1 Introduction

This unaudited quarterly regulatory disclosure complies with the Banking (Disclosure) Rules (“Rules”) under section 60A of the Banking Ordinance and the Financial Institutions (Resolution) (Loss-absorbing Capacity Requirements - Banking Sector) Rules (“LAC Rules”) under section 19(1) of the Financial Institutions (Resolution) Ordinance (“FIRO”).

References to “the Group” within this document means Standard Chartered Bank (Hong Kong) Limited (“the Bank”) and its subsidiaries.

These banking disclosures are governed by the Group’s disclosure policy, which has been approved by the Board of Directors. The disclosure policy sets out the approach to determine the content, appropriateness and frequency of the disclosures, the approach to ensure the relevance and adequacy of the disclosures, and the internal control over the process for making the disclosures. The disclosures have been subject to independent review in accordance to the disclosure policy.

According to the Rules and the LAC Rules, disclosure of comparative information is not required unless otherwise specified in the standard disclosure templates. Prior period disclosures can be found in the Regulatory Disclosure section of our website, www.sc.com/hk.

Basis of preparation

The consolidated capital ratios were calculated in accordance with the Banking (Capital) Rules of the Hong Kong Banking Ordinance. The basis and scope of consolidation for regulatory purposes is different from the basis and scope of consolidation for accounting purposes.

The Group uses the advanced internal ratings based (“IRB”) approach for both the measurement of credit risk capital requirements and the management of credit risk for the majority of its portfolios. The Group also uses the standardized (credit risk) approach for certain insignificant portfolios exempted from IRB. For counterparty credit risk, the Group uses the standardized (counterparty credit risk) approach (“SA-CCR”) to calculate its default risk exposures. For securitization exposures, the group uses the securitization internal ratings-based approach (“SEC-IRBA”), securitization external ratings-based approach (“SEC-ERBA”), securitization standardised approach (“SEC-SA”) or securitization fallback approach (“SEC-FBA”) to determine credit risk for its banking book securitization exposures.

For market risk, the Group uses the internal models approach (“IMM approach”) to calculate majority of its general market risk capital charge in respect of the risk categories of interest rates and foreign exchange (including gold) and uses the standardized (market risk) approach to calculate the general market risk capital charge for its equity exposures and commodity exposures, market risk capital charge on exempted foreign exchange exposures and the specific risk capital charge for its interest rate exposures and equity exposures. The Group also uses a stochastic asset-liability model approach for two guaranteed retirement funds. In addition, the Group adopts the standardized (operational risk) approach for operational risk.

Loss-absorbing Capacity Disclosures

Hong Kong LAC Rules came into operation on 14 December 2018. Following classification by the HKMA (as resolution authority), in scope entities are required under these rules to issue LAC instruments that can be written down or converted in the event of failure, and maintain minimum LAC resources.

The Group was notified by HKMA of its classification as a material subsidiary under the LAC rules with effect from 1 April 2019, with Standard Chartered PLC (“SC PLC”) as the non-HK resolution entity. Following this classification, the Group has met its minimum LAC requirements since 1 July 2019, and is now publishing LAC disclosures for the period ended 30 September 2022. The basis of calculating the Group’s LAC and RWAs is in accordance with the LAC Rules, with disclosures made using standard templates issued by the HKMA on 31 October 2019.

The Group’s LAC disclosures are included as part of this regulatory disclosure, while SC PLC’s LAC disclosures are included as part of its disclosures which can be found in the Investors section of SC PLC’s website, <https://www.sc.com>.

6c	If the capped subordination exemption applies, the amount of funding issued that ranks pari passu with excluded liabilities and that is recognised as external loss-absorbing capacity, divided by funding issued that ranks pari passu with excluded liabilities and that would be recognised as external loss-absorbing capacity if no cap was applied ²	Not applicable	Not applicable	Not applicable	Not applicable	Not applicable

¹ Increase in risk-weighted amount and exposure measure under the LAC Rules were in line with the increase in RWA and Leverage exposures

² The subordination exemptions in the antepenultimate and penultimate paragraphs of Section 11 of the FSB TLAC Term Sheet does not apply in Hong Kong under the LAC Rules.

2. Key prudential ratios and metrics (continued)

c. Key metrics – LAC requirements for non-HK resolution entity (at resolution group level) (KM2(B))

The following table shows information about SC PLC's total loss-absorbing capacity (TLAC) available, and TLAC requirements, applied at the resolution group level under a Single Point of Entry resolution strategy.

The numbers are disclosed in the functional currency of SC PLC which is US Dollars.

(i) the Relevant Hong Kong Resolution Authority notifying the Issuer in writing that the Relevant Hong Kong Resolution Authority is satisfied that the Issuer has ceased, or is likely to cease, to be viable and there is no reasonable prospect that private sector action (outside of resolution) would result in it again becoming viable within a reasonable period (in both cases, without taking into account the write-down or conversion into ordinary shares on any LAC debt instruments); and

(ii) for Notes issued directly to a group company in a non-Hong Kong jurisdiction, as specified in the applicable Final Terms, the Relevant Hong Kong Resolution Authority notifying the Issuer in writing that:

(A) the Relevant Hong Kong Resolution Authority has notified the Home Authority of the Relevant Hong Kong Resolution Authority’s intention to notify the issuer under paragraph (i) above; and

(B) the Home Authority (x) has consented to the write-down or conversion of the relevant Securities issued by the Issuer or (y) has not, within 24 hours after receiving notice under subparagraph (ii)(A) above, objected to the write-down or conversion of the relevant Securities issued by the Issuer;

“Non-Viability Event” means the earlier of:

(a) the Monetary Authority notifying the Bank in writing that the Monetary Authority is of the opinion that a write-off or conversion is necessary, without which the Bank would become non-viable; and

(b) the Monetary Authority notifying the Issuer in writing that a decision has been made by the government body, a government officer or other relevant regulatory body with the authority to make such a decision, that a public sector injection of capital or equivalent support is necessary, without which the Issuer would become non-viable

6 Liquidity Coverage Ratio – for category 1 institution (LIQ1) (continued)

Key Drivers

Liquidity Coverage Ratio (LCR) measures the short-term resilience of the Group's liquidity risk profile, and is sensitive to balance sheet movement and composition. The Group has maintained a strong liquidity position well above the regulatory requirement of 100% throughout Q3 of 2022. The average LCR was 154% for the quarter ending 30 September 2022 (vs. 141% for the quarter ending 30 June 2022), mainly as a result of increase in longer tenor deposits, and deployment of more shorter tenor central bank and interbank placements, thereby having a positive impact on our LCR position.

Composition of High Quality Liquid Asset (“HQLA”)

The Group holds significant levels of high quality unencumbered liquid assets that can be liquefied, repo-ed or used as collateral in the event of a liquidity stress.

The liquid assets consist predominately of Level 1 assets, including mainly cash and central bank reserves, Hong Kong exchange fund bills and notes, US treasuries and other marketable debt securities issued or guaranteed by other central banks and governments. In addition, the Group also holds level 2 assets such as high quality covered bonds, corporate bonds and bonds issued by public sector entities.

Concentration of Funding Sources

Our assets are primarily funded by customer deposits, largely made up of low cost and stable current and savings accounts. This forms a stable base for the Group's funding requirement. In addition, wholesale funding is widely diversified by client type and maturity which helps managing liquidity mismatches as required. The Group has various internal quantitative limits and metrics in place to monitor deposit concentrations, as well as HQLA Issuer concentrations.

The Regional Asset and Liability Committee (“RALCO”) and the Country Asset and Liability Committee (“ALCO”) monitor trends in the balance sheet and ensure that any concerns that might impact the stability of deposits are addressed in an effective and timely manner. RALCO and ALCO also review balance sheet plans to ensure that projected asset growth is matched by growth in customer deposits.

Derivatives Exposure

The use of derivatives for hedging and sale to customers as risk management products is an important part of the Group's business activities. These instruments are also used to manage the Group's own exposures to market risk. The principal derivative instruments used by the Group are foreign exchange related and interest rate related contracts. Derivative positions are mark-to-market on a daily basis.

Currency Mismatch on LCR

Customer assets are as far as possible funded in the same currency. Where mismatches arise, they are controlled by limits on the amount of foreign currency that can be swapped to local currency and vice versa. Such limits are therefore a means of controlling reliance on foreign exchange markets, which minimizes the risk that obligations could not be met in the required currency in the event that access to foreign exchange markets becomes restricted.

Majority of the Group's customer deposits are denominated in HKD, USD, CNY and KRW. The Group holds higher USD denominated HQLA due to its significant market depth and ease of conversion in the event of liquidity stress. This is in line with the Alternative Liquidity Approach option prescribed by HKMA. During this period, the Group maintained an amount of HKD-denominated level 1 assets well above the regulatory requirement of 20% of its HKD-denominated total net cash outflows.

Liquidity management

Treasury Markets is responsible for managing the Group's liquidity position within the approved liquidity and funding risk limits and thresholds. Oversight under the liquidity and funding framework resides with RALCO and ALCO, supported by Treasury Markets. RALCO and ALCO also ensure the Group remains in compliance with liquidity policies and practices, as well as local regulatory requirements.

It is the Group's policy to manage liquidity without presumption of the Group's parent support. RALCO and ALCO are responsible for ensuring that the Group is able to maintain adequate liquidity at all times and be in a position to meet all obligations as they fall due; repay depositors and fulfil all commitments to lend.

7 RWA flow statements of credit risk exposures under IRB approach (CR8)

The following table sets out a flow statement explaining variations in the RWA for credit risk determined under the IRB approach.

	(a) Amount HK\$'M
1 RWA as at end of previous reporting period (30 June 2022)	555,495
2 Asset size	(7,723)
3 Asset quality	6,686
4 Model updates	–
5 Methodology and policy	–
6 Acquisitions and disposals	–
7 Foreign exchange movements	(11,939)
8 Other	–
9 RWA as at end of reporting period (30 September 2022)	542,519

The decrease in RWA during the quarter were mainly due to the following items:

- RWA decrease from asset size which is in line with balance sheet movement,
- RWA increase from asset quality mainly due to credit migration during the period.
- RWA decrease from foreign exchange rate movement mainly due to the depreciation of KRW, CNY and TWD in relation to HKD during the period.

b. Market risk exposures on guaranteed retirement funds

The capital requirement for the Group's guaranteed retirement funds is calculated based on the potential shortfall between the estimated returns from the funds and the guaranteed returns after considering accounting provisions. The projected returns are estimated using a simulation approach with a 99% confidence level. The model is back-tested against actual results. As of 30 September 2022, the potential shortfalls marginally exceeds accounting provisions.
