State Street Bank & Trust Company Financial Disclosure (Unaudited) as of December 31, 2023

As requested by the Hong Kong Monetary Authority, we are pleased to provide the following information with respect to the operations of our Hong Kong Branch and (where indicated) State Street Corporation on a consolidated basis. The financial disclosure (unaudited) may be viewed on our website:

https://www.statestreet.com/disclosures-and-disclaimers/hk/legal-disclosure

### Section A - Branch Information (Hong Kong Office only)

#### I. General

### State Street Bank and Trust Company Hong Kong Branch

State Street Bank and Trust Company, Hong Kong Branch has been registered to operate in Hong Kong since 1984. State Street Bank and Trust Company, Hong Kong Branch and its affiliates in Hong Kong (together "State Street Hong Kong") serve as local office with regional business leaders of certain businesses.

### **Investment Servicing**

To help our clients keep up with the sweeping changes taking place in the financial industry - both worldwide and in Hong Kong - State Street Hong Kong brings our clients an array of customized investment servicing solutions, including global custody and accounting, investment performance and analytics, investment operations outsourcing and investment compliance.

### **Investment Research and Trading**

State Street Global Markets Hong Kong provides specialized research, foreign exchange trading and securities lending.

### VI. Liquidity

i. The average liquidity maintenance ratio ("LMR")ii. The average core funding ratio ("CFR")123.24%1498.77%460.55%

The average liquidity maintenance ratio is the simple average of each calendar month's average LMR as reported in Part 3(II)D of the 'Return of Liquidity Position of an Authorized Institution' submitted pursuant to section 63 of the Banking Ordinance.

The average core funding ratio is the simple average of each calendar month's average CFR as reported in Part 1(II) of the 'Return of Stable Funding Position of an Authorized Institution' submitted pursuant to section 63 of the Banking Ordinance.

### Liquidity Risk Management Approach - Qualitative

State Street Bank and Trust Co. ("SSBTC") manages liquidity in a global context in which liquidity risk controls and measures are managed, supervised, and integrated on a global basis and has established Liquidity Risk Guidelines that apply to the Hong Kong Branch ("the Branch"). The purpose of Liquidity Risk Guidelines is to articulate the roles, responsibilities, accountabilities, and framework for the liquidity risk management approach within the Branch. The Branch manages liquidity risk in accordance with the Liquidity Risk Guidelines as well as in accordance with all applicable corporate global policies and guidelines, and all applicable local regulatory requirements.

The roles and responsibilities related to liquidity risk management cut horizontally across the organization, incorporating business unit representation and various independent oversight functions in the "three lines of defense" model. The first line owns the risks associated with their activities and is responsible for establishing effective internal controls to manage liquidity risk within approved level. The second line serves as the independent oversight function, responsible for ensuring the adequacy of the risk measurement methodologies and tools used to monitor liquidity risk and that liquidity risks are properly identified, measured, monitored, reported and controlled. The third line is responsible for assessing the effectiveness of the first and second lines as it relates to managing risk and providing reporting to the Board of Directors and management.

SSBTC's liquidity risk management is underpinned by few key components, including but not limited to, intraday and intercompany liquidity management, liquidity risk limit framework, stress testing and contingency funding plan. All of these management processes/ tools are subject to internal governance process to ensure the robustness and SSBTC's business and risk profile is reflected. Under SSBTC's overarching framework, the Branch employs conservative liquidity risk measures and business practices to ensure that sufficient fund is in place to accommodate customers' transaction and cash management requirements, meet other funding obligations, adhere within the risk appetite tolerance levels established by the Board of Directors and meet liquidity regulatory requirements.

### Liquidity Risk Management Approach - Qualitative (Con't)

The liquidity risk at the Branch, like SSBTC as a whole, stems from the possibility of a large-scale deposit loss, increases in client funding requirements, and the loss of wholesale funding availability. Under the current risk management framework, liquidity related risk limits have been established and these metrics measure the status of liquidity health and related liquidity drivers are monitored daily at a global level which incorporates the Hong Kong Branch's balance sheet, as well as at branch level. Furthermore, SSBTC runs regular stress tests based on various crisis scenarios which stress the balance sheet and SSBTC's ability to access wholesale funding. As a part of SSBTC, the Branch's balance sheet is incorporated into the assumptions used in these scenarios. The Branch addresses and manages potential liquidity risks arising from funding and market crisis by building sufficient liquidity buffers achieved through the global internal risk management practices.

SSBTC develops its liquidity management strategy in a global context. While branches and banking subsidiaries are an important source of stable funding, such entities may also rely on liquidity from SSBTC to support a special liquidity need or a crisis that may impact local operations. SSBTC's centralized approach to liquidity management assures that ample liquidity is available to fund its branches and certain wholly owned subsidiaries during times of stress.

### Liquidity Risk Management Approach - Quantitative

The Branch has established a liquidity metric framework that includes measurement tools and the associated thresholds to assess its balance sheet and liquidity positions. These internal metrics:

- Set buffers on top of the regulatory minimum requirements
- Assess the volatility in sources of funding which are mainly from client deposits and intracompany transactions
- Project and stress future cash flows based on maturity buckets

The internal liquidity metrics are reported on a regular basis by the first line, monitored and reviewed by the second line and senior management. Thresholds have been calibrated to alert the management of any potential liquidity shortfalls. The exception reporting and escalation procedures are defined in the Branch's Liquidity Risk Guidelines.

### Liquidity Risk Management Approach – Quantitative (continued)

On- and Off-Balance Sheet is based on return "Asset and Liabilities" (MA (BS) 1) with additional information on Off-Balance Sheet obligations.
