derivatives and SFTs. It is calculated in both the trading and non-trading books, and is the risk that a counterparty may default before settlement of the transaction. An economic loss occurs if the transaction or portfolio of transactions with the counterparty has a positive economic value at the time of default. CCR is generated primarily in our wholesale global businesses.

Table 38: MR4 – Comparison of VaR estimates with gains or losses

In the first half of 2023, the Group experienced one loss exception against actual profit and loss, and one loss exception against hypothetical profit and loss. The two loss back-testing exceptions are mainly driven by HKD foreign exchange ('FX') implied yield and government bond yield.

The backtesting process applies only to regulatory trading book positions. The actual profit and loss excludes reserves arising from regulatory banking book positions as well as fee and commission which are non-modelled items.

BANKING DISCLOSURE STATEMENT (unaudited) (continued)

Liquidity information

The LCR aims to ensure that a bank has sufficient unencumbered HQLA to meet its liquidity needs in a 30 calendar day liquidity stress scenario. The Group also uses the NSFR as a basis for ensuring operating entities raise sufficient stable funding to support their business activities. The NSFR requires institutions to maintain minimum amount of stable funding based on assumptions of asset liquidity.

The Group is required to calculate its LCR and NSFR on a consolidated basis in accordance with rule 11(1) of the BLR and to maintain both LCR and NSFR of not less than 100%.

Table 39: Average liquidity coverage ratio

	Quarter ended
	30 Jun
	2023
	%
Average liquidity coverage ratio	245.0

The Group maintained a strong LCR of 230.6% at 30 June 2023 (31 December 2022 : 281.3%) which is well above the statutory requirement. The average LCR decreased from 276.7% for the quarter ended 31 March 2023 to 245.0% for the quarter ended 30 June 23, mainly reflecting the decrease in holding of HQLA as a result of the drop in commercial surplus.

The composition of the Group's HQLA as defined under Schedule 2 of the BLR is shown as below. The majority of the HQLA held by the Group are Level 1 assets which comprise mainly of government debt securities.

Table 41: Net stable funding ratio

	Quarter ended
	30 Jun
	2023
	%
Net stable funding ratio	161.4

The funding position of the Group remained healthy and stayed well above the minimum statutory requirement for the first half of 2023. The period end NSFR were 161.4% and 163.6% for the quarters ended 30 June and 31 March 2023 respectively.

Sources of funding

Our primary sources of funding are customer deposits. We issue wholesale securities to supplement our customer deposits and change the currency mix or maturity profile of our liabilities.

Currency mismatch

In times of stress it cannot automatically be assumed that one currency can always be converted for another, even if those currencies are 'hard' currencies. LCR is therefore assessed by single currency for those that are material. In some currencies, convertibility is restricted by regulators and central banks and this restriction results in local currency not being convertible offshore or even onshore. Group policy requires all operating entities to monitor material single currency Internal Liquidity Metric ('ILM') and LCR. Limits are set to ensure that outflows can be met, given assumptions on stressed capacity in the FX swap markets. Limits are approved by the local Asset and Liability Management Committee ('ALCO')/Tactical Asset and Liability Management Committee ('TALCO'), and monitored by the local ALCO.

Additional contractual obligations

Most of the Group's derivative transactions are exchange rate contracts and interest rate contracts. Under the terms of our current collateral obligations under derivative contracts (which are International Swaps and Derivatives Association ('ISDA') compliant Credit support annex ('CSA') contracts), the additional collateral required to post in the event of one-notch and two-notch downgrade in credit ratings is nil.

A summary of the Group's current policies and practices for the management of liquidity and funding risk is set out in pages 50 to 53 of the Group's 2023 Interim Report*.

* Refers to printed version. The page reference of Interim Report (text version) is pages 57 to 59.

Mainland activities exposures

The analysis of mainland activities exposures is based on the categories of non-bank counterparties and the type of direct exposures defined by the HKMA under the BDR with reference to the HKMA's Return of Mainland Activities - (MA(BS)20). This includes the mainland activities exposures extended by the Bank's Hong Kong offices and its wholly owned banking subsidiary in mainland China.

Table 44: Mainland activities exposures

	On-balance sheet exposure HK\$m	Off-balance sheet exposure HK\$m	Total exposures HK\$m
As at 30 Jun 2023			
Type of Counterparties			
1 Central government, central government-owned entities and their subsidiaries and joint ventures ('JVs')	52,662	6,052	58,714
2 Local governments, local government-owned entities and their subsidiaries and JVs	29,885	1,026	30,911
3 People's Republic of China ('PRC') nationals residing in Mainland China or other entities incorporated in Mainland China and their subsidiaries and JVs	94,400	13,245	107,645
4 Other entities of central government not reported in item 1 above	5,677	234	5,911
5 Other entities of local governments not reported in item 2 above	3,276	102	3,378
6 PRC nationals residing outside Mainland China or entities incorporated outside Mainland China where the credit is granted for use in Mainland China	23,543	1,060	24,603
7 Other counterparties where the exposures are considered by the reporting institution to be non-bank Mainland China exposures	8,434	151	8,585
Total	217,877	21,870	239,747
Total assets after provision	1,532,998		
On-balance sheet exposures as percentage of total assets	14.21%		

On-balance sheet exposures as percentage of total assets remained stable as compared with 2022 year-end.

International claims

The Group's country risk exposures in the table below are prepared in accordance with the HKMA 'Return of International Banking Statistics - (MA(BS)21)' guidelines. International claims are on-balance sheet exposures to counterparties based on the location of the counterparties after taking into account the transfer of risk, and represent the sum of cross-border claims in all currencies and local claims in foreign currencies.

The table shows claims on individual countries and territories or areas, after recognised risk transfer, amounting to not less than 10% of the Group's total international claims.

Table 45: International claims

	Banks	Official Sector	Non Bank Financial Institution	Non-Financial Private Sector	Others	Total
As at 30 Jun 2023	HK\$m	HK\$m	HK\$m	HK\$m	HK\$m	HK\$m
