### Hong Kong Branch

#### Off-balance sheet and liquidity information As at 31 Dec 2024

	31 Dec 2024 HKD million	30 Jun 2024 HKD million
Contingent liabilities and commitments		
Other commitments	121	105

#### Derivatives instruments

	31 Dec 2024 HKD million		
	<u>Fair Value</u> <u>Assets</u>	<u>Fair Value</u> <u>Liabilities</u>	<u>Total Notional</u> <u>Amount</u>
Exchange rate-related derivative contracts	7	7	2,395
	<u>7</u>	<u>7</u>	<u>2,395</u>
	30 Jun 2024 HKD million		
	<u>Fair Value</u> <u>Assets</u>	<u>Fair Value</u> <u>Liabilities</u>	<u>Total Notional</u> <u>Amount</u>
Exchange rate-related derivative contracts	3	4	2,260
	<u>3</u>	<u>4</u>	<u>2,260</u>

The notional amounts of the above instruments indicate the volume of transactions outstanding as of the balance sheet date. They do not represent amounts at risk.

#### Liquidity information disclosure

	For the quarter ended 31 Dec 2024	For the quarter ended 31 Dec 2023
Average Liquidity Maintenance Ratio for the financial reporting period	170.26%	109.32%

The liquidity maintenance ratio ("LMR") is prepared in accordance with the Banking (Liquidity) Rules ("BLR") issued by the Hong Kong Monetary Authority ("HKMA"). The average LMR is calculated based on the arithmetic mean of the monthly LMR as reported in the Liquidity Position Return submitted to the HKMA for the abovementioned reporting periods.

# Barclays Bank PLC

## Hong Kong Branch

### Liquidity Information Disclosure (continued)

#### Liquidity framework

Barclays' Enterprise Risk Management Framework ("ERMF") governs the way in which Barclays identifies and manages its risks. The ERMF identifies Principal Risks that Barclays faces. Liquidity Risk is defined as the risk that the firm is unable to meet its contractual or contingent obligations or that it does not have the appropriate amount, tenor and composition of funding and liquidity to support its assets.

Barclays manages Liquidity Risk through a combination of tools and activities including policies and standards, governance and control processes, liquidity reporting and monitoring, internal and regulatory liquidity stress testing, limit setting and monitoring, and second line of defence (Risk) review and challenge of the first line of defence's (Treasury and Front Office businesses) liquidity risk-generating activities.

#### Structure and responsibilities of liquidity risk management

The Regional Funding and Liquidity Risk Management Departments approve the Internal Liquidity Stress Test of the branch which is then reviewed and challenged by the Hong Kong Asset and Liabilities Management Committee ("ALCO"). The ALCO additionally reviews the liquidity and funding risk management strategies, key metrics and limits structure, and the assets and liabilities maturity profile.

The Hong Kong and the Regional Treasury Departments are responsible for day-to-day monitoring of the liquidity stress test, the liquidity maintenance ratio and other liquidity risk management metrics produced by various financial and risk reporting functions, and exercise relevant controls to ensure compliance with the internal and regulatory requirements. The Regional Funding and Liquidity Risk functions are responsible for setting the quantitative and qualitative liquidity risk management measures, limits and constraints. The Internal Audit Department conducts regular audits to provide assurance on the effectiveness of the liquidity risk management governance and the related risk management controls.

#### Risk Appetite and Internal Liquidity Stress Testing

The Risk function establishes Barclays' Risk Appetite which includes a qualitative risk statement for Liquidity Risk that states "Liquidity Risk sets limits against internal and regulatory stress scenarios to ensure that Barclays maintains sufficient liquidity resources and stable sources of funding to remain within regulatory requirements and Barclays Risk Appetite."

In order to ensure Barclays remains in compliance with its risk appetite, the Liquidity Risk team sets Liquidity Risk Quantitative Constraints at the Group and material entity levels which consist of limits set against the internal liquidity stress test and regulatory metrics.

The Internal Liquidity Stress Test includes three stress scenarios: (i) idiosyncratic (30-day horizon), (ii) market-wide (90-day horizon), and (iii) combined (30-day horizon) in order to ensure Barclays maintains a liquidity surplus throughout different stresses over different periods of time.

In addition, liquidity risk management provides for other management actions, including generating additional liquidity from other liquid assets on the Group balance sheet in order to meet further outflows as well as to preserve or restore the liquidity pool in the event of a liquidity stress.

# Barclays Bank PLC

## Hong Kong Branch

### Liquidity Information Disclosure (continued)

#### Risk Appetite and Internal Liquidity Stress Testing (continued)

The Branch manages its eligible liquid asset pool to be at least 100% of the anticipated net stressed outflows assessed under each of these stress scenarios.

In addition, the Branch also establishes internal limits and monitoring procedures to ensure compliance with the LMR required under the Banking (Liquidity) Rules. A daily report on the LMR is produced with results communicated to the abovementioned departments for monitoring and risk management purposes.

The stress test report is also produced on a daily basis with the results communicated to the above mentioned departments for funding and liquidity risk management purposes.

#### Liquidity risk management and funding strategies

The key objective of the Branch's liquidity risk management and funding strategies is to maintain liquidity surplus over the designated horizon under each stress scenario. Where there is a projected shortfall or an actual funding gap, Treasury will take necessary actions to meet the liquidity required through additional funding or business actions as appropriate to the scenario.

As at 31 Dec 2024 and 29 Dec 2023, the Branch held material liquidity surpluses under both the 30-day Barclays specific and the combined market-wide and as well as the 90-day market wide stress scenario.

	30-day Barclays specific stress requirements HKD million	Combined 30-day market- wide and Barclays specific stress requirements HKD million	90-day Market-wide stress requirements HKD million
As at 31 Dec 2024			
Eligible liquid assets	2,934	2,934	2,934
Net stress outflows	(1,300)	(1,313)	(796)
Surplus	1,634	1,621	2,138

	30-day Barclays specific stress requirements HKD million	Combined 30-day market- wide and Barclays specific stress requirements HKD million	90-day Market-wide stress requirements HKD million
As at 29 Dec 2023			
Eligible liquid assets	2,696	2,696	2,696
Net stress outflows	(459)	(506)	(946)
Surplus	2,237	2,190	1,750

The contractual maturity profile of the Branch's on and off-balance items is reviewed regularly by the HK ALCO. In practice, the behavioural maturity of these items may differ from contractual maturity. The maturity profile of the sources and uses of funding is monitored to maintain sufficient liquidity surplus over the designated horizon under each stress test.

#### Remarks:

(1) The Branch holds highly liquid assets in its liquidity pool, which mainly comprises of balances with the central bank, Treasury bills and Government Bonds as shown in the above maturity profile analysis. These assets are all eligible to meet the local and the Group's liquidity requirements and there is no concentration limit set on individual type of assets held in the pool.

(2) The funding source diversification, including by currency, is centralised for Barclays Bank PLC Head Office and its branches. The Branch is funded within these arrangements.

#### Contingency funding plan

The Branch adopts and conforms to the APAC Contingency Funding Plan, which outlines the liquidity early warning indicators, the crisis invocation and escalation protocols, and the sources of funding available to the Branch. The Branch also establishes its own recovery plan which covers the contingency funding options for managing local liquidity stresses. These plans are reviewed regularly by the Hong Kong Treasurer, the relevant Asia Treasury and Risk functions, and the Hong Kong ALCO.

## Hong Kong Branch

### Notes to the Financial Information Disclosure Statement (continued)

#### 5 Loans and receivables (continued)

Barclays Group is required to recognise expected credit losses (ECLs) based on unbiased forward-looking information for all financial assets at amortised cost and debts financial assets at fair value through other comprehensive income and loan commitments under IFRS 9 Financial Instruments (IFRS 9). An allowance (or provision for loan commitments) is required for the 12 month (Stage 1) ECLs. If the credit risk has significantly increased since initial recognition (Stage 2), or if the financial instrument is credit impaired (Stage 3), an allowance (or provision) should be recognised for the lifetime ECLs.

The measurement of the ECLs are calculated using three main components as follows:

- (i) probability of default (PD)
- (ii) loss given default (LGD)
- (iii) exposure at default (EAD)

The 12 month and lifetime ECLs are calculated by multiplying the respective PD, LGD and EAD discounted at the effective interest rate at initial recognition. Expected credit loss measurement is based on the ability of borrowers to make payments as they fall due. The Group also considers sector-specific risks and whether additional adjustments are required in the measurement of ECL.

IFRS 9 impairment involves several important areas of judgement, including estimating forward-looking modelled parameters (PD, LGD and EAD), developing a range of unbiased future economic scenarios, estimating expected lives and assessing significant increases in credit risk, based on the Group's experience of managing credit risk.

Impairment models are used to determine impairment allowance and management adjustments which contain an element of subjectivity are applied by the Group to factor in certain conditions or changes in policy that are not fully incorporated into the impairment models, or to reflect additional facts and circumstances at the period end. Management adjustments are reviewed and incorporated into future model development where appropriate.

The credit impairment allowances made by Barclays Bank PLC Hong Kong Branch as at 31 Dec 2024 and 30 Jun 2024 represent Stage 1 ECL for loan and advances to customers and loan commitments respectively. These credit impairment allowances are assessed on a collective basis.
