1. Letter to shareholders

Dear fellow shareholders:

Governments worldwide maintained extensive monetary easing policies and fiscal stimulus measures in response to the pandemic in 2021. Although the low interest rate environment remained, CTBC Bank saw a nearly 10% increase over 2020 in net profit by improving and stabilizing our overseas asset quality. In addition, backed by our robust performance in the capital market, growth in wealth management and consumer finance, and recovery in institutional banking business, we maintained our leading position in Taiwan.

Looking ahead in 2022, there is high uncertainty in the global financial market and regarding the continuing impact of the pandemic. As such, our Bank has adopted various measures to ensure stable business operations, fulfill our social responsibility, work with the government, and help our customers and employees overcome whatever challenges the future brings.

2021 business plan and operating results

In terms of its financial performance in 2021, CTBC Bank reported annual consolidated net revenue of NT\$104.7 billion, consolidated pre-tax income of NT\$35 billion, and consolidated net income attributable to the parent company of NT\$29.8 billion, with a consolidated after-tax ROE of 9.47%, which placed us in the leading position in the industry. With the pandemic gradually contained, we saw a 6% increase in consolidated net revenue and a 9% increase in consolidated net income attributable to the parent company from the 2020 fiscal year, achieving 99% of budgeted consolidated net income attributable to the parent company.

In major business developments, CTBC Bank, in support of the Taiwanese government's New Southbound Policy, increased its shareholding in Thailand's LH Financial Group Public Company Limited (LHFG) to 46.6% in 2021, making it the largest shareholder of LHFG. It further obtained over half of the seats of LHFG's board in October 2021. In addition, to support renewable energy development, CTBC Bank has led the project financing for four offshore wind farms so far, for a total syndicated loan amount of approximately NT\$300 billion. In 2020, the Bank and Taiwan Life served as co-lead arrangers for a syndicated loan of approximately NT\$90 billion for the Changfang and Xidao offshore wind project; then, in 2021, we entered into contracts for the Greater Changhua South East and ZhongNeng offshore wind projects for syndicated loan amounts of approximately NT\$82 billion and NT\$45 billion, respectively.

Regarding product and service innovation, CTBC Bank launched an innovative financial service with Apple Messages for Business. Using the Messages app on any Apple device, customers can now enjoy real-time interactive financial services when visiting a branch, including taking queue numbers in advance, checking queue progress, pre-completing forms, and accessing relevant financial Q&As. This innovative financial service earned a 90% customer satisfaction rate. In addition, CTBC Bank received the Best Asia Pacific Digital KYC/Onboarding Initiative award from The Asian Banker for its Smart KYC (know your customer) technology. Smart KYC is an AI-based platform that uses compliance technology and data analytics to assist in risk identification and support AML controls for CTBC Bank and its branches worldwide.

Regarding organizational changes, to improve the quality of credit investigations, CTBC Bank established the Institutional Banking Credit Analysis Division in January 2021 to be responsible for the business planning and execution of institutional finance credit investigation business, thereby improving credit risk management. Furthermore, to enhance the management of various institutional banking customer segments, in January 2022, we moved the Taiwan Emerging Business Division from retail banking to under the Greater China Region Group for the better overall use of resources. In addition, to facilitate international institutional banking business, we established the Southeast Asia Region Division and Northeast Asia & North America Region Division under the International Business Group to be responsible for the institutional banking business of regional branches, subsidiaries, and representative offices. To support the risk management of overseas branches and subsidiaries and to facilitate business growth on the foundation of effective credit risk management, in January 2022, we established the International Credit Risk Management Division to be responsible for the planning and control of international credit risk management.

We also restructured our retail banking business in October 2021 and formed three full-function business lines, namely wealth management, payment and consumer finance, and international retail banking. Meanwhile, to drive our development of international retail banking business, we established the International Retail Banking Group to be responsible for the strategic planning and business management of international retail banking.

We also continued our efforts in digital innovation last year. Having established the Financial Technology Development Center and Data Intelligence R&D Division in January 2020, we formed the Technology Group in January 2022. In the future, this integrated team will develop technology policy and coordinate the efforts of our Digital Finance Division, Data Intelligence R&D Division, and Information Service Division, helping to implement our Bank's digital transformation.

CTBC Bank received substantial acclaim in 2021 from domestic and international institutions. It was ranked 160th among the global top 1,000 banks by The Banker, taking first place in Taiwan for the

fifth consecutive year. The Bank received three awards at Harvard Business Review's first Digital Transformation Awards for its excellent financial innovation and digitalization capabilities, namely Digital Transformation Leader, Overall Digital Transformation Service Industry Pioneer-No. 1, and Single Item Digital Transformation-Excellent Operation Group No. 1. The Bank was also selected as the Best Bank in Taiwan by Global Finance, Asiamoney, FinanceAsia, and The Banker and received the Asia's Leader In Loans award from IDC. In addition, The Asian Banker ranked CTBC Bank No. 1 in Taiwan in its Most Helpful Banks in Asia Pacific During COVID-19 awards for the second consecutive year. We believe that such recognition favorably reflects our performance in stabilizing business, promoting digital innovation, and collaborating with the government in granting relief loans during the pandemic.

In risk management, CTBC Bank continued to strictly control its asset quality and capital adequacy in 2021. Our consolidated non-performing loan and coverage ratios were 0.57% and 293.87%, respectively, indicating satisfactory asset quality, while our consolidated BIS ratio was 14.63%, signifying a sound capital structure. Furthermore, domestic and international credit rating agencies maintained their stable outlooks for the Bank on the back of its diverse business sources, adequate risk management, good funding sources and liquidity, and leading business position in the domestic market.

Impact of the competitive, regulatory, and overall business environments

Although the effects of COVID-19 lingered in 2021, the global economy saw growth due to increasing vaccination rates in advanced economies, the lifting of pandemic control restrictions, and extensive monetary easing policies and fiscal stimulus measures. The International Monetary Fund predicted a substantial increase in global economic growth, from -3.1% in 2020 to 5.9% in 2021. The growth rates of the U.S., euro area, and China, meanwhile, were forecast to rise from -3.4% to 5.6%, -6.4% to 5.2%, and 2.3% to 8.1%, respectively, while the growth of most emerging economies was relatively limited due to insufficient vaccine supplies. Taiwan maintained relatively strong control of the pandemic, which also brought new business opportunities. With the diversification of

global supply chains and offshore funds investing in Taiwan, the national economy grew from 3.4% in 2020 to 6.3% in 2021 according to the Directorate General of Budget, Accounting and Statistics, outpacing all advanced economies and trade competitors.

Overseas, the central banks of advanced economies maintained extreme monetary easing policies for the first half of 2021. In the second half of 2021, however, as job markets stabilized and predictions of inflation amid soaring prices, these central banks began gradually shifting these policies in the other direction, reducing asset purchases and signaling rate hikes. Regarding fiscal policy, after the unprecedented stimulus measures implemented by many countries in 2020, governments worldwide in 2021 continued to launch policies aimed at supporting their economies and industries, thereby assisting individuals and businesses hit by the pandemic. Faced with the high uncertainty, Taiwan's central bank kept its rediscount rate at 1.125% and continued its relief loans to SMEs. Overall in 2021, the world experienced an economic rebound. Monetary policy and fiscal policy remained key factors in economic and industry recovery. Financial markets were in turn influenced by the interaction of abundant liquidity and high uncertainty, which resulted in drastic fluctuations in financial markets and thus a challenging environment for the banking business.

2022 business plan outline and future development strategies

Looking ahead, CTBC Bank will continue to pursue asset growth while maintaining risk discipline and will focus on developing its franchise business. In addition, as it strives to develop a differentiated operating model in the long run, the Bank will expand the competitive edge of its retail banking business through data analytics and digitalization. Meanwhile, the Bank will develop its SME business, focus on corporates with cross-border needs, and develop innovative products and services in response to post-pandemic demands, thereby establishing a stable and profitable operating model for its institutional banking business. Regarding operations, the Bank will scale up its process digitalization efforts, modernize its core banking system, and enhance its data capabilities for better efficiency, productivity, and operation quality.

1. Seize retail banking growth opportunities in the post-pandemic new normal

The Bank will grasp business opportunities presented by the new normal, including customers' increasing need for asset management and post-pandemic preference for digital services. For wealth management, we will satisfy customers' domestic and overseas asset management needs by providing diverse and innovative products and services, thereby expanding our core customer base. As for our consumer finance business, we will leverage our data and digital capabilities to create a leading customer experience while seeking the opportunity to serve new customers via cooperation with third parties. Regarding our payment business, we will build the industry's best payment experience, refine our digital customer acquisition models, and expand the variety of digital payment options.

2. Establish a stable and profitable operating model for institutional banking

In response to the impact of decreasing margins, we will expand our SME business in key markets through designated teams, develop our fee business, and thoroughly optimize the efficiency of our internal processes. Moreover, we will continue to expand our customer base of corporates with cross-border needs and will improve our cross-border platforms, cooperation mechanisms, and products and services to enhance our overseas performance.

3. Modernize core banking system for operational stability and cost efficiency

CTBC Bank's first- and second-generation core banking IT systems have been supporting its business for almost 30 years. Entering the digital era and facing innovative business models, our next-generation technology architecture will fulfill our business development needs, particularly in terms of time to market and product innovation.

In an environment of increasing global financial uncertainty, we will continue to pursue asset growth while maintaining risk discipline and will maximize value for our shareholders through a diversified business model and solid balance sheet.

Chairman:

Ant.

2. Company profile

2.1. Company overview

2.1.1. Date of establishment: March 14, 1966

2.1.2. History of the Bank

Established in 1966, CTBC Bank has been building customers' wealth and Taiwan's economy for over half a century now. In that time, it has grown into an international force offering a comprehensive suite of financial services.

Guided by the business principles of integrity and caring, our Bank has a proud history punctuated by regular achievements and innovative services. From issuing the first credit card in Taiwan to setting up the first customer service center of any bank in the country, we have led the way in the financial industry's transformation, particularly by promoting the digitalization of business processes. As of the end of 2021, the Bank's consolidated assets totaled NT\$4.88 trillion, the most among all privately owned banks in Taiwan. It is also the best-performing bank in other indicators, such as profits, tier 1 capital, and client base.

In addition to its 152 branches nationwide, CTBC Bank has the most extensive international presence of any Taiwanese bank, with 219 overseas outlets across 14 countries and regions. With a subsidiary, The Tokyo Star Bank, purchased in Japan and CTBC Bank subsidiaries established in the U.S., Canada, the Philippines, and Indonesia, the Bank has laid a strong foundation for regional business, providing international enterprises with comprehensive transnational financial services.

Furthermore, in support of the Taiwanese government's New Southbound Policy, the Bank has proactively expanded its South and Southeast Asian business in recent years by leveraging its existing branches in Vietnam, India, and Singapore. It also increased its shareholding in a local Thai operator, LH Financial Group Public Company Limited(LHFG), to 46.6%, making it the largest shareholder of the group. The Bank further obtained more than half of the seats of the Board in October 2021. Meanwhile, in Greater China, the Bank is cultivating business in the Yangtze River Delta Economic Zone and the Guangdong–Hong Kong–Macau Greater Bay Area, with Shanghai at the heart of its expansion into the Chinese market. Together, these advances abroad are providing our customers with a more convenient and comprehensive service network.

Looking ahead, we're determined to continue leading the industry in digitalization, leveraging FinTech and Big Data to drive innovation and create entirely new and engaging digital experiences for our customers. We will also continue to expand our efforts in operational performance, corporate governance, corporate social responsibility, and environmental sustainability as we cement our status as "Taiwan Champion, Asia Leader."

3. Business overview

3.1. Business performance

- 3.1.1. Scope of business
 - 1) Institutional banking, capital markets, and international business
 - (1) Institutional banking

We provide customers with comprehensive and specialized financial services, including loans, trade finance, cash management, and corporate trusts services.

(2) International business

We provide cross-border financial services by leveraging our global network, with a focus on customers in Greater China, Southeast Asia, North America, and Japan.

(3) Capital markets

We provide tailored solutions to meet clients' financing needs. These solutions include syndicated lending, structured finance, and financial advisory, and fixed-income securities underwriting services. In addition to managing our own market risk exposure and liquidity position, we offer a wide range of services to meet our institutional clients' hedging and financial needs. These services include foreign exchange, derivative, and structured investment products.

- 2) Retail banking
 - (1) Wealth management

We provide target customer groups with financial planning, asset allocation planning, and advisory services as well as assistance in the acquisition of a variety of financial products.

(2) Loan services

We provide individuals with diverse loan services including home mortgages, refinancing, installment loans, policy-based loans, financial planning mortgages, unsecured term loans, and revolving loans.

(3) Payment services

We provide payment solution services, such as card issuing and merchant acquiring services, for credit as well as debit cards. CTBC Bank also provides digital and mobile payment solutions, including digital wallets and mechanisms for third-party payments, bill payments, and cross-border transactions.

(4) Overseas financial services

We provide comprehensive financial services, such as deposit and loan, payment, and wealth management services, to overseas markets, namely the U.S., Indonesia, the Philippines, Japan, and Thailand.

Unit: NT\$ million

Revenue source	Amount	Percentage
Institutional banking, capital markets, and international business	45,203	43%
Retail banking	55,190	53%
Other	4,277	4%
Total	104,670	100%

Note: On a consolidated basis

3.1.2. Business discussion

1) Institutional banking, capital markets, and international business

CTBC Bank's institutional banking and capital market business continues to lead the sector in Taiwan. Amid financial liberalization and globalization, we have maintained expansion in Taiwan by optimizing our core business and growing our emerging businesses. Furthermore, we have been leveraging our global networks to accelerate the growth of international business by expanding the scale of overseas markets and connecting cross-border opportunities to boost synergy.

We keep our thumb on the market pulse as we lead the financial industry in creative, specialized financial products and have become an indispensable partner to our customers. Both our Bank and our main products have been honored with international awards such as Outstanding Leadership in Sustainable Infrastructure Finance in Asia Pacific, Best Treasury & Cash Management Bank in Taiwan, Best Trade Finance Bank in Taiwan, Best Foreign Exchange Provider in Taiwan, and Best Custodian Bank in Taiwan. The management direction and achievements of our primary products are as follows:

(1) Transaction banking

In 2021, despite both cash management and trade finance encountering severe challenges and most of our target markets facing geopolitical uncertainties and the rapid escalation of trade tensions, the market share of CTBC Bank deposit continued to grow. Specifically, we maintained our leading market position, including in foreign currency deposits, and enlarged our share of competitive overseas markets across all businesses. In addition, we retained our leading position in the trade and factoring market and remained among the top three banks in terms of revenue—a position we have held for several years. However, we do expect some turbulence due to the recent market headwinds. Therefore, we will prioritize our efforts and leverage our extensive networks in markets like Greater China and Southeast Asia.

Also notable is how our digital strategy has transformed us from a traditional transaction bank into one that supports its customers' expansion throughout Asia Pacific. Whether for corporates or individual customers like controllers, we are continuing to improve our customers' banking experience through innovative technologies. This includes providing a comprehensive range of channels to meet customers' needs, such as by increasing the use of mobile devices and application-to-application banking services. Indeed, we have closed a record number of deals because of these digital capabilities and the solutions that we provide.

For instance, we were the first bank in Taiwan to conduct a cross-border trade transaction using a blockchain-based end-to-end solution. The blockchain platform solution leverages the joint efforts of both our digital and trade teams and, more importantly, we are continuing to work with our customers to create more efficient ecosystems and trade processes. We believe our digital transformation will reposition us as a new type of transaction bank that stands out from the rest, and that we can achieve this by revamping our offerings and solutions in the changing digital landscape in order to identify new business opportunities.

(2) Custody and corporate trust business

Our custody and corporate trust business, which includes transfer agent, trust, and custody business, showed solid growth in 2021. Notably, CTBC Bank's assets under custody reached NT\$3.46 trillion (US\$124 billion) at the end of 2021. The corporate trust business revenue from all segments in 2021 was NT\$1.29 billion. In terms of asset size, we retained our No. 1 position in the transfer agent and employee benefit business.

(3) Syndicated loans

CTBC Bank is a leading arranger of loan syndication in Asia, with an extensive presence in the region as well as a strong commitment to its home market. The Bank has strong origination and structuring capabilities providing innovative solutions, and has extensive distribution channels. We specialize in financing solutions requiring higher levels of sectorial knowledge, such as private equity-sponsored leveraged financing, merger and acquisition financing, and aviation/shipping/real estate/project financing. The Bank has developed extensive networking and firm partnerships with key players in the region.

CTBC Bank is also actively involved in the renewable energy market, including solar and wind energy. We have helped arrange a number of large project financing cases and have been mandated as the financial adviser for several international and local developers. In addition, we offer local insights and tailored solutions including capital market and debt structuring, agency services, and hedging, and are wellpositioned to be the leading bank in these fields. In addition to being named Taiwan Loan House by IFR Asia, Best Investment Bank in Taiwan by Global Finance, and Best Corporate and Investment Bank in Taiwan by Asiamoney, we have lead-arranged several signature deals in the region and won the ESG Deal of the Year Global Award and Outstanding Leadership in Sustainable Infrastructure Finance Award in Asia Pacific from The Asset as well as the Syndicated Project Finance of the Year in Taiwan from APLMA.

(4) Fixed income underwriting

As one of the leading bond underwriters in Taiwan, CTBC Bank has participated in numerous landmark transactions and debut transactions of new kinds since the inception of the country's international bond market. In 2021, we had another record year in fixed income underwriting, with a number of successful issuances for regional deals, particularly in ESG bonds in Taiwan, of which we are the top underwriter. Also last year, we remained in the top spot among our Taiwanese peers in Asian G3 currency bond underwriting. With our strengthened debt capital market franchise together with our loan syndication business, we are well positioned to serve our clients across Asia with comprehensive corporate finance solutions.

(5) Treasury and derivatives

Our strong local presence in Taiwan provides us with unique advantages. Through collaboration across different business lines and geographical regions, we are able to offer clients comprehensive cross-border solutions. As such, we again maintained our leading position in the Taiwanese derivatives market in 2021, supported by strong product innovation capabilities and a vast market franchise. We were also granted numerous international awards in this area, such as House of the Year in Taiwan, Best Foreign Exchange Provider in Taiwan and Best Investment Bank in Taiwan.

2) Retail banking

CTBC Bank remains a pioneer in retail banking service innovation. In addition to enjoying a significant market share, we received 106 international and domestic awards in 2021, including being named the Best Private Bank in Taiwan in the Private Banking and Wealth Management Survey by Euromoney for the 17th consecutive year and the Best Retail Bank in Taiwan by The Asian Banker for the 15th consecutive year.

With the Bank's competitive advantages in branding and comprehensive services, our number of retail customers as well as assets under management has shown strong growth over the past few years, with compound annual growth of 6% and 10%, respectively, from 2017. More importantly, we continued to improve our customer satisfaction in 2021, increasing the rate to 88% from 87% and maintaining the best Net Promoter Score among all Taiwanese financial institutions.

(1) Wealth management

With its open platform strategy, CTBC Bank is able to provide comprehensive and innovative wealth management services and products to meet its diverse customer needs. Our diversified wealth management product lines have contributed to the Bank's leading position in Taiwan's wealth management market. Furthermore, our comprehensive wealth management services and transaction platforms meet customers' financial needs, both online and offline.

(2) Loan services

CTBC Bank has long been dedicated to providing complete financing solutions with multi-channel customer services, and also continues to maintain superior asset quality and profitability. As a result, we have enjoyed a leadership position in the personal loan and non-government-affiliated mortgage markets. In order to further optimize the customer experience, the Bank has also established an award-winning digital lending platform that radically simplifies the loan application process and reduces turnaround time. As a result of such constant and successful digital transformation, when supporting the government-led financial relief program for individuals affected by the pandemic in 2021, we received more than 210,000 applications within six days—the most in Taiwan. We also partner with players in e-commerce to provide loan services that fit in customers' daily lives, thereby not only offering convenient services but also expanding our customer base.

(3) Payment services

As part of its efforts to provide customers with a convenient payment experience, CTBC Bank continues partnering with various retailers and mobile payment platforms. For example, we launched a co-branded card with Hotai Motor Co., Ltd., the distributor of Toyota and Lexus vehicles in Taiwan, to fulfill customers' financial needs when it comes to car purchases, rental, and maintenance. Our customers are now able to utilize payment tools such as cards and account linking for a seamless payment experience both online and offline.

(4) Overseas financial services

CTBC Bank continues to develop a complete line of financial services abroad, such as deposit and loan services, payment services, and wealth management, based on these countries' unique economic development and customer needs. In the U.S. market, we continue to expand our mortgage customer base from Taiwanese to local customers and to offer more convenience services for customers. Residents of six states, namely California, Nevada, New Jersey, New York, Washington, and Texas, can now open digital accounts for use across these states. In Indonesia and the Philippines, supporting government policies to provide individuals with affordable and sustainable financial services and to become cashless societies, we develop digital strategies to provide better financial services to customers. Such efforts in Indonesia have earned CTBC Bank five international awards and one domestic award, including the Best New Digital Lending Platform - Indonesia and Top Digital Implementation awards. In Japan, supporting its government's push for digital innovation, we are committed to optimizing digital channel services in wealth management. In Thailand, meanwhile, CTBC Bank has increased its shareholding in LH Financial Group Public Co., Ltd., becoming its largest shareholder.

(5) Digital banking

Our internet and mobile banking services continue to be the most popular in the country thanks to the continual improvement of their platform design and addition of innovative features, earning numerous awards in the process. The number of customers using our digital banking services now exceeds 5.5 million. Our continual efforts building customer experiences around the customer journey and optimizing communications and interactions are driven by our commitment to providing retail banking services whenever and wherever customers need them.

(6) ATM services

CTBC Bank has the largest ATM network in Taiwan. With nearly 6,800 machines nationwide, we top the list in terms of interbank withdrawal transactions, accounting for approximately 28% of market share. We are also constantly innovating ATM functionality, such as biometric authentication. To offer individuals with sustainable financial services and to promote social equity and welfare, CTBC Bank provides virtual teller machine services in convenience stores, enabling suburban customers to open an online bank account in just 24 hours. This allows customers to receive a debit card quickly without needing to visit a branch.

As of	Dec. 3	Dec. 31, 2021		Dec. 31, 2020	
Number of employees	12,	12,503		12,143	
Average age (years)	39.0		38.7

Senior high school	609	4.9%	625	5.1%	
Below senior high school	28	0.2%	28	0.2%	

3.2. Employees

3.3. Social responsibility

1) CSR implementation

As the largest private and most international bank in Taiwan and one of the leading financial institutions in Asia, CTBC Bank has service locations across the globe, including 152 branches in Taiwan and 219 subsidiaries spanning 14 overseas countries and regions. CTBC

Bank is actively responding to the needs of major stakeholders—its employees, suppliers, customers, and community—and working toward the U.N. Sustainable Development Goals (SDGs).

- (1) CTBC Bank has been expanding its efforts in public welfare for many years. These efforts in turn spread across the community and country, like ripples in a pond, as the Bank continues to focus on five categories of charitable endeavors: charity, anti-drug awareness, sports, education, and arts and culture.
 - (a) Charity

The Light Up a Life charity fundraiser held by CTBC Bank was the starting point of CTBC Holding's involvement in community engagement—an involvement that has persisted and grown stronger in the intervening 37 years. As the longest-running charitable activity of any private enterprise in Taiwan, Light Up a Life has raised nearly NT\$2.4 billion in donations and helped more than 580,000 children by giving them a chance to escape poverty and realize their dreams.

CTBC Bank founded the CTBC Charity Foundation in 2004 to encourage its employees to engage in activities that promote public welfare. The Bank was also the first financial institution in Taiwan to offer charity leave. Through the CTBC Charity Foundation, after-school care, financial literacy, and English language volunteer teams are formed and trained to serve disadvantaged families and children across Taiwan.

Inspired by the microfinancing concept of Nobel Peace Prize winner Dr. Muhammad Yunus's Grameen Bank, the CTBC Charity Foundation introduced the first such initiative in Taiwan in 2011 with the CTBC Poverty Alleviation Program. It provides disadvantaged and marginalized families with the microloans and financial advice they need to meet their basic needs and beyond. Since its inception, the program has successfully funded the start-up businesses of 561 families and helped them escape poverty, with an accumulated amount of loans totaling NT\$180 million. The initiative, which has so far helped build 27 Taiwan Dream Project sites, works by marshaling central and local government resources and leveraging the efforts of volunteers and the general public to provide children with a warm and loving second home.

In terms of overseas aid, the CTBC Charity Foundation embraces the philosophy that poverty can be overcome through education. As such, in China in 2013, it launched the Caring for China's Next Generation on Campus program alongside the Caring for China's Next Generation Working Committee and the Social Welfare Foundation for China's Next Generation Fund. Priority has been given to areas that are underdeveloped, remote, or home to large ethnic minorities. Schools

have been selected as educational demonstration sites in each area, with funds provided to purchase teaching equipment. The project has seen outstanding results since its launch. As of publication, 52 pilot program sites had been set up, and over 60,000 underprivileged students now have access to more learning resources as a result. Learning and living conditions have been greatly improved in general, earning plaudits on both sides of the strait.

(b) Anti-drug awareness

During events hosted by CTBC Holding as part of its long-term involvement with disadvantaged children and otherwise marginalized families, the blight of serious drug abuse continually reared its head. We saw first-hand the cause-and-effect relationships between drug abuse and other social issues, prompting us to integrate human and material resources from across the CTBC Holding group to establish the CTBC Anti-Drug Educational Foundation in 2015, which is Taiwan's first privately operated anti-drug educational institution. It raises children's awareness of the dangers of drugs in an engaging manner that breaks free of conventional, low-impact methods. For instance, it utilizes interactive 3D and VR activities and a host of drug-detection tools as part of its touring exhibitions and workshops, which to date have reached more than 720,000 people all around Taiwan.

(c) Sports

Baseball is hailed as the national pastime of Taiwan, and long-term support is needed for it just as it is for education. CTBC Holding became the first enterprise to invest in all five levels of the sport, from little league to the majors, through sponsorship or hosting games to enhance the overall strength of the sport in Taiwan.

In 2014, CTBC Bank began sponsoring the CTBC Brothers Baseball Club. That same year, to support the game at the grassroots level, the CTBC Charity Foundation launched the CTBC Youth Baseball Project for the little and junior leagues, giving the opportunity to play the sport to children in rural areas who otherwise may not have been able to—despite them being among the country's most passionate baseball fans. At the big league level, CTBC Bank began sponsoring the CTBC Black Panther Pennant (National High School Baseball Competition) in 2015. It also established a Taiwanese version of Japan's famed Koshien Stadium in order to support and nurture talented high school players.

As part of its endeavor to maximize the impact of its social welfare projects, in 2018, CTBC Bank evaluated the social return on investment (SROI) of its sponsorship of the CTBC Brothers. The quantitative analysis, as certified by Social Value International, found that every NT\$1 invested produced NT\$17.59 in social value. This was not only the first SROI analysis ever conducted by Social Value

International for a baseball team, but the return calculated was the highest it had ever certified in the field of sports. In 2020, an SROI analysis was conducted for the CTBC Black Panther Pennant and found that every NT\$1 invested generated NT\$12.49 in social value. It marked the first SROI analysis conducted by Social Value International on baseball education.

CTBC Bank has also used the sport to promote literacy. Since 2016, it has cooperated with the CTBC Brothers to organize the Home Run Readers project, which offers baseball tickets to incentivize reading. For these efforts, in 2021, CTBC Holding received a Gold award at the Taiwan Sustainability Action Awards and first prize in the public welfare promotion category at the Wealth Management Awards. In addition, CTBC Bank was recognized by the Ministry of Education in 2020, becoming the first in the financial industry to win a Reading Rock Award since the prize was introduced 12 years ago. To further understand the project's influence on public welfare, we initiated an SROI evaluation of it in 2021, the results for which SVI will certify in 2022.

Elsewhere in sports, CTBC Bank has been nurturing a new generation of women's golfers, supporting six professional players and two amateur juniors—efforts for which we have received the Bronze Award in the Sports Administration's Sports Activist Awards. At the end of the 2021 season, sponsored athletes Yu-Sang Hou and Yu-Chiang Hou qualified for the LPGA tour while Ho-Yu An qualified for the Epson tour. Every year, CTBC Bank and the TLPGA co-host ladies professional golf tournaments, the results for which go toward world rankings, making these major events for Asia Pacific. The 2021 CTBC Invitational marked the first use of match play scoring in Taiwan for ladies professional golf and attracted more than 2,000 spectators over its three days.

To further expand our influence in social welfare through sports, in 2021, we established CTBC Sports Entertainment Co., Ltd., which manages the New Taipei CTBC DEA basketball team in the T1 League. Named after the U.S. Drug Enforcement Administration, the team hopes to use sports to reach younger people with its anti-drug abuse message.

(d) Education

We firmly believe that education provides people with opportunities to change their lives and is a priceless investment. Acting on these principles, in 2015, CTBC Holding integrated the group's resources and established CTBC Business School. The college, which helps both deserving and underprivileged students, offers grants and scholarships with diverse industry–academia cooperation to disadvantaged students who display outstanding academic performance. It
achieved a 100% student enrollment rate for its undergraduate and graduate programs in 2021, and has been lauded by the Ministry of Education as a model of higher education transformation. Since 2016, graduate schools of financial management, law, and fintech have been established. We have also put down more roots in the educational sphere, founding CTBC International Academy in 2017 to provide a consistent, high-quality six-year middle school curriculum. In 2019, the first batch of graduates from CTBC Business School had a 100% employment rate and became an important talent pool for Taiwan's finance industry.

(e) Arts and culture

CTBC Bank also has a proud history supporting Taiwan's cultural and creative field, including by founding the CTBC Foundation for Arts and Culture. In its early years, the foundation focused on operating the Novel Hall performance arts venue. In 2015, it shifted to a new operation model with more emphasis on engagement with the wider community, namely through performance art, visual art, and art education. Among such efforts are the annual CTBC Arts Festival, the only performance art festival in Taiwan; the CTBC Painting Prize, which is the only modern painting award in Taiwan and which received an impressive 790 entries in its first year; and the Love & Arts for Dreams Initiatives Project, which has supported the arts education of over 2,000 students in rural areas. In addition to receiving 23 major domestic and foreign awards, the project was also the subject of Taiwan's first ever social return on investment (SROI) evaluation in the field of arts and culture, which found that every NT\$1 invested yielded an SROI of NT\$4.18.

In addition, in an effort to cultivate talent in musical theater, the Company partnered with National Taichung Theater in 2021 for the NTT+ \times CTBC Musicals Talent Cultivation Project, building a unique one-stop model for the staging of shows, from creating the book of the musical to putting on the production to handling the box office.

(2) Environmental protection and energy management

CTBC Bank is located in the group's headquarters, CTBC Financial Park, which boasts 29,752 square meters of park area and 264,463 square meters of gross floor area. Incorporating various environmental protection and energy-saving techniques, the complex is the largest financial institution building in Taiwan to receive a Diamondgrade Green Building label under Taiwan's EEWH building certification system. At the end of 2019, CTBC Financial Park obtained LEED O+M v4.1 Platinum Certification and the LEED Dynamic Plaque, becoming Taiwan's first recipient of either recognition.

Given the tremendous global challenge of climate change and in line with its sustainable development policies, CTBC Bank has built upon its foundations in energy efficiency, carbon reduction, resource management, and green buildings to expand its sustainability efforts further to include green services, green sourcing, and green consumption. In response to extreme weather patterns, the headquarters' water facilities, fountains, and sprinkler equipment utilize rainwater reclamation and water-recycling technologies, while solar panels are installed to supply electricity for the financial park's public spaces. Aligning with global conservation efforts, CTBC Bank has adopted carbon footprint reduction measures, such as the purchasing of products that meet strict standards in environmental protection, energy efficiency, water conservation, and green construction. As a result, it has received the Outstanding Contribution to Green Purchasing by a Private Enterprise Award from Taipei City Government's Department of Environmental Protection for 12 consecutive years.

Furthermore, the Bank is keenly aware of the need for proactive ecological preservation. In addition to planting 2,000 thatch screwpine trees and Cuban bast trees at Zhongjiao Bay, in New Taipei City's Jinshan District, and in Yunlin County's Xiluo Township in 2020, it adopted 1,000 salt-, draught-, and wind-tolerant Cuban bast trees and horsetail trees in Taoyuan's Caota sand dunes in 2021. The event was attended by nearly 100 volunteers working to protect Taiwan's coastline from erosion by typhoons and waves.

CTBC Bank has also established an Environmental Sustainability Group, which holds regular management review meetings to follow through with the implementation of environment-related policies. In 2018, the Bank continued to grow the scope of its certification in the three major international certification standards of ISO 50001 (Energy Management), ISO 14001 (Environment Management System), and ISO 14064-1 (Greenhouse Gas Emissions Reporting). In 2019, this expanded to cover all of its branches across Taiwan. In the same year, except for passing ISO 14064-1 (Greenhouse Gas Emissions Reporting), all branches obtained dual certification in ISO 50001 (Energy Management) and ISO 14001 (Environment Management). The Bank's environmental measures have been honored with an Outstanding Energy Saving Performance Award from the Ministry of Economic Affairs and an R.O.C. Enterprise Environmental Protection Award from Taiwan's Environmental Protection Administration. In addition, CTBC Bank became the first financial institution in Taiwan to obtain renewable energy certification from the Ministry of Economic Affairs.

The Bank places great value on environmental protection and energy saving. In 2020, its efforts helped earn CTBC Holding a Clean Energy Ministerial Award of Excellence in Energy Management from the U.N. Industrial Development Organization, making it the world's first financial institution to receive this award.

(3) Talent cultivation and friendly working environment

CTBC Bank firmly believes that its workforce is its most valuable asset. As such, it has for years promoted a function-oriented talent strategy and has mapped out various

professional and management training courses. It also examines the performance and potential of personnel at all levels, thereby facilitating the planning of customized career development paths. The Bank precisely allocates resources to build a complete talent pool by providing employees with on-the-job training, project assignments, and rotations across different countries, businesses, and functions. Moreover, the Bank has cooperated with numerous leading international academic institutions to introduce top teachers and development resources to maintain its leading position in the industry in response to the rapidly changing external operating environment.

To ensure and protect employee human rights and gender equality, CTBC Bank adopts international human rights provisions in its Employee Code of Conduct and periodically conducts employee surveys to learn about its employees. The Bank also maintains grievance-reporting channels and keeps all cases confidential to protect the rights of complainants.

CTBC Bank also understands the importance of providing a comfortable and friendly working environment. In doing so, it focuses on three aspects in particular: risk-based thinking, preventive health care, and a culture of safety. From 2018 to 2021, it passed ISO 45001 Occupational Safety and Health Management System certification, strengthening its occupational safety management standards and overall performance. Moving forward, the Bank will expand its corporate influence to work with suppliers and related enterprises to form an ecosystem of safety and sustainability.

Addressing the impact of COVID-19, in 2021, we purchased epidemic group health insurance for more than 60,000 employees and their dependents in Taiwan. In July that year, we gave NT\$10,000 to every non-managerial full-time employee and an additional NT\$5,000 to every front-line employee to help them purchase epidemic prevention supplies. We also provided rapid COVID-19 home test kits for employees to help them proactively stay healthy and block the chain of infection, and gave out condolence payments to employees who tested positive. To encourage employees to get vaccinated and rest sufficiently afterward, we introduced paid vaccination leave of up to two days.

Among our overseas operations, those in the Philippines, Indonesia, and India have been hardest hit by the pandemic. Our efforts in response have included helping our staff in the Philippines and Indonesia to purchase a large number of epidemic prevention supplies, including masks, protective clothing, automatic disinfectant sprayers, and laptops for working from home. In addition, in May 2021, CTBC Holding headquarters started shipping 10 oxygen generators to India to improve the work environment for employees there. Furthermore, as the pandemic ravaged countries around the world, we helped arrange charter flights to bring Taiwanese nationals stationed in the Philippines and India back to Taiwan.

In late October 2021, the Company issued its first Employee Empowerment Report, reflecting its commitment to treating its employees like family members. The report details how the Company is able to grow in tandem with employees by listening to their feedback; providing them competitive pay, comprehensive training, career development, and a healthy and safe work environment; providing the necessary resources for them to realize their potential; and empowering them to work more independently.

(4) Green business and responsible finance

In 2012, CTBC Holding became one of the first Taiwanese financial institutions to sign on to the CDP. CTBC Bank also signed the Equator Principles in 2019, becoming the 94th financial institution in the world to do so. It has also expanded the environmental and social risk evaluations in its credit investigation and credit extension procedures. As of the end of 2020, three project finance cases had adopted the Equator Principles. In addition to the aforementioned financial initiatives, CTBC Bank voluntarily adopted the U.N. Principles for Responsible Banking in 2019 and, to facilitate sustainable development in the global financial sector, in 2020 it established plans in three strategic directions, namely sustainable finance green energy financing goals, the control and management of credit extensions to highly sensitive industries, and human resources development in the digital era.

Also in 2020, CTBC Bank became the first institution in Taiwan to issue a sustainability bond, and in 2021 this bond became the first in Taiwan to be included in the International Capital Market Association (ICMA) Sustainable Bonds Database. In addition, the Bank issued Taiwan's first social bond in 2021, further supporting Taiwan's sustainable development.

(5) Financial inclusion and digital development

CTBC Bank actively supports access to finance for all. Our Bank has 24-hour ATMs in nearly all of Taiwan's ubiquitous 7-Eleven convenience store locations. Its bank branches feature barrier-free office space and ATM services. Nationwide, it has more than 6,400 barrier-free ATMs plus 161 ATMs tailored for users with impaired vision, thus effectively providing people with disabilities convenient financial services. Meanwhile, its Home Bank app leads the industry in Taiwan with its use of responsive web design, which makes the app comfortably usable across all sizes and forms of mobile device. This ensures that all customers have access to the app's myriad financial services, regardless of their device.

In addition, one way the Bank meets the financial needs of SMEs is with an online financial service platform, which has resulted in 6.6% annual growth in SME loans

over the past three years. The Bank also provides life-changing microfinancing abroad through its overseas branches and by partnerships with grassroots organizations supporting disadvantaged groups.

As a leader in the development of digital finance in Taiwan, CTBC Bank has established a Blockchain Lab, AI Join Lab, customer experience design center, and Big Data research and development center, recruiting professionals and teams of experts to promote online and offline digitalization engineering and a consistent financial service experience across all channels for customers via a three-track approach to financial development comprising digital transformation, digital innovation, and digital infrastructure. CTBC Bank launched the "Bank Corporate Direct System Connection" service in 2021, which is convenient for corporate customers to connect their internal system applications with the bank's corporate online banking or bank host (Host to Host) through the Application Programming Interface (API) to obtain financial services to meet their management needs of financial information integration, autonomous, realtime and automated.

In direct response to the pandemic, CTBC Bank worked with Taiwan's central government to provide relief loans. On the first day it opened for COVID-19 relief loan applications, our internet banking platform saw 44 times its usual number of users, with page views 57 times the usual number. Thanks to the diligence of its staff, the Bank was able to handle the influx smoothly and process each application quickly. As of mid-July 2021, CTBC Bank had granted more than 130,000 bailout loan applications worth over NT\$10 billion—the most of any bank.

For its excellent performance in 2021, the Bank was named the Best Loan Service Bank in Asia Pacific by IDC and the Best Pandemic Prevention Bank in Asia Pacific and the Most Popular Personal Finance Bank in Asia Pacific by The Asian Banker. Furthermore, in part for its continued success in operating performance, digital transformation, and corporate social responsibility, it was named the Best Taiwanese Bank of the Year by The Banker, Global Finance, Asiamoney, and FinanceAsia. In addition to its digital performance, the Bank's brand value also earned plaudits. The Banker ranked it No. 160 among the top 1,000 global banks, including the No. 1 Taiwanese Bank for the fifth consecutive year; it was also named Brand of the Year by World Branding Forum for the seventh time, becoming the only Taiwanese bank to receive the honor on consecutive occasions.

Moving forward, CTBC Bank will continue to give ESG-related issues high priority in its decision-making and planning. It will further expand its capacity for sustainably minded corporate operations—and it will do so by upholding its "We are family" brand spirit, "protect and build" corporate mission, and "caring, professional, and trustworthy" brand values. It does this in order to create value for its customers, employees, shareholders, suppliers, and community, working to cement its status as the most trusted financial service institution in the minds of customers and shareholders alike.

2) Ethical Conduct

CTBC Bank does its best to fulfill the responsibility that comes with its corporate citizenship, and emphasizes ethical business operations. It has formulated a Code of Ethical Conduct, which includes a nine-part framework comprising the avoidance of conflicts of interest, improper personal gain, and unethical conduct; confidentiality obligations; fair trade; the protection and appropriate use of company assets; compliance with laws and regulations; the encouraging of the reporting of illegal or unethical activities; and disciplinary measures. It functions jointly with related policies such as the Code of Conduct, Corporate Governance Best Practice Principles, and Ethical Corporate Management Best Practice Principles. These rules require all directors, managers, and employees to self-regulate and directors and high-level management to issue ethical management compliance statements, as well as annual ethical management trainings be conducted to avoid any improper behavior that may harm the company's reputation. The above regulations are published on the websites of CTBC Holding and CTBC Bank. Personnel who violate any of these regulations will face disciplinary action according to relevant company measures.

4. Dividend policy and earnings distribution

4.1. Dividend policy and execution status

4.1.1. Dividend policy:

As a subsidiary of CTBC Holding, and in order to satisfy the fund requirements of the parent company, if the Bank reaches a reasonable BIS ratio, cash dividends and bonuses for common shares shall be prioritized and maintained at a stable level every year.

The above policy, however, is to be observed only in principle. The Bank shall take business performance and budgeted capital requirements into consideration and make necessary adjustments to the actual distribution.

Regarding the distribution terms, time, and amount, if there are earnings in the financial statement, the Bank shall first set aside funds for taxes, to be adjusted according to the principles of financial accounting, and offset losses, if any. It shall then set aside 30% of the earnings as a legal reserve and subsequently, per applicable laws and regulations, appropriate or reverse a special reserve. The balance, together with the undistributed retained earnings of the previous year, shall be the distributable earnings. The Board of Directors shall present an earnings distribution proposal at a shareholders' meeting for approval. Prior to the legal reserve reaching the paid-in capital of the Bank, the distributed cash dividends shall not exceed 15% of the Bank's paid-in capital. Upon the Bank's accumulated legal reserve reaching the Bank's paid-in capital, or if the Bank meets the required finance and business operation standards as defined by the competent authority in Paragraph 2 of Article 50 of the Banking Act and has set aside legal reserve according to the Company Act, it shall not be limited by the legal reserve and the cash earning distribution ceiling.

- 4.1.2 The Board has approved the earnings appropriation proposal for 2021. It is proposed that a total of NT\$12,137,190 thousand from the retained earnings of the year be distributed in cash according to the record shown in the shareholder book on the distribution record date. The dividend is NT\$0.82029 per share in cash. In the event of a capital increase or decrease affecting the number of outstanding shares on the distribution record date, the Chairman shall be authorized to handle relevant matters.
- **4.2 Impact of proposed stock dividend on the Company's business performance and EPS:** No financial forecast was announced for the Bank in 2022; therefore, no such disclosure is applicable.

4.3 Information relating to the compensation of employees, directors, and supervisors

- 4.3.1 Proportion or range of employee, director, and supervisor compensation as set forth in the Bank's Articles of Incorporation: 0.05% of the current year's profit as employee compensation. However, the compensation of directors and supervisors is not mentioned in the Articles of Incorporation.
- 4.3.2 The basis for estimating employee, director, and supervisor compensation, for calculating the number of shares to be distributed as employee compensation, and the accounting treatment of the discrepancy, if any, between the actual distributed amount and the estimated figure, for the current period: Employee compensation in 2021 is recognized as the current-period expenses based on the Bank's pre-tax income before the deduction of employee compensation at the end of the accounting period, multiplied by the percentage set by the Bank's Articles of Incorporation. Differences between the actual amount, as approved by the Board of Directors, and the original estimate will be accounted for as changes in accounting estimates and recognized as a profit or loss in the following year.
- 4.3.3 Distribution of compensation approved by the Board of Directors:
 - 1) Employee compensation distributed in cash or stock: The cash compensation of employees was NT\$17,202 thousand.
 - 2) Discrepancy between the actual amount and the original estimates, and the reasons and handling thereof:
 - (1) Compensation discrepancies: The accrued expenses for employee compensation in 2021 were NT\$17,202 thousand. There is no discrepancy between the actual distribution amount and the accrued expenses for employee compensation.
 - (2) Reason and handling:
 - 3) The percentage of employee compensation distributed in stock of the sum of after-tax net income stated in the parent company-only financial reports or individual financial reports for the current period and of total employee compensation: Not applicable because the Bank did not distribute any employee compensation in stock.
- 4.3.4. The actual distribution of employee, director, and supervisor compensation for 2020(including the number of shares, monetary amount, and stock price of the shares distributed), and any discrepancy between the actual distribution and the recognized employee, director, or supervisor compensation, and the reason and handling thereof:

		202	20

CTBC Bank Internal Control Statement

To: Financial Supervisory Commission,

On behalf of CTBC Bank Co., Ltd., we hereby certify that for the fiscal year of 2021, the Bank has duly complied with the Implementation Rules of Internal Audit and Internal Control System of Financial Holding Companies and Banking Industries in establishing our internal control system, enforcing risk management, auditing the same by an independent audit unit and reporting the results thereof to the Board of Directors and Audit Committee on a periodic basis; the Bank has also duly complied with paragraph 5 of Article 38 and Article 38-1 of the abovementioned implementation rules as well as the information security self-discipline standards established by relevant financial industry associations.

For its concurrent securities business, the Bank has evaluated the effectiveness of the design and implementation of the relevant internal control system according to the evaluation requirements under the Regulations Governing the Establishment of Internal Control Systems by Service Enterprises in Securities and Futures Markets.

For its concurrent insurance agent business, the Bank has evaluated the effectiveness of the design and implementation of the relevant internal control system according to the Regulations Governing the Implementation of Internal Control and Audit System and Business Solicitation System of Insurance Agent Companies and Insurance Broker Companies.

Upon prudent evaluation, we, the undersigned, hereby certify that, with the exception of the items listed in the attachment, the Bank's internal control system, compliance with relevant laws and regulations, and overall information security mechanism were effectively implemented in 2021. This statement shall form part of the Bank's annual report and prospectus to be disclosed to the public, and we are liable for false information or omissions in its material contents under Articles 20, 32, 171, and 174 of the Securities and Exchange Act.

Sincerely yours,

Chairman

President

Chief Auditor

Tank. Fors Chen

Chief Compliance Officer Justic Lee

Independent Auditors' Report

To the Board of Directors of CTBC Bank Co., Ltd.:

Opinion

We have audited the consolidated financial statements of CTBC Bank Co., Ltd. ("the Bank") and its subsidiaries , which comprise the consolidated balance sheets as of December 31, 2021 and 2020, the consolidated statements of comprehensive income, changes in stockholders' equity and cash flows for the years ended December 31, 2021 and 2020, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Bank and its subsidiaries as at December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years ended December 31, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, Regulations Governing the Preparation of Financial Reports by Securities Firms, and Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants and International Financial Reporting Standards (IFRSs), International Accounting Standards (IASs), interpretations and pronouncements as endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audit of the consolidated financial statements in accordance with the Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants, Jin Kuan Yin No. 10802731571 issued by the Financial Supervisory Commission, and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the consolidated Financial Statements section of our report. We are independent of the Bank and its subsidiaries in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Emphasis of Matter

The judicial cases are stated in Note 9(c). Part of judicial cases are still under investigation by the judiciary, and the results remain uncertain. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2021. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In our judgment, the key audit matters which should communicate through the auditors' report were as follows:

1. Assessment of the fair value of financial instruments

Please refer to Note 4(f) for the related accounting policies of the assessment of the fair value of financial instruments, Note 5 for the accounting assumptions and estimation uncertainty, and Note 6(aq) for the other details.

Description of key audit matter:

Parts of the financial instruments owned by the Bank and its subsidiaries as of December 31, 2021 were valued via evaluation model due to the lack of transaction prices at active market, and parts of the referred input values could not be obtained from the public market. Thus, it demands significant professional judgments from the management by using different valuation techniques and assumptions for input values. Therefore, the assessment of fair value of financial instruments is one of the key audit matters.

How the matter was addressed in our audit:

Our principal audit procedures included: Testing the management's control procedures over the classification, measurement and disclosure of fair value of financial instruments, including evaluating how the management determines the classification of financial instruments, chooses the appropriate evaluation method and decides the prime parameter hypothesis, and confirming that the presentation and disclosure of financial instruments are in accordance with the International Financial Reporting Standards (IFRSs). For financial instruments with active market prices, we used sampling test to assess the appropriateness of public quoted prices. As to financial instruments using evaluation method and the prime input values used by the management.

2. Impairment of loans and receivables

Please refer to Note 4(f) for the related accounting policies of impairment of loans and receivables, Note 5 for the accounting assumptions and estimation uncertainty, and Note 6(h), (i), (j) and (aq) for the other details.

Description of key audit matter:

The management assessed the expected credit loss (ECL) of loans and receivables by identifying whether the credit risk of credit assets has significantly increased since initial recognition, then dividing ECL into 12-month ECL and lifetime ECL, and dividing them into collective assessment and individual assessment to measure them by using different impairment methods. For collective assessment, the impairment is calculated by establishing an impairment model and using the past loss experience, current market conditions and forward-looking estimation on assets with similar credit risk characteristic to form basic estimation. For individual assessment, the measurement is based on expected future recoverable cash flows. The aforementioned measurement methods involved significant professional judgments and estimation by the management; therefore, the impairment of loans and receivables is one of the key audit matters.

How the matter was addressed in our audit:

Our principal audit procedures included: Understanding the methodology and related control procedures on how the management assesses and measures the impairment amount of loans and receivables. For collective assessment, we assessed the impairment model adopted by the management and reviewed the appropriateness of the calculation of the impairment parameters (including probability of default, loss given default, exposure at default and recovery rate) via sampling. For individual assessment, we used sampling test to assess the appropriateness of the estimation of future recoverable amounts and the value of collateral. Meanwhile, we assessed whether the allowance for loans and receivables meets the regulation requirement.

Other Matter

Individual financial statements of the Bank were additionally prepared, and we have expressed an unqualified opinion with emphasis of matter and other matter on it for user reference.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants, International Financial Reporting Standards (IFRSs), International Accounting Standards (IASs), interpretations, and pronouncements as endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank and its subsidiaries' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including audit committee) are responsible for overseeing the Bank and its subsidiaries' financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank and its subsidiaries' internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank and its subsidiaries' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank and its subsidiaries to cease to continue as a going concern.

- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Bank and its subsidiaries to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit and developing the Bank and its subsidiaries' audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Wu, Lin and Tzang, Kuo-Yang.

KPMG

Taipei, Taiwan (Republic of China) March 15, 2022

Notes to Readers

The accompanying consolidated financial statements are intended only to present the consolidated statement of financial position, financial performance and cash flows in accordance with the accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally accepted and applied in the Republic of China.

The independent auditors' audit report and the accompanying consolidated financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of the English and Chinese language independent auditors' audit report and consolidated financial statements, the Chinese version shall prevail.

(English Translation of Consolidated Financial Statements Originally Issued in Chinese) CTBC BANK CO., LTD. AND SUBSIDIARIES Notes to the Consolidated Financial Statements

For the years ended December 31, 2021 and 2020

(Expressed in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

(1) Company history:

CTBC Bank Co., Ltd. (the "Bank") was originally incorporated in March 1966 as "China Securities Investment Corporation." In December 1970, the Bank changed its organization and was renamed China Trust Co., Ltd. Twenty-one years later, on July 2, 1992, it was approved to conduct commercial banking business and changed its name to CTBC Bank Co., Ltd.

In order to restructure overall resources, lower costs, expand the business scope, enhance competitiveness, and improve the quality of financial services and operating efficiency, on September 30, 2003, the Bank's Board of Directors resolved to acquire Grand Commercial Bank, a wholly owned subsidiary of CTBC Financial Holding Co., Ltd., and to merge with it, with the Bank as the surviving entity. The acquisition date of record was December 1, 2003.

On August 1, 1991, Grand Commercial Bank was approved to conduct commercial banking business, and it began operations on December 30, 1991. As of November 30, 2003, Grand Commercial Bank had a business department, a trust department, a domestic banking unit, an offshore banking unit, and 42 domestic branches.

In order to develop the business units, enhance competitiveness, and provide customers with more convenient and varied financial services, the Bank assumed the outstanding assets, liabilities and operations of Fengshan Credit Cooperative ("FSCC") and Enterprise Bank of Hualien ("EBH") on October 1, 2004, and September 8, 2007, respectively.

In order to enhance the effectiveness of the overall operation of CTBC Financial Holding Company and to reduce operational risk and cost, the Bank merged with Chinatrust Bills Finance Corp., a wholly owned subsidiary of CTBC Financial Holding Co., Ltd., by issuing common shares in a 0.77-for-1 exchange for the shares of Chinatrust Bills Finance Corp. on April 26, 2008. The Bank is the surviving entity from this merger.

In order to restructure overall resources and fulfill operating efficiency, the Bank merged with CTBC Insurance Brokers Co., Ltd., a wholly owned subsidiary of CTBC Financial Holding Co., Ltd. by issuing common shares in a 10.47-for-1 exchange for the shares of CTBC Insurance Brokers Co., Ltd. on November 30, 2015. The Bank is the surviving entity from this merger.

The Bank has been approved to conduct business in the following areas:

- (a) Checking accounts, savings accounts, and time deposits;
- (b) Short, medium, and long-term loans;
- (c) Note discounting;
- (d) Investment in marketable securities;
- (e) Domestic foreign exchange business;
- (f) Banker's acceptances;

- (g) Issuance of domestic standby letters of credit;
- (h) Domestic endorsement guarantees business;
- (i) Collection and payment agency;
- (j) Agency for government bonds, treasury bills, corporate bonds, and securities transactions;
- (k) Agency transactions and proprietary trading of short-term bills;
- (l) Credit card-related products;
- (m) Agency for sale of gold nuggets, gold coins, and silver coins;
- (n) Financial derivative businesses as approved by the Financial Supervisory Commission;
- (o) Custody and warehouse services;
- (p) Renting of safe-deposit boxes;
- (q) Financial advisory services on corporate banking;
- (r) Foreign exchange business in connection with exports and imports, fund remittance and repatriation, foreign currency deposits and loans; guarantee for secured repayment, and attestation on exports and imports;
- (s) Non-discretionary trust funds for investment in foreign and domestic marketable securities;
- (t) Account receivable factoring business as approved by the Financial Supervisory Commission;
- (u) Endorsement and issuance of corporate bonds;
- (v) Issuance of financial debentures;
- (w) Underwriting, agency transactions, and proprietary trading of marketable securities;
- (x) Proprietary trading of government bonds;
- (y) All businesses related thereto as specified in the license or other agency services as approved by the Financial Supervisory Commission;
- (z) Trust and fiduciary services;
- (aa) Margins on foreign currency transactions;
- (ab) Issuance of cash value cards;
- (ac) Public welfare lottery sales;

- (ad) Futures proprietary trading business; and
- (ae) Other businesses as approved by the Financial Supervisory Commission.

The Bank's headquarters coordinate corporate-wide operations and establishes domestic and overseas banking units to expand business. As of December 31, 2021, the Bank had 152 domestic branches, 14 foreign branches and 7 overseas representative offices, whereas its subsidiaries had 198 overseas offices.

The Bank's parent company and ultimate parent company is CTBC Financial Holding Co., Ltd.

(2) Approval date and procedures of the consolidated financial statements:

The consolidated financial statements were approved by the Board of Directors on March 15, 2022.

(3) New standards, amendments and interpretations adopted:

(a) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The details of impact on the Bank and subsidiaries' adoption of the new amendments beginning January 1, 2021 are as follows:

(i) Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform—Phase 2" (the Phase 2 amendments)

The Bank and subsidiaries applied the Phase 2 amendments retrospectively. However, in accordance with the exceptions permitted in the Phase 2 amendments, the Bank and subsidiaries have elected not to restate the prior period to reflect the application of these amendments, including not providing additional disclosures for 2020. There is no impact on beginning equity balances as a result of retrospective application.

The Phase 2 amendments provide practical relief from certain requirements in the standards. These reliefs relate to modifications of financial instruments when a benchmark interest rate in a contract is replaced with a new alternative benchmark rate.

When the basis for determining the contractual cash flows of a financial instrument is changed as a direct consequence of interest rate benchmark reform and is made on an economically equivalent basis, the Phase 2 amendments provide a practical expedient to update the effective interest rate of a financial asset or financial liability before applying the existing requirements in the standards.

Please refer to Note 6(aq) for information with regard to financial risk.

(ii) Amendments to IFRS 16 "Covid-19-Related Rent Concessions beyond June 30, 2021"

A one-year extension to the practical expedient is available to lessees when accounting for COVID-19-related rent concessions reduce the lease payments originally due on or before June 30, 2022. The Bank and subsidiaries have elected to apply the amendments on January 1, 2021, with early adoption. In response to the rent concessions which occurred as a direct consequence of the Covid-19 pandemic, the Bank and subsidiaries elect to use the practical expedient without assessing the lease modifications. In accordance with the practical expedient, the effect of the change in the lease liability is reflected in profit or loss in the period in which the event or condition that triggers the rent concession occurs.

- (iii) Other amendments
 - Amendments to IFRS 4 "Extension of the Temporary Exemption from Applying IFRS 9"

The Bank and subsidiaries assess that the adoption of the above-mentioned standard would not have any material impact on its consolidated financial statements.

(b) The impact of IFRS issued by the FSC but not yet effective

The Bank and subsidiaries assess that the adoption of the following new amendments, effective for annual period beginning on January 1, 2022, would not have a significant impact on its consolidated financial statements:

- Amendments to IAS 16 "Property, Plant and Equipment Proceeds before Intended Use"
- Amendments to IAS 37 "Onerous Contracts Cost of Fulfilling a Contract"
- Annual Improvements to IFRS Standards 2018–2020
- Amendments to IFRS 3 "Reference to the Conceptual Framework"

(c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The following new and amended standards, which may be relevant to the Bank and subsidiaries, have been issued by the International Accounting Standards Board (IASB), but have yet to be endorsed by the FSC:

Standards or Interpretations	Content of amendment	Effective date per IASB
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"	A full gain or loss is recognized in accounting when sale or contribution of assets between an investor and its associate or joint venture occurred, if it's considered as the loss of control of a subsidiary that constitutes a business. A deferred unrealized gain or loss computed by shareholding ratio is recognized when the transaction that involves assets does not constitute a business.	
Amendments to IAS 1	The key amendments to IAS 1 include:	January 1, 2023
"Disclosure of Accounting Policies"	 requiring companies to disclose their material accounting policies rather than their significant accounting policies; clarifying that accounting policies related to immaterial transactions, other events or conditions are themselves immaterial and as such need not be disclosed; and clarifying that not all accounting policies that relate to material transactions, other events or conditions are themselves material to a company's financial statements. 	
Amendments to IAS 8 "Definition of Accounting Estimates"	The amendments introduce a new definition for accounting estimates: clarifying that they are monetary amounts in the financial statements that are subject to measurement uncertainty. The amendments also clarify the relationship between accounting policies and accounting estimates by specifying that a company develops an accounting estimate to achieve the objective set out by an accounting policy.	
Amendments to IAS 12 "Deferred Tax related to Assets and Liabilities arising from a Single Transaction"	The amendments narrowed the scope of the recognition exemption so that it no longer applies to transactions that, on initial recognition, give rise to equal taxable and deductible temporary differences.	January 1, 2023

The impact of applying new standards on the financial position and financial performance of the Bank and subsidiaries is under evaluation. Once the evaluation is completed, the Bank and subsidiaries will disclose the effect on the consolidated financial reports.

The Bank and subsidiaries do not expect the following other new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its consolidated financial statements:

- IFRS 17 "Insurance Contracts" and amendments to IFRS 17 "Insurance Contracts"
- Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"

(4) Summary of significant accounting policies:

(a) Assertion of compliance

The consolidated financial reports were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, the Regulations Governing the Preparation of Financial Reports by Securities Firms, the Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants, IFRSs, IAS, interpretations and pronouncements as accepted by the FSC ("IFRSs as accepted by the FSC").

(b) Basis of compilation

The consolidated financial reports have been prepared on a historical cost basis except for the following material items in the balance sheet:

- (i) Financial instruments measured at fair value through profit or loss (including derivative financial instruments);
- (ii) Financial instruments measured at fair value through other comprehensive income;
- (iii) Hedging derivative financial instruments measured at fair value;
- (iv) Cash-settled share-based payment agreements liability measured at fair value; and
- (v) Defined benefit assets, which are recognized as the net amount of pension plan assets plus unrecognized prior service cost and unrecognized actuarial losses, minus unrecognized actuarial gains and present value of defined benefits obligation.
- (c) Basis of consolidation
 - (i) Basis of compilation for consolidated financial reports

The consolidated financial reports encompass the Bank itself and controlled entities. All significant of the Bank and subsidiaries intra-group transactions are written-off.

- (ii) The control of a special purpose entity ("SPE") by the Bank and subsidiaries may be indicated if the following criteria are met simultaneously.
 - 1) The entity has powers to obtain the majority of the benefits of the SPE's activities through voting rights or other rights;
- 2) By having a right to the majority of the SPE's benefits, the entity is exposed to the SPE's business risks;
- 3) The entity is capable of using its leverage over the SPE to influence the benefits of the SPE.
- (iii) Subsidiaries and special purpose entities included in the consolidated financial reports:

Name of			Percentage of		
Investor Company	Name of Subsidiary	Primary Business	December 31, 2021	December 31, 2020	Description

- Note 1: The Bank increased its capital contribution to CTBC Bank (Philippines) Corp. in March 2020, increasing its percentage of ownership to 99.72%.
- Note 2: The company had been liquidated on March 16, 2021.
- Note 3: On October 25, 2021, the Bank acquired control of LH Financial Group Public Company Limited whose financial report has since been included in the consolidated financial reports.

- (d) Foreign currency
 - (i) A foreign currency transaction, which is denominated or requires settlement in a foreign currency, shall be recorded on initial recognition in the functional currency by applying the foreign currency spot exchange rate between the functional currency and the foreign currency at the date of the transaction.
 - (ii) At each balance sheet date, foreign currency monetary items shall be translated using the closing rate. Non-monetary items that are measured in terms of historical cost in a foreign currency shall be translated using the exchange rate at the date of the translated using monetary items that are measured at fair value in a foreign currency shall be translated using the exchange rate at the date of the translated using the exchange rate at the date of the translated using the exchange rates at the date when the fair value was determined.
 - (iii) Foreign currency differences arising on the settlement of a foreign currency transaction are recognized in current profit or loss. Foreign currency differences arising on the retranslation of monetary items, except for differences arising on the retranslation of monetary items designated as hedging instruments in a hedge of the net investments in foreign operations or in a qualifying cash flow hedge are recognized directly in other comprehensive income, are recognized in profit or loss when it incurred.
 - (iv) When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange difference of that gain or loss shall be recognized in other comprehensive income. Otherwise, when a gain or loss on a non-monetary item is recognized in profit or loss, any exchange difference of that gain or loss shall be recognized in profit or loss.
 - (v) Functional currency and presentation currency

The functional currency of the Bank and subsidiaries is the currency of the primary economic environment in which they operate. The consolidated financial reports are presented in New Taiwan Dollars, the functional currency of the Bank.

(e) Cash and cash equivalents

The statements of cash flows are compiled based upon cash and cash equivalents. Cash comprises cash on hand, savings accounts, checking accounts, and unrestricted time deposits or negotiable certificates of deposit which may be terminated anytime without impairing the principal. Cash equivalents consist of short-term and highly liquid investments that are readily convertible to known amounts of cash and will mature within a short period so that interest rate fluctuations have little effect on their values. Cash equivalents include short-term bills with maturities within three months from the investment date.

Cash and cash equivalents comprise time deposits that are used by the Bank and subsidiaries in the management of its short-term cash commitments and are not for investment or other purposes. Additionally, the aforementioned deposits are readily convertible to fixed amount of cash and are subject to an insignificant risk of changes in their fair value.

(f) Financial instruments

Financial assets held by the Bank and subsidiaries are recorded on the trading date, the fair value is recorded at the time of initial recognition. Except for financial instruments classified as fair value through profit or loss (FVTPL), other financial instruments are initially recognized at acquiring or issuing cost plus transaction costs. However, if the handling fee arising from the sale and purchase does not reach the principle of materiality, it will be charged to current expenses. Upon disposition, the cost of sale of equity securities is determined by the moving-average method, and the cost of sale of debt securities is determined by the first-out (FIFO) method.

(i) Financial assets

Financial assets are classified into the following categories: fair value through profit or loss (FVTPL), fair value through other comprehensive income (FVOCI) and measured at amortized cost.

1) Financial assets measured at fair value through profit or loss

Financial assets measured at fair value through profit or loss, if one of the following conditions is met:

- a) Financial assets held for trading
 - i) Its main purpose is to sell or repurchase in the near future.
 - ii) When it was originally recognized, it was part of the identifiable financial commodity investment of a group of merged management with evidence showing the mode of operation in which this combination is actually a short-term profit in the near term.
- b) Financial assets that are not measured at amortized cost or fair value through other comprehensive income.

- c) In addition to being designated as a hedged item by hedge accounting, financial assets designated as at fair value through profit or loss at initial recognition.
- d) Derivative financial instrument

At each balance sheet date, the fair value is remeasured, and the resulting gain or loss from such remeasurement is recognized in current profit or loss.

- 2) Financial assets measured at fair value through other comprehensive income
 - a) Financial assets measured at fair value through other comprehensive income, if both of the following conditions are met and financial assets were not designated as financial assets measured at fair value through profit or loss:
 - i) The financial assets are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
 - ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
 - 1. Principal is the fair value of the financial asset at initial recognition. Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.
 - 2. However, in some cases, the time value of money element may be modified (i.e., imperfect). In such cases, the Bank and subsidiaries must assess the modification to determine whether the contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.

The fair value of debt instruments measured at fair value through other comprehensive income shall be remeasured at each balance sheet date. The resulting gain or loss from such remeasurement is recognized directly in other comprehensive income. Interest on a debt instrument shall be recorded under the accrual basis, with the relevant premium/discount amortized by using the effective-interest-rate method. Credit losses on the financial instrument shall be recognized as well. If, in a subsequent period, the impairment loss decreases, and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss. The balance of impaired adjustment amount in other comprehensive income after the reversal shall not be negative. A gain or loss on financial assets is recognized directly in other comprehensive income, except for foreign exchange gains or losses arising from monetary financial assets, until the financial assets are derecognized, at which time the cumulative gain or loss previously recognized in other comprehensive income is charged to profit or loss.

- b) At initial recognition, an irrevocable election is made to present changes in the fair value of an equity instrument that is not held for trading in other comprehensive income. When the equity instrument is derecognized, the amounts presented in other comprehensive income shall not be subsequently transferred to profit or loss. However, the cumulative gain or loss may be transferred within equity or into retained earnings directly. Dividends are recognized in profit or loss unless the dividend represents the recovery of part of the investment costs clearly.
- 3) Financial assets at amortized cost

Financial assets measured at amortized cost include cash and cash equivalents, debt instruments measured at amortized cost, securities under repurchase/resell agreements, loans and receivables, deposits pledged and other financial assets that are not measured at fair value, etc.

Financial assets measured at amortized cost are initially recognized at whose fair value plus transaction costs. After initial recognition, the amortized cost minus impairment loss are determined by using the effective-interest-rate method. The interest income and impairment loss are recognized in profit or loss. Until the financial assets are derecognized, at which time the cumulative gain or loss is charged to profit or loss.

a) Debt instruments at amortized cost

The debt instrument investments held by the Bank and subsidiaries shall be measured at amortized cost if both of the following conditions are met:

- i) The financial assets are held within a business model whose objective is achieved by collecting contractual cash flows; and
- ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Bank and subsidiaries, whose business model is to hold assets in order to collect contractual cash flows, may sell financial assets when there is an increase in the assets' credit risk. Sales made for other reasons may be consistent with a business model whose objective is to hold financial assets in order to collect contractual cash flows if those sales are infrequent (even if significant in value) or insignificant in value both individually and in aggregate (even if frequent). For debt instruments measured at amortized cost, the effective-interest-rate method shall be used to calculate amortized cost and interest revenue. Credit-impaired loss shall be recognized for assets measured at amortized cost. If, in a subsequent period, the impairment loss decreases, and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss. The carrying amount after the reversal shall not exceed the recoverable amount.

b) Securities under repurchase/resell agreements

Securities sold/purchased with a commitment to repurchase/resell at predetermined price are treated as financing transactions. The difference between the cost and the repurchase/resell price is treated as interest expenses/revenue and recognized over the term of the agreement. On the selling/purchasing date, these agreements are recognized as securities sold under repurchase agreements or securities purchased under resell agreements.

c) Loans and receivables

At initial recognition, loans and receivables include incremental direct transaction costs, and the subsequent measurement recognizes interest revenues through the effective interest method on accrual basis, under which the loans and receivables are carried at amortized cost less impairment losses. Loans are reclassified as a non-accrual account if either of the following conditions is met, and interest collected while accruing of interest has been suspended is included in earnings only to the extent of cash actually received.

- Collection of payment of principal or interest accrued is considered highly unlikely; or
- Payment of principal or interest accrued is over 3 or 6 months past due; or
- Payment of principal, interest accrued and other suspense account of credit card is over 90 days past due.

Loans and receivables are assessed on each reporting day and the credit risk of loans and receivables have been significantly increased since the initial recognition. Comparing the risk of breach of contract on the reporting date and the original date of recognition, and considering the credit risk from the original recognition, the significant increase of reasonable and verifiable information as a basis for the estimation of default risk and expected loss rate. In accordance with the expected credit losses and with reference to the "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Nonperforming/Non-accrual Loans" and relevant regulations issued by the FSC. The provision will be determined based on the higher of the amount calculated in accordance with regulatory requirements.

Nonaccrual accounts deemed uncollectible are written off upon approval of the Board of Directors. The recovery of written-off loans and accounts receivable is accounted for under the reversal of the allowance for credit losses.

Off-balance-sheet loan commitments and financial guarantee contracts should be evaluated for the possibility of bad debts and the provisions of guarantee or financial commitments should be recognized.

4) Financial asset impairment

The Bank and subsidiaries should consider the past events, the current situation and the forecast of future economic conditions, to identify whether the credit risk of financial instruments has significantly increased since the initial recognition; After the credit risk has increased significantly, these financial instruments should be recognized lifetime expected credit loss; If there is no significant increase in credit risk after recognition, the impairment loss should be measured against the 12-month expected credit loss. For the judgment and forward-looking adjustment method after the recognition of whether the credit risk has increased significantly, please refer to Note 6(aq).

5) Derecognition of financial assets

The Bank and subsidiaries shall derecognize a financial asset when the contractual rights to the cash flows from the financial asset expire or when the Bank and subsidiaries transfer substantially all the risks and rewards of ownership of the financial assets.

Securities lending agreement or repurchase transactions, where bonds or stocks are taken as collateral, shall not be derecognized, because the Bank and subsidiaries have retained substantially all the risks and rewards of ownership. The transaction of asset-backed securitization applies to such situation when the Bank and subsidiaries still retain partial risks.

6) Reclassification of financial assets

The Bank and subsidiaries reclassify all affected financial assets in accordance with regulations only when changing the business model of managing financial assets.

(ii) Financial liabilities

Financial liabilities held by the Bank and subsidiaries include financial liabilities measured at fair value through profit or loss (including the instruments designated as at fair value through profit or loss), financial liabilities measured at amortized cost and hedge derivatives.

1) Financial liabilities measured at fair value through profit or loss

Financial liabilities measured at fair value through profit or loss, if one of the following conditions is met:

a) A financial liability is held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term; on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. A derivative, except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument, is classified as a instrument held for trading as well. Financial liabilities held for trading include obligations to deliver financial assets borrowed by a short seller.

b) A financial liability designated as measured at fair value through profit or loss on initial recognition, except that designated as a hedged item in accordance with the hedge accounting.

Financial liabilities falling under this category are measured at fair value in the balance sheet at the balance sheet date. Moreover, the changes in fair value are recognized as current profit or loss. While for financial liabilities designated at fair value through profit or loss, its fair value changed in the liability's credit risk should be recognized under other comprehensive income, except for avoiding accounting mismatch or in the circumstances of loan commitments and financial guarantee contract to provide a loan that should be accounted as current profit or loss.

Under certain circumstances, the Bank and subsidiaries may not recognize profit or loss of a financial asset or a financial liability at initial recognition, if a fair value is not derived from a quoted market price in an active market and is based on the evaluation method with data retrieved from unobservable market. In the above scenario, the recognition of the difference between fair value at initial recognition and transaction price is deferred. After initial recognition, the entity shall recognize the aforesaid deferred difference as a gain or a loss only to the extent that it arises from a change in a factor that market participants would take into account when pricing the asset or liability.

2) Financial liabilities measured at amortized cost

Financial liabilities are classified at financial liabilities measured at amortized cost, except for financial liabilities measured at fair value through profit or loss, hedged derivatives financial liabilities, financial bonds payable, financial guarantee contracts, commitments to provide a loan at a below-market interest rate and financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies.

3) Derecognition of a financial liability

The Bank and subsidiaries shall remove a financial liability from its statement of financial position when, and only when, it is extinguished.

4) Offsetting financial assets and financial liabilities

Financial assets and financial liabilities will be offset and recognized in the net amount on the balance sheet only when the Bank and subsidiaries have statutory rights to offset and intend to net settle or realize assets and to pay off liabilities at the same time.

- 5) The Bank and subsidiaries shall not reclassify any financial liability.
- (iii) Derivatives and hedging accounting

Derivative instruments are initially recognized at fair value on contract date and subsequently measured at fair value. Fair value includes quoted price in an active market, occurring market transaction prices or model valuation technique. All derivatives instruments are recognized as assets with positive fair value and as liabilities with negative fair value.

The Bank and subsidiaries should account for financial liabilities embedded in derivatives if the economic characteristics and risks of the embedded derivatives are closely related to the economic characteristics of the host contract. If not, the host contract is not a financial liability that is measured at fair value through profit or loss. Unless choosing to designate an overall hybrid contract to measure financial liabilities at fair value through profit or loss, the Bank and subsidiaries should recognize the host contract and embedded derivatives separately. In addition, the embedded derivative is recognized as a financial liability as measured at fair value through profit or loss.

When a fair value hedge, cash flow hedge, and hedge of a net investment in a foreign operation are in conformity with all the conditions for applying hedge accounting, the affected profit or loss is recognized by offsetting the changes in the fair value of hedging instruments and hedged items. The related accounting treatments are as follows:

- 1) Fair value hedge: Changes in the fair value of derivatives that are designated and qualified as fair value hedging instruments against the exposure to changes in fair value of a recognized asset or liability or an unrecognized firm commitment are recognized through profit or loss in the current period.
- 2) Cash flow hedge: Where a derivative financial instrument is designated as a hedge of the variability in cash flow of a recognized asset or liability or a highly probable forecast transaction, the effective portion of any gain or loss on remeasurement of the derivative financial instrument to fair value is recognized directly under other comprehensive income. When the hedged transaction actually affects the profit or loss, the gain or loss previously recognized under other comprehensive income shall be recognized through current profit or loss. Any gain or loss from the change in fair value relating to an ineffective portion of the hedge transaction is recognized immediately through profit or loss in the current period.
- 3) Hedge of a net investment in a foreign operation: The effective portion of any gain or loss on a hedging instrument relating to a hedge against foreign currency fluctuation in a foreign operation is recognized directly in other comprehensive income until the disposal of the foreign operation, at the time which the cumulative gain or loss recognized directly under other comprehensive income is recognized in profit or loss in the current period.
- (iv) Financial guarantee contracts

The Bank and subsidiaries recognize financial guarantee liabilities initially at their fair value at the date of providing guarantee. The Bank and subsidiaries receive commission income with non-arm's-length transaction at contract date; this is, the income could represent the fair value of financial guarantee contract. The advanced service fee is recognized as a deferred item and amortized by straight-line method over the life of the financial guarantee.

Financial guarantee contracts shall be subsequently measured by the Bank and subsidiaries at the higher of:

- 1) The amount determined in accordance with "Provisions"; and
- 2) The amount initially recognized less, when appropriate, cumulative amortization recognized from deferred revenues.

(g) Investment properties

Investment properties could be recognized by the Bank and subsidiaries only to earn rentals or for capital appreciation or both.

Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held for use by the Bank and subsidiaries. If these portions could be sold separately, the Bank and subsidiaries account for the portions separately. The portion that is held for use is treated following "Premises and equipment", and another portion that is held to earn rentals or for capital appreciation or both is regarded as investment property. If the portions could not be sold separately, and if an insignificant portion is held for use, then the whole property is regarded as investment property.

Investment property shall be recognized as an asset when, and only when it is probable that the future economic benefits that are associated with the investment property will flow to the Bank and subsidiaries, and the cost of the investment property can be measured reliably. Subsequent expenditure is capitalized as cost only when it is probable that the future economic benefits that are associated with the investment property will flow to the Bank and subsidiaries, and the cost of the investment property will flow to the Bank and subsidiaries, and the cost of the investment property will flow to the Bank and subsidiaries, and the cost of the investment property can be measured reliably. Regular repair costs are recognized as expenses in the period they are incurred.

If the recognition criteria are met, the Bank and subsidiaries recognize the cost of replacement in the carrying amount of the replaced investment property at the time the cost is incurred. The carrying amount of the part that is replaced is derecognized.

After initial recognition, real estate property is subsequently measured by cost model, and amortized by the depreciable amount. Its depreciation method, useful life and residual value can be referred to the regulation of premises and equipment.

When the use of a property changes such that it is reclassified as premises and equipment, the book value at the date of reclassification becomes its cost for subsequent accounting.

(h) Non-financial asset impairment

At each balance sheet date, the recoverable amount of an asset is estimated and compared with the carrying amount whenever there is an indication that the non-financial asset may be impaired. An impairment loss is recognized when the recoverable amount, higher of fair market value or value in use, is less than the carrying amount. For assets other than goodwill, a reversal of impairment loss is recognized when the recoverable amount of the asset has increased from its prior-period estimation. The carrying amount after the reversal shall not exceed the recoverable amount or the depreciated or amortized balance of the assets assuming no impairment loss was recognized in prior periods.

(i) Assets held for sale

For an asset or a disposal group to be classified as held for sale, it needs to be disposed through sale rather than through continuing use to recover its carrying amount. Assets or disposal groups that meet the criteria to be classified as such must be subject only to terms that are usual and customary and be available for immediate sale, which is highly probable, within one year of such classification. After being classified as held for sale, it is measured at the lower of carrying amount and fair value less costs to sell.

Amortization or depreciation on intangible assets, premises and equipment ceases once they are classified as held for sale.

(j) Investments in associates

Investments in associates in which the Bank or its subsidiaries are able to exercise significant influence and subsidiaries the Bank has control over are accounted for under the equity method and initially recognized at cost. Goodwill, deducting accumulated impairment loss, related to an associate is included in the carrying amount of the investment. The equity method discontinues to be used from the date when it ceases to have significant influence, and the book value is taken as the new cost of the investment.

The Bank or its subsidiaries have significant influence if holding, directly or indirectly 20% or more of the voting right of the investee. However, an exception will apply if the Bank or its subsidiaries can specify that it has no significant influence over an investee.

After the date of acquisition the Bank or its subsidiaries' share of the profit or loss of the associates is recognized in profit or loss. Distributions received from an associate reduce the carrying amount of the investment. Adjustments to the carrying amount of the investment may also be necessary for changes in the Bank or its subsidiaries' proportionate interest in the associates arising from changes in the associates' other comprehensive income. If the Bank or its subsidiaries' share of losses of an associate equals or exceeds their interest in the associate (including non-guarantee long-term receivables), the Bank or its subsidiaries discontinues recognizing its share of further losses. Additional losses are provided for, and a liability is recognized, only to the extent that the Bank or its subsidiaries has incurred legal or constructive obligations or made payments on behalf of the associate.

Changes in ownership interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions. In such circumstances the carrying amounts of the parent's ownership interest and non-controlling interests shall be adjusted to reflect the changes in their relative interests in the subsidiary. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received shall be recognized directly in equity.

(k) Interest in joint ventures

The joint agreements include joint operations and joint ventures, and have the following characteristics:

- (i) The parties are bound by a contractual arrangement;
- (ii) The contractual arrangement gives two or more of those parties joint control of the arrangement.

The Bank or its subsidiaries distinguish between joint operations and joint ventures by considering the structure and legal form of the arrangement, the contractual terms agreed to by the parties to the arrangement and, when relevant, other facts and circumstances. In joint operations, the Bank or its subsidiaries account for its share of the joint assets, liabilities, revenues and expenses in accordance with the contractual arrangement. In joint ventures, the Bank or its subsidiaries account for its investment using the equity method.

(1) Cash surrender value of life insurance

The Bank's U.S. subsidiary purchased single-premium life insurance under which the executive officers and directors are the insured, while the subsidiary is the owner and beneficiary thereof. The cash surrender value indicates the amount that would be received if the life insurance is terminated prior to the maturity date, and is accounted for under "other assets."

(m) Premises and equipment

The Bank and subsidiaries' premises and equipment are recognized after deducting any accumulated depreciation and accumulated impairment losses from historical cost. The historical cost includes any costs directly attributable to acquiring the assets.

Subsequent expenditure of premises and equipment shall be recognized as an asset or be included in the carrying amount of assets, when, and only when it is probable that the future economic benefits that are associated with premises and equipment will flow to the Bank or its subsidiaries, and the cost of premises and equipment can be measured reliably. The carrying amount of those parts that are replaced is derecognized. A major improvement or repair expense that can extend the benefits over afterward period is regarded as capital expenditure; while frequent maintenance or repairs are charged to current expenses.

If the Bank and subsidiaries have obligations to dismantle, remove and restore the premises and equipment, the obligation for which the Bank and subsidiaries incur either when the item is acquired or as a consequence of having used the item during a particular period shall be recognized as the cost of the premises and equipment as well as a liability.

Depreciation is computed using the straight-line method; the useful lives are calculated based on the normal economic lives. Each part of an item of premises and equipment with a cost that is significant in relation to the total cost of the item shall be depreciated separately. The residual value and the useful life of an asset shall be reviewed or adequately adjusted at each financial year-end. Useful lives of major premises and equipment are as follows:

Buildings and premises	$2\sim$ 56 years
Transportation equipment	$4 \sim 6$ years
Miscellaneous equipment	$2\sim 20$ years

The gain or loss arising from the disposition of an item of premises and equipment shall be recognized in current profit or loss and determined as the difference between the disposal proceeds and the carrying amount of the item.

A property is reclassified to investment property at its carrying amount when the use of the property changes from owner-occupied to investment property.

(n) Intangible assets

(i) Computer software

Computer software system expenses, which are recorded on the basis of the actual cost of acquisition, are amortized using a straight-line method over a period of 3 to 15 years. Its amortization method, useful life and residual value are referred to the regulation of properties and equipment. The Bank and subsidiaries use cost model to proceed subsequently measurement.

(ii) Goodwill

The Bank and subsidiaries account a business combination by applying the acquisition method. The consideration transferred in a business combination shall be measured at fair value, which shall be calculated as the sum of the acquisition-date fair values of the assets transferred by the acquirer, the liabilities assumed by the acquirer and the equity interests issued by the acquirer. In addition, other expense directly contributed to the acquisition is included. The acquirer shall measure the identifiable assets acquired from business combination and the liabilities or contingent liabilities assumed at their acquisition-date fair values without considering non-controlling interest. The acquirer shall recognize goodwill as of the acquisition date measured as the excess of the consideration transferred over the fair value of net identifiable assets held according to holding proportion. Adversely, the difference may result in directly recognizing a gain on a purchase.

Goodwill relating to cash-generating units is tested for impairment periodically each year. An impairment loss is recognized when the recoverable amount is less than the carrying amount. Impairment losses cannot be reversed once an impairment loss has been recognized.

(o) Leases

(i) Identifying a lease

At inception of a contract, the Bank and subsidiaries assess whether a contract is, or contains, a lease. A contract is, or contains, a lease, if the contract conveys the right to control the use of an identified asset for a period of time.

(ii) As a lessor

The leases are classified as finance leases, if the Bank and subsidiaries transfer substantially the entire risks and rewards incidental to the ownership of the assets. Otherwise, the leases are classified as operating leases.

- 1) Operating lease: Lease payments or receivables under an operating lease shall be recognized in current profit or loss using a straight-line method over the lease term.
- 2) Finance lease: As lessors, the Bank and subsidiaries shall derecognize assets held under a finance lease at contract date and recognize them as lease payment receivable at an amount equal to the present value of lease payments. The difference between gross amount and present value of lease payment receivables is recognized as unrealized interest income and transferred to interest income of current period on an accrual basis. Lease revenue is calculated based on the interest rate implicit in the lease on the remaining balance of lease payment receivables and recognized in current profit or loss over the lease term.

(iii) As a lessee

The Bank and subsidiaries recognize a right-of-use asset and a lease liability at the lease commencement date. The initial amount of the right-of-use asset comprises the initial amount of the lease liability, adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, and an estimate of costs to restore the underlying asset, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the underlying asset or the end of the lease term. Refer to "Premises and equipment" for the review of useful life and the impairment assessment policy.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease, or the Bank and subsidiaries' incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise the following:

- 1) Fixed payments, including payments that may, in form, contain variability but that, in substance, are unavoidable.
- 2) Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- 3) Amounts expected to be payable under a residual value guarantee; and
- 4) Amounts expected for the exercise price under a purchase option, lease payments under an extension option, and penalties for early termination, if the Bank and subsidiaries are reasonably certain to exercise or early terminate.

The lease liability is measured by the effective interest method to recognize the interest expense, and remeasured to reflect the changes as follows:

- 1) The lease term changes;
- 2) The future lease payments change to reflect a change in an index or rate; or
- 3) If there is a change in the Bank and subsidiaries' estimate of the amount expected to be payable under a residual value guarantee, or if the Bank and subsidiaries change its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured to reflect above changes, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Bank and subsidiaries do not recognize right-of-use assets and lease liabilities for shortterm leases that have a lease term of 12 months or less and leases of low-value assets. The Bank and subsidiaries recognize the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(p) Foreclosed properties

Foreclosed properties received are stated at acquired cost, and the difference between it and the nominal value of the original claim is reflected as a credit loss. On the balance sheet date, if the foreclosed properties received are still unsold, they shall be evaluated at the lower of carrying amount and net fair market value. If there is sufficient evidence indicating that the net fair market value is lower than the carrying amount of foreclosed properties, the difference after reassessment is accounted for under impairment loss on assets. Gain or loss on disposal of foreclosed properties is recognized in current profit or loss as well.

(q) Provisions

The Bank and subsidiaries recognize provisions only if all of the following conditions are met:

- (i) An entity has a present, legal or constructive obligation, as a result of a past event;
- (ii) It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- (iii) A reliable estimate can be made of the amount of the obligation.

The Bank and subsidiaries shall not recognize provisions for future operating losses.

Where there are a number of similar obligations the probability that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Although the likelihood of outflow for any one item may be small, it may well be probable that some outflow of resources will be needed to settle the class of obligations as a whole. If that is the case, a provision is recognized.

The amount of a provision is measured subsequently as the present value of the expenditures expected to be required to settle the obligation. The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The deficiency is recognized as profit or loss of the current period.

(r) Revenue recognition

The Bank and subsidiaries' incomes are recognized on an accrual basis. Please refer to Note 4(f)(i)3) for more information on interest income from receivables and loans.

- (s) Employee benefit
 - (i) Short-term employee benefit: The Bank or its subsidiaries expect to settle all short-term nondiscounted benefits in 12 months after the end of annual financial reporting date in which the services are rendered by employees, and recognize as current expenses.

- (ii) Post-employment benefit: The Bank and subsidiaries' pension plan comprises defined contribution plan and defined benefit plan.
 - 1) A defined contribution plan is a post-employment benefit plan under which the Bank pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in profit or loss in the periods during which services are rendered by employees. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan that is due more than 12 months after the end of the period in which the employees render the service are discounted to their present value.
 - 2) A defined benefit plan is a post-employment benefit plan under which benefit is paid to an employee on the basis of their ages, service periods and compensated salaries at the date of retirement. The Bank recognizes remeasurements of the defined benefit plan which are incurred by the change of actual experience and actuarial assumption in other comprehensive income, and recognize pension asset or liability in balance sheet in which asset or liability is the amount of actuarial present value of defined benefits obligation deducting fair value of plan assets. The calculation of defined benefits obligation is performed annually by an actuary using the projected unit credit method. The actuarial present value of defined benefits obligation is calculated by discounting future cash flow at the yield rate on AA credit rated bonds that have maturity dates approximating the terms of the obligation and that are denominated in the same currency in which the benefits are expected to be paid. In accordance with the article 30 of the Regulations Governing the Preparation of Financial Reports by Public Bank's, when the interest incurred from retiree deposits with favorable rates exceed the interest generated from market rate, it should be considered the actuarial amount according to defined benefit plan regulated on IAS 19 "Employee Benefits" since the employee's retirement date. Otherwise, the parameter of actuarial assumption of competent authority should be followed (if have). The interim amount of defined benefit plan is determined based on the pension cost rate, which is the actuarial rate at the end of last fiscal year, and the amount, which is from the beginning of the year to the end of current period. In addition, an adjustment would be made if significant market fluctuation, significant decrease, payoff or other significant one-time event occurs after the end of period.
 - 3) The defined contribution plan of overseas unit is in accordance with respective authorities' regulation.
- (iii) Termination benefits: Termination benefits are incurred when the Bank or its subsidiaries terminate employment prior to qualifying for retirement, or the employees accepted voluntary redundancy to get termination benefits in return. Termination benefits are recognized as a liability when the Bank and subsidiaries are committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to provide termination benefits or make an offer of termination benefits to encourage voluntary redundancy. Termination benefits are payable more than 12 months after the reporting period, then they are discounted to their present value.

(t) Share based payment transactions

The Bank's accounting treatments of share-based payment are as below.

- (i) Equity-settled share-based payments are measured at fair value at the date of grant. The fair value determined at the grant date of the equity-settled share-based payments is expensed over the vesting period, and the corresponding increase in owners' equity is recognized. The vesting period is estimated based on the ultimate vesting conditions that must be satisfied. The vesting conditions include service conditions and performance conditions, including market conditions. In valuing equity-settled payments, no account is taken of any vesting conditions other than market conditions.
- (ii) For cash-settled share-based payment transactions, a liability equal to the portion of the goods or services received is recognized at its current fair value determined at each balance sheet date and at the date of settlement, with any changes in the fair value recognized in profit or loss of the period.
- (iii) Fair value of the share options at the grant date is measured with the use of an option pricing model based on management's best estimate of the exercise price, expected term, underlying share price, expected volatility, expected dividend yield, risk-free interest rate, and any other inputs to the model.
- (u) Compensations of employees and directors

The Bank's employees' and directors' (including independent directors) compensations are recognized as personnel expenses. Any difference lies between the actual allocation amount and the amount previously recognized in the financial report is considered as change in accounting estimates which is then recognized as profit or loss in next year.

(v) Income taxes

Income tax expenses include both current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes shall be recognized in profit or loss. Current taxes include tax payables and tax deduction receivables on taxable gains (losses) for the years calculated using the statutory tax rate on the reporting date or the actual legislative tax rate, as well as tax adjustments related to prior years. Income tax expense is measured by interim reporting period net income before tax multiplied by best estimate effective annual tax rate. And the best estimate effective annual tax rate is determined by the management. Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred tax assets and liabilities shall be measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period. Deferred tax assets and liabilities may be offset against each other if the following criteria are met by the Bank and subsidiaries:

- (i) The entity has the legal right to settle tax assets and liabilities on a net basis; and
- (ii) The deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:

- 1) Levied by the same taxing authority; or
- 2) Levied by different taxing authorities, but where each such authority intends to settle tax assets and liabilities (where such amounts are significant) on a net basis every year of the period of expected asset realization or debt liquidation, or where the timing of asset realization and debt liquidation is matched.

A deferred tax asset should be recognized for the carry-forward of unused tax losses, unused tax credits, and deductible temporary differences to the extent that it is probable that future taxable profit will be available against which the unused tax losses, unused tax credits, and deductible temporary differences can be utilized. Such unused tax losses, unused tax credits, and deductible temporary differences shall also be re-evaluated every year on the financial reporting date, and adjusted based on the probability that future taxable profit will be available against which the unused tax losses, unused tax credits.

As a subsidiary of CTBC Financial Holding Co., Ltd., the Bank files a consolidated corporate income tax return with its parent company and subsidiaries. The difference between the consolidated income tax and the Bank's ordinary income tax is adjusted at the parent-company level, and the Bank recognizes such difference as payables or receivables.

(w) Contingent liabilities

A contingent liability is defined as a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Bank or its subsidiaries; or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability. The Bank and subsidiaries shall not recognize a contingent liability; instead, contingent liability shall be appropriately disclosed.

(x) Operating segments

An operating segment is a component of the Bank and subsidiaries that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Bank and its affiliates). The segment's operating results are reviewed regularly by the Bank's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance for which discrete financial information is available.

The prime responsibility of the Bank's parent company CTBC Financial Holding Co., Ltd. is the management of its subsidiaries, whose operational performance and resource allocation are executed under board approval of the parent company. The Bank and subsidiaries periodically report actual financial results to the Group's Management Board, and thereby leading to its role as the chief operating decision maker.

(5) Significant accounting assumptions and judgments, and major sources of estimation uncertainty:

When preparing the consolidated financial reports in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, the Regulations Governing the Preparation of Financial Reports by Securities Firms, the Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants and International Financial Report Standards (IFRSs) endorsed by the FSC, the management needs to make judgments, estimates, and assumptions that affect the adoption of accounting policies, reported amounts of assets, liabilities, revenues, and expenses. Actual results could differ from these estimates.

The management should continuously evaluate the estimates and assumptions. Changes in accounting estimates are recognized at the occurrence and the impacted future periods.

Please refer to the following for accounting policies and management judgments which have significant impacts on the financial statements of the Bank and subsidiaries.

(a) Impairment of financial assets

The impairment of financial assets of the Bank and subsidiaries is recognized as the 12-month expected credit loss or the lifetime credit loss by identifying whether the credit risk of financial instruments has been significantly increased since the initial recognition. To evaluate the expected credit losses for 12-month and lifetime, the Bank and subsidiaries consider the default probability (Probability of default, "PD") of financial assets or issuers or counterparties, and loss given default rate ("LGD") multiplying the exposure at default ("EAD"), taking into account the time value of money as well evaluate 12-month and lifetime loss. The Bank and subsidiaries consider historical experiences, current market conditions and forward-looking estimates to decide the assumptions and input values to be used in determining the impairment loss. For the details of the relevant assumptions and input values, please refer to Note 6(aq).

(b) Assessment of goodwill impairment

Assessment of goodwill impairment depends on subjective judgment by the Bank and subsidiaries, including identifying cash-generating units, allocating goodwill to related cash generating units, and deciding recoverable amount of related cash generating units. The management of the Bank and subsidiaries shall estimate the expected future cash flow from cash generating units and decide proper discount rate for calculating present value. If the actual cash flow is less than expected, significant impairment losses may incur.

(c) Assessment of the fair value of financial instruments

The Bank and subsidiaries hold certain financial instruments without active markets, including financial instruments lacking active market quotes and financial instruments that turned out to be inactive due to market conditions (e.g., low market liquidity). When a market is inactive, there are usually only a few or no observable market data available to measure the fair value of financial instruments. Determination of the existence of an active market for a financial instrument requires management's judgement. If the market for an investment held by the Bank and subsidiaries are not active, the fair value of the instrument is determined using valuation techniques. The Bank and subsidiaries use quotes from independent third parties or prices derived from internally developed models to determine the fair value of those financial instruments. When the fair value may be publicly obtained from independent sources it shall be adopted first. Overall, the Bank and subsidiaries would decide a source or a technique as a fair value determination method that can reflect the price achieved between market participants through regular trading as of the reporting

date. Valuation techniques include adoption of recent arm's-length transactions, reference to other instruments with a substantially identical basis, application of discounted cash flow analysis, etc., which may also include a number of assumptions related to each variable (such as credit risk and interest rate). Adoption of different valuation techniques or assumptions may lead to significant discrepancies in fair value determination results.

Please refer to note 6(aq) for the estimated fair value of the above financial instruments.

(6) Explanation of significant accounts:

(a) Cash and cash equivalents

	De	ecember 31, 2021	December 31, 2020	
Cash on hand	\$	30,006,286	29,395,037	
Petty cash and revolving fund		19,958	21,941	
Checks for clearance		3,592,450	2,039,159

Due from Central Bank		121,208,319	133,389,143	
Call loans to banks		42,266,999	51,992,611	
Total	\$ <u></u>	359,081,906	357,920,481	

The reserves for deposits are calculated at prescribed rates, using the average monthly balances of various deposit accounts, and are appropriated and deposited in the reserve account of the Central Bank of the Republic of China (Taiwan). Deposits in "Required reserve – Account A" are interest free and can be withdrawn at any time; deposits in "Required reserve – Account B" are interest bearing and cannot be withdrawn except for the monthly adjustment to the required reserve permitted by relevant regulations.

Please refer to Note 8 for information with regard to the restrictions on the due from Central Bank and call loans to banks shown above.

(c) Financial instruments measured at fair value through profit or loss

Financial assets measured at fair value through profit or loss of the Bank and subsidiaries were as follows:

	December 31, 2021		December 31, 2020
Mandatorily measured at fair value through profit or loss			
Commercial paper	\$	121,073,330	119,561,419
Negotiable certificates of deposits		2,000,146	1,000,000
Treasury bills		-	29,214
Government bonds		2,167,431	3,577,571
Corporate bonds		7,515,092	4,988,425
Convertible bonds		692,250	1,567,940
Financial debentures		1,245,564	793,033
Stocks		1,274,305	734,574
Beneficiary certificates		587,349	527,367
Derivative financial assets		33,741,837	61,106,422
Valuation adjustment of financial assets		(76,474)	516,308
Total	\$	170,220,830	194,402,273

Please refer to Note 6(u) for information with regard to repurchase conditions for financial assets measured at fair value through profit or loss shown above.

Financial liabilities measured at fair value through profit or loss of the Bank and subsidiaries were as follows:

	D	ecember 31, 2021	December 31, 2020
Derivative financial liabilities	\$	35,445,878	63,041,830
Financial liabilities designated at fair value through profit or loss		10,541,448	14,475,274
Total	\$	45,987,326	77,517,104

The aforementioned financial liabilities designated at fair value through profit or loss were issued by the Bank, with the related terms and conditions disclosed in Note 6(y). The amounts of fair value and its changes which were attributable to changes in the credit risk were as follows:

	D	ecember 31, 2021	December 31, 2020
Financial debentures at fair value	\$	10,541,448	14,475,274
Cumulative changes in fair value that is attributable to changes in the credit risk		57,064	90,364
The difference between book value and the amount payable upon maturity as specified in the contract		(361,219)	(734,418)

The Bank assesses changes in fair value that was not attributable to changes in market conditions that give rise to swing of market risk to evaluate changes in fair value due to shift of credit risk. For the years ended December 31, 2021 and 2020, there was no transfer of the cumulative gain or loss within equity.

The fair value of the callable financial debentures issued by the Bank was evaluated based on the internal evaluation model, with evaluation variables retrieved from parameters unobservable in the market. In consideration of the discrepancy between evaluated price and transaction price, the Bank has recognized reserve for day one profits. The changes in reserve for day one profits were as follows:

	For	For the years ended		
		2021	2020	
Beginning balance	\$	59,193	910,293	
Current increase		138,071	-	
Current decrease		(42,035)	(840,894)	
Foreign exchange losses		(2,256)	(10,206)	
Ending balance	\$	152,973	59,193	

(d) Financial assets measured at fair value through other comprehensive income

	D	ecember 31, 2021	December 31, 2020
Debt investments measured at fair value through other comprehensive income			
Negotiable certificates of deposits	\$	1,583,265	4,030,282

Premium receivable	4,152,958	4,038,537
Other receivables	11,807,930	6,553,975
Subtotal	165,727,909	143,438,534
Less: Allowance for credit losses	(2,282,169)	(2,178,747)
Total	\$ <u>163,445,740</u>	141,259,787

The accounts receivable shown above included the receivables from credit card holders who were involved in debt repayment negotiation with the Bank.

Please refer to Note 8 for information with regard to the restrictions on other receivables shown above.

Please refer to Note 6(j) for changes in allowance for credit losses of receivables listed above.

Please refer to Note 6(aq) for credit risk and market risk information listed above. Receivables of the Bank and subsidiaries should be included in impairment assessment, excluding that of credit card receivables, which is accounted for under provisions. Total receivables do not encompass investments in security-related and other receivables whose impairment assessments are consistent with corresponding assets.

(i) Loans-net

Miscellaneous equipment	Leased office equipment		211,110	354,512
Total		<u></u>	15,279,456	14,285,447

A few real estate include lease extension options to extend the lease while some of them are not reasonably assured that options will be exercised, so the measurement of lease liabilities did not reflect the terms.

Maturity analysis of lease liabilities (undiscounted) for the Bank and subsidiaries was as follows:

	De	ecember 31, 2021	December 31, 2020
Less than one year	\$	2,734,981	2,455,012
Between one and five years		6,709,604	5,698,953
More than five years		11,093,833	11,673,299
Total	\$	20,538,418	19,827,264

For the years ended December 31, 2021 and 2020, the total cash outflows of leases were \$4,252,679 and \$3,601,096, respectively.

(ad) Employee benefits

(i) Defined contribution plan

The Bank's defined contribution plan follows the Labor Pension Act of the R.O.C. and makes monthly cash contributions to the employees' individual pension accounts at the Bureau of Labor Insurance at the rate of 6% of the employees' monthly salary. Under this plan, the Bank has no legal or constructive obligation to make other payments after the Bank makes the fixed amount of contribution to the Bureau of Labor Insurance.

For the years ended December 31, 2021 and 2020, the pension expense under defined contribution plan of the Bank and subsidiaries amounted to \$753,716 and \$745,173, respectively, and were contributed to the Bureau of Labor Insurance or labor agencies designated by local authorities in the case of overseas units.

(ii) Employee benefits provision

Employee benefits provisions recognized by the Bank in the balance sheet were as follows:

	December 31, 2021		December 31, 2020	
Defined benefits plan	\$	2,720,101	2,558,052	
Retiree deposits with favorable rates and other post-employment benefits		522,653	518,447	
Total	\$	3,242,754	3,076,499	

1) Defined benefits plan

The reconciliations between present value of the Bank's defined benefits obligation and fair value of plan assets were as follows:

	December 31, 2021		December 31, 2020	
Present value of defined benefits obligation	\$	8,138,228	7,993,197	
Fair value of plan assets		(5,418,127)	(5,435,145)	
Net defined benefit liability	\$ <u> </u>	2,720,101	2,558,052	

The Bank's defined benefits plan contributes to designated depository account with Bank of Taiwan. Payments of pension benefits to employees who are covered by the Labor Standards Act are calculated based on the employee's average monthly salary for the last 6 months prior to approved retirement and base point (b.p.) entitlement based on years of service.

a) Composition of plan assets

The Bank's labor pension fund contributed in compliance with Labor Standard Act is managed by Bureau of Labor Funds, Ministry of Labor. According to Regulations for Revenues, Expenditures Safeguard and Utilization of the Labor Retirement Fund with regard to the utilization of the Fund, its minimum earnings in the annual distributions on the final financial statement shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. Please refer to the website of Bureau of Labor Funds, Ministry of Labor for information on labor pension fund assets utilization including earning rate and fund assets allocation.

b) Movements in present value of the defined benefits obligation

The movements in present value of defined benefits obligation for the Bank for the years ended December 31, 2021 and 2020 were as follows:

	For the years ended December 3		
		2021	2020
Defined benefits obligation at January 1	\$	7,993,197	8,307,733
Current service costs and interest		84,378	136,539
Remeasurements of net defined benefit liability			
Actuarial gains and losses arising from changes in demographic assumptions		88,155	-
Actuarial gains and losses arising from changes in financial assumption		(96,018)	96,572
Actuarial gains and losses arising from experience adjustments		569,463	75,183
Benefits paid by the plan		(500,947)	(622,830)
Defined benefits obligation at December 31	<u>\$</u>	8,138,228	7,993,197

c) Movements in fair value of defined benefit plan assets

The movements in fair value of the defined benefit plan assets for the Bank for the years ended December 31, 2021 and 2020 were as follows:

	For the years ended December 31		
		2021	2020
Fair value of plan assets at January 1	\$	5,435,145	5,620,258
Interest income		13,588	42,152
Remeasurements of net defined benefit liability			
Return on plan assets (exclude current interest)		208,802	120,949
Contribution plans made		261,539	274,616
Benefits paid by the plan		(500,947)	(622,830)
Fair value of plan assets at December 31	\$ <u></u>	5,418,127	5,435,145

d) Expense recognized in profit or loss

The expenses recognized in profit or loss for the Bank for the years ended December 31, 2021 and 2020 were as follows:

	For the years ended December 3		
		2021	2020
Current service costs	\$	64,395	74,231
Net interest of net defined benefit liability		6,395	20,156
Total	\$	70,790	94,387

e) Net remeasurement of defined benefit liability recognized in other comprehensive income

The net remeasurement of defined benefit liability recognized in other comprehensive income for the Bank for the years ended December 31, 2021 and 2020 were as follows:

	For the years ended December		
		2021	2020
Cumulative amount at January 1	\$	(863,107)	(812,301)
Recognized during the period		(352,798)	(50,806)
Cumulative amount at December 31	\$	(1,215,905)	(863,107)

f) Primary actuarial assumptions

The following were the primary actuarial assumptions at the reporting date:

	December 31, 2021	December 31, 2020
Discount rate	0.50 %	0.25 %
Increasing rate of future compensation levels	3.00 %	3.00 %

The Bank expected \$109,337 in contributions to be paid to defined benefit plans within a year after report date of 2021.

Weighted average duration base on defined benefits plan was 4.4 years.

g) Sensitivity analysis

When adopted primary actuarial assumption changes, the effects of present value of the benefits obligation as at December 31, 2021 and 2020 were as follows:

	Present value of the benefits obligation effects			
	Incr	rease 0.25%	Decrease 0.25%	
December 31, 2021				
Discount rate	\$	(94,699)	96,832	
Increasing rate of future compensation levels		85,257	(83,833)	

	Present value of the benefits obligation effects		
	Increase 0.25%	Decrease 0.25%	
December 31, 2020			
Discount rate	(48,831)	49,961	

The sensitivity analysis above analyzing the effects of changes in single assumptions is based on other assumptions remain unchanged. In practice, changes in many assumptions may link together. Sensitivity analysis and net pension liability of balance sheet were calculated under the same approach.

The methodology for sensitivity analysis and assumptions adopted are the same as last year.

2) Retiree deposits with favorable rates and other post-employment benefits

The reconciliations between present value of the Bank's defined benefits obligation and fair value of plan assets were as follows:

	Dec	ember 31, 2021	December 31, 2020	
Present value of defined benefits obligation	\$	522,653	518,447	
Fair value of plan assets		-		
Net defined benefit liability	\$	522,653	518,447	

The Bank's obligation to grant retirees, including current employees retiring in the future, fixed-amount deposits with favorable rates is based on the Bank's Regulations for Subsidizing the Retiree Benefits.

a) Movements in value of the defined benefits obligation

The movements in present value of defined benefits obligation for the Bank for the years ended December 31, 2021 and 2020 were as follows:

	For the years ended December 3		
		2021	2020
Defined benefits obligation at January 1	\$	518,447	468,746
Current service costs and interest		20,748	20,130
Past service costs		26,720	29,295
Remeasurements of net defined benefit liability			
Actuarial gains and losses arising from changes in demographic assumptions		3,810	-
Actuarial gains and losses arising from changes in financial assumptions		(2,656)	19,118
Actuarial gains and losses arising from experience adjustments		(20,854)	6,039
Benefits paid by the plan		(23,562)	(24,881)
Defined benefits obligation at December 31	\$ <u></u>	522,653	518,447

b) Expense recognized in profit or loss

The expense recognized in profit or loss for the Bank for the years ended December 31, 2021 and 2020 were as follows:

	For the years ended December 31		
		2021	2020
Past service costs	\$	26,720	29,295
Current service costs		10,659	9,821
Net interest of net defined benefit liability		10,089	10,309
Total	\$	47,468	49,425

c) Net remeasurement of defined benefit liability recognized in other comprehensive income

The net remeasurement of defined benefit liability recognized in other comprehensive income for the bank for the years ended December 31, 2021 and 2020 were as follows:

	For the years ended December 31		
		2021	2020
Cumulative amount at January 1	\$	(71,268)	(46,111)
Recognized during the period		19,700	(25,157)
Cumulative amount at December 31	\$	(51,568)	(71,268)

d) Primary actuarial assumptions

	December 31, 2021		December 31, 2020		
	Favorable rates for employee deposits	Other post- employment benefits	Favorable rates for employee deposits	Other post- employment benefits	
Discount rate	4.00%	0.5~0.625%	4.00%	0.5~0.625%	
Expected rate of return on deposited fund	2.00%	-	2.00%	-	
Withdrawal rate of retirement favorable deposit/utilization rate on subsidy for health examination and social networking	2.00%	31~66%	2.00%	32~68%	
Probability of future changes in favorable rates deposits scheme	50.00%	-	50.00%	-	

e) Sensitivity analysis

When adopted primary actuarial assumption changes, the effects of present value of the benefits obligation as at December 31, 2021 and 2020 were as follows:

	Present value of the benefits obligation effects			
Favorable rates for employee deposits	Incre	ease 0.25%	Decrease 0.25%	
December 31, 2021				
Discount rate	\$	(5,687)	5,946	
Withdrawal rate of retirement favorable deposit		(6,042)	6,302	
December 31, 2020				
Discount rate		(5,955)	6,232	
Withdrawal rate of retirement favorable deposit		(6,327)	6,605	
	D.	acont volue	of the honofits	

	Present value of the benefits obligation effects				
Other post- employment benefits	Incr	ease 0.25%	Decrease 0.25%		
December 31, 2021					
Discount rate	\$	(11,189)	11,886		
December 31, 2020					
Discount rate		(10,989)	11,683		

The sensitivity analysis above analyzing the effects of changes in single assumptions is based on other assumptions remain unchanged. In practice, changes in many assumptions may link together. Sensitivity analysis and net pension liability of balance sheet were calculated under the same approach.

The methodology for sensitivity analysis and assumptions adopted are the same as last year.

3) Defined benefits plan of overseas branches and subsidiaries

Defined benefits plan of overseas branches and subsidiaries recognized in consolidated balance sheets was as follows:

	De	cember 31, 2021	December 31, 2020
Defined benefits plan	\$	681,698	524,714

For the years ended December 31, 2021 and 2020, expenses recognized by overseas branches and subsidiaries in profit and loss amounted to \$161,376 and \$183,326, respectively.

For the years ended December 31, 2021 and 2020, other comprehensive income recognized by overseas subsidiaries in actuarial profit and loss amounted to \$43,061 and \$(54,241), respectively.

(ae) Income tax

(i) Income tax

For the years ended December 31, 2021 and 2020, the income tax expenses (benefits) and related accounts were as follows:

	For the years ended December 3		
		2021	2020
Current income tax expenses	\$	8,689,120	3,807,247
Deferred income tax (benefits) expenses		(3,305,079)	1,191,895
Income tax expenses	\$	5,384,041	4,999,142

For the years ended December 31, 2021 and 2020, the income tax expenses (benefits) recognized under other comprehensive income were as follows:

	For the years ended December 31		
		2021	2020
Items that will not be reclassified subsequently to profit or loss:			
Remeasurement losses related to defined benefit plans	\$	(51,463)	(30,775)

(iii) Uncertainty over income tax treatments

For all the Bank's and subsidiaries' income tax return which have already returned but have not assessed, the Bank and subsidiaries evaluate some related factors, such as relevant interpretations letter and previous experience, and consider it has already estimated enough income tax liabilities.

(iv) The Bank's income tax returns assessed and administrative remedies filed were as below:

The Bank has complied with collection authority to assess income tax return until the fiscal year of 2015.

Year	Recheck
2014	Undistributed earnings

(af) Capital stock, capital surplus, and other equity interest

(i) Capital stock

As of December 31, 2021, the Bank's authorized capital was \$150,000,000, representing 15,000,000 thousand common shares with par value at NTD 10 per share, and paid in capital for common stock was \$147,962,186, with 14,796,218 thousand common shares issued.

On June 24, 2020, the Bank's Board of Directors, on behalf of shareholders' meeting, decided a capital increase of 386,343 thousand shares from retained earnings which amounted to \$3,863,432, with August 30, 2020 as its baseline for capital increase.

(ii) Capital surplus

The components and sources of capital surplus were as follows:

	December 31, 2021		
Additional paid-in capital-stock	\$	28,607,197	28,607,197
Share based payment transactions		1,185,867	1,185,867
Others		15,107	66,141
Total	<u></u>	29,808,171	29,859,205

In compliance with the Company Act, capital surplus can only be used to offset a deficit when surplus reserve is not sufficient to offset losses or to be distributed by issuing new shares or by cash pursuant to a resolution to be adopted by a shareholders' meeting as required in Article 241, Paragraph 1 of the Company Act. Furthermore, according to Article 72-1, Paragraph 1 of the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, the amount of capital surplus to be used to increase capital shall not exceed 10% of total paid-in capital. The capital surplus arising from a capital increase can be capitalized only in the following fiscal year after being registered by the Bank with the competent authority for approval.

Shared based payment transactions are from cash capital increase by the parent company CTBC Financial Holding Co, Ltd. According to the Company Act, the parent company issues new shares and reserve 10 percent of such new shares for subscription by CTBC Bank Co., Ltd.'s employees and recognize it to personnel expenses and capital surplus.

(iii) Other equity interest

Changes in the Bank and subsidiaries' other equity interest were as below:

	over	ange differences of rseas subsidiaries' al reports translation	Unrealized gains (losses) from financial assets measured at fair value through other comprehensive income	Changes in financial liabilities designated at fair value through profit or loss attributable to credit risk	Total

(ag) Earnings distribution and dividend policy

As a subsidiary of CTBC Financial Holding Co., Ltd., the Bank is required to fulfill the operating fund demands of the parent company and to maintain its own capital adequacy ratio. Therefore, common stock dividends and bonuses are generally distributed as cash dividends. The Bank adopts a constant and balanced dividend policy through annual common stock dividends and distribution of bonuses.

The above-mentioned methodology is merely a guideline used to select an appropriate dividend policy. In consideration of current operations and capital budget planning for the next year, an appropriate dividend distribution ratio is selected.

Annual earnings, if any, are used to pay taxes, to make certain adjustments in accordance with financial accounting standards, and to offset cumulative losses. Then 30% of the remaining earnings are appropriated as legal reserve and set provision for or reversal of special reserve according to the regulations. Subsequent to all appropriations aforesaid, the remaining balance and the undistributed earnings at the beginning period should report to the Board of Directors for the discussion of dividend distribution ahead of seeking approval from shareholders. Before the legal reserve balance reaches an amount equal to total paid in capital, cash dividends are limited to 15% of total paid in capital. When the legal reserve balance reaches an amount equal to total paid in capital, or satisfies the Article 50, paragraph 2 of the Banking Law, if the Bank is sound in both its finance and business operations and has set aside legal reserve in compliance with the Company Act, the restrictions stipulated in the preceding paragraph shall not apply.

A resolution on 2020 earnings distribution of the Bank was approved by the Board of Directors, on behalf of shareholders' meeting on May 21, 2021, and cash dividend amounting to \$16,790,748 was distributed.

A resolution on 2019 earnings distribution of the Bank was approved by the Board of Directors, on behalf of shareholders' meeting on June 24, 2020, and cash dividend amounting to \$21,614,813 and stock dividend amounting to \$3,863,432 were distributed.

Relevant information approved by the Board of Directors on behalf of shareholders' meeting is available on Market Observation Post System or other sites.

(ah) Share based payment transactions

For the years ended December 31, 2021 and 2020, the Bank and subsidiaries had set out the measurement principles and specific requirements for the share-based payment transactions as below:

	Management stock appreciation rights plan for the years				
	2017	2018	2019	2020	
Grant date	02.08.2018	01.31.2019	01.21.2020	02.05.2021	
Grant number	187,422	239,855	266,154	205,432	
Exercise period	12.31.2020	12.31.2021	12.31.2022	12.31.2023	
Exercise price (in dollars)	21.39	20.24	22.44	19.35	

The Bank and subsidiaries implement the above plan via cash settlements, yet absentee and resigned employees' stock appreciation rights will be deemed abandoned and forfeited.

Disclosures for the Bank and subsidiaries' Employee Stock Appreciation Rights Plan (SARs):

Total	\$	6,625,545	6,805,095

(ao) Compensations of employees

Annual earnings, if any, should be appropriated 0.05% as compensations of employees. However, if there is any cumulative loss, the Bank should offset cumulative losses in priority. Compensations of employees which are recognized as current period operating expenses based on the Bank's net income before tax excluding the amount of the compensations of employees at the end of the accounting period multiplied by the estimate of remuneration distribution set by the Bank's articles of incorporation. The estimated compensations of employees for the years ended December 31, 2021 and 2020 were \$17,202 and \$15,963, respectively. The actual compensations of employee of 2020 and 2019 amounted to \$15,963 and \$18,363 with \$0 and \$460 different from the amount recognized in the annual financial report. The difference was regarded as a change of accounting estimates and would be adjusted in profit or loss in the following fiscal year. Relevant information is available on Market Observation Post System.

Other expenses		5,639,021	5,630,116
Business tax	_	3,465,301	3,292,647
Total	\$ <u></u>	20,189,980	20,639,529

The total amount of rent expenses of exemption for short-term lease contracts and low value assets of the Bank and subsidiaries for the years ended December 31, 2021 and 2020 were \$438,426 and \$425,141, respectively.

- (aq) Financial instruments
 - (i) Methods and assumptions used by the Bank and subsidiaries for fair value evaluation of financial instruments were as follows:
 - 1) Fair value of short-term financial instruments is estimated by their book value on the balance sheet date. Since these instruments have short maturities, the book value is adopted as a reasonable basis in estimating the fair value. The method is applied to cash and cash equivalents, due from Central Bank and call loans to banks, securities purchased under resell agreements, receivables, other financial assets, deposits from Central Bank and other banks, securities sold under repurchase agreements, payables, remittances, and other financial liabilities.

- 2) If there is a quoted price in an active market for the financial asset, including financial instruments measured at fair value through profit or loss, financial assets measured at fair value through other comprehensive income, financial assets measured at amortized cost and financial instruments-hedging, the quoted price is regarded as its fair value. If there is no quoted price in an active market for the financial asset, its fair value is estimated on the basis of the result of a valuation technique that refers to quoted prices provided by financial institutions. The estimates, hypotheses and discount rates for valuation referring to quoted prices, from financial institutions, of financial instruments have substantially the same terms and characteristics, including the credit quality of debtors, the remaining term over which the contractual interest rate is fixed, the remaining term to repayment of the principal, and the currency in which the payments are to be made. Fair value for an equity investment is determined based on either the price calculated using a valuation technique or its book value.
- 3) Loans and deposits are both classified as interest-bearing financial assets; therefore, the book value of financial assets is equivalent to their fair value. The net book value of the non-accrual account, after deducting provision for credit loss, is adopted as the fair value.
- 4) Fair value of long-term liabilities is estimated by the present value of expected future cash flows. The discount rate is based on rates of equivalent loans available elsewhere; that is, loans with similar maturity date and terms (close to the maturity date).
- 5) Derivatives usually adopt mark-to-model prices. The Discounted-Cash-Flow method is adopted for non-option derivatives, and the Black-Scholes Model is adopted for most options.
- 6) The exchange price is used for financial instruments traded on an exchange. Over the counter (OTC) positions use independent price/parameter quotes by reliable brokers or data vendors, such as Reuters, Bloomberg, etc. In general, the closing price, settlement price, mid-price at a fixed cut-off time, and the average price of several independent brokers could be used as market data for valuation purposes.
- 7) The Bank and subsidiaries would calculate credit valuation adjustment (CVA) by assessing probability of default (PD) and loss given default (LGD) of the counterparty before multiplying exposure at default (EAD) of the counterparty. On the contrary, debit valuation adjustment (DVA) is computed by applying probability of default of the Bank and subsidiaries considering loss given default of the Bank and subsidiaries before being multiplied by exposure at default of the Bank and subsidiaries.

The Bank and subsidiaries adopt IFRS 9 or take any observable data into account to evaluate the probability of impairment and loss rate of allowance for doubtful accounts as the estimates of PD and LGD. In addition, mark to market assessment of a derivative instrument from Over the Counter (OTC) is applied as EAD. For those accounts have showed significant increase in credit risk, would be the CVA assessed individually by taking into account of the changes of exposures, conditions of collaterals and the recovery probabilities.

8) Except the following listed items, the book value is considered to be a reasonable basis of estimated fair value if the Bank and subsidiaries do not measure a financial instrument at fair value.

		December .	31, 2021
Financial assets		Book value	Fair value
Investment in debt instruments at amortized cost	\$	948,058,348	956,216,334

.

	December 31, 2020		
Financial assets	Book value		Fair value
Investment in debt instruments at amortized cost	\$	781,466,726	800,227,680

- (ii) Fair value hierarchy information on financial instruments
 - 1) The definition of fair value hierarchy
 - a) Level 1

Fair value measurement for a financial instrument classified in Level 1 is determined as the quoted price for an identical financial instrument in an active market. The definition of active market has all of the following conditions: (1) the products traded in the market are homogeneous, (2) willing parties are available anytime in the market, and (3) price information is available for the public.

b) Level 2

Fair value measurement for a financial instrument classified in Level 2 is determined as the observable price other than quoted price in an active market, including an observable input obtained in an active market, either directly (i.e., as prices) or indirectly (i.e., derived from prices). The examples of observable price are as follows:

i) The quoted price for an identical financial instrument in an active market means the fair value from the market transaction prices for an identical financial instrument. An identical financial instrument should be determined by its characteristics and terms of transaction. The fair value of a financial instrument has to be adjusted according to the observable market price of the identical financial instrument. The reasons for adjustments include time lag of the occurring market transaction prices for an identical financial instrument (the quoted prices do not represent fair value at the measurement date), the difference in transaction terms for financial instruments, transaction prices involving related parties, and the correlation between the observable transaction prices of identical financial instruments and the market prices of held financial instruments.
- ii) The quoted market price of the same or identical financial instruments in an inactive market.
- iii) The fair value is estimated on the basis of the results of a valuation technique, and the market inputs used (i.e., interest rate, yield curve, and fluctuation rate) are based on obtainable data from the market (an observable input means an input can be derived from market data and can reflect the expectation of market participants when the inputs were used in evaluating the prices of financial instruments).
- iv) A majority of inputs are derived from observable market data, or the input correlation can be tested based on observable market data.
- c) Level 3

Input for a fair value measurement for a financial instrument classified in Level 3 is not based on obtainable data from the market (an unobservable input, such as volatility for a share option derived from the share's historical prices, as it does not generally represent current market expectations about future volatility).

The policy for when to recognize the transfers in or out of Level 3 is according to the actual date of the event or change in circumstances. This transfer between Level 3 and Level 2 was due to a switch of valuation approach.

Unrealized gains (losses) associated with liabilities as of December 31, 2021 and 2020 which were recognized in current net income shown in the above table were \$295,634 of profit and \$2,098,315 of loss, respectively.

6) Sensitivity analysis of Level 3 fair value if reasonably possible alternative assumptions used

Valuation techniques used by the Bank and subsidiaries for fair value measurements of financial instruments are appropriate. However, the use of different valuation models or inputs could lead to different outcomes of fair value measurements. The following statement analyses Level 3 sensitivities for those unobservable inputs in valuation models that have a material impact on the valuation of Level 3 financial instrument. The Bank and subsidiaries' major Level 3 financial instruments include:

- a) Back-to-back derivative transactions: the movements of fair value between financial assets and liabilities can be fully offset for back-to-back trades, so there is no material impact on the income statement.
- b) Financial debentures issued by the Bank: the sensitivity analysis based on the assumption of one basis point change in the Bank's credit spread would have the following effects on the statement of other comprehensive income.

	Impacts on the statement of other comprehensive income as fair value changes					
	Favorable changes	Unfavorable changes				
December 31, 2021						
Liabilities						
Financial liabilities measured at fair value through profit or loss						
Designated as financial liabilities measured at fair value through profit or loss	\$ <u>8,262</u>	(8,105)				
December 31, 2020						
<u>Liabilities</u>						
Financial liabilities measured at fair value through profit or loss						
Designated as financial liabilities measured at fair value through profit or loss	\$3,327	(3,292)				

7) Quantitative information about the significant unobservable inputs in Level 3

As of December 31, 2021 and 2020, the relationship between quantitative information about the significant unobservable inputs and fair value cannot be fully controlled practically, thus unobservable quantitative information of fair value were \$57,081 and \$1,475,094 thousand of assets, and \$57,299 and \$1,475,367 thousand of liabilities, respectively.

Quantitative information about the significant unobservable inputs was as follows:

	December 31, 2021						
urring fair value measurements	Fair value	Valuation techniques	Key unobservable inputs	Range of inputs	The relation between inputs and fair value		
Non-derivative financial instruments assets							
and liabilities							
Assets:

8) The valuation process to level 3 financial instruments

Market risk management unit is responsible for independent model validation, with using and confirming the reliable for independent market data, calibrating valuation model on a regular basis, executing back testing, as well as applying any fair value adjustments if necessary to ensure the valuation results are reasonable.

(iii) Financial risk information

The Bank and subsidiaries have established the Risk Governance Policy to serve as its primary principle, which covers managerial conception, organizational structure, accountability, and risk management procedures. The major objective of the risk management of the Bank and subsidiaries is to limit potential risks within an acceptable level in order to achieve sustainable operation.

The major risks include credit risk, market risk, operational risk, liquidity risk and interest risk.

And the organization structure of risk management consists of Board of Directors, Risk Management Committee, Senior Management and Global Risk Management Group. The scope of their authorities is illustrated as follows:

Board of Directors, who is responsible for the approval, review, supervision of risk strategies and risk policies, risk management frameworks, and creating the well balanced and independent risk management culture, serves as the primary guidance for all risks, ensure the operation of risk management and undertakes ultimate responsibility of overall risk management.

Risk Management Committee assists the Board in risk governance by communicating, reporting, and recommendations. We expect through the support from Board level in Bank's risk culture, along with supportive behavior and decision-making process, the whole organization can be influenced by Board's determination in risk management.

Senior Management establishes independent risk management functions and effective risks assessment mechanism in accordance with the policy direction of the Board of Directors to ensure that the Bank and subsidiaries operate properly. Senior Management establish an appropriate risk authorization system to supervise and ensure the proper operation of the system.

Global Risk Management Group is responsible for planning and managing the Bank's risk profiles which include credit, market, operations, interest and liquidity risks of the banking book, developing proper policies and strategies relating to risk identification, measurement, control, and management, and supervising the implementation of system implementation, as well as system operation effectiveness.

1) Market Risk Management

Definition and sources of market risk management

Market risk is the risk that the Bank and subsidiaries' earnings, capital, or its ability to meet business objectives will be adversely affected by changes in the level, volatility, correlation, or liquidity of market risk factors, such as interest rate (including credit spread), foreign exchange, equity and commodity.

The market risk of the Bank and subsidiaries arises from either trading or non-trading portfolios. The trading portfolio includes positions arising from trading activities, which aim at benefiting from short-term price movements, such as proprietary trading and market making. The non-trading portfolio includes positions not held for the purpose of earning capital gains.

The market risk management framework for trading and non-trading portfolios is described as follows:

- a) Trading Portfolios Management
 - i) Objective

The Market Risk Management Policy is the cornerstone of managing market risk-taking activities in the Bank and subsidiaries. The Policy is developed to establish definite market risk management mechanisms of financial transaction, to facilitate market risk communication within the Bank and subsidiaries, and to provide proper management.

- ii) Market Risk Management Procedure and Measurement
 - 1. Management Procedures
 - a. Risk identification

Risk-taking unit shall identify the market risk of financial instruments, and this should be clearly stated in the relevant product program documentation. Market risk management unit (MRMU) executes the identification of market risk independently.

b. Risk measurement

MRMU shall define appropriate and consistent market risk measurement methodologies in line with the business characteristics and risk source to properly evaluate the primary market risk exposure. The risk measurement shall be applied to daily management and shall serve as a foundation for market risk planning, monitoring, and controlling.

Valuation approach and market data adoption for calculating P/L, risk sensitivities, Value at Risk (VaR), stress testing should be approved by MRMU.

c. Risk controlling

Market risk limit is a tool for authorizing and controlling specific forms of market risk arising from the trading activities of the Bank and subsidiaries to ensure that the Bank and subsidiaries are not exposed to market risk beyond the risk appetite. Market risk limit management procedures, such as the establishment, approval, exception management and limit excess treatment, etc., shall comply with the relevant market risk management documents.

d. Risk reporting

Market risk reporting is an effective risk communication tool. MRMU shall submit market risk management reports to senior managers on a daily basis and periodically report the integrated market risk profile to senior executives and the Board to evaluate risk concentration and capacity of the Bank and subsidiaries and to form necessary risk adjusting strategies.

- 2. Risk Measurement Approaches
 - a. Value at Risk, VaR

The VaR system is developed and maintained for internal risk management purpose, and will be continually refined to meet the quantitative and qualitative standards of IMA (Internal Model Approach) requirements.

b. Stress Testing

Stress testing is used to calculate a range of trading exposures which result from extreme market events or scenarios. Stress testing measures the impact of exceptional changes in market rate/price, volatility or correlation in the fair value of trading portfolios as a supplement to VaR which is unable to capture the tail risk.

c. Factor Sensitivity

Factor sensitivity is a measurement for monitoring the crossproduct exposures within each risk type, including but not limited to foreign exchange, interest rate, equity, commodity, and credit.

iii) Market Risk Mitigation and Hedging

The Bank and subsidiaries' trading portfolios include spots and derivatives. The derivatives are employed to reduce spots exposure or combined with other derivatives to form trading strategy. MRMU evaluates and controls the mitigation effectiveness between trading positions and its' hedge positions by using risk measurement tools, such as VaR, risk sensitivities, etc.

- iv) Interest Rate Risk Management
 - 1. Definition

Interest rate risk arises from adverse changes in interest rates. Primary interest rate related instruments held in the Bank and subsidiaries' trading portfolios include bonds and interest rate derivatives, such as interest rate swaps, caps/floors, and swaptions.

2. Management Procedure

In order to effectively control the interest rate risk in the trading portfolios, the Bank and subsidiaries control interest rate risk by setting limits in different yield curves and currencies depending on its own business development and management needs.

3. Measurement Approach

PVBP, the change in fair value as the yield curve parallel shifts up by 0.01% (1bp), is used to measure interest rate risk exposures of the Bank and subsidiaries' trading portfolios.

Unit: In Thousands of New Taiwan Dollars

Yield curve parallel shift of +0.01%	Currency	Dec	ember 31, 2021	December 31, 2020
	EUR	\$	271	441
	IDR		(497)	(936)
	NTD		500	706
	PHP		(123)	(78)
	RMB		(513)	(549)
	USD		1,432	5,048
	Others		81	263

v) Foreign Exchange Risk

1. Definition

Foreign exchange risk arises from adverse changes in exchange rates. Primary foreign exchange instruments held in the Bank and subsidiaries' trading portfolios include spots, forwards, and currency options.

2. Management Procedure

In order to effectively control the foreign exchange risk for the trading portfolios, the Bank and subsidiaries control foreign exchange risk by setting limits in different currencies or currency pairs depending on its own business development and management needs.

3. Measurement Approach

FX Delta, the change in net present value as the foreign exchange rate moves up by one unit, 1%, is used to measure foreign exchange risk exposure of the Bank and subsidiaries' trading portfolios.

Underlying currency upward movement by 1%	Currency	Dec	ember 31, 2021	December 31, 2020
	EUR	\$	1,198	(508
	HKD		(601)	(2,561
	JPY		(236)	187
	PHP		(1,980)	(449)
	RMB		841	572
	THB		(695)	(55
	USD		1,199	(5,770)
	VND		205	1,921
	Others		399	1,530

Unit: In Thousands of New Taiwan Dollars

vi) Other Risk Factor Sensitivities

1. Equity Factor Sensitivity (Equity delta)

Equity Delta is the change in fair value as the underlying stock price or index price moves up by 1%. Primary equity instruments held in the Bank and subsidiaries' trading portfolios include stocks, convertible bonds, equity index futures and options.

2. Commodity Factor Sensitivity (Commodity delta)

Commodity Delta is the change in fair value as the underlying commodity price moves up by 1%. Primary commodity instruments held in the Bank and subsidiaries' trading portfolios include derivatives in gold and crude oil.

3. Credit Spread Factor Sensitivity (CR01, Credit 01)

CR01 is the change in fair value as the credit spread shift up by 0.01% (1bp). Primary credit-linked instruments held in the Bank and subsidiaries' trading portfolios include credit default swaps.

Equity factor sensitivity (Equity delta)	Country/ Commodity	Dec	ember 31, 2021	December 31, 2020
Equity Factor Sensitivity				
Stock price or index upward movement by 1%	Taiwan	\$	(27)	2,337
	China		(49)	37
	Thailand		977	-
Commodity Factor Sensitivity				
Commodity price upward movement by 1%	Gold		-	1
Credit Spread Factor Sensitivity				
Credit spread upward shift by 0.01%			(2,580)	(861)

b) Management Mechanism of Non-Trading Purpose Investment Portfolio

- i) Management of Non-Trading Purpose Interest Rate Risk
 - 1. Definition of Non-Trading Purpose Interest Rate Risk

Non-trading purpose interest rate risk of the Bank and subsidiaries refers to the impact on the profit or the equity of non-trading purpose interest rate sensitive assets and liabilities when interest rate changes.

Interest rate risk mainly stems from different sensitivity of assets and liabilities to interest rate change. Such risk could arise from mismatches of repricing timing amount of asset and liability, varying magnitude of changes in short-term and longer-term interest rates, various interest rate indexes to which asset and liability are linked, or embedded options.

2. Management Objective of Non-Trading Purpose Interest Rate Risk

The "Asset and Liability Management Policy" is the highest guideline of managing the Bank and subsidiaries' non-trading purpose interest rate risk. The Policy defines the authorities, responsibilities and management procedures. Through the Funds Transfer Mechanism (FTP) and funding activities, the Bank and subsidiaries navigate the asset and liability structure to keep the interest risk exposure within the risk appetite, attain a balanced risk profile and maximize shareholder value.

3. Management Procedures and Risk Measurement of Non-Trading Purpose Interest Rate Risk

In order to earn stabilized profits, the Bank and subsidiaries control the interest rate risk by keeping the interest rate exposures within the limit approved by the Board, centralizing the interest rate risk from business unit to specified unit through the Match-Term Fund Transfer Mechanism, and adjusting the funding positions proactively.

The measurement includes on balance sheet banking book interestsensitive asset and liabilities, non-trading purpose financial instruments, and interest rate related derivatives which apply hedge accounting.

Interest rate risk monitoring unit periodically conducts the risk reports, which contain the analysis of limit usage, interest rate risk sensitivity and stress test. The risk report shall periodically be submitted to related risk management meetings.

The Bank and subsidiaries frequently measure interest rate risks by the following tools:

- a. Repricing Gap Report: This report measures the repricing gap between asset and liability by various time buckets in order to understand interest rate mismatch.
- b. Interest Rate Sensitivity:
 - i. Asset and Liability Mismatch: This measures the impact of 1 basis point change in interest rate on net interest income (NII) and that on economic value of equity (EVE). The analysis of such impact on NII (1bp△ NII) focuses on changes in interest income and expense within a year; hence, this analysis is of a short-term perspective. The analysis of such impact on EVE (1bp△ EVE) is of a long-term perspective as it focuses on changes of economic value which will become net interest income received every year later on.
 - ii. Non-trading purpose financial instruments specified: Use the PVBP to measure the impact of 1 basis point change in interest rate on fair value.
- c. Stress Test: This evaluates the impact of a significant change in interest rate on EVE. The test results will be compared with capital in order to examine the appropriateness of exposure.
- d. (Non-trading purpose financial instruments specified) Profit and Loss: This evaluates the market value of financial instrument, and aims to keep the impact on earnings or equity within the Bank and subsidiaries risk appetite.

4. Risk Mitigation and Hedge of Non-Trading Purpose Interest Rate Risk

The Bank and subsidiaries set limits to manage risk. When an excess of limit is confirmed, the risk monitoring unit analyzes the impact; the business unit causing the changes in the risk should submit the action plan to the limit authority for approval. The relevant units should keep track of the effectiveness of the action plan and make prompt adjustments to ensure the risk will be effectively reduced.

The Bank and subsidiaries may adjust the interest rate risk exposure by adjusting the asset and liability structures or entering derivative with external counterparties. Prior to executing an external hedge, the hedge plan with specified hedged position, profit and loss analysis, detailed scheme, etc., shall gain approval from the limit authority. After a hedge executed, risk management unit shall periodically review the hedge execution and its effectiveness, and report to the limit authority depending on the impact.

- ii) Management of Non-Trading Purpose Foreign Exchange Rate Risk
 - 1. Definition and Sources of Non-Trading Purpose Foreign Exchange Rate Risk

Non-trading purpose foreign exchange (FX) rate risk of the Bank and subsidiaries refers to the impact on the profit or loss due to fluctuation of FX rate on the non-trading purpose FX positions.

2. Management Objective of Non-Trading Purpose Foreign Exchange Rate Risk

The Bank and subsidiaries' management objective of non-trading purpose FX risk aims to keep FX exposures within the risk appetite by the authorities, responsibilities and management procedures defined in the Policy.

3. Management Procedure and Risk Measurement of Non-Trading Purpose Foreign Exchange Rate Risk

The Bank and subsidiaries identify, measure, monitor, and report the FX risk through the thorough risk management framework and procedure. To control the FX risk, the Bank and subsidiaries periodically monitor the risk exposure according to the approved limit hierarchy and sweep FX risk centrally from business units to designated FX management unit. For overseas branches without a specified FX management unit, FX positions will be centrally managed by the Funding Management Unit. The risk factor which measures non-trading purpose Foreign Exchange Risk is "FX Delta", which measures the impact on the profit and loss when FX rate changes.

4. Non-Trading Purpose Foreign Exchange Rate Risk monitoring and reporting

The Bank and subsidiaries set the limits and control mechanisms to manage the FX risk. When an excess of limit is confirmed, the business unit will give an explanation on it and make an action plan; the action plan will then be submitted to the limit authority for approval after being reviewed by the risk management unit. The relevant units should keep track of the effectiveness of the action plan and make prompt adjustments to ensure the risk will be effectively reduced.

- iii) Management of Non-Trading Purpose Equity Risk
 - 1. Definition and Sources of Non-Trading Purpose Equity Risk

Non-trading purpose equity risk of the Bank and subsidiaries refer to the impact on the profit or loss due to equity price fluctuation of nontrading purpose equity positions.

2. Management Objective of Non-Trading purpose Equity Risk

The Bank and subsidiaries' management objective of non-trading purpose equity risk aims to keep equity exposures within the risk appetite and control severe impact on profit or owner equity by the authorities, responsibilities and management procedure defined in the Policy.

3. Management Procedure and Risk Measurement of Non-Trading Purpose Foreign Exchange Rate Risk

The Bank and subsidiaries identify, measure, monitor, and report the equity risk through the thorough risk management framework and procedure. To control the equity risk, the Bank and subsidiaries periodically monitor the risk exposure according to the approved limit hierarchy. The major aspects of Equity limits include the position limit and the year to date loss trigger.

4. Risk Mitigation of Non-Trading Purpose Equity Risk

The Bank and subsidiaries set limits to manage risk. When an excess of limit is confirmed, the business unit should analyze the reasons and impacts, and make an action plan; the action plan will then be submitted to the limit authority for approval after being reviewed by the risk management unit. The relevant units should keep track of the effectiveness of the action plan and make prompt adjustments to ensure the risk will be effectively reduced.

iv) Factor Sensitivity Analysis

Factor sensitivity analysis by the Bank and subsidiaries was summarized as below:

December 31, 2021							
		Amount					
Risk Items	Movement	Profit and Loss	Equity				
Interest Rate Risk	Interest rate curve shift up 1bp	143,062	(80,263)				
	Interest rate curve shift down 1bp	(143,062)	80,263				
Foreign Exchange Rate Risk	Foreign currency appreciate 1% against NTD	71	-				
	Foreign currency depreciate 1% against NTD	(71)	-				
Equity Price Risk	Equity price appreciate 1%	13,224	290,132				
	Equity price depreciate 1%	(13,224)	(290,132)				

December 31, 2020							
		Amount					
Risk Items	Movement	Profit and Loss	Equity				
Interest Rate Risk	Interest rate curve shift up 1bp	114,027	(96,576)				
	Interest rate curve shift down 1bp	(114,027)	96,576				
Foreign Exchange Rate Risk	Foreign currency appreciate 1% against NTD	627	-				
	Foreign currency depreciate 1% against NTD	(627)	-				
Equity Price Risk	Equity price appreciate 1%	7,112	149,456				
	Equity price depreciate 1%	(7,112)	(149,456)				

Note: When a fair value hedge or hedge of a net investment in a foreign operation is in conformity with all the conditions for applying hedge accounting, the mentioned positions will not be covered by summarized details above. Because the affected profit or loss is recognized by offsetting the changes in the fair value of hedging instruments and hedged items.

c) Foreign exchange rate gap information

According to IFRS 7 "Financial Instruments: Disclosures" paragraph No. 34(a), an entity shall disclose summarized quantitative data about its exposure to that risk at the end of the reporting period. Significant foreign exchange rate risk exposure of the Bank and subsidiaries was as below:

- 4. Ratio of interest rate sensitive assets to liabilities = Interest rate sensitive assets / Interest rate sensitive liabilities (denominated in USD).

- 2) Credit Risk Management
 - a) Definition and Sources of Credit Risk Management

Credit risk of the Bank and subsidiaries refers to the risk of financial loss if an obligor, guarantor or counterparty fails to meet its contractual obligations. Credit risk arises from both on-balance-sheet and off-balance-sheet items. On-balance-sheet items include Loan, Discounting bills and notes, Credit Card, Due from Central Bank and Call loans to banks, Debt Investment and Derivatives Transaction, etc. Off-balance-sheet items mainly include Guarantees, Bank Acceptance, Letter of Credit and Loan Commitments.

b) Objectives of Credit Risk Management

The objective of credit risk management is to minimize the potential financial losses by appropriate strategies, policies and procedures. By strengthening credit risk management framework, which is transparent, systematic, professional and well-established, credit risk management is rooted in its corporate governance to reinforce business performance and improve shareholder's equity.

- c) Credit Risk Management Process and Credit Risk Measurement
 - i) Credit Risk Management Process
 - 1. Risk Identification

Credit risk comes from the default risk and significant credit deteriorated of an obligor, change on collateral value or the default risk of derivatives counterparty. Defining credit risk factors for identification shall consider not only internal business operations but also external economic environmental changes.

2. Risk Measurement

In order to appropriately evaluate and monitor obligor's credit risk, the Bank and subsidiaries implement the internal rating system factored in the characteristics of obligors and products to quantify it. The corresponding policies and procedures are established and the regular model validation mechanism is executed to ensure the appropriateness and effectiveness of the model performance. Besides credit rating, credit risk management policy and experienced (senior) credit officers' judgment supplement the credit application on credit approval, facility management and performance analysis, etc.

3. Risk Monitoring

To ensure credit risk is under control, the Bank has established credit risk limit management mechanism, and set up the information management system to monitor the credit risk portfolio and risk concentration situation. The Bank and subsidiaries have developed comprehensive credit policies and procedures covering a credit cycle for facilitating the control of credit risk by responsible units, such as procedures about credit extension and credit evaluation, interim review mechanism, guideline for early warning and watch list accounts, guideline for collateral appraisement and management, rules of treasury credit risk mitigation, procedure for problem assets management, guideline for provision allowance and so on, to reduce the probability of credit loss and ensure our financial claim on exposure.

4. Risk Reporting

Credit risk management unit periodically prepares credit risk management reports and submits these reports to senior management. The reports disclose the Bank and subsidiaries' credit risk profile from various dimensions, such as asset quality, portfolio concentration, industry sector exposure, scorecard model validation result, etc.

- ii) Measurement of Credit Risk
 - 1. Internal Rating System

The development of internal rating system and the estimation of parameters for credit risk measurement are based on the Bank and subsidiaries' internal historical data and the experience of internal experts. The three major risk components include Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), which are used to measure the expected loss and unexpected loss, to assist the Bank and subsidiaries in their stable growth of long-term operation.

a. Probability of default

The Bank and subsidiaries' institutional banking group has developed various scorecard models for Middle Market and Jumbo-sized Enterprise, Small and Medium-sized Enterprise, Real Estate Developer and Personal, etc. based on obligor's characteristics, including exposure types, industrial characteristics, revenue scales, and the correspondent with the Bank. The Bank also develop a master scale to segment obligor's default risk; each segment of the master scale is associated with a predefined forward-looking probability of default. As for retail banking group, we have leveraged the customer-centric based credit risk scorecard model to generate the risk rating by predefined one-year forward-looking probability of default.

b. Loss given default

The Bank's institutional banking group calculates the parameters of LGD, such as Collateral Recovery Rate, based on the product characteristics, collateral types, and guarantee forms, etc. The parameters are used to estimate the LGD for each facility. CTBC retail banking group established the LGD rating with long-run default-weighted average LGD, which is developed according to the characteristics of products and collaterals.

c. Exposure at default

Exposure at default is calculated by current outstanding plus potential extra outstanding at default. The credit conversion factor (CCF) for potential extra outstanding at default is calculated by taking the facility commitment, usage ratio, loan outstanding and headroom into consideration. For off-balance-sheet exposure, CCF is used to estimate the portion of off-balance-sheet exposure converted into on-balance-sheet if default.

2. Stress Testing

Depending on credit risk materiality and business scale, stress testing of credit risk portfolios was implemented. Stress testing helps the Bank and subsidiaries aware of the possible change of risk component resulting from stress event, and assesses the amount of capital needed to absorb losses or plan remedial actions to mitigate the impact of exceptional loss when such incident occurs.

- d) Mitigation of Credit Risk
 - i) Collateral Management

In assessing the credit extension, obligor's business prospect, future cash flow, and repayment ability and willingness are the main factors for identifying the repayment sources. However, for the creditor's sake, the Bank, under government regulations, may ask the obligor or a third party to deliver pledge of real estate, chattel, or securities as collateral which can be disposed for recovering the Bank's claim on exposure if the obligor defaults.

In order to maintain the good standing value of collateral, the Bank and subsidiaries have established guidelines regarding collateral management, which are as follows. By taking the volatility of market value and the characteristic of collateral into account, the Bank and subsidiaries set the type of collateral that can be pledged and consider the historical recovery experience to draw up the highest loan to value. To verify the fairness of the value of the collateral, collaterals are appraised not only through valuation reports issued by professional appraisers but also market price and the actual registered price. With the periodic reappraisal, the adequacy of the collateral with high fluctuations can be timely monitored.

ii) Pre-settlement risk mitigation

For pre-settlement risk, the Bank and subsidiaries might take mitigation actions such as calling for additional collateral (or margin), signing a netting agreement or signing an early determination agreement so as to reduce the credit loss.

iii) Post-lending monitoring mechanisms

For post lending monitoring through interim review mechanism to control the change of customer's risk, the review frequency and content depend on the risk grade of customers. The Bank and subsidiaries have stipulated Guideline for Interim Reviews based on the principle about interim review issued by The Bankers Association of The Republic of China. Interim review items cover change of borrower's business, inspection of credit standing, change of business operation and financial condition, change of the collateral, change of bank debt, the proceeds in accordance with funding purpose, and change of repayment sources and so on. If there is significant change of obligor's business and credit status, the credit grade will be re-rated and facilities might be adjusted depending on the situation.

iv) Credit Risk Assessment Review

In order to ensure the adequacy of entire credit risk management and control mechanisms, portfolio credit risk and management process are assessed, reviewed, monitored and examined periodically by the Bank and subsidiaries, to assist the Bank and subsidiaries in their stable growth of long-term operation.

v) External guarantee

In order to enhance the credit protection for weak small and medium business borrowers and risk mitigation for the unsecured exposure of small and medium business borrower, external guarantee provided by R.O.C. SMEG fund approved by government is one of the eligible guarantees.

vi) Concentrations Risk Management

Besides periodic and intermittent monitoring by various risk components on credit risk exposure via different relevant credit risk management reports, the Bank and subsidiaries have risk limit control mechanism, effective after approval by the Board of Directors, at the level of asset portfolio and the level of group, considering that changes in external macro environment are likely to introduce concentration risk from customers with the same characteristics.

Dimensions of limit ceiling monitoring include country risk, high risk grade obligors, product types, industry, treasury limit, project limit, collateral, in the same affiliate and counterparty, and so on.

e) Maximum exposure to credit risk

Without taking collateral or other credit enhancement mitigation effect into account, the maximum exposure to credit risk of on-balance-sheet financial assets is equal to the carrying values.

Please refer to Note 6(aq)(3)g. for off-balance sheet financial instruments' maximum exposure to credit risk maturity analysis.

f) Concentrations of credit risk

Significant concentrations of credit risk occur when there are exposures, significant enough to threaten a Bank's security or its ability to maintain core businesses, to an individual counterparty to a transaction or a number of related counterparties engage in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. Concentrations of credit risk originate from assets, liabilities, and off-balance-sheet items by means of performing an obligation to deliver products or service, execution of a trade, or combination of cross-classification exposures. The Bank and subsidiaries have proper internal policies, systems, and controls to recognize, measure, monitor, and control concentrations of credit risk. The following table illustrates the diversification of the loan portfolio among industry sectors and geographical regions of the Bank and subsidiaries.

g) Credit risk analysis of financial assets, loan commitments and financial guarantee contracts of the Bank and subsidiaries

The measurement of expected credit losses of the Bank and subsidiaries is based on internal rating system and the estimation of three major credit risk components including Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD), which are used to measure the 12-month and lifetime expected credit losses.

For Probability of Default, the Bank's institutional banking group develop the risk segmentation according to obligor's country, internal rating, status of credit risk, and industry. As for retail banking group, the risk segmentation is developed according to obligor's risk characteristics, credit score, and delinquency status.

For Loss Given Default, the Bank's institutional banking group develop the risk segmentation depending on whether the asset is partially secured, fully secured, or other else. As for retail banking group, risk factors are derived from the product characteristics, such as Loan-to-value, exposure, and collateral type.

Current exposure method or expected exposure approach is adopted for the estimation of exposure at default. The on-balance sheet exposure at default is measured by gross carrying amount (including accrued interest and accrued fees); the off-balance sheet exposure at default is estimated by carrying amount multiplied by credit conversion factor (CCF) under the Basel Accords - the standardize approach for credit risk.

The criteria for identifying the significant increases in credit risk are set as below:

- i) Delinquent asset with interest or principal payments over 30 days; delinquent asset with interest or principal payments over 45 days for recourse factoring exposure; delinquent asset with interest or principal payments over 60 days for non-recourse factoring exposure (considering the credit risk characteristics and the amount of time required for reconciliation process, special overdue days criteria have been set to both Recourse and Nonrecourse Factoring exposure).
- ii) Obligor's risk rating or collateral value at the reporting date deteriorates significantly compared to that at the initial recognition date.
- iii) Obligor placed in early warning list due to the mechanism of early warning or the probability of default of obligor similar with delinquent asset at reporting date.

The objective evidence of impairment generally includes the items as below:

- i) Significant financial difficulty of the issuer or obligor;
- ii) Adverse changes in the repayment status of borrower;
- iii) A breach of contract, such as a default or past due event;
- iv) The lender, for economic or contractual reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider;
- v) Decease, dissolution, or it is becoming probable that the borrower will file for bankruptcy or undergo financial reorganization;
- vi) The disappearance of an active market for that financial asset because of financial difficulties;
- vii) Purchased or originated credit-impaired financial asset at a significant discount to the contractual par amount;
- viii) Counterparty defaulting on agreement of other financial instruments (e.g., transactions settlement failure, a bank decide to execute early termination of transactions, or loans originated from derivatives settlement failure).

Estimation of expected credit losses that incorporates forward-looking information:

By analyzing the historically macroeconomic data, the relevant macroeconomic factors for credit risk of each portfolio (e.g., economic growth rate, consumer price index, interest rate or unemployment rate) are recognized, which are further adopted based on the correlation of the Bank's loss experience and consistency of forecast. The risk signals then are developed based on the chosen macroeconomic factors and apply the forward-looking adjustment by incorporating the internal and external loss experiences. Besides, to derive and reflect macro light forecasts for the next three years in the estimation of impairment allowance, the Bank considers and gets the average of macroeconomics forecasting derived from the chosen Business, Public Agencies, and Academic Institutions.

There is no significant change on the methodology or assumptions for assessment of expected credit losses at the reporting date.

Some financial assets held by the Bank and subsidiaries, such as cash and equivalent cash, due from central bank, call loans to banks, financial assets measured at fair value through profit or loss, financial assets measured at fair value through other comprehensive income, securities purchased under resell agreements, refundable deposits, operational guarantee deposits, and settlement fund, are excluded from this analysis since most of counterparties are normally with good credit quality and can be considered as low credit risk. Some products, such as certificate of deposit loan, due from banks, and call loans to banks, are treated as products with low credit risk in consideration of their characteristics and zero historically impaired experience. Below tables provide the expected credit risk analysis for the rest of financial assets.

- Note 1: The Bank's non-performing loans represent the amount of overdue loans as reported in accordance with the "Regulations on the Procedures for Banking Institutions to Evaluate Assets and Deal with Past Due/Non-performing Loans". The credit card overdue loans represent the amount of overdue loans as reported in accordance with Jin Kuan Yin (4) Zi No. 0944000378, dated July 6, 2005.
- Note 2: Non-performing loans ratio = Non-performing loans ÷ total loans; Credit card delinquency ratio = Overdue receivables ÷ balance of receivables.
- Note 3: Coverage ratio for loans = Allowance for credit losses ÷ non-performing loans; Coverage ratio for credit card = Allowance for credit losses ÷ overdue receivables.
- Note 4: For residential mortgage loans, a borrower provides his/her (or spouse's or minor child's) house as collateral in full and pledges it to the financial institution for the purpose of obtaining funds to purchase property and to construct or repair a house.
- Note 5: Microcredit loans are defined by Jin Kuan Yin (4) Zi No. 09440010950, dated December 19, 2005, and do not include credit cards or cash cards.
- Note 6: Others in consumer finance are secured and unsecured consumer loans other than residential mortgage loans, cash cards, and microcredit loans, and do not include credit cards.
- Note 7: In accordance with Jin Kuan Yin (5) Zi No. 094000494, dated July 19, 2005, receivables without recourse factoring will be classified as overdue receivables within 3 months after the date that suppliers or insurance companies resolve not to compensate the loss.
- Note 8: The balances of impairment allowance, as shown above, are calculated in accordance with the IFRSs accepted by FSC and "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing/Non-accrual Loans", and other related regulations. Additionally, the amounts exclude non-accrual loans arising from guarantees. Related allowance for credit losses is recognized under provisions.
- Note 9: Supplemental disclosures:

The information below shows supplemental disclosures of the Bank's loans and receivables that may be exempted from reporting as non-performing loans and overdue receivables, respectively.

Unit: In	Thousands	of New	Taiwan	Dollars

- Note 1: The top 10 enterprise groups other than government or state-owned enterprises are ranked according to their total outstanding credit amount. If the borrowers belong to an enterprise group, the aggregate credit balance of the enterprise should be calculated and disclosed as a code number for each such borrower together with an indication of the borrowers' line of business. In addition, if the borrowers are enterprise groups, the enterprise group's industry sector with the maximum exposure to credit risk in its main industry sector should be disclosed, along with the "class" of the industry, in compliance with the Standard Industrial Classification System of the R.O.C. posted by the Directorate General of Budget, Accounting and Statistics, Executive Yuan, R.O.C.
- Note 2: Enterprise group is as defined in Article 6 of the "Supplementary Provisions to the Taiwan Stock Exchange Corporation Rules for Review of Securities Listings."
- Note 3: The total outstanding credit amount is the sum of the balances of all loan types (including import and export bill negotiations, loans, overdrafts, short/medium/long term secured and unsecured loans, margin loans receivable, and non-accrual loans), bills purchased, without recourse factoring, acceptances receivable, and guarantees receivable.

- 3) Liquidity Risk Management Mechanism
 - a) Definition and sources of liquidity risk

Liquidity risk of the Bank and subsidiaries refer to the risk of inability to obtain funds at a reasonable cost within a reasonable timeframe to meet financial obligations, and thus impact the Bank and subsidiaries' profits or economic value.

Liquidity risk may stem from external and internal factors, such as undermined payment capability caused by financial market volatility, early withdraws and concerns of creditors or depositors over the Bank's ability to meet payment obligations due to credit, market or operational risk.

b) Objectives of liquidity risk management

Since there were costs associated with the level of liquidity, the liquidity risk management for the Bank and subsidiaries aim to satisfy the funding needs by allocating the assets and liabilities in the most cost-effective way within the approved risk tolerance to balance the risk and return.

c) Management procedures and risk measurement of liquidity risk

Based on the "Asset and Liability Management Policy", the Bank and subsidiaries set robust management procedures and risk measurement to identify, measure, monitor, and report the liquidity risk. By periodically monitoring the liquidity limit approved, continuously conducting the development and application of quantitative risk assessment tools, and studying liquidity related issues, the liquidity risk is properly managed. The Bank and subsidiaries set various limits for managing liquidity risk, including the mismatch of cash inflow and outflow and funding concentration to assure the Bank and subsidiaries maintain adequate liquidity.

Funding Management Unit is entrusted the responsibility to centrally manage the liquidity risk of the Bank and subsidiaries, and to act as sole window to engage in funding activities. The risk management unit will monitor the liquidity risk independently. The main responsibilities of funding management unit are as follows:

- i) Keep abreast of market condition, and monitor the Bank's liquidity to ensure the capacity to meet the intraday payment obligation.
- ii) Adjust funding gap and liquidity to conform exposure within the Bank's risk appetite and regulatory requirements, and support customers' funding needs by use of different funding instruments with different amount and maturity.
- iii) Diversify funding instruments and counterparties in order to reduce the concentration.
- iv) Activate Contingency Funding Plan (CFP) and adjust positions when a liquidity crisis is detected.
The liquidity risk monitoring unit is responsible to identify the cause of liquidity risk, develop and enhance the measurement of risk, periodically conduct the risk reports, activate the Contingency Funding Plan when liquidity crisis is detected, and monitor the effectiveness of action plan.

The scope and characteristics of risk measurements and reporting system are as follows:

- i) Establish the thorough liquidity risk measurement for measuring liquidity risks. The common methods are as follows:
 - 1. Maximum Cumulative Outflow (MCO): Analyzing maturity mismatch to capture each time bucket cash flow changes, which serves as an early warning of liquidity risk.
 - 2. Liquidity risk heat map: Liquidity risk indicators can be further developed into an easily understandable map to facilitate systematic monitoring and to effectively highlight changes, causes and impact.
- ii) The liquidity risk monitoring unit periodically conducts the risk reports, which contain the analysis of limit usage and liquidity risk indicators. The risk report with supporting stress test result will periodically be submitted to related risk management meetings. For important liquidity risk issues, depending on the impact, they will be reported to the Bank or the Holding Bank's management level to discuss the action plan.
- d) Risk mitigation and hedge of liquidity risk

Through liquidity risk management framework, the Bank and subsidiaries maintain sufficient liquidity status and robust funding structure. By using rigorous liquidity risk measurement and strict supervision, the Bank and subsidiaries can detect potential issues on liquidity risk at an early stage and report them during the risk meeting. Also, the Bank and subsidiaries can thoroughly monitor, and coordinate with, each business unit to adjust the exposure by taking into consideration the risk and return. Once the risk has exceeded its limit, the risk management unit will analyze the cause and the primary business unit which caused the change on the risks, then the business unit responsible should report the action plans and followups to the relevant authority for approval. The related unit should keep track of the pace of improvement on its performance and timely adjust its strategy to ensure that the risk could be decreased effectively.

Being a systemically important bank in Taiwan, the Bank and subsidiaries have set up rigorous monitoring index and stress tests additionally to detect liquidity risk at early stages. The Bank and subsidiaries also follow the instruction of the contingency funding plan to integrate each resource in order to promptly deal with the liquidity crises and to ensure liquidity for steady operation.

e) Maturity analysis of non-derivatives liabilities

Table below shows the analysis of cash outflows of non-derivatives liabilities based on time remaining until the contractual maturity date. The amount disclosed is based on contractual cash flows and may be different from that included in the consolidated balance sheets.

			December	31, 2021

4) Interest rate benchmark reform

A fundamental reform of major interest rate benchmarks is being undertaken globally, including the replacement of London Interbank Offered Rate (LIBOR) with alternative nearly risk-free rate. The Bank intends to convert the risk exposure of financial instruments related to interest rate benchmark of LIBOR. According to the cessation date of LIBOR announced by the Financial Conduct Authority (FCA) in March 2021, LIBOR is expected to retire by the end of 2021. The Bank and subsidiaries will complete the contract modification or add appropriate fallback provisions before the cessation date of LIBOR. Since the interest rate benchmark reform of LIBOR will impact the Bank's operation and risk management and accounting, the Bank has formally established a cross-functional project team since March 2020, to initiate the project of LIBOR transition; the scope of the project contains overseas branches and subsidiaries. In addition to coordinate the project implementation of domestic and overseas branches, the Bank's project team will also provide the planning content of headquarters for reference by the overseas subsidiaries' project team to ensure the corporate-wide consistency of project implementation.

The project team is responsible for setting timeline, monitoring the progress, and mitigating potential risks in the implementation of the project. It also closely tracks the regulatory key milestones and recommendations by local authorities on LIBOR reforms, and regularly reports to the LIBOR transition project steering committee.

In response to the interest rate benchmark reform of LIBOR, the Bank and subsidiaries are currently modifying or preparing to modify contract terms, adjusting related systems and operating procedures, restarting bilateral negotiations with clients on transactions related to interest rate benchmark of LIBOR, updating contract terms, signing supplementary agreements or negotiating other arrangements, and establishing control mechanisms to keep track of the progress of transition.

The financial instruments that should be converted, but not yet converted, of the Bank and subsidiaries on December 31, 2021 are as follows:

Position	USD LIBOR		Л	JPY LIBOR		EUR LIBOR		GBP LIBOR		SOR		THBFIX	
Derivatives (Notional amount)	USD	8,791,322		-		-		-	SGD	777,128	THB	5,119,580

Unit: In Thousands of US Dollars/Thousands of JPY Dollars/Thousands of EUR Dollars/Thousands of GBP Dollars/Thousands of SGD Dollars/Thousands of THB dollars

(iv) Transferred financial assets that are not fully derecognized

The transactions, relating to transferred financial assets not qualifying for full derecognition, the Bank and subsidiaries conduct during daily operation mostly involve securities lending in accordance to repurchase agreements. Since the right to receive contractual cash flow has been transferred to others and the Bank and subsidiaries' obligation to repurchase the transferred assets for a fixed price at a future date is recognized under liabilities, the said transferred assets are not fully derecognized.

(v) Offsetting financial assets and financial liabilities

The Bank and subsidiaries have an exercisable master netting arrangement or similar agreement in place with counterparties. When both parties reach a consensus regarding net settlement, the aforesaid exercisable master netting arrangement or similar agreement can be net settled by offsetting financial assets and financial liabilities. If not, the transaction can be settled at the total amount. In the event of default involving one of the parties, the other party can have the transaction net settled.

The following tables present the aforementioned offsetting financial assets and financial liabilities.

- (vi) Capital management
 - 1) Capital management goal and procedure

The goal of the Bank's capital management is to meet the regulatory requirement on capital adequacy and the organization's target of maximizing returns for shareholders by implementing the capital management procedures and improving the efficiency of capital utilization.

Both short-term and long-term capital demands shall be considered in capital planning. The annual capital plan shall be drawn with reference to the business plan, the internal planning referenced indicators of each capital ratio, current and future estimated capital demands, and committed returns for shareholders of the Bank. A backup plan shall also be established to fulfill unplanned capital demands. The Bank also regularly conducts stress tests and scenario simulation analyses to calculate capital ratios, fully taking into account external conditions and other factors, including potential risks, changes in financial markets, and other events impacting risk taking capabilities, to make sure that the Bank can maintain adequate capital in case of detrimental events and huge market changes.

Planning for yearly earnings distribution follows the principles and a ratio mandated by the articles of incorporation and dividend policy, and is put into effect after being approved by the Board of Directors on behalf of the shareholders'. Capital adequacy, potential investment needs, and dividend amount of previous years are taken into account. The needs to maintain proper financial ratios and satisfy fund requirement of the parent company are also preconditions of the distribution.

2) Definition and regulation

The regulator of the Bank is the FSC of the Republic of China, and the Bank follows the "Regulations Governing the Capital Adequacy and Capital Category of Banks" issued by the FSC.

According to the regulations aforementioned, the ratio of regulatory capital to riskweighted assets (hereinafter referred to as the "capital ratios") shall mean common equity tier 1 ratio, Tier 1 capital ratio, and total capital adequacy ratio. Besides calculating these stand-alone capital ratios of the Bank, it should also calculate capital ratios by consolidating its investments in subsidiaries in financial statements prepared in accordance with IFRS 10, and the stand-alone and consolidated capital ratios should follow Section 5 of Paragraph 1 of Article 2 of the "Regulations Governing the Capital Adequacy and Capital Category of Banks."

3) Regulatory capital

The Bank's regulatory capital is divided into net Tier 1 Capital and net Tier 2 Capital following the "Regulations Governing the Capital Adequacy and Capital Category of Banks":

- a) Net Tier 1 Capital: The aggregate amount of net Common Equity Tier 1 and net additional Tier 1 Capital.
 - Net common equity Tier 1 Capital: Primarily consists of the aggregate amount of Common stock and its additional paid in capital, Capital collected in advance, Capital surplus, Legal reserve, Special reserve, accumulated profit or loss, Non-controlling interests, and Other equity interest items, minus intangible assets, deferred income tax assets due to losses from the previous year, the insufficiency of operational reserves and loan loss provisions, the revaluation surplus of real estate, and statutory adjustment items calculated in accordance with "the Methods for Calculating Bank's Regulatory Capital and Risk Weighted Assets."
 - Net additional Tier 1 Capital: Consists of the aggregate amount of noncumulative perpetual preferred stock and its additional paid in capital, noncumulative perpetual subordinated debts, additional Tier 1 Capital issued by the Bank's subsidiaries and not directly or indirectly held by the Bank, minus statutory adjustment items calculated in accordance with "the Methods for Calculating Bank's Regulatory Capital and Risk Weighted Assets."
- b) Net Tier 2 Capital: Consists of the aggregate amount of cumulative perpetual preferred stock and its additional paid in capital, cumulative perpetual subordinated debts, convertible subordinated debts, long-term subordinated debts, non-perpetual preferred stock and its additional paid in capital, the increase in retained earnings when fair value or re-estimated value is adopted as deemed cost for the first-time adoption of IFRSs on premises, 45% of unrealized gains on changes in the fair value of investment properties using fair value method, as well as the 45% of unrealized gains on financial assets measured at fair value though other comprehensive income, operational reserves and loan-loss provisions, and Tier 2 Capital issued by the Bank's subsidiaries and not directly or indirectly held by the Bank, minus statutory adjustment items calculated in accordance with " the Methods for Calculating Bank's Regulatory Capital and Risk Weighted Assets."

The Bank issues different capital instruments via versatile venues to maintain a sound capital structure. The Bank does not provide holders of such capital instruments with relevant financing. Subsidiaries of the financial holding company, to which the Bank belongs, do not own such capital instruments.

The regulator examines a Bank's capital category in accordance with capital ratios and net worth to total assets. When the Bank's capital is graded as inadequate capital, significantly inadequate capital or seriously inadequate capital by the regulator, the regulator shall take prompt corrective actions pursuant to Sections 1 to 3, Paragraph 1, Article 44 2 of the Banking Act.

The aforementioned regulations governing categories issued by the regulator follows the new BASEL capital agreement issued by Bank for International Settlements. A brief description of three pillars of the agreement and the Bank's compliance with them is as below:

i) Pillar 1

Pillar 1 covers the capital requirement for credit risk, market risk, and operational risk.

- 1. Credit risk measures bank's risk of financial loss resulting from borrowers, guarantors or counterparties' failure to repay or meet contractual obligations. The scope of credit risk includes the default risk arises from on and off-balance sheet assets as well as counterparty credit risk. The capital requirement calculation includes standardized approach and internal ratings based (IRB) approach, while the Bank adopts standardized approach for regulatory capital.
- 2. Market risk is the risk that the Bank's earnings, capital, or its ability to meet business objectives will be adversely affected by changes in the level, volatility, correlation, or liquidity of market risk factors, such as interest rate (including credit spread), foreign exchange, equity and commodity. Market risk capital methods include standardized approach and internal model approach. The Bank adopts standardized approach in the calculation of required capital.
- 3. Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including legal risk but excluding strategic and reputational risk. Methods used to measure required operational risks capital charges are Basic Indicator Approach (BIA), Standardized Approach (SA), Alternative Standardized Approach (ASA), and Advanced Measurement Approach (AMA). The Bank adopts Standardized Approach that divides business activities into 8 business lines and multiplies each line's gross income with its Beta Factor to obtain the capital charge.
- ii) Pillar 2

Pillar 2 ensures that each bank has a sound internal assessment process and is able to forecast its capital adequacy based on the thorough assessment of bank risks, and that, with proper regular monitoring, regulatory capital matches the overall risk characters.

For compliance with regulatory monitoring of capital adequacy, the Bank conducts regular filing of capital adequacy self-assessment and various risks management every year in accordance with regulatory mandate.

iii) Pillar 3

Pillar 3 involves Market Discipline and requires banks to disclose detailed information on risk, capital, and risk management for the improvement of banking information transparency. To comply with pillar 3 – Market Discipline, the Bank has disclosed "Capital Adequacy and Risk Management Report" on its website for the disclosure of qualitative and quantitative information.

4) Capital adequacy ratios of the Bank and subsidiaries

Analyzed items		Period	December 31, 2021 (Note)	December 31, 2020

	Total amount o	of risk weighted assets	2,505,150,252	2,379,292,01
Capital adequacy	ratio		14.63 %	14.61
Ratio of common	equity to risk	weighted assets (%)	11.50 %	11.95
Ratio of tier 1 ca	pital to risk wei	ghted assets (%)	12.80 %	13.09
Leverage ratio			6.19 %	6.60

Note: In capital adequacy ratios of the Bank and subsidiaries, the ratio of LH Financial Group Public Company Limited is calculated by the regulator of Thailand Banks based on the Basel regulations.

- (ar) Structured entities that are not included in consolidated financial reports
 - (i) The table below presents the types of structured entities that the Bank and subsidiaries do not include in consolidated financial reports but in which they hold an interest.

The types of structured entities	Nature and purpose	Interests held by the Bank and subsidiaries
Asset-backed securities	Securitizing financial or non- financial assets and issuing them to raise funds.	Investing or lending in securities issued by these entities.
Private fund	Raising funds to create investment opportunities in a variety of assets.	Investing in funds issued by these entities.

(ii) The scales of structured entities not included in consolidated financial reports were as follows:

	December 31,	December 31,
	2021	2020
Asset-backed securities	\$ 235,583,906,024	184,428,851,636
Private fund	24,576,248	29,264,174

(iii) The carrying amounts of interests held by the Bank and subsidiaries in these structured entities were as follows:

		ecember 31, 2021	December 31, 2020	
Assets held by the Bank and subsidiaries				
Financial assets measured at fair value through profit or loss	\$	5,346,417	597,935	
Financial assets measured at fair value through other comprehensive income		47,090,876	63,943,022	
Loans-net		5,960,556	-	
Investment in debt instruments at amortized cost		64,077,534	47,995,225	
Investment under equity method		386,458	117,168	
Other financial assets – net	_	867,054		
Total assets held by the Bank and subsidiaries	\$	123,728,895	112,653,350	

The maximum amount of risk exposure the Bank and subsidiaries endure to a loss incurred from special purpose entities that are not included in consolidated financial reports is the carrying amount of interests held by the Bank and subsidiaries.

(iv) As of December 31, 2021 and 2020, the Bank and subsidiaries have not provided any financial support to their special purpose entities that are not included in consolidated financial reports.

Other items in custody	27,551,055	368,161
Total	\$ <u>5,081,098,033</u>	4,755,603,907

As of December 31, 2021 and 2020, the credit amount of the cancellable loan commitments of the Bank and subsidiaries were \$1,914,036,142 and \$1,439,047,127, respectively.

The Bank renewed the services contract of information resources with International Business Machines, authorizing a five years and four months contract term commencing from September 1, 2017, and ending on December 31, 2022, in the amount of \$2.67 billion, which comprises a host computer lease fee, an authorization fee, and an annual software maintenance fee.

The Bank was designated by the Ministry of Finance (the "MOF") as the issuing institution for the fourth term of public welfare lottery. The periods of the term are from January 1, 2014 to December 31, 2023. The Bank was authorized to arrange and issue traditional lottery, scratch and win lottery, and computerized lottery tickets. For the fourth term of public welfare lottery, the Bank receives a commission for issuing lottery tickets, representing 4.35% of the total lottery sales amount. The commission will be settled monthly. And the Bank's profit will be what remains after a fixed payment of \$2,700,000 to the MOF per year. Furthermore, in order to ensure that the lottery prize payout rate is not greater than 60% of the lottery issuing amount, the Bank created a transitional monitoring account, provision for the lottery prize and the Bank adopted appropriate risk control strategies.

On May 31, 2013, the Bank signed a contract with LotRich Information Co. for lottery software, hardware purchase and establishment and maintenances services amounting to \$2,322,756 within which \$1,633,851 was for software service. The maintenance service started from May 31, 2013 to the redemption date of the last lottery ticket issued in December 2023. The service will be finished as all the settlement, consignment and aftermath of the work have been done.

The Bank entrusted Taiwan Lottery Co., Ltd. to operate the public welfare lottery's ticket issuing, sales, promotion, drawing, payment of prize, and management, with a contract period from November 11, 2013, and ending on June 30, 2024. The Bank will disburse 4.35% of the total lottery sales amount as commission to Taiwan Lottery Co., Ltd. The Bank agreed that Taiwan Lottery Co., Ltd. can receive a reward, amounting to the commission revenue after the deduction of value-added tax (VAT), rebates and direct costs incurred for the lottery business, and the addition of marginal benefits, if the balance is positive. Otherwise, Taiwan Lottery Co., Ltd. should pay for the discrepancy, if the balance is negative. On May 20, 2015, the reward calculation was revised by deleting the addition of marginal benefits, and was retroactively applied from January 1, 2015.

On November 6, 2015, the Bank signed with Zile Development Co., Ltd. (BVI) and Shuohe Development Co., Ltd. a contract of joint construction for a building on the land, zone 18 at Xinyi section 4, Xinyi District, Taipei City. The Bank will retain 5% of the rights of the land for joint construction, get 5% of the whole construction area of the new building and the corresponding land, and burden 5% of the costs of construction based on purchase contract and joint construction. As of December 31, 2021, the Bank has paid \$253,632.

As of December 31, 2021, the unpaid amounts of the committed investment facility of signed private fund contract of the Bank and subsidiaries were JPY 1,809,331 thousand.

(c) Other significant legal matters

(i) Structured Notes

From September to December in 2005, the Bank's Hong Kong branch ("HK Branch"), purchased structured notes ("Overseas Structured Notes") in a total par value of US\$390 million from Barclays Bank PLC with the approval of the Bank's Board of Directors. When CTBC Financial Holding Co., Ltd ("CTBC Holding") intended to invest in Mega Financial Holding Company in 2006, the Overseas Structured Notes must be sold in order that the Bank would not violate the 5% shareholding ceiling in another single company set on a commercial bank in the Banking Act of the Republic of China. The HK Branch thus sold the Overseas Structured Notes at the market price to Red Fire, a special purpose vehicle acquired by the then president of the Bank's corporate banking department (i.e., Mr. xxx Chen). In the sale of the Overseas Structured Notes, the Bank earned a profit of US\$8.448 million. Through the redemption of the Overseas Structured Notes from Barclays Bank PLC, Red Fire had a profit of US\$30.47 million, among which an amount about US\$9.50 million was, for certain unknown reasons, remitted into an account controlled by Mr. Chen, and the balance about US\$20.90 million had been remitted to CTBC Holding's overseas subsidiary, CT Opportunity Investment Company. Pursuant to the request of Financial Supervisory Committee ("FSC"), CTBC Holding's directors advanced US\$30.47 million to the Bank in September 2006 so as to allow a smooth development of business operations. Given that the amount so advanced is far more than the amount about US\$9.50 million (which was not remitted to CTBC Holding's overseas subsidiary), the Bank had thus suffered no losses.

Per a letter dated April 28, 2011 from two directors of CTBC Holding (i.e., Chung Cheng Investment and Kuan Ho Construction & Development), they realized that the Bank suffered no losses in its sale of Overseas Structured Notes, based on the Analysis Report on the Sale of Structured Notes to Red Fire by the Bank's Hong Kong Branch ("Analysis Report") attached to CTBC Holding's letter dated March 30, 2011 (with a reference number of Chung Hsin Chin 1002243570005), and they further indicated that as stated in the Analysis Report, without the ground that the Bank suffered losses pursuant to which an agreement dated February 9, 2009 was signed between CTBC Holding and these two directors, the Bank was thus urged to negotiate with them for a reasonable solution. The Bank sent a letter dated August 16, 2011 to Chung Cheng Investment and Kuan Ho Construction & Development asking them to waive their right of claim arising from the advancement of US\$30.47 million made in September of 2006. These two directors responded and agreed to waive on August 18, 2011, but they requested that the Bank should apply the US\$20.90 million proceeds to loans for emergency assistances and charities, and the Bank should transfer US\$9.57 million to CTBC Holding so as to make up the losses recognized by CTBC Holding which arose from the investment made by CTBC Holding's overseas subsidiary, CT Opportunity Investment Company. In this regard, the Bank and these two directors would have to further negotiate, as the Bank has yet made the aforesaid applications about the US\$20.90 million, but these two directors still insisted so. Furthermore, Red Fire was deemed as CTBC Holding's special purpose vehicle as Red Fire's profits would ultimately belong to CTBC Holding based on the investigation conducted by CTBC Holding and the opinion of the legal counsel appointed by CTBC Holding. As manifested in the fund flow, none of the ex-chairman of the Bank, Mr. Koo and the other three employees involved in the litigation had acquired any gains personally.

After this case was appealed for the third instance, the Supreme Court, in August of 2014, revoked the judgment made by the High Court and a re-trial by the High Court was ordered ("first retrial"). In the judgment made by the first retrial on September 12, 2018, a defendant was judged not guilty and the other three were guilty. All of the defendants judged guilty and the Taiwan High Prosecutors Office had appealed against the judgment. On November 14, 2019, the Supreme Court revoked the guilty judgment made by the first retrial on the defendants (i.e., Koo, Chang and Lin) and a second retrial by the High Court was ordered ("second retrial"), and the non-guilty judgment on the defendants rendered by the first retrial has affirmed. In the judgment made by the second retrial on April 28, 2021, the defendants were judged not guilty (i.e., Koo, Chang and Lin). Prosecutors have filed an appeal against the judgment made by the second retrial. Given this, this case is not yet completely final and conclusive. According to the opinion of the legal counsel retained by CTBC Holding, "The profits of US\$20.90 million from the redemption of the structured notes by Red Fire have been remitted to CT Opportunity Investment Company, an overseas subsidiary of CTBC Holding. In addition, two directors of CTBC Holding have advanced US\$30,474,717 to CTBC Bank. Given that the total of the aforesaid two amounts is far more than the profits realized by Red Fire from the redemption of the structured notes, CTBC Holding has thus suffered no losses. Furthermore, as far as the legal liability is concerned, since this case is a criminal one, even if certain defendants were judged guilty, such judgment would not apply to CTBC Holding as a corporate entity. Besides, the guilty judgment has yet been final. Hence, the judgment has no material adverse impact upon the financial conditions or business operations of CTBC Holding, and would not affect the fact that CTBC Holding suffers no losses or damages." It is thus assessed that this case has no material impact upon the operation and shareholders' interests of the Bank.

The Taiwan High Prosecutors Office filed a petition to the High Court on July 6, 2016 against CTBC Holding trying to recover NT\$261,696,000 illegal income arising from the stock price manipulation conducted by CTBC Holding. The High Court for the 1st retrial notified CTBC Holding to attend the court hearings as a third interested party. CTBC Holding is of the opinion that this case has no such act of stock price manipulation and there is no illegal income. A legal counsel has been retained to claim so in the High Court for the 1st retrial. In its judgment made by the High Court for the 1st retrial on September 12, 2018, CTBC Holding's property should neither be confiscated nor pursued on the ground (among others) that this case has no such act of stock price manipulation and there is thus no illegal income. Regarding the judgment of no confiscation of CTBC Holding's property made by the High Court for the 1st retrial on September 12, 2018, the Supreme Court revoked it and ordered a second retrial on the ground that even the prosecutor did not appeal to the Supreme Court against the "no confiscation" judgment, the appeal nonetheless applies to this issue. In order to avoid a conflict of judgments respectively made by the 1st retrial court and the 2nd retrial court as far as the "confiscation" issue is concerned, the Supreme Court thus revoked the "no confiscation" judgment and ordered a 2nd retrial. In the judgment made by second retrial on April 28, 2021, CTBC Holding's property should neither be confiscated nor levied. Prosecutors have filed an appeal against the judgment made by the second retrial. Hence, the "no confiscation" judgment is not yet final.

(ii) NPLs and Transaction of Chengcing Lake Building

As to the indictment brought by the prosecutor of the Taipei District Prosecutors Office on August 26, 2019 about the transaction of real property and non-performing loans between the Bank and its related parties (i.e., Tectonics Laboratories Co., Ltd. and other companies) in 2005 and 2006, the legal counsel appointed by CTBC Holding opined that "Keshin Company, Lilin Company and Tectonics Laboratories Co., Ltd. were all special purpose vehicles indirectly owned by CTBC Asset Management Co., Ltd., therefore the profits arising from the transactions between the aforesaid three companies and CTBC Bank or CTBC First Asset Management Co., Ltd., a subsidiary of CTBC Asset Management Co., Ltd. should ultimately belong to CTBC Holding. Because the non-performing loans of Fengshan Credit Union were sold by CTBC Bank within the appraise value range, there thus were no losses or damages. Given that the other three transactions of non-performing loans had been canceled and the payments thereof had been returned to CTBC Bank, no losses or damages would have been made to CTBC Holding or CTBC Bank. According to the data provided by CTBC Holding, the profits derived from the sale of Chenghu Building had been remitted to CT Opportunity Investment, a subsidiary of CTBC Asset Management Co., Ltd. and had ultimately been returned to CTBC Holding. Given this, the transaction of Chenghu Building had caused no losses or damages to CTBC Holding and CTBC Bank." Based upon the aforesaid legal opinion, it is thus assessed that this case has no material impact on the operations and shareholders' interests of the Bank.

(iii) Neihu Land and Building

Regarding the transaction in which the Bank purchased three lots of land in Neihu, Taipei and the buildings thereon (consisting of administration building and computer facilities) and from which Mr. xxx Chang and others earned improper price differences, the Taipei District Prosecutors Office brought an indictment on January 12, 2017 and an additional indictment against another employee on January 4, 2018. All defendants indicted on January 12, 2017 were judged guilty and they have appealed. As to the additional indictment made on January 4, 2018, the employee in question was judged not guilty by the Taipei District Court on June 4, 2019 and the prosecutor has filed an appeal against such judgment; thus the case is still in progress as of the reporting date. In respect of the guilty judgment, the legal counsel retained by CTBC Holding opined in writing: "CTBC Bank made the aforesaid purchase of the administration building and computer facilities with the approval of its Board of Directors and it had in advance hired professional institutions to give an appraisal price for reference. Even if the court doubted that the appraisal institutions failed to appraise the real property objectively, it did not object the appraisal conclusion. Given that (1) the purchase prices were less than the appraisal prices and (2) the purchase prices did not exceed the ceilings set by the Board of Directors of CTBC Bank, it could be proven that the purchase prices were comparable with the then reasonable prices and the employees-in-charge had followed the resolution of the Board of Directors without breaking the law. It may therefore be concluded that CTBC Bank suffered no losses or damages from the said transaction. Furthermore, as far as the legal liability is concerned, since this case is a criminal one, even if defendants were judged guilty, such judgment would not apply to CTBC Bank as a corporate entity. In addition, this has yet been final. Hence, the guilty judgment has no material adverse impact upon the present financial conditions or business operations of CTBC Bank or CTBC Holding." Regarding the issue raised in the guilty judgment that Yongyue Development Co., Ltd. is a related party to the Bank and the transaction in question should be disclosed in the financial statement of the Bank

and CTBC Holding, the Board of Directors of CTBC Holding requested the department-incharge together with a legal counsel to analyze and report. The analysis report manifests: "In our opinion, Mr. Chang in substance is not a person-in-charge and he has no controlling power over CTBC Bank's policies or operations. The process and price of the purchase transactions in question had been made in accordance with the law. Besides, Mr. Chang did neither attend the board meeting in which the transaction in question was reviewed nor participate in the formation of decision about purchasing the real property in question." The legal counsel further opined: "According to the Regulations Governing the Acquisition and Disposal of Assets by Public Companies, Article 45 of the Financial Holding Company Act, CTBC Bank's Regulations Governing Transactions (other than credit extensions) by Quasi-Related Parties of CTBC Bank as amended on July 31, 2013, Regulations Governing the Preparation of Financial Statements by Issuers of Securities, Regulations Governing the Preparation of Financial Statements by Banks, and IAS 24, Mr. Chang is not, in form or in substance, a related party or quasi-related party of CTBC Bank."

"Ms. Woo, a shareholder of Yongyue Development Co., Ltd (also the ultimate beneficiary) and the spouse of Mr. Chang's younger brother, has taken no position of decision making power as stipulated in the aforesaid regulations and has no such identity as stated in Para. 9 of IAS (Part A). Thus, Ms. Woo is not a related party or quasi-related party of CTBC Bank." As stated in the aforesaid analysis report and legal opinion, Mr. Chang is not a person-in-charge in substance of the Bank and is neither a related party nor a quasi-related party of the Bank in form or in substance. Even if Mr. Chang is deemed as a person-in-charge in substance of the Bank, Ms. Woo, as a second-degree relative (in marriage) of Mr. Chang, should not be deemed as a related party or a quasi-related party of the Bank, in accordance with Para. 9 of IAS (Part A).

The legal counsel concluded "Regardless the guilty judgment has yet been final, the evidences as referred to in the judgment are not strong enough to support the point that Mr. Chang managed Yongyue in substance. Besides, the profits earned by Yongyue are irrelevant to Mr. Chang. As such, the transaction between CTBC Bank and Yongyue is not a related-party transaction as far as CTBC Bank or CTBC Holding is concerned and thus, there is no need to disclose such deal in the financial statement."

"From the evidences as stated in the guilty judgment, (1) it cannot conclude that Mr. Chang is the person managing Yongyue in substance, as mentioned above, and (2) neither Mr. Chang nor Ms. Woo is a related party or quasi-related party of CTBC Bank. We may say that Yongyue is not a related party or quasi-related party of CTBC Bank, the transaction in question between Yongyue and CTBC Bank is not a related-party transaction and accordingly, there should be no need for CTBC Holding to disclose such transaction in its quarterly or annual financial statement as a related-party transaction. It may conclude that there is no such illegal misstatement in the financial statement." Based upon the aforesaid legal opinion, given that (1) the purchase prices were comparable with the then reasonable prices and the employees-in-charge had followed the resolution of the Board of Directors without breaking the law. It may therefore be concluded that the Bank suffered no losses or damages from the said transaction. In addition, neither Mr. Chang nor Yongyue is a related party or quasi-related party of the Bank. There should be no need for CTBC Holding to disclose such transaction in its quarterly or annual financial statement as a related-party transaction. It may conclude that there is no such illegal misstatement in the financial statement. It is thus assessed that this case has no material impact on the operations and shareholders' interests of the Bank.

(iv) Tainan Real property

As stated in a press release on September 12, 2019, the Taipei District Prosecutors Office made an indictment relating to a sale by the Bank of a real property located in Tainan in 2012. The legal counsel retained by CTBC Holding opined that since (1) the Bank had hired a professional appraisal company to appraise before the transaction, (2) the sale price was higher than (a)the appraisal price and (b)the book value shown in June 2012, (3) the transaction in question was duly made in accordance with the Bank's approval process, the transaction in question was made in due process following the Bank's internal rules and relevant laws and regulations and the Bank had suffered no losses or damages. It is thus assessed that this case has no material impact on the operations and shareholders' interests of the Bank.

(v) Ex-Xinyi Headquarter Building

Regarding the transaction in which the Bank sold 95% of its holding in the land at Songshou building (i.e., Ex-Xinyi headquarter building) in Taipei on November 6, 2015, the legal counsel retained by CTBC Holding opined that the Bank sold the land by way of public tender, Cushman & Walkfield was appointed to carry out the public tender, and Baker & McKenzie was also retained to monitor the whole process. The Bank had hired two professional appraisal companies to conduct appraisals in advance and the floor price for the public tender was set at the average of two appraisal prices. The transaction in question had been approved by the Bank's audit committee and Board of Directors. The sale price was higher than the floor price set for the public tender. A public announcement about its board approval and the sale had been made by the Bank. The transaction in question had been made duly in accordance with relevant laws and regulations and the Bank's internal rules, and the Bank suffered no losses or damages. The non-prosecution rulings of relevant employees of CTBC Holding and CTBC Bank were final on October 8, 2020, except for Mr. Chang's, whose case was remanded to the Taiwan Taipei District Prosecutors Office for further investigation by the Taiwan High Prosecutors Office.

- (10) Losses Due to Major Disasters: None
- (11) Subsequent Events: None
(12) Other:

(a) Profitability

Unit: %

Items		December 31, 2021	December 31, 2020
Return on assets ratio (annual)	Before income tax	0.75	0.74
	After income tax	0.63	0.62
Return on equity ratio (annual)	Before income tax	11.21	10.38
	After income tax	9.47	8.77
Net income ratio		28.27	27.57

Note 1: Return on assets ratio = Net income before/after income tax \div average total assets.

- Note 2: Return on equity ratio (excluding non-controlling interests) = Net income before/after income tax \div average total stockholders' equity.
- Note 3: Net income ratio = Net income after income tax \div Net revenue.
- Note 4: Net income before/after tax represented accumulated income of current year.
- (b) The income and expenses arising from the joint marketing operation and information interoperability amongst the Financial Holding Company's subsidiaries were allocated as follows:

The Bank and Taiwan Life Insurance Co., Ltd. ("Taiwan Life") have gained from the joint business promotion. The bonus for co-marketing with Taiwan Life is shared based on annual commission rate agreed between the Bank and Taiwan Life for each insurance product.

The aforesaid allocations of revenue and expenses are disclosed in Note 7.

(c) Information of merger and acquisition of LH Financial Group Public Company Limited :

LH Financial Group Public Company Limited was originally an associate invested by the Bank. During the fiscal year of 2021, the Bank has purchased the equity of LH Financial Group Public Company Limited further via cash, increased the ownership to 46.61%, and acquired control over it on October 25, 2021, resulting in LH Financial Group Public Company Limited to be one of the Bank's subsidiaries.

From the acquisition date to December 31, 2021, the net revenue and net loss contributed by LH Financial Group Public Company Limited were \$542,588 and \$180,573 thousand, respectively. If the merger and acquisition happened on January 1, 2021, the management estimated the net revenue and net loss of the Bank and subsidiaries would have been \$110,599,748 and \$31,231,726 thousand, respectively. When determining the aforementioned estimated amount, the management assumes that the acquisition happened on January 1, 2021. Moreover, the management also assumes that the temporary fair value adjustment will be the same.

The difference between main categories of the consideration transferred, and the LH Financial Group Public Company Limited's assets and underlying liabilities were recognized bargain purchase gains on the acquisition date as follows:

Items		Amount
Fair value of merger and acquisition	\$	19,202,447
Non-controlling interests	_	22,430,217
Total consideration		41,632,664
Fair value of assets		224,330,642
Fair value of liabilities	_	(182,320,982)
Less: Total fair value of net assets		42,009,660
Bargain purchase gains		376,996
Remeasurement gains of original holding of LH Financial Group Public Company Limited	_	12,768
Total interest of merger and acquisition	<u>\$</u>	389,764

The Bank and subsidiaries remeasured the fair value of equity of LH Financial Group Public Company Limited, which the Bank and subsidiaries had already held on the acquisition date, resulting in the Bank and subsidiaries to recognize the gain amounting to \$12,768 thousand, recognized as "Proportionate share of gains from associates or joint ventures under equity method" in the consolidated statements of comprehensive income for the year ended December 31, 2021.

The Bank and subsidiaries recognized the bargain purchase gains as "Other net non-interest income (losses)" in the consolidated statements of comprehensive income for the year ended December 31, 2021 on the acquisition date.

Independent Auditors' Report

To the Board of Directors of CTBC Bank Co., Ltd.:

Opinion

We have audited the financial statements of CTBC Bank Co., Ltd. ("the Bank"), which comprise the balance sheets as of December 31, 2021 and 2020, the statements of comprehensive income, changes in stockholders' equity and cash flows for the years ended December 31, 2021 and 2020, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at December 31, 2021 and 2020, and its financial performance and its cash flows for the years ended December 31, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, Regulations Governing the Preparation of Financial Reports by Securities Firms, and Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants, Jin Kuan Yin No.10802731571 issued by the Financial Supervisory Commission, and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

Emphasis of Matter

The judicial cases are stated in Note 9(c). Part of judicial cases are still under investigation by the judiciary, and the results remain uncertain. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the year ended December 31, 2021. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In our judgment, the key audit matters which should communicate through the auditors' report were as follows:

1. Assessment of the fair value of financial instruments

Please refer to Note 4(e) for the related accounting policies of the assessment of the fair value of financial instruments, Note 5 for the accounting assumptions and estimation uncertainty, and Note 6(ao) for the other details.

Description of key audit matter:

Parts of the financial instruments owned by the Bank as of December 31, 2021 were valued via evaluation model due to the lack of transaction prices at active market, and parts of the referred input values could not be obtained from the public market. Thus, it demands significant professional judgments from the management by using different valuation techniques and assumptions for input values. Therefore, the assessment of fair value of financial instruments is one of the key audit matters.

How the matter was addressed in our audit:

Our principal audit procedures included: Testing the management's control procedures over the classification, measurement and disclosure of fair value of financial instruments, including evaluating how the management determines the classification of financial instruments, chooses the appropriate evaluation method and decides the prime parameter hypothesis, and confirming that the presentation and disclosure of financial instruments are in accordance with the International Financial Reporting Standards (IFRSs). For financial instruments with active market prices, we used sampling test to assess the appropriateness of public quoted prices. As to financial instruments using evaluation model to measure their fair value, we used sampling test to confirm the appropriateness of the evaluation method and the prime input values used by the management.

2. Impairment of loans and receivables

Please refer to Note 4(e) for the related accounting policies of impairment of loans and receivables, Note 5 for the accounting assumptions and estimation uncertainty, and Note 6(h), (i), (j) and (ao) for the other details.

Description of key audit matter:

The management assessed the expected credit loss (ECL) of loans and receivables by identifying whether the credit risk of credit assets has significantly increased since initial recognition, then dividing ECL into 12-month ECL and lifetime ECL, and dividing them into collective assessment and individual assessment to measure them by using different impairment methods. For collective assessment, the impairment is calculated by establishing an impairment model and using the past loss experience, current market conditions and forward-looking estimation on assets with similar credit risk characteristic to form basic estimation. For individual assessment, the measurement is based on expected future recoverable cash flows. The aforementioned measurement methods involved significant professional judgments and estimation by the management; therefore, the impairment of loans and receivables is one of the key audit matters.

How the matter was addressed in our audit:

Our principal audit procedures included: Understanding the methodology and related control procedures on how the management assesses and measures the impairment amount of loans and receivables. For collective assessment, we assessed the impairment model adopted by the management and reviewed the appropriateness of the calculation of the impairment parameters (including probability of default, loss given default, exposure at default and recovery rate) via sampling. For individual assessment, we used sampling test to assess the appropriateness of the estimation of future recoverable amounts and the value of collateral. Meanwhile, we assessed whether the allowance for loans and receivables meets the regulation requirement.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Public Banks, Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Futures Commission Merchants and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including audit committee) are responsible for overseeing the Bank's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.

- 5. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of the investment in other entities accounted for using the equity method to express an opinion on the financial statements. We are responsible for the direction, supervision and performance of the audit and developing the Bank's audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Wu, Lin and Tzang, Kuo-Yang.

KPMG

Taipei, Taiwan (Republic of China) March 15, 2022

Notes to Readers

The independent auditors' audit report and the accompanying financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of the English and Chinese language independent auditors' audit report and financial statements, the Chinese version shall prevail.
