For example, Liquidity Maintenance Ratio (“LMR”) is communicated to the senior management of the branch on a daily basis.

Internal stress testing

The objective of internal stress testing is to ensure sufficient liquidity for the Branch under different adverse scenarios to ensure compliance with survival horizon established for the Branch and monitor adequate liquidity reserves over the period. The results of stress testing are reported to the ALCO.

Contingent Funding Plan (“CFP”)

The Hong Kong Branch Contingent Funding Plan (Hong Kong CFP) aims to ensure that in a liquidity crisis, the Branch can meet both expected and unexpected, current and future cash flows and collateral needs without negatively affecting either the daily operation or the financial condition of the Branch.

Contingent Funding Plan (“CFP”) - continued

The Hong Kong CFP forms part of the Group CFP framework that the CBA Board has approved. The Hong Kong CFP’s key objectives are to:

- Ensure that in a potential liquidity stress event, the Branch would still have sufficient liquidity resources to ensure that it can meet its liabilities as they fall due.
- Outline escalation procedures to the Group CFP;
- In the event of a liquidity crisis provide location specific detail for the following:

 - ✓ communications
 - ✓ contingent funding options

- Ensure effective local management of any liquidity concerns.
- Ensure immediate escalation of a Branch level liquidity concern to the Group Treasurer.
- Ensure escalation across Senior Mgmt. Committees (Hong Kong ALCO, RGC etc.) including roles and responsibilities of those committees; and
- Formally implement the Policy requirement for the Group Treasurer to lead the management of any liquidity crisis in a Liquidity Group (LG) (subject to local regulatory and/or legal requirements)

Liquidity Risk Tolerance and Reporting

The HK branch has various intraday and daily liquidity management processes in place. On a daily basis, a forward cash ladder for the next 3 days by currency is run approximately 3 times a day to update the cash position. This enables the Hong Kong Treasury desk to monitor intraday funding gaps and short-term funding gaps. Further, a Liquidity and Funding Status Report is run daily. This report monitors the LCR and funding gaps for the next 30 days. The Hong Kong Treasury desk manages the funding gaps against an established limits of USD 800 million for a 90-day outflow cumulative trigger, this is on top of the LCR limit of 80% for any single day and an operating range of 100% to 130%.
