#### 3. INTERNATIONAL CLAIMS DISCLOSURE

Figures in HKD millions

The following tables analyse international claims by location and types of counterparties. Country or geographical segment classification is based upon the locations of counterparties after taking into account any recognised risk transfer. They are prepared in accordance with the Completion Instructions for the "Return of International Banking Statistics". Countries or geographical segments constituting not less than 10% of the total international claims are disclosed.

| Forward sales              | (26,188)   | (22,086)   | (1,573)    | -          | (2,211)       | (52,058)     |
| Net options position       | -          | -          | -          | -          | -             | -            |
| Net long (short) position  | <u>490</u> | <u>121</u> | <u>22</u>  | <u>-</u>   | <u>(30)</u>   | <u>603</u>   |

The net options position is calculated on the basis of the delta-weighted position of options contracts. There were no foreign currency structural position as at the above respective reporting dates.

### VI. LIQUIDITY DISCLOSURE

#### GOVERNANCE

The Board of Bank SinoPac defines the overall liquidity risk management framework and delegates the execution and implementation of liquidity risk management functions to the Asset Liability Committee (ALCO). The framework and structure of the group assets and liabilities management are written in Bank SinoPac's policy document, "Assets and Liabilities Management Policies". ALCO of Hong Kong Branch executes its functions under the supervision of head office ALCO.

ALCO of Hong Kong Branch is composed of the Branch chief executive, branch manager, treasurer, and head of risk management, heads of accounting, operations, internal audit, and representatives from head office.

#### LIQUIDITY RISK TOLERANCE

The Branch follows Head Office defined liquidity risk appetite and maintains sufficient liquidity to meet operations and regulatory requirements. An additional safety margin of 5% is added on top of the minimum Liquidity Maintenance Ratio (LMR) regulatory requirement. 30% LMR is the minimum liquidity risk tolerance level that the Branch has to meet on daily basis.

The Branch also makes use of cash flows models and stress testing computation tools to estimate the available liquidity resources and gaps over a period of time and set up corresponding gap limits. These are the liquidity risk levels in different maturity tenors that the Branch can take and tolerate in order to pursue the Branch's business activities and at the same time meeting the regulatory obligations.

#### LIQUIDITY RISK MANAGEMENT

ALCO of the Branch establishes liquidity risk management policies and executes through the treasury functions of the Branch. Accounting department is responsible for preparing and reporting daily financial report and liquidity ratios. Risk Management department performs liquidity related stress tests, reviews the liquidity risk management policies and related measurement metrics on a regular basis and proposes amendment recommendations for ALCO of the Branch review and approval. ALCO of the Branch meets regularly on a monthly basis, reviewing the Branch latest liquidity situation and effectiveness of existing liquidity management strategies. Ad hoc meeting will be convened should emergent market or internal circumstances require an urgent decision. Meetings minutes are kept and circulated to the ALCO members and senior management in head office.

#### FUNDING STRATEGIES

The liquidity management strategies of the Branch are to establish and maintain locally stable sources of funding with effective diversification, maintain an active presence in the relevant market to ensure access to funding sources in a timely manner under both normal and stressed market conditions. Diversified sources of funding include not only stable customers deposits and certificate of deposits program, but also well-established inter-bank money market network and direct head office support.

To ensure the diversification of funding sources, a list of potential funding source providers is prepared regularly, along with internal assessment on their degree of reliability, the funding terms (such as interest rate, collateral requirements, borrowing tenors), and any implicit effect on using such funding measures. The list is regularly reported and reviewed in the ALCO of the Branch.

**LIQUIDITY MONITORING AND MITIGATION TOOLS**

**Liquidity Maintenance Ratio**

To monitor and mitigate liquidity exposure, the Branch has established a range of liquidity risk measurement metrics to monitor and control the liquidity exposure of the Branch. To ensure the average LMR stays above the 25% statutory requirement, the Branch sets an additional 5% internal safety margin. The Branch will take immediate actions if the LMR is below 30% internal limit. The LMR are disclosed as follows:

|  | %  | %  |
| Average liquidity maintenance ratio (LMR) for the period | <u>59.27</u>                                 | <u>50.57</u>                                 |

The branch's average liquidity maintenance ratio (LMR) for the period is based on the arithmetic mean of the average value of its LMR for each calendar month as reported in the liquidity position return submitted for the reporting period, which is computed in accordance with the Hong Kong Banking (Liquidity) Rules.

**Cash Flows Maturity Mismatch and Concentration Ratios**

The Branch has established a set of maturity gap limits for all individual currency with activities in the Branch to monitor the liquidity exposure of each currency in different maturity tenors. The Branch has also established an aggregate currency mismatch limit to control the overall currency mismatch positions of the Branch within 1-year maturity tenor. In addition, the Branch has set up concentration limits on deposits and swap activities to monitor stability and diversification of deposit base and avoid overreliance on funding from intragroup companies and funding swaps instruments in the financial market. For instance, the intragroup companies deposit and top 10 customers deposit constituted 0.5% and 29.1% respectively of the Branch total deposit base as of end of December 2020. The Branch total assets were only 10.5% funded by swap activities as of end of December 2020. The cash flow maturity mismatch positions and the on- and off-balance sheet items broken down into maturity bucket as of end of December 2020 are as follows.

**Cash flow maturity mismatch**

|                        | Next day | 2 to 7 days | 8 days to 1<br>month | > 1 month up<br>to 3 months | > 3 months up<br>to 1 year | Over 1 year |

\* The basis of compilation and maturity buckets follow information provided to the HKMA MA(BS)23 – Return on Liquidity Monitoring Tools.

#### Liquidity Stress Tests

The Branch performs liquidity stress tests on LMR and the assets and liabilities maturity gap positions on a regular basis to monitor the liquidity position of the Branch and its resilience to different stress situations. The assets and liabilities maturity gap positions are computed on cash flow basis, including derivatives instruments, with behavioral considerations taken on customer deposits run-off or early redeemed activities, loans rollover and default assumptions, as well as bonds realization conditions under different stress scenarios. Sensitivity analysis is also performed on the stressed results to measure the impact on LMR and maturity gap positions upon changes in the computation parameters. Target limits are set for the maturity gap positions under different stress scenarios and follow up actions will be taken if the limit is exceeded. Remedial actions include investigation of the reasons for excess and subsequent recommendation strategies to strengthen liquidity positions.

#### Liquidity Mitigation Tools

While upkeeping a stable and diversified funding deposit base, the Branch also maintains a sufficient cushion of unencumbered, liquid, and high-quality investment-grade bonds which can be readily liquidated in the secondary market to increase liquidity even in severe idiosyncratic and adverse market conditions. A liquidity cushion coverage ratio was set up in the Branch and has to maintain a minimum 20% of the Branch's Qualifying Liabilities. The size of liquidity cushion reflects and supports the Branch to meet its risk tolerance appetite and is considered sufficient to meet the funding gap generated from adverse market and liquidity stress conditions.

#### Contingency Funding Plan

The Branch also established a Contingent Funding Plan (CFP) to deal with any unforeseeable situation which could severely affect the liquidity position of the Branch. The plan is to provide a framework with a set of policies, procedures and actions plan for the Branch to access the fund providers and financial market efficiently. In addition, an ad hoc Liquidity Crisis Management Committee (LCMC) will be set up to execute the CFP policies and handle the day-to-day liquidity management under emergent situation. The duties of LCMC include but not restricted to maintaining close communication contact with regulators, fund suppliers, major customers and internal staff, implementing contingent funding strategies, closely monitoring the effectiveness of the strategies, and reporting the Branch liquidity positions to head office as well as the regulators.

Contingent funding strategies include revising the premium the Branch pays for the term fund, lengthening the borrowed fund maturities if possible, identifying unutilized collateral to make collateralized borrowing, temporarily stopping rollover of existing loans and extending interbank placement, and requesting head office funding support if required. The Branch did not trigger any CFP in 2020.

### VII. DISCLOSURE ON REMUNERATION

Pursuant to the disclosure requirement under the HKMA's Supervisory Policy Manual (CG-5) - Guideline on a Sound Remuneration System, please refers to the session "EMPLOYEE BENEFITS EXPENSE" in Bank's 2020 Annual Report page 55.
