Contingent liabilities and commitments are credit-related instruments. The contract amounts represent the amounts at risk should the contract be fully drawn upon. Since a significant portion of commitments is expected to expire without being drawn upon, the total of the contract amounts is not representative of future liquidity requirements.

The above derivatives transactions are undertaken by the Branch in the foreign exchange and interest rate markets. The notional amounts of these instruments indicate the volume of transactions outstanding and do not represent amounts at risk.

Derivatives are carried at fair value in the balance sheet. Asset values represent the cost to the Branch of replacing all transactions with a fair value in the Branch's favor assuming that all the Branch's relevant counterparties default at the same time, and that transactions can be replaced at the market. Liability values represent the cost to the Branch's counterparties of replacing all their transactions with the Branch with a fair value in their favour if the Branch were to default.

VII. Liquidity Information Disclosures

(i) Liquidity Maintenance Ratio (LMR)	31-Mar-23	31-Mar-22

(ii) Core Funding Ratio (CFR)	31-Mar-23	31-Mar-22
Average CFR for 3 months period (%)	133.78%	112.92%

Approach to Liquidity Risk Management

The average Liquidity Maintenance Ratio ("LMR") for the period is the arithmetic mean of each calendar month's average liquidity ratio. It is calculated in accordance with Section 103B of Banking (Disclosure) Rules.

In compliance with The Banking (Liquidity) Rules ("BLR") which signified the implementation of LMR and Core Funding Ratio ("CFR") for category 2A institution under Basel III liquidity standards in Hong Kong, the quarterly and half yearly average values of LMR and CFR reported are calculated based on the arithmetic mean of the average values of its LMR and CFR reported in its liquidity position return, for each month during the quarter and half year respectively.

Net funding exposures are managed through regular reviews of projected cash flows. Cumulative cashflow profiles under normal and stress conditions across different horizons are monitored against limits for each of these scenarios. The policy also provides a framework for the management of market access and contingency planning to withstand a liquidity crisis.
