Supplementary Notes to Consolidated Financial Statement (unaudited)

These notes are supplementary to and should be read in conjunction with the 2023 Consolidated Financial Statements (“consolidated financial statements”). The consolidated financial statements and this supplementary notes to consolidated financial statements (unaudited) taken together comply with the Banking (Disclosure) Rules (“Rules”) under section 60A of the Banking Ordinance and the Financial Institutions (Resolution) (Loss-absorbing Capacity Requirements – Banking Sector) Rules (“LAC Rules”) under section 19(1) of the Financial Institutions (Resolution) Ordinance (“FIRO”).

References to “the Group” within this document means Standard Chartered Bank (Hong Kong) Limited (“the Bank”) and its subsidiaries.

These banking disclosures are governed by the Group’s disclosure policy, which has been approved by the Board of Directors. The disclosure policy sets out the approach to determine the content, appropriateness and frequency of the disclosures, the approach to ensure the relevance and adequacy of the disclosures, and the internal control over the process for making the disclosures. The disclosures have been subject to independent review in accordance to the disclosure policy.

According to the Rules and the LAC Rules, disclosure of comparative information is not required unless otherwise specified in the standard disclosure templates. Prior period disclosures and additional disclosures as required by the Banking (Disclosure) Rules will be available on our website: www.sc.com/hk on or before 31 March 2024.

1 Basis of consolidation and preparation

The consolidated capital ratios were calculated in accordance with the Banking (Capital) Rules of the Hong Kong Banking Ordinance.

The basis of consolidation for accounting purposes is in accordance with Hong Kong Financial Reporting Standards. The principal subsidiaries of the Bank for accounting purposes are Standard Chartered Bank (China) Limited (“SCB China”), Standard Chartered NEA Limited (“SC NEA”), Standard Chartered Bank Korea Limited (“SCB Korea”) and Standard Chartered Bank (Taiwan) Limited (“SCB Taiwan”) (SC NEA, SCB Korea and SCB Taiwan collectively referred to as “SC NEA Group”), Mox Bank Limited and Standard Chartered Leasing Group Limited (which holds Marina Leasing Limited).

The basis and scope of consolidation for regulatory purposes is different from the basis and scope of consolidation for accounting purposes.

Subsidiaries included in the consolidation for regulatory purposes are specified in a notice from the HKMA in accordance with section 3C(1) of the Banking (Capital) rules. Subsidiaries not included in consolidation for regulatory purposes are non-financial companies and the securities companies that are authorized and supervised by a regulator and are subject to supervisory arrangements regarding the maintenance of adequate capital to support business activities comparable to those prescribed for authorized institutions under the Banking (Capital) Rules and the Banking Ordinance.

The Bank’s shareholdings in these subsidiaries are deducted from its capital base subject to the thresholds as determined in accordance with Part 3 of the Banking (Capital) Rules.

The Group operates subsidiaries in a number of countries and territories where capital is governed by local rules and there may be restrictions on the transfer of regulatory capital and funds between members of the banking group.

1 Basis of consolidation and preparation (continued)

Subsidiaries not included in the consolidation for regulatory purposes are set out below:

Name of company	Principal Activity	At 31 December 2023	
		Total assets HK\$'M	Total equity HK\$'M
Prunelli Asset Purchaser HK Limited	Asset-backed securitization	5,716	–
Standard Chartered Securities Korea Limited	Provision of security trading, underwriting and brokerage transactions	2,045	1,900
Standard Chartered Securities (China) Limited	Securities business	1,101	990
Standard Chartered Securities (Hong Kong) Limited	Equity capital markets, corporate finance and institutional brokerage	134	132
Standard Chartered Trust (HK) Limited	Trustee services	15	8
Horsford Nominees Limited	Nominees services	–	–
		9,011	3,030

The Bank's shareholdings in the above subsidiaries are deducted from CET1 capital, subject to certain thresholds, in accordance with the Banking (Capital) Rules. There is no relevant capital shortfall in any of the Bank's subsidiaries which are not included as part of the consolidation group for regulatory purposes.

The Group uses the advanced internal ratings based ("IRB") approach for both the measurement of credit risk capital requirements and the management of credit risk for the majority of its portfolios. The Group also uses the standardized (credit risk) approach for certain insignificant portfolios exempted from IRB. For counterparty credit risk, the Group uses the standardized (counterparty credit risk) approach ("SA-CCR") to calculate its default risk exposures. For securitization exposures, the group uses the securitization internal ratings-based approach ('SEC-IRBA'), securitization external ratings-based approach ('SEC-ERBA'), securitization standardized approach ('SEC-SA') or securitization fallback approach ('SEC-FBA') to determine credit risk for its banking book securitization exposures.

For market risk, the Group uses the internal models approach ("IMM approach") to calculate majority of its general market risk capital charge in respect of the risk categories of interest rates and foreign exchange (including gold) and uses the standardized (market risk) approach to calculate the general market risk capital charge for its equity exposures and commodity exposures, market risk capital charge on exempted foreign exchange exposures and the specific risk capital charge for its interest rate exposures and equity exposures. The Group also uses a stochastic asset-liability model approach for two guaranteed retirement funds. In addition, the Group adopts the standardized (operational risk) approach for operational risk.

The Group applies the Internal Capital Adequacy Assessment Process ("ICAAP") to assess its capital demand on a current, planned and stressed basis. The assessment covers the major risks faced by the Group, in addition to credit, market and operational risks that are covered under the minimum capital requirements. The 2023 ICAAP has been approved by the Regional Asset and Liability Committee ("RALCO"), the Asia Risk Committee ("ARC") and the Board of Directors ("the Board").

Loss-absorbing Capacity Disclosures

Hong Kong LAC Rules came into operation on 14 December 2018. Following classification by the HKMA (as resolution authority), in scope entities are required under these rules to issue LAC instruments that can be written down or converted in the event of failure, and maintain minimum LAC resources.

The Group was notified by HKMA of its classification as a material subsidiary under the LAC rules with effect from 1 April 2019, with Standard Chartered PLC ("SC PLC") as the non-HK resolution entity. Following this classification, the Group has met its minimum LAC requirements since 1 July 2019, and is now publishing LAC disclosures for the period ended 31 December 2023. The basis of calculating the Group's LAC and RWAs is in accordance with the LAC Rules, with disclosures made using standard templates issued by the HKMA on 31 October 2019.

The Group's LAC disclosures are included as part of this regulatory disclosure, while SC PLC's LAC disclosures are included as part of its disclosures which can be found in the Investors section of SC PLC's website, <https://www.sc.com>.

2. Key prudential ratios and metrics

a. Key prudential ratios (KM1)

The following table sets out an overview of the Group's key prudential ratios.

	(a) At 31 December 2023 HK\$'M	(b) At 30 September 2023 HK\$'M	(c) At 30 June 2023 HK\$'M	(d) At 31 March 2023 HK\$'M	(e) At 31 December 2022 HK\$'M	
Regulatory capital (amount)						
1	Common Equity Tier 1 (CET1)	144,196	146,825	145,147	143,900	141,259
2	Tier 1	164,882	167,513	165,830	164,583	161,939
3	Total capital	179,130	181,125	179,557	178,391	175,443
RWA (amount)						
4	Total RWA ¹	848,627	877,931	875,103	867,207	846,074
Risk-based regulatory capital ratios (as a percentage of RWA)						
5	CET1 ratio (%)	17.0%	16.7%	16.6%	16.6%	16.7%
6	Tier 1 ratio (%)	19.4%	19.1%	18.9%	19.0%	19.1%
7	Total capital ratio (%)	21.1%	20.6%	20.5%	20.6%	20.7%
Additional CET1 buffer requirements (as a percentage of RWA)						
8	Capital conservation buffer requirement (%)	2.5%	2.5%	2.5%	2.5%	2.5%
9	Countercyclical capital buffer requirement (%)	0.5%	0.5%	0.5%	0.4%	0.5%
10	Higher loss absorbency requirements (%) (applicable only to G-SIBs or D-SIBs)	1.5%	1.5%	1.5%	1.5%	1.5%
11	Total AI-specific CET1 buffer requirements (%)	4.5%	4.5%	4.5%	4.4%	4.5%
12	CET1 available after meeting the AI's minimum capital requirements (%)	12.5%	12.2%	12.1%	12.1%	12.2%
Basel III leverage ratio						
13	Total leverage ratio (LR) exposure measure	2,674,005	2,616,503	2,611,722	2,620,875	2,655,994
14	LR (%) ²	6.2%	6.4%	6.3%	6.3%	6.1%
Liquidity Coverage Ratio (LCR) / Liquidity Maintenance Ratio (LMR)						
Applicable to category 1 institution only:						
15	Total high quality liquid assets (HQLA)	489,269	459,443	457,161	482,997	465,501
16	Total net cash outflows	241,033	211,733	205,381	277,630	287,153
17	LCR (%) ³	206%	220%	225%	176%	163%
Applicable to category 2 institution only:						
17a	LMR (%)	NA	NA	NA	NA	NA
Net Stable Funding Ratio (NSFR) / Core Funding Ratio (CFR)						
Applicable to category 1 institution only:						
18	Total available stable funding	1,480,282	1,406,726	1,397,506	1,387,959	1,382,091
19	Total required stable funding	1,026,173	1,042,507	1,066,609	1,046,427	1,044,154
20	NSFR (%)	144%	135%	131%	133%	132%
Applicable to category 2A institution only:						
20a	CFR (%)	NA	NA	NA	NA	NA

¹ Decrease in total RWA was contributed by decrease in RWA under credit risk for non-securitization exposures and counterparty default risk partially offset by increase in market risk RWA.

² Decrease in leverage ratio was due to the increase in leverage exposure and decrease in Tier 1 capital.

³ Please refer to note 8 for the key drivers of LCR% changes.

2 Key prudential ratios and metrics (continued)

b. Key metrics – LAC requirements for the Group (at LAC consolidation group level) (KM2(A))

The following table sets out a summary information on internal loss-absorbing capacity available, at LAC consolidation group level, of the Group.

	(a) At 31 December 2023 HK\$'M	(b) At 30 September 2023 HK\$'M	(c) At 30 June 2023 HK\$'M	(d) At 31 March 2023 HK\$'M	(e) At 31 December 2022 HK\$'M	
Of the material entity at LAC consolidation group level						
1	Internal loss-absorbing capacity available	199,648	201,322	199,792	198,836	195,548
2	Risk-weighted amount under the LAC Rules ¹	848,627	877,931	875,103	867,207	846,074
3	Internal LAC risk-weighted ratio ¹	23.5%	22.9%	22.8%	22.9%	23.1%
4	Exposure measure under the LAC Rules	2,674,005	2,616,503	2,611,722	2,620,875	2,655,994
5	Internal LAC leverage ratio ²	7.5%	7.7%	7.6%	7.6%	7.4%
6a	Does the subordination exemption in the antepenultimate paragraph of Section 11 of the FSB TLAC Term Sheet apply? ³	Not applicable	Not applicable	Not applicable	Not applicable	Not applicable
6b	Does the subordination exemption in the penultimate paragraph of Section 11 of the FSB TLAC Term Sheet apply? ³	Not applicable	Not applicable	Not applicable	Not applicable	Not applicable
6c	If the capped subordination exemption applies, the amount of funding issued that ranks pari passu with excluded liabilities and that is recognised as external loss-absorbing capacity, divided by funding issued that ranks pari passu with excluded liabilities and that would be recognised as external loss-absorbing capacity if no cap was applied ³	Not applicable	Not applicable	Not applicable	Not applicable	Not applicable

¹ Decrease in risk-weighted amount under the LAC Rules and increase in internal LAC risk-weighted ratio were in line with the decrease in risk-weighted assets and increase in total capital ratio.

² Decrease in internal LAC leverage ratio was in line with the decrease in leverage ratio.

³ The subordination exemptions in the antepenultimate and penultimate paragraphs of Section 11 of the FSB TLAC Term Sheet does not apply in Hong Kong under the LAC Rules.

2. Key prudential ratios and metrics (continued)

c. Key metrics – TLAC requirements for non-HK resolution entity (at resolution group level) (KM2(B))

The following table shows information about SC PLC's total loss-absorbing capacity (TLAC) available, and TLAC requirements, applied at the resolution group level under a Single Point of Entry resolution strategy.

The numbers are disclosed in the functional currency of SC PLC which is US Dollars.

		At 31 December 2023 US\$'M	At 30 September 2023 US\$'M	At 30 June 2023 US\$'M	At 31 March 2023 US\$'M	At 31 December 2022 US\$'M
Of the non-HK resolution entity at resolution group level						
1	External loss-absorbing capacity available	81,310	80,460	79,847	78,424	78,480
2	Total risk-weighted amount under the relevant non-HK LAC regime	244,151	241,506	249,117	250,893	244,711
3	External loss-absorbing capacity as a percentage of risk-weighted amount	33.3%	33.3%	32.1%	31.3%	32.1%
4	Leverage ratio exposure measure under the relevant non-HK LAC regime	847,142	823,546	844,979	857,214	854,311
5	External loss-absorbing capacity as a percentage of leverage ratio exposure measure	9.6%	9.8%	9.4%	9.1%	9.2%
6a	Does the subordination exemption in the antepenultimate paragraph of Section 11 of the FSB TLAC Term Sheet apply?	Yes	Yes	Yes	Yes	Yes
6b	Does the subordination exemption in the penultimate paragraph of Section 11 of the FSB TLAC Term Sheet apply?	No	No	No	No	No
6c	If the capped subordination exemption applies, the amount of funding issued that ranks pari passu with excluded liabilities and that is recognised as external loss-absorbing capacity, divided by funding issued that ranks pari passu with excluded liabilities and that would be recognised as external loss-absorbing capacity if no cap was applied	N/A	N/A	N/A	N/A	N/A

3 Overview of risk management and RWA

a. Overview of risk management (OVA)

Note 33 on pages 82 to 128 of the 2023 consolidated financial statements sets out a description of risk management objectives and policies and how the Board of Directors and senior management assess and manage risks, enabling users to gain a clear understanding of the risk tolerance and appetite in relation to the main activities and all significant risks.

3 Overview of risk management and RWA (continued)

b. Overview of risk-weighted amount (“RWA”) (OV1)

The following table sets out an overview of capital requirements in terms of a detailed breakdowns of RWAs for various risks.

	(a)	(b)	(c)
	At 31 December 2023 HK\$'M	At 30 September 2023 HK\$'M	At 31 December 2023 HK\$'M
1 Credit risk for non-securitization exposures	551,521	583,740	46,572
2 Of which STC approach	41,016	39,024	3,281
2a Of which BSC approach	-	-	-
3 Of which foundation IRB approach	-	-	-
4 Of which supervisory slotting criteria approach ³	25,515	30,177	2,164
5 Of which advanced IRB approach ³	484,990	514,539	41,127
6 Counterparty default risk and default fund contributions	40,200	47,070	3,406
7 Of which SA-CCR	36,088	42,166	3,059
7a Of which CEM	-	-	-
8 Of which IMM(CCR) approach	-	-	-
9 Of which others	4,112	4,904	347
10 CVA risk	17,995	18,427	1,440
11 Equity positions in banking book under the simple risk-weight method and internal models method	-	-	-
12 Collective investment scheme (“CIS”) exposures – LTA	556	571	44
13 CIS exposures – MBA	-	-	-
14 CIS exposures – FBA	-	-	-
14a CIS exposures – combination of approaches	-	-	-
15 Settlement risk	-	120	-
16 Securitization exposures in banking book	5,968	7,018	477
17 Of which SEC-IRBA	1,043	1,112	83
18 Of which SEC-ERBA (including IAA)	4,600	5,647	368
19 Of which SEC-SA	325	259	26
19a Of which SEC-FBA	-	-	-
20 Market risk	87,152	75,648	6,972
21 Of which STM approach	30,949	37,691	2,476
22 Of which IMM approach	56,203	37,957	4,496
23 Capital charge for switch between exposures in trading book and banking book (not applicable before the revised market risk framework takes effect)*	N/A	N/A	N/A
24 Operational risk	96,172	93,205	7,694
24a Sovereign concentration risk	-	-	-
25 Amounts below the thresholds for deduction (subject to 250% RW)	16,215	16,753	1,297
26 Capital floor adjustment	-	-	-
26a Deduction to RWA	153	102	12
26b Of which portion of regulatory reserve for general banking risks and collective provisions which is not included in Tier 2 Capital	-	-	-
26c Of which portion of cumulative fair value gains arising from the revaluation of land and buildings which is not included in Tier 2 Capital	153	102	12
27 Total⁴	815,626	842,450	67,890

* Items marked with * will be applicable only after their respective policy frameworks takes effect. Until then, “Not applicable” should be reported in the rows.

¹ RWAs in this table are before the application of the 1.06 scaling factor, where applicable.

² Minimum capital requirement represents the Pillar 1 capital charge at 8% of the RWAs after application of the 1.06 scaling factor, where applicable.

³ Please refer to note 9(m) for the main drivers of the change in total RWA of credit risk exposures under advanced IRB approach.

⁴ Decrease in total RWA was contributed by decrease in RWA under credit risk for non-securitization exposures and counterparty default risk partially offset by increase in market risk RWA.

4 Linkages between financial statements and regulatory exposures

a. Differences between accounting and regulatory scopes of consolidation and mapping of financial statement categories with regulatory risk categories (L1f)

The following table sets out an information on assets and liabilities to enable users to identify the differences between the scope of accounting consolidation and the scope of regulatory consolidation, with a breakdown into regulatory risk categories of every item of the assets and liabilities reported in financial statements based on the scope of accounting consolidation.

	(a)	(b)	(c)	(d)	(e)	(f)	(g)

b. Main sources of differences between regulatory exposure amounts and carrying values in financial statements (LI2)

The following table sets out information on the main sources of differences between the carrying values in financial statements and the exposure amounts used for the calculation of regulatory capital in respect of the assets and liabilities based on the scope of regulatory consolidation.

	(a)	(b)	(c)	(d)	(e)
			Items subject to:		
At 31 December 2023	Total HK\$'M	credit risk framework HK\$'M	counterparty credit risk framework HK\$'M	securitization framework HK\$'M	market risk framework HK\$'M
1 Asset Carrying value amount under scope of regulatory consolidation (as per template LI1)	2,520,413	1,896,493	338,147	29,321	356,593
2 Liabilities Carrying value amount under scope of regulatory consolidation (as per template LI1)	185,638	–	140,404	–	160,710
3 Total net amount under regulatory scope of consolidation	2,334,775	1,896,493	197,743	29,321	195,883
4 Off balance sheet amounts and potential future exposures for counterparty credit risk	992,832	282,314	142,713	–	–
5 Difference due to financial collateral on standardized approach	(20,080)	(20,080)	–	–	–
6 Difference due to impairments on exposures under IRB approach	13,662	13,662	–	–	–
7 Difference due to regulatory exposure adjustments	(333)	(333)	–	–	–
8 Exposure amounts considered for regulatory purposes	3,320,856	2,172,056	340,456	29,321	195,883

c. Explanations of differences between accounting and regulatory exposure amounts (LIA)

Off-balance sheet amounts and potential future exposure for counterparty credit risk

Off-balance sheet amounts subject to credit risk include the undrawn portion of committed facilities, various trade finance commitments and guarantees, by applying credit conversion factors ('CCF') to these items and consideration of potential future exposures ('PFE') for counterparty credit risk ('CCR').

Difference due to financial collateral under standardized approach

The exposure value is calculated after deducting credit risk mitigation ('CRM'), whereas the accounting value is before such deductions.

Difference due to impairments on exposures under IRB approach

The carrying value of assets is net of credit risk adjustments. The regulatory exposure value under the IRB approach is before deducting credit risk adjustments.

Difference due to regulatory exposures adjustment

Regulatory exposures adjustment is the differences arise between accounting carrying values and regulatory Exposure at Default (EAD) on leasing transactions.

4 Linkages between financial statements and regulatory exposures (continued)

c. Explanations of differences between accounting and regulatory exposure amounts (LIA) (continued)

Explanation of differences between accounting fair value and regulatory prudent valuation

The Group has implemented various systems and controls to ensure that valuations are prudent and reliable.

Fair value is defined as the best estimate of the price that would be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants. All fair value positions are tested using independently sourced inputs. Where material price testing differences exist, the Group calculates respective adjustments through the Independent Price Testing process. Material price testing adjustments are charged to the Profit and Loss account.

The Group also calculates fair value adjustments in order to ensure the appropriate level of conservativeness. Additional fair value adjustments are made to reflect risks such as credit risk and funding risk of the portfolios for uncollateralised trades or exit costs due to bid-offer spreads.

Furthermore, the Group also calculates Prudent Valuation Adjustments (“PVA”) which arise due to valuation uncertainties inherent in fair value positions such as market price uncertainty, close-out costs, model risk, unearned credit spreads, investing and funding costs, concentrated positions, early termination, operational risk and future administrative costs. The excesses of the Prudent Valuation Adjustments over the respective Fair Value Adjustments are referred to as Additional Valuation Adjustments (AVAs) and their aggregate is deducted from Common Equity Tier 1 capital.

All valuation adjustments are governed by internal methodology documents which are approved regularly by the relevant valuation governance committee.

d. Prudent valuation adjustment (PV1)

The following table sets out a detailed breakdown of the constituent elements of valuation adjustment.

	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)
	Equity HK\$'M	Interest rates HK\$'M	FX HK\$'M	Credit HK\$'M	Commodities HK\$'M	Total HK\$'M	Of which: In the trading book HK\$'M	Of which: In the banking book HK\$'M
At 31 December 2023								
1 Closeout uncertainty, of which	256	881	32	144	7	1,320	585	735
2 Mid-market value	44	281	26	129	3	483	206	277
3 Closeout cost	9	251	6	12	–	278	185	93
4 Concentration ¹	203	349	–	3	4	559	194	365
5 Early termination	–	–	–	–	–	–	–	–
6 Model risk	–	2	–	2	–	4	4	–
7 Operational risk	5	55	3	14	–	77	38	39
8 Investing and funding costs	–	1	–	–	–	1	1	–
9 Unearned credit spreads	–	–	–	21	–	21	21	–
10 Future administrative costs	2	1	–	27	–	30	28	2
11 Other adjustments ²	–	–	–	78	–	78	–	78
12 Total adjustment	263	940	35	286	7	1,531	677	854

1. The decrease in concentration was mainly from debt securities, due to reduction of concentrated positions in Treasury and Rates desk.

2. Other adjustment is the Additional Valuation Adjustment (“AVA”) calculated based on Fallback approach as defined in the Regulatory Technical Standard. The fallback approach is applicable where the AVA for any of the valuation uncertainty categories cannot be computed.

5 Composition of regulatory capital

a. Composition of regulatory capital (CC1)

The following table sets out a breakdown of the constituent elements of Total regulatory capital.

At 31 December 2023		(a)	(b)
		HK\$'M	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation in note 5b (CC2)
CET1 capital: instruments and reserves

Notes to the Template:

(on elements where a more conservative definition has been applied in the BCR relative to that set out in the Basel III capital standards.)

Description	At 31 December 2023	
	Hong Kong basis	Basel III basis
	HK\$'M	HK\$'M
9 Other intangible assets (net of associated deferred tax liabilities)	5,450	5,450

Explanation

As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights ("MSRs") may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI's financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 9 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

5 Composition of regulatory capital (continued)

a. Composition of regulatory capital (CC1) (continued)

		<i>At 31 December 2023</i>	
<i>Description</i>		<i>Hong Kong basis HK\$M</i>	<i>Basel III basis HK\$M</i>
10	Deferred tax assets (net of associated deferred tax liabilities)	2,561	140

Explanation

As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realized are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

18	Insignificant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
----	--	---	---

Explanation

For the purpose of determining the total amount of insignificant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

19	Significant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
----	--	---	---

Explanation

For the purpose of determining the total amount of significant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 19 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

5 Composition of regulatory capital (continued)

a. Composition of regulatory capital (CC1) (continued)

Description	At 31 December 2023	
	Hong Kong basis HK\$M	Basel III basis HK\$M
39 Insignificant LAC investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-

Explanation

The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in AT1 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 39 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

54 Insignificant LAC investments in Tier 2 capital instruments issued by, and non-capital LAC liabilities of, financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold and, where applicable, 5% threshold)	-	-
---	---	---

Explanation

The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in Tier 2 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 54 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 54 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

Remarks:

The amount of the 10% threshold mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

Abbreviations:

CET1: Common Equity Tier 1
AT1: Additional Tier 1

Note:

5 Composition of regulatory capital (continued)

c. Main features of regulatory capital instruments (CCA) and non-capital LAC debt instruments (CCA(A))

The following is a summary of the Group's CET1 capital, Additional Tier 1 capital, Tier 2 capital and non-capital LAC debt instruments.

	At 31 December 2023		
	Total amount	Amount recognised in regulatory capital HK\$'M	Amount recognised in loss-absorbing capacity HK\$'M
(i) Both regulatory capital and LAC requirements			
CET1 capital instruments			
Ordinary shares:			
5,289 million issued and fully paid ordinary shares	HK\$65,025m	65,025	65,025
AT1 capital instruments			
Perpetual non-cumulative capital securities	US\$250m	1,954	1,954
US\$900 million Floating Rate Undated Additional Tier 1 Capital Securities	US\$900m	7,031	7,031
US\$1,000 million Fixed Rate Undated Additional Tier 1 Capital Securities	US\$1,000m	7,750	7,750
US\$250 million Floating rate Undated Additional Tier 1 Capital Securities	US\$250m	1,957	1,957
US\$250 million Fixed rate Undated Additional Tier 1 Capital Securities	US\$250m	1,959	1,959
Tier 2 capital instruments			
Floating rate Tier 2 Notes due 2029, callable from 2024	US\$450m	3,514	3,514
Floating rate Tier 2 Notes due 2031, callable from 2025	US\$250m	1,952	1,952
Fixed rate (1.20%) Tier 2 Notes due 2031, callable from 2026	EUR1,000m	7,998	7,998
(ii) Only LAC (but not regulatory capital) requirements			
Non-capital LAC Debt Instruments			
US\$1,500 million 1.456 per cent Notes due 2027	US\$1,500m	Nil	11,436
US\$1,250 million 2.608 per cent Notes due 2028	US\$1,250m	Nil	9,082

The full terms and conditions of the Group's capital instruments can be found in the Regulatory Disclosures section of our website, www.sc.com/hk.

5 Composition of regulatory capital (continued)

c. Main features of regulatory capital instruments (CCA) and non-capital LAC debt instruments (CCA(A)) (continued)

(i) Both regulatory capital and LAC requirements

Ordinary Shares

1	Issuer	Standard Chartered Bank (Hong Kong) Limited
2	Unique identifier (eg CUSIP, ISIN or Bloomberg identifier for private placement)	N/A

29	If convertible, specify issuer of instrument it converts into	N/A
30	Write-down feature	Yes
31	If write-down, write-down trigger(s)	Upon a Loss Absorption Event or Non-Viability Event

“Loss Absorption Event” means:

(i) the Relevant Hong Kong Resolution Authority notifying the Issuer in writing that the Relevant Hong Kong Resolution Authority is satisfied that the Issuer has ceased, or is likely to cease, to be viable and there is no reasonable prospect that private sector action (outside of resolution) would result in it again becoming viable within a reasonable period (in both cases, without taking into account the write-down or conversion into ordinary shares on any LAC debt instruments); and

(ii) for Securities issued directly to a group company in a non-Hong Kong jurisdiction, as specified in the applicable Final Terms, the Relevant Hong Kong Resolution Authority notifying the Issuer in writing that:

(A) the Relevant Hong Kong Resolution Authority has notified the Home Authority of the Relevant Hong Kong Resolution Authority’s intention to notify the issuer under paragraph (i) above; and

(B) the Home Authority (x) has consented to the write-down or conversion of the relevant Securities issued by the Issuer or (y) has not, within 24 hours after receiving notice under subparagraph (ii)(A) above, objected to the write-down or conversion of the relevant Securities issued by the Issuer;

or, if earlier than (i) and (ii) above, the occurrence of a Group Resolution Event.

“Non-Viability Event” means the earlier of:

(a) the Monetary Authority notifying the Bank in writing that the Monetary Authority is of the opinion that a write-off or conversion is necessary, without which the Bank would become non-viable; and

(b) the Monetary Authority notifying the Issuer in writing that a decision has been made by the government body, a government officer or other relevant regulatory body with the authority to make such a decision, that a public sector injection of capital or equivalent support is necessary, without which the Issuer would become non-viable

5 Composition of regulatory capital (continued)

c. Main features of regulatory capital instruments (CCA) and non-capital LAC debt instruments (CCA(A)) (continued)

(i) Both regulatory capital and LAC requirements (continued)

Floating rate Tier 2 Notes due 2029, callable from 2024 (continued)

29	If convertible, specify issuer of instrument it converts into	N/A
30	Write-down feature	Yes
31	If write-down, write-down trigger(s)	Upon a Loss Absorption Event or Non-Viability Event

“Loss Absorption Event” means:

(i) the Relevant Hong Kong Resolution Authority notifying the Issuer in writing that the Relevant Hong Kong Resolution Authority is satisfied that the Issuer has ceased, or is likely to cease, to be viable and there is no reasonable prospect that private sector action (outside of resolution) would result in it again becoming viable within a reasonable period (in both cases, without taking into account the write-down or conversion into ordinary shares on any LAC debt instruments); and

(ii) for Notes issued directly to a group company in a non-Hong Kong jurisdiction, as specified in the applicable Final Terms, the Relevant Hong Kong Resolution Authority notifying the Issuer in writing that:

(A) the Relevant Hong Kong Resolution Authority has notified the Home Authority of the Relevant Hong Kong Resolution Authority’s intention to notify the issuer under paragraph (i) above; and

(B) the Home Authority (x) has consented to the write-down or conversion of the relevant Securities issued by the Issuer or (y) has not, within 24 hours after receiving notice under subparagraph (ii)(A) above, objected to the write-down or conversion of the relevant Securities issued by the Issuer;

or, if earlier than (i) and (ii) above, the occurrence of a Group Resolution Event.

“Non-Viability Event” means the earlier of:

(a) the Monetary Authority notifying the Bank in writing that the Monetary Authority is of the opinion that a write-off or conversion is necessary, without which the Bank would become non-viable; and

(b) the Monetary Authority notifying the Issuer in writing that a decision has been made by the government body, a government officer or other relevant regulatory body with the authority to make such a decision, that a public sector injection of capital or equivalent support is necessary, without which the Issuer would become non-viable

5 Composition of regulatory capital (continued)

d. LAC composition of the bank (at LAC consolidation group level) (TLAC1(A))

The following table provides details of the composition of internal loss-absorbing capacity, at LAC consolidation group level, of the Bank.

		(a) HK\$'M
Regulatory capital elements of internal loss-absorbing capacity and adjustments		
1	Common Equity Tier 1 ("CET1") capital	144,196
2	Additional Tier 1 ("AT1") capital before LAC adjustments	20,686
3	AT1 capital instruments ineligible as internal loss-absorbing capacity as not issued directly or indirectly to, and held directly or indirectly by, the resolution entity or non-HK resolution entity in the material subsidiary's resolution group	-
4	Other adjustments	-
5	AT1 capital eligible under the LAC Rules	20,686
6	Tier 2 ("T2") capital before LAC adjustments	14,248
7	Amortized portion of T2 capital instruments that are internal LAC debt instruments issued directly or indirectly to, and held directly or indirectly by, the resolution entity or non-HK resolution entity in the material subsidiary's resolution group	-
8	T2 capital instruments ineligible as internal loss-absorbing capacity as not issued directly or indirectly to, and held directly or indirectly by, the resolution entity or non-HK resolution entity in the material subsidiary's resolution group	-
9	Other adjustments	-
10	T2 capital eligible under the LAC Rules	14,248
11	Internal loss-absorbing capacity arising from regulatory capital	179,130
Non-regulatory capital elements of internal loss-absorbing capacity		
12	Internal non-capital LAC debt instruments issued directly or indirectly to, and held indirectly or indirectly by, the resolution entity or non-HK resolution entity in the material subsidiary's resolution group ¹	20,518
17	Internal loss-absorbing capacity arising from non-capital LAC debt instruments before adjustments	20,518
Non-regulatory capital elements of internal loss-absorbing capacity: adjustments		
18	Internal loss-absorbing capacity before deductions	199,648
19	Deductions of exposures between the material subsidiary's LAC consolidation group and group companies outside that group that correspond to non-capital items eligible for internal loss-absorbing capacity	-
20	Deduction of holdings of its own non-capital LAC liabilities	-
21	Other adjustments to internal loss-absorbing capacity	-
22	Internal loss-absorbing capacity after deductions	199,648

5 Composition of regulatory capital (continued)

d. LAC composition of the bank (at LAC consolidation group level) (TLAC1(A)) (continued)

The following table provides details of the composition of internal loss-absorbing capacity, at LAC consolidation group level, of the Bank.

		(a) HK\$'M
Risk-weighted amount and exposure measure under the LAC Rules for internal loss-absorbing capacity purposes		
23	Risk-weighted amount under the LAC Rules ¹	848,627
24	Exposure measure under the LAC Rules	2,674,005
Internal LAC ratios and buffers		
25	Internal LAC risk-weighted ratio²	23.5%
26	Internal LAC leverage ratio	7.5%
27	CET1 capital (as a percentage of RWA under the Banking (Capital) Rules ("BCR")) available after meeting the LAC consolidation group's minimum capital and LAC requirements	9.7%
28	Institution-specific buffer requirement (capital conservation buffer plus countercyclical capital buffer requirements plus higher loss absorbency requirement, expressed as a percentage of RWA under the BCR)	4.5%
29	Of which: capital conservation buffer requirement	2.5%
30	Of which: institution-specific countercyclical capital buffer requirement	0.5%
31	Of which: higher loss absorbency requirement	1.5%

¹ Decrease in risk-weighted amount under the LAC Rules was in line with the decrease in RWA.

² Increase in internal LAC risk-weighted ratio was in line with the decrease in RWA.

5 Composition of regulatory capital (continued)

e. Creditor ranking of the bank at legal entity level (TLAC2)

The following table sets out the creditor ranking, at legal entity level, of the Bank.

	Creditor ranking				Total	
	1 (most junior)	2	3	4 (most senior)		
1	Is a resolution entity or a non-HK resolution entity the creditor/investor? (yes or no)	Yes	Yes	Yes	Yes	
2	Description of creditor ranking (free text)	CET1 capital instruments ¹	AT1 capital instruments	Tier 2 capital instruments	Non capital LAC debt instruments	
3	Total capital and liabilities net of credit risk mitigation	65,025	20,651	13,464	20,518	119,658
4	Subset of row 3 that are excluded liabilities	-	-	-	-	-
5	Total capital and liabilities less excluded liabilities	65,025	20,651	13,464	20,518	119,658
6	Subset of row 5 that are eligible as internal loss-absorbing capacity	65,025	20,651	13,464	20,518	119,658
7	Subset of row 6 with 1 year ≤ residual maturity < 2 years	-	-	-	-	-
8	Subset of row 6 with 2 years ≤ residual maturity < 5 years	-	-	-	20,518	20,518
9	Subset of row 6 with 5 years ≤ residual maturity < 10 years	-	-	13,464	-	13,464
10	Subset of row 6 with residual maturity ≥ 10 years, but excluding perpetual securities	-	-	-	-	-
11	Subset of row 6 that is perpetual securities	65,025	20,651	-	-	85,676

¹ Issued and fully paid ordinary shares includes preference shares held by Standard Chartered Bank which have been redeemed December 2020 via payment out of distributable profits and for which the amount was transferred from retained earnings to share capital in accordance with the requirements of the Hong Kong Companies Ordinance.

6 Macprudential supervisory measures

Geographical distribution of credit exposures used in countercyclical capital buffer (CCyB1)

The following table sets out an overview of the geographical distribution of private sector credit exposures relevant for the calculation of the Group's CCyB ratio.

At 31 December 2023

In HKD million

	<i>Jurisdiction (J)</i>	<i>Applicable JCCyB ratio in effect</i>	<i>Total RWA used in computation of CCyB ratio of AI</i>	<i>CCyB ratio of AI</i>	<i>CCyB amount of AI HK\$'M</i>
1	Hong Kong	1.000%	234,637		
2	Australia	1.000%	4,857		
3	France	0.500%	217		
4	Germany	0.750%	724		
5	Luxembourg	0.500%	2,258		
6	Netherland	1.000%	1,663		
7	Sweden	2.000%	905		
8	United Kingdom	2.000%	7,189		
9	Sum ¹		252,450		
10	Total²		552,965	0.469%	3,977

¹ This represents the sum of RWAs for the private sector credit exposures in jurisdictions with a non-zero countercyclical buffer rate.

² The total RWAs used in the computation of the CCyB ratio in row (10) represents the total RWAs for the private sector credit exposures in all jurisdictions to which the bank is exposed, including jurisdictions with no countercyclical buffer rate or with a countercyclical buffer rate set at zero.

7 Leverage Ratio

a. Summary comparison of accounting asset against leverage ratio exposure measure (LR1)

The following table reconciles the total assets in the published financial statements to the LR exposure measure.

At 31 December 2023		(a) Value under the Leverage Ratio framework (HK\$'M)
1	Total consolidated assets as per published financial statements	2,534,695
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	(470)
2a	Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference	-
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting standard but excluded from the leverage ratio exposure measure	-
3a	Adjustments for eligible cash pooling transactions	-
4	Adjustments for derivative contracts	20,602
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	5,498
6	Adjustment for off-balance sheet ("OBS") items (i.e. conversion to credit equivalent amounts of OBS exposures)	192,206
6a	Adjustment for prudent valuation adjustments and specific and collective provisions that are allowed to be excluded from exposure measure	(15,732)
7	Other adjustments	(62,794)
8	Leverage ratio exposure measure	2,674,005

Other adjustments mainly represent the Hong Kong Government certificates of indebtedness and assets deducted in determining Tier 1 capital. These are excluded for deriving the leverage ratio exposure in accordance with the HKMA requirements specified in Part 1C of the BCR.

7 Leverage Ratio (continued)

b. Leverage ratio (LR2)

The following table sets out a detailed breakdown of the components of the LR denominator.

	(a)	(b)
	At 31 December 2023 HK\$'M	At 30 September 2023 HK\$'M
On-balance sheet exposures		
1 On-balance sheet exposures (excluding derivatives and SFTs, but including collateral)	2,166,589	2,095,198
2 Less: Asset amounts deducted in determining Basel III Tier 1 capital	(18,842)	(15,930)
3 Total on-balance sheet exposures (excluding derivatives and SFTs)	2,147,747	2,079,268
Exposure arising from derivative contracts		
4 Replacement cost associated with all derivatives contracts (where applicable net of eligible cash variation margin and/or with bilateral netting)	21,731	41,928
5 Add-on amounts for PFE associated with all derivatives contracts	93,012	92,276
6 Gross-up for collateral provided in respect of derivative contracts where deducted from the balance sheet assets pursuant to the applicable accounting framework	-	-
7 Less: Deductions of receivables assets for cash variation margin provided under derivatives contracts	(8,028)	(8,354)
8 Less: Exempted CCP leg of client-cleared trade exposures	-	-
9 Adjusted effective notional amount of written credit-related derivative contracts	13,146	2,791
10 Less: Adjusted effective notional offsets and add-on deductions for written credit-related derivative contracts	(2,587)	-
11 Total exposures arising from derivative contract	117,274	128,641
Exposure arising from SFTs		
12 Gross SFT assets (with no recognition of netting), after adjusting for sales accounting transactions	229,507	206,554
13 Less: Netted amounts of cash payables and cash receivables of gross SFT assets	-	-
14 CCR exposure for SFT assets	1,472	17,108
15 Agent transaction exposures	-	-
16 Total exposures arising from SFTs	230,979	223,662
Other off-balance sheet exposures		
17 Off-balance sheet exposure at gross notional amount	992,832	1,006,804
18 Less: Adjustments for conversion to credit equivalent amounts	(800,626)	(808,049)
19 Off-balance sheet items	192,206	198,755
Capital and total exposures		
20 Tier 1 capital	164,882	167,513
20a Total exposures before adjustments for specific and collective provisions	2,688,206	2,630,326
20b Adjustments for specific and collective provisions	(14,201)	(13,823)
21 Total exposures after adjustments for specific and collective provisions	2,674,005	2,616,503
Leverage ratio		
22 Leverage ratio¹	6.17%	6.40%

¹ Decrease in leverage ratio was due to the increase in leverage exposure and decrease in Tier 1 capital.

8 Liquidity

a. Liquidity Risk Management (LIQA)

The following Liquidity Risk Management related information, together with the disclosure in section 8b (LIQ1), provides the supplement to the Liquidity Risk Section from 2023 SCB (Hong Kong) Limited Directors' Report and Consolidated Financial Statements.

LCRs and NSFRs of Hong Kong Office and Consolidated basis	LCR	NSFR
As at 31 Dec 2023	%	%
Hong Kong Office	156%	142%
Consolidated	189%	144%

Following table is an extraction from Part 4 of Liquidity Monitoring Tools return, which sets out the details of the Group's maturity profile covering on-and off-balance sheet items, broken down into maturity buckets and the resultant liquidity gaps.

Basis of disclosure: consolidated Currency : (HK\$ mil)	2023					Balancing amount
	Within 1 month	1-3 months	3 months-1 year	1-5 years	Over 5 years

8 Liquidity (continued)

b. Liquidity Coverage Ratio – for category 1 institution (LIQ1)

The following table sets out the details of LCR, high quality liquid assets (“HQLA”), and a breakdown of cash outflows and inflows.

Number of data points used in calculating the average value of the Liquidity Coverage Ratio (LCR) and related components set out in this Template for the quarter ending on 30 September 2023 and 31 December 2023 are 77 and 74.

Basis of disclosure: Consolidated		Q4 2023		Q3 2023	
		Currency: (HK\$mil)		Currency: (HK\$mil)	
		UNWEIGHTED AMOUNT	WEIGHTED AMOUNT	UNWEIGHTED AMOUNT	WEIGHTED AMOUNT
		(Average Value)	{Average Value}	(Average Value)	{Average Value}
A. HIGH QUALITY LIQUID ASSETS					
1	Total high quality liquid assets (HQLA)		489,269		459,443
B. CASH OUTFLOWS					
2	Retail deposits and small business funding, of which:	862,787	65,309	844,651	64,301
3	Stable retail deposits and stable small business funding	201,697	10,085	205,102	10,255
4	Less stable retail deposits and less stable small business funding	443,404	44,340	441,385	44,138
4a	Retail term deposits and small business term funding	217,686	10,884	198,164	9,908
5	Unsecured wholesale funding (other than small business funding) and debt securities and prescribed instruments issued by the institution, of which:	840,926	368,067	825,753	361,334
6	Operational deposits	410,221	102,008	411,414	102,298

23	LCR(%)		206%		220%

8 Liquidity (continued)

b. Liquidity Coverage Ratio – for category 1 institution (LIQ1) (continued)

Key Drivers

Liquidity Coverage Ratio (LCR) measures the short-term resilience of the Group's liquidity risk profile, and is sensitive to balance sheet movement and composition. The Group has maintained a strong liquidity position well above the regulatory requirement of 100% throughout Q4 of 2023. The average LCR was 206% for the quarter ending 31 Dec 2023 (30 Sep 2023: 220%), mainly as a result of increase deployment into non-HQLA, partially offset by increase in deposits, and also decrease in cash inflows arising from interbank placement within 30 days.

Composition of High Quality Liquid Asset (“HQLA”)

The Group holds significant levels of high quality unencumbered liquid assets that can be liquefied, repo-ed or used as collateral in the event of a liquidity stress.

The liquid assets consist predominately of Level 1 assets, including mainly cash and central bank reserves, Hong Kong exchange fund bills and notes, US treasuries and other marketable debt securities issued or guaranteed by other central banks and governments. In addition, the Group also holds level 2 assets such as high quality covered bonds, corporate bonds and bonds issued by public sector entities.

Concentration of Funding Sources

Our assets are primarily funded by customer deposits, largely made up of low cost and stable current and savings accounts. This forms a stable base for the Group's funding requirement. In addition, wholesale funding is widely diversified by client type and maturity which helps managing liquidity mismatches as required. The Group has various internal quantitative limits and metrics in place to monitor deposit concentrations, as well as HQLA Issuer concentrations.

The Regional Asset and Liability Committee (“RALCO”) and the Country Asset and Liability Committee (“ALCO”) monitor trends in the balance sheet and ensure that any concerns that might impact the stability of deposits are addressed in an effective and timely manner. RALCO and ALCO also review balance sheet plans to ensure that projected asset growth is matched by growth in customer deposits.

Derivatives Exposure

The use of derivatives for hedging and sale to customers as risk management products is an important part of the Group's business activities. These instruments are also used to manage the Group's own exposures to market risk. The principal derivative instruments used by the Group are foreign exchange related and interest rate related contracts. Derivative positions are mark-to-market on a daily basis.

Currency Mismatch on LCR

Customer assets are as far as possible funded in the same currency. Where mismatches arise, they are controlled by limits on the amount of foreign currency that can be swapped to local currency and vice versa. Such limits are therefore a means of controlling reliance on foreign exchange markets, which minimizes the risk that obligations could not be met in the required currency in the event that access to foreign exchange markets becomes restricted.

Majority of the Group's customer deposits are denominated in HKD, USD, CNY and KRW. The Group holds higher USD denominated HQLA due to its significant market depth and ease of conversion in the event of liquidity stress. This is in line with the Alternative Liquidity Approach option prescribed by HKMA. During this period, the Group maintained an amount of HKD-denominated level 1 assets well above the regulatory requirement of 20% of its HKD-denominated total net cash outflows.

Liquidity management

Treasury Markets is responsible for managing the Group's liquidity position within the approved liquidity and funding risk limits and thresholds. Oversight under the liquidity and funding framework resides with RALCO and ALCO, supported by Treasury Markets. RALCO and ALCO also ensure the Group remains in compliance with liquidity policies and practices, as well as local regulatory requirements.

It is the Group's policy to manage liquidity without presumption of the Group's parent support. RALCO and ALCO are responsible for ensuring that the Group is able to maintain adequate liquidity at all times and be in a position to meet all obligations as they fall due; repay depositors and fulfil all commitments to lend.

32	Off-balance sheet items				970,545	15,776
33	Total RSF					1,042,507
34	Net Stable Funding Ratio (%)					135%

8 Liquidity (continued)

c. Net Stable Funding Ratio – for category 1 institution (LIQ2) (continued)

NSFR Key Drivers

Net Stable Funding Ratio (NSFR) requires the bank to maintain sufficient stable funding relative to required stable funding. It reflects a bank's long-term funding profile and complement Liquidity Coverage Ratio (LCR) which measures short-term resilience to liquidity risk. The Group has continuously maintained a healthy NSFR ratio during the second half of 2023, and well above the regulatory requirement minimum of 100%. NSFR was 144% for the quarter ending 31 December 2023 (30 September 2023: 135%), mainly as a result of increase in deposits deployed into HQLA and non-HQLA securities matured in 12 months and reverse repos within 6 months, thereby having an overall positive impact on NSFR position.

Composition of AI's interdependent assets and liabilities

Complying with HKMA Banking (Liquidity) Rules, the Group's interdependent assets and liabilities consist of legal tender notes and certificates of indebtedness, being one of the note-issuing banks in Hong Kong.

9 Credit risk for non-securitization exposures

a. General information about credit risk (CRA)

Our approach to credit risk can be found in the Risk management approach section in notes 33 on pages 89 to 104 of the 2023 consolidated financial statements.

b. Credit quality of exposures (CR1)

The following table sets out an overview of the credit quality of on— and off-balance sheet exposures.

	(a)	(b)	(c)	(d)	(e)	(f)	(g)	
	Gross carrying amounts of			Of which ECL accounting provisions for credit losses ¹ on STC approach exposures	Allocated in regulatory category of	Allocated in regulatory category of	Of which ECL accounting provisions for credit losses on IRB approach exposures	Net values (a+b-c)
At 31 December 2023	Defaulted Exposures HK\$'M	Non-defaulted Exposures HK\$'M	Allowances/Impairments HK\$'M	specific provisions HK\$'M	collective provisions HK\$'M	exposures HK\$'M	HK\$'M	HK\$'M
1 Loans	16,040	1,317,036	13,803	151	420	13,232	1,319,273	
2 Debt securities	–	426,558	26	–	–	26	426,532	
3 Off-balance sheet exposures	985	991,846	370	–	42	328	992,461	
4 Total	17,025	2,735,440	14,199	151	462	13,586	2,738,266	

¹ The categorisation of Expected Credit Loss ('ECL') accounting provisions into the regulatory categories of specific and collective provisions follows the treatment specified in the completion instructions of the HKMA Capital Adequacy Ratio – MA(BS)3 return. According to the completion instructions, the ECL accounting provisions classified into Stage 1 and Stage 2 are treated as collective provisions, while those classified under Stage 3 are treated as specific provisions.

² Decrease in total exposures was in line with the balance sheet movement during the period.

9 Credit risk for non-securitization exposures (continued)

c. Changes in defaulted loans and debt securities (CR2)

The following table sets out information on the changes in defaulted loans and debt securities, including any changes in the amount of defaulted exposures, movements between non-defaulted and defaulted exposures, and reductions in the defaulted exposures due to write-offs.

	(a) HK\$M
1 Defaulted loans and debt securities at end of the previous reporting period (30 June 2023)	14,844
2 Loans and debt securities that have defaulted since the last reporting period	3,268
3 Returned to non-defaulted status	(133)
4 Amounts written off	(1,520)
5 Other changes ¹	(419)
6 Defaulted loans and debt securities at end of the current reporting period (31 December 2023)	16,040

¹ Other changes included repayment, foreign exchange movement and the net increase in defaulted loans and debt securities.

d. Additional disclosure related to credit quality of exposures (CRB)

The following tables set out an additional qualitative and quantitative information on the credit quality of exposures to supplement the quantitative information provided under templates CR1 and CR2.

Please refer to note 2(k) of the consolidated financial statements for the approach for determining credit-impairment provisions and the definition of “credit impaired” and “forborne loans”.

Financial assets are considered to be credit impaired where the obligors are unlikely to pay on the occurrence of one or more observable events that have a detrimental impact on the estimated future cash flows of the financial asset or it was past due for more than 90 days in respect of principal and/or interest.

I. Exposures by geographical location (CRB1)

At 31 December 2023	Gross carrying amount HK\$M
1 Hong Kong	1,031,157
2 South Korea	500,868
3 Mainland China	465,635
4 Others ¹	754,805
5 Total	2,752,465

¹ “Others” constitutes geographical locations less than 10% of total RWA and is disclosed on an aggregated basis.

Exposures decreased in Hong Kong and South Korea was in line with the balance sheet movement during the period.

II. Exposures by Industry (CRB2)

At 31 December 2023	Gross carrying amount HK\$M
1 Individuals	814,581
2 Financial concerns	514,997
3 Manufacturing	311,737
4 Wholesales and Retail Trade	223,329
5 Others ¹	887,821
6 Total	2,752,465

¹ “Others” constitutes segment less than 10% of total RWA and is disclosed on an aggregated basis.

Exposures decreased across industries was in line with the balance sheet movement during the period.

9 Credit risk for non-securitization exposures (continued)

d. Additional disclosure related to credit quality of exposures (CRB) (continued)

III. Exposures by residual maturity (CRB3)

At 31 December 2023		<i>Repayable on demand to 1 year HK\$'M</i>	<i>Due between 1 year to 5 years HK\$'M</i>	<i>Due after 5 years HK\$'M</i>	<i>Total HK\$'M</i>
1	Loans	683,902	158,762	490,412	1,333,076
2	Debt Securities	252,572	155,207	18,779	426,558
3	Off-balance sheet exposures	624,628	315,255	52,948	992,831
4	Total	1,561,102	629,224	562,139	2,752,465

Decrease in exposures across maturity period was mainly due to the decrease in loans and off-balance sheet exposures.

IV. Impaired exposures and related allowances and write-offs by geographical location (CRB4)

At 31 December 2023		<i>Gross impaired advances HK\$'M</i>	<i>Specific provisions² HK\$'M</i>	<i>Advances written-off in a year HK\$'M</i>
1	Hong Kong	3,338	1,417	830
2	Mainland China	10,512	7,925	895
3	Taiwan	714	169	266
4	South Korea	1,128	463	445
5	Others ¹	348	191	2
6	Total	16,040	10,165	2,438

¹ "Others" constitutes geographical locations less than 10% of total RWA and is disclosed on an aggregated basis.

² Please refer to note 9(b) for the classification of specific provisions.

V. Impaired exposures and related allowances and write-offs by Industry (CRB5)

At 31 December 2023		<i>Gross impaired advances HK\$'M</i>	<i>Specific provisions² HK\$'M</i>	<i>Advances written-off in a year HK\$'M</i>
1	Property development	9,247	7,474	39
2	Individuals	2,625	811	2,092
3	Manufacturing	1,188	902	102
4	Property investment	1,765	420	33
5	Wholesales and retail trade	377	181	114
6	Others ¹	838	377	58
7	Total	16,040	10,165	2,438

¹ "Others" constitutes segment less than 10% of total RWA and is disclosed on an aggregated basis.

² Please refer to note 9(b) for the classification of specific provisions.

9 Credit risk for non-securitization exposures (continued)

d. Additional disclosure related to credit quality of exposures (CRB) (continued)

VI. Aging analysis of accounting past due exposures (CRB6)

Please refer to note 19 for aging analysis of past due exposures.

VII. Breakdown of restructured exposures (CRB7)

At 31 December 2023	HK\$'M
Impaired	6,587
Not impaired	222
	<u>6,809</u>

e. Qualitative disclosures related to credit risk mitigation (CRC)

Potential credit losses from any given account, customer or portfolio are mitigated using a range of tools such as collateral, netting agreements, credit insurance, credit derivatives and guarantees. The reliance that can be placed on these mitigants is carefully assessed in light of issues such as legal certainty and enforceability, market valuation, correlation and credit risk of the guarantor. The requirement for risk mitigation is, however, not a substitute for the ability to pay, which is the primary consideration for any lending decisions.

Collateral types which are eligible for risk mitigation include: cash; account receivables; residential, commercial and industrial property; fixed assets such as motor vehicles, aircraft, plant and machinery; marketable securities; commodities; risk participations; guarantees; credit insurance; and standby letters of credit. The Group also enters into collateralised reverse repurchase agreements. Physical collateral, such as property, fixed assets and commodities, and financial collateral must be independently valued and an active secondary resale market must exist. The collateral must be valued prior to drawdown and regularly thereafter. The valuation frequency is at minimum annual and more frequent valuations are driven by the level of price volatility of each type of collateral and the nature of the underlying product or risk exposure. For financial collateral to be eligible for recognition the collateral must be sufficiently liquid, and its value over time sufficiently stable, to provide appropriate certainty as to the credit protection achieved. Risk mitigation benefits may be reduced or removed where the collateral value is not supported by a recent independent valuation.

Our approach to credit risk mitigation can be found in the Risk management approach section in notes 33(a) on page 91 of the 2023 consolidated financial statements.

f. Overview of recognized credit risk mitigation (CR3)

The following table sets out the extent of credit risk exposures covered by different types of recognized CRM.

	(a)	(b1)	(b)	(d)	(f)
	Exposures unsecured: carrying amount HK\$'M	Exposures to be secured HK\$'M	Exposures secured by recognized collateral HK\$'M	Exposures secured by recognized guarantees HK\$'M	Exposures secured by recognized credit derivative contracts HK\$'M
At 31 December 2023					
1 Loans	748,193	571,080	483,260	45,180	–
2 Debt securities	419,787	6,745	3,825	–	–
3 Total	1,167,980	577,825	487,085	45,180	–
4 Of which defaulted	13,652	2,388	1,647	126	–

9 Credit risk for non-securitization exposures (continued)

g. Qualitative disclosures on use of ECAI ratings under STC approach (CRD)

External ratings, where available, are used to assign risk weights for standardized approach (SA) exposures under the following exposure classes: Multilateral development bank exposures, certain Bank and Corporate exposures are which exempt from application of IRB Approach.

These external ratings must come from External Credit Assessment Institutions (ECAI); which currently include Moody's, Standard & Poor's and Fitch. The Group uses the ECAI ratings from these agencies in its day-to-day business, which are tracked and kept updated.

The Group determines ECAI issuer ratings or ECAI issue-specific ratings in a process consistent with Part 4 of BCR and the exposures classes are assigned risk weightings as prescribed in the BCR.

h. Credit risk exposures and effects of recognized credit risk mitigation – for STC approach (CR4)

The following table sets out the effect of any recognized CRM (including recognized collateral under both comprehensive and simple approaches) on the calculation of capital requirements. RWA density provides a synthetic metric on riskiness of each portfolio.

At 31 December 2023	(a) Exposures pre-CCF and pre-CRM		(c) Exposures post-CCF and post-CRM		(e) RWA and RWA density		(f)
	On-balance sheet amount	Off-balance sheet amount	On-balance sheet amount	Off-balance sheet amount	RWA	RWA density	
	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M	%	
<i>Exposure classes</i>							
1	Sovereign exposures	123	77	122	3	–	0%
2	PSE exposures	110	–	890	21	182	20%
2a	<i>Of which: domestic PSEs</i>	–	–	634	21	131	20%
2b	<i>Of which: foreign PSEs</i>	110	–	256	–	51	20%
3	Multilateral development bank exposures	33,827	–	33,827	–	–	0%
4	Bank exposures	1,881	–	1,881	–	376	20%
5	Securities firm exposures	4	–	4	–	2	50%
6	Corporate exposures	26,151	4,129	17,775	566	15,835	86%
10	Regulatory retail exposures	14,786	47,498	13,291	1	9,969	75%
11	Residential mortgage loans	14,478	190	14,478	38	5,561	38%
12	Other exposures which are not past due exposures	18,672	33,132	8,064	203	8,267	100%
13	Past due exposures	657	68	657	–	824	125%
15	Total	110,689	85,094	90,989	832	41,016	45%

Decrease in total exposures pre-CCF and pre-CRM was mainly driven by decrease in multilateral development bank exposures, corporate exposures, regulatory retail exposures and other exposures which are not past due exposures.

Decrease in total exposures post-CCF and post-CRM was mainly driven by decrease in multilateral development bank exposures and other exposures which are not past due exposures.

9 Credit risk for non-securitization exposures (continued)

i. Credit risk exposures by asset classes and by risk weights – for STC approach (CR5)

The following table sets out a breakdown of credit risk exposures by asset classes and by risk weights (corresponding to the classification of exposures according to the approaches used).

	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(ha)	(i)	(j)

15 Total	33,952	-	4,175	13,427	2,996	14,201	22,543	527	-	-	91,821

Please refer to note 9(h) for the main drivers of the change in total exposures post-CCF and post-CRM.

9 Credit risk for non-securitization exposures (continued)

j. Qualitative disclosures related to internal models for measuring credit risk under IRB approach (CRE)

Model Governance

All IRB models are developed by independent model analytics teams aligned to CCIB and CPBB businesses, following internal standards informed by regulatory requirements for model development, validation, and performance monitoring approved by the Group Credit Model Assessment Committee (CMAC). New models, changes to new models, and existing models (periodically) are subject to independent validation by Group Model Validation (GMV), and are approved by the Asia Risk Committee (Asia RC) and the SCBHK Model Assessment Committee (MAC) based on materiality. SCBHK Group Model Risk Management (SCBHK MRM) team was established to provide ongoing assessment and independent oversight of model risk management and adherence to HKMA requirements in aspects related to model development and use.

The performance of regulatory capital credit risk IRB models in use, including comparative metrics on actual-against-predicted estimates, is monitored regularly by model owners based on internal standards and regulatory requirements, and is reported to both SCBHK MAC and to the Asia RC. In addition, existing models in use are subject to annual independent validation by GMV. The Board Risk Committee is updated on the status and performance of IRB models on an annual basis.

The Group has a robust monitoring and governance framework in place to identify and mitigate model performance issues. While most models are conservative and over-predict Probability of Default (“PD”), Loss Given Default (“LGD”), and Exposure At Default (“EAD”), should models under predict, an analysis will be performed to determine the impact and a post model adjustment may be applied to ensure adequate capitalisation, in addition to ensuring an appropriate longer-term remediation plan is put in place.

Group Internal Audit is responsible for carrying out independent audit reviews on the effectiveness of the controls supporting IRB models’ development, validation, approval, and monitoring.

Probability of Default (PD)

Probability of Default is modelled through one of three industry standard approaches, namely the “good-bad approach” (when sufficient number of internal defaults is available for modelling), the “shadow-bond approach” (used in the case there are no sufficient internal defaults but there are external ratings for a large number of obligors), or the “constrained expert judgement approach” (used when neither internal defaults nor external ratings are available).

In Corporate, Commercial & Institutional Banking (CCIB), the largest portfolios are rated based on the shadow bond approach (Sovereigns and Large Corporates) or the good-bad approach (Banks and Mid Corporates). Central governments and central banks are rated using the Sovereign model. Non-bank financial institutions are rated using one of six constrained expert judgement models according to their respective line of business, with the largest being Funds, Finance & Leasing, and Broker Dealers. Corporate clients are differentiated by their annual sales turnover and rated using one of the corporate models unless they are commodity buyers and traders, for which a separate model has been developed and used, or are classified under specialised lending. Excluding the Sovereign model, CCIB internal rating-based (IRB) PD models are subject to the regulatory floor of 0.03 per cent.

PD models for retail clients under each asset class are developed following the good-bad approach. The same PD modelling approach is adopted across the four key retail client product types: Residential Mortgages, Credit Cards (Qualifying Revolving Retail), Personal Instalment Loans (Other Retail) and Retail SME (Small Business Retail). The approach employs country and product-specific application scorecards for new to bank clients and behaviour scorecards for existing clients. Scorecards are built using demographic information, credit bureau data, observed client performance data (for behaviour scores), and where applicable, financial information. Statistical techniques are used to develop a relationship between this information and the probability of default. Scorecards and PD models are used to support credit decisions. All retail client PD models are subject to the 0.03 per cent regulatory floor.

Estimates of PD are computed as of 31 December 2022 and are compared with default observations through 31 December 2023.

9 Credit risk for non-securitization exposures (continued)

j. Qualitative disclosures related to internal models for measuring credit risk under IRB approach (CRE) (continued)

Probability of Default (PD) (continued)

Our historical default experience for sovereigns is minimal, so the predicted PD reflects a particularly low number of defaults. There are no defaults for sovereigns during 2023. The observed default rate for 'Small business retail' is higher than the predicted PD, and the underestimation is related to a specific sub-segment that is not material for SCBHK Group; model redevelopment, nevertheless, is in progress to address the model performance issue as per internal standards. Realised default rates for 'Banks', 'Corporates', 'Residential mortgages', 'Qualifying revolving retail', and 'Other retail' asset classes in 2023 remain within model predictions, based on the arithmetic average PD by obligors.

Loss Given Default (LGD)

The CCIB loss given default model is a component-based model reflecting the Group's recovery and workout process, which considers risk drivers such as portfolio segment, jurisdiction, product, and collateral associated to the exposure. Model calibration is based on downturn experience should that be more conservative than the long-run experience.

The comparison of realised versus predicted LGD considers that the workout process may take years to complete. As such, an observed (or "empirical") recovery value cannot be assigned to the majority of the 2023 defaults, making it statistically challenging to compare realised versus predicted outcomes in a manner like that for PD and exposure at default (EAD).

To address this, for 'Sovereign', 'Banks' and 'Corporates' asset classes, we have adopted an approach based on a four-year rolling period of predicted and realised LGD, which for the current reporting year includes 2020 to 2023 defaults that have completed their workout process as at the end of 2023. This approach compares the four-year rolling predicted LGD, providing the predicted outcome of these resolved defaults one year prior to default, against the realised LGD for the same set of defaults. These two figures are thus comparable, thereby providing a meaningful assessment of the LGD model's performance. There were no defaults in the previous four years for 'Sovereign' and 'Banks' while realised LGD values for 'Corporates' are lower than the respective predicted LGD values, demonstrating conservatism of estimates. This conservativeness is driven by the regulatory guidance to calibrate LGD models to economic downturn conditions.

LGDs for retail portfolios are modelled following two approaches:

- LGDs for unsecured products are based on historical loss experience of defaults during a downturn; these are portfolio-specific LGD estimates segmented by default status (including restructuring).
- LGDs for secured products are parameter-based estimates mainly driven by the different ways a default is resolved (cure, sale, restructuring, or charge-off) due to the very low volume of defaults observed historically. Key LGD parameters are differentiated by segments such as loan-to-value, property type and default status. These parameters are calibrated based on the portfolio's downturn experience.

Retail LGD model monitoring considers defaults from a cohort and the actual recoveries up to the end of the workout window which is typically two to three years. For workout window of 2 years, the observed LGD from the December 2020 cohort (existing defaults and those defaulted in the next 12 months) was calculated based on actual recoveries observed from January 2021 until December 2023. This is compared to the predicted outcome of the same set of defaults.

Under this approach, realised LGD values for all retail asset classes are lower than their respective predicted LGD values, primarily due to the regulatory guidance to calibrate LGD models to downturn conditions.

Exposure At Default (EAD)

EAD modelling takes into consideration the potential drawdown of a commitment as an obligor moves towards default by estimating the Credit Conversion Factor (CCF) of undrawn commitments, resulting in the amount expected to be outstanding when default takes place.

9 Credit risk for non-securitization exposures (continued)

j. Qualitative disclosures related to internal models for measuring credit risk under IRB approach (CRE) (continued)

Exposure At Default (EAD) (continued)

The CCIB EAD model has adopted the “momentum approach” to estimate the CCF, with the type of facility and the level of utilisation being key drivers of CCF. The model is calibrated based on the Group’s internal downturn experience.

EAD for retail portfolios differs between revolving products and term (instalment) products. For revolving products, EAD is computed by estimating the CCF of undrawn commitments. For term products, EAD is set at the outstanding balance plus any undrawn portion. All the retail client EAD models are built and validated using internal default data.

The comparison of realised versus predicted EAD is summarised as ratio of the sum of outstanding amount at time of default to the sum of predicted EAD of assets of each defaulted client in 2023. The ratios for all models are smaller than one, indicating that the predicted EAD amount is higher than the realised outstanding amount at default. This is explained by the regulatory guidance to assign conservatism to the CCF of certain exposure types and to calibrate the models to downturn conditions.

At 31 December 2023, the portion of exposure at default (“EAD”) and RWA within the Group covered by IRB approach are summarised in the following table. The remaining portions not covered by IRB approach are under STC approach.

Percentage of total EAD and RWA covered by IRB approach

At 31 December 2023 Portfolio	<i>Percentage of total EAD under IRB approach</i>	<i>Percentage of total RWA under IRB approach</i>
Corporate exposures (includes SME and other corporates and specialised lending)	96%	93%
Sovereign exposures	93%	100%
Bank exposures (including securities firms)	99%	99%
Residential mortgage loans	97%	91%
Other retail exposures	90%	84%
Equity exposures	0%	0%
Other exposures	100%	100%

The above table covers credit risk for non-securitization exposures excluding counterparty credit risk.

For counterparty credit risk, the percentage of total RWA covered by models is 98% for corporate exposures and 100% for bank exposures.

9 Credit risk for non-securitization exposures (continued)

k. Credit risk exposures by portfolio and PD ranges – for IRB approach (CR6)

The following table sets out the main parameters of internal models used for the calculation of credit risk capital requirements under the IRB approach, for the purpose of enhancing the transparency of RWA calculations and the reliability of regulatory measures.

Total (all portfolios subject to the IRB approaches)	1,648,707	903,894	27.8%	1,899,561	1.12%	1,863,640	41.1%	1.14	419,246	22%	13,994	13,461

Provisions in this table represent the eligible provisions as defined under Division 1, Part 6 of the BCR which include the regulatory reserves for general banking risks and the impairment allowances reported under IRB approach, which increases as customer loan increases.

Decrease in exposures was in line with the balance sheet movement during the period.

9 Credit risk for non-securitization exposures (continued)

I. Effects on RWA of recognized credit derivative contracts used as recognized credit risk mitigation – for IRB approach (CR7)

The following table sets out the effect of recognized credit derivative contracts on the calculation of credit risk capital requirements under the IRB approach. The hypothetical RWA before taking into account the mitigation effect of recognized credit derivative contracts (column (a) below) is disclosed to evaluate the impact of recognized credit derivative contracts on RWA. This is irrespective of the extent that recognized CRM are taken into account in calculating the RWA.

At 31 December 2023	(a) Pre-credit derivatives RWA HK\$'M	(b) Actual RWA HK\$'M
1 Corporate – Specialized lending under supervisory slotting criteria approach (project finance)	–	–
2 Corporate – Specialized lending under supervisory slotting criteria approach (object finance)	11,357	11,357
3 Corporate – Specialized lending under supervisory slotting criteria approach (commodities finance)	–	–
4 Corporate – Specialized lending under supervisory slotting criteria approach (income-producing real estate)	14,158	14,158
5 Corporate – Specialized lending (high-volatility commercial real estate)	–	–
6 Corporate – Small-and-medium sized corporates	9,690	9,690
7 Corporate – Other corporates	172,863	172,863
8 Sovereigns	35,887	35,887
9 Sovereign foreign public sector entities	8,598	8,598
10 Multilateral development banks	–	–
11 Bank exposures – Banks	42,981	42,981
12 Bank exposures – Securities firms	5,410	5,410
13 Bank exposures – Public sector entities (excluding sovereign foreign public sector entities)	2,400	2,400
14 Retail – Small business retail exposures	1,412	1,412
15 Retail – Residential mortgages to individuals	54,557	54,557
16 Retail – Residential mortgages to property-holding shell companies	1,504	1,504
17 Retail – Qualifying revolving retail exposures (QRRE)	16,933	16,933
18 Retail – Other retail exposures to individuals	67,011	67,011
19 Equity – Equity exposures under market-based approach (simple risk-weight method)	–	–
20 Equity – Equity exposures under market-based approach (internal models method)	–	–
21 Equity – Equity exposures under PD/LGD approach (publicly traded equity exposures held for long-term investment)	–	–
22 Equity – Equity exposures under PD/LGD approach (privately owned equity exposures held for long-term investment)	–	–
23 Equity – Equity exposures under PD/LGD approach (other publicly traded equity exposures)	–	–
24 Equity – Equity exposures under PD/LGD approach (other equity exposures)	–	–
24a Equity – Equity exposures associated with equity investments in funds (CIS exposures)	–	–
25 Other – Cash items	–	–
26 Other – Other items	65,744	65,744
27 Total	510,505	510,505

There is no effect in RWA as the Group does not have credit derivative contracts used as recognised credit risk mitigation.

9 Credit risk for non-securitization exposures (continued)

m. RWA flow statements of credit risk exposures under IRB approach (CR8)

The following table sets out a flow statement explaining variations in the RWA for credit risk determined under the IRB approach.

	(a) Amount HK\$M
1 RWA as at end of previous reporting period (30 September 2023)	544,717
2 Asset size	(5,911)
3 Asset quality	4,586
4 Model updates	-
5 Methodology and policy	-
6 Acquisitions and disposals	(14,918)
7 Foreign exchange movements	5,990
8 Other	(23,959)
9 RWA as at end of reporting period (31 December 2023)	510,505

The decrease in RWA during the quarter were mainly due to the following items:

- RWA decrease from asset size which is in line with balance sheet movement,
- RWA increase from asset quality mainly due to credit migration during the period,
- RWA decrease from acquisitions and disposals mainly due to exit of aircraft leasing business,
- RWA increase from foreign exchange movements mainly due to the appreciation of KRW, CNY and TWD in relation to HKD during the period,
- RWA decrease from other mainly due to process improvement and better data sourcing of balances reported under other assets.

n. Back-testing of PD per portfolio – for IRB approach (CR9)

The following table sets out the comparison between observed and predicted PD, LGD and EAD.

Observed vs. Predicted PD, LGD and EAD

2023

Asset Class	PD (%)		LGD (%)		EAD Ratio (Observed /Predicted)
	Observed	Predicted	Observed	Predicted	
Sovereigns	0.00	0.16	N/A	N/A	N/A
Banks	0.00	0.93	N/A	N/A	N/A
Corporates	1.87	2.94	29.54	45.86	0.90
Qualifying revolving retail exposures (QRRE)	0.24	0.67	69.51	82.89	0.87
Residential mortgages	0.15	0.40	9.25	19.00	0.98
Small business retail exposures	3.42	2.88	79.84	86.28	0.78
Other retail exposures to individuals	2.45	3.48	47.89	59.46	0.97

2022

Asset Class	PD (%)		LGD (%)		EAD Ratio (Observed /Predicted)
	Observed	Predicted	Observed	Predicted

o. Specialized lending under supervisory slotting criteria approach and equities under simple risk-weight method – for IRB approach (CR10)

The following table sets out the quantitative information in respect of specialized lending under the supervisory slotting criteria approach.

Specialized Lending under supervisory slotting criteria approach – Other than HVCRE

At 31 December 2023		(a)	(b)	(c)	(d)(i)	(d)(ii)	(d)(iii)	(d)(iv)	(d)(v)	(e)	(f)
Regulatory Categories	Remaining Maturity	On-balance sheet exposure amount HK\$'M	Off-balance sheet exposure amount HK\$'M	SRW	EAD amount					RWA HK\$'M	Expected loss amount HK\$'M
					PF HK\$'M	OF HK\$'M	CF HK\$'M	IPRE HK\$'M	Total HK\$'M		
Strong [^]	Less than 2.5 years	14,123	1,964	50%	-	2,203	-	12,621	14,824	7,412	-
Strong	Equal to or more than 2.5 years	8,836	563	70%	-	6,506	-	2,556	9,062	6,343	36
Good [^]	Less than 2.5 years	7,024	585	70%	-	197	-	7,018	7,215	5,050	29
Good	Equal to or more than 2.5 years	3,354	483	90%	-	3,530	-	14	3,544	3,190	28
Satisfactory		2,917	47	115%	-	2,075	-	845	2,920	3,358	82
Weak		65	1	250%	-	-	-	65	65	162	5
Default		2,441	4	0%	-	-	-	2,441	2,441	-	1,221
Total		38,760	3,647		-	14,511	-	25,560	40,071	25,515	1,401

[^] Use of preferential risk-weights.

Decrease in total exposure was in line with the balance sheet movement during the period.

Decrease in RWA is mainly driven by the decrease from asset size and asset quality due to credit migration.

10 Counterparty Credit risk

a. Qualitative disclosures related to counterparty credit risk (including those arising from clearing through CCPs) (CCRA)

Counterparty credit risk (CCR) is the risk that a counterparty in foreign exchange, interest rate, commodity, equity or credit derivative or repo contract defaults prior to the maturity date of the contract, and that the Group at the time has a claim on the counterparty. CCR arises predominantly in the trading book, but also arises in the non-trading book when hedging with external counterparties is required.

CCR is managed within the overall credit risk appetite for corporate and financial institutions. CCR limits are set for individual counterparties, including central clearing counterparties, and for specific portfolios. Individual limits are calibrated to the credit grade and business model of the counterparties. Portfolio limits are set to contain concentration risk across multiple dimensions and are set on PFE or other equivalent measures.

The Group reduces its credit exposures to counterparties by entering into contractual netting agreements which results in a single amount owed by or to the counterparty. The amount is calculated by netting the Mark-To-Market (MTM) owed by the counterparty to the Group and the MTM owed by the Group to the counterparty on the transactions covered by the netting agreement. In line with the International Accounting Standard (IAS) 32 principles, the Group's balance sheet will present assets and liabilities on a net basis provided there is a legally enforceable right to set off assets and liabilities, and the Group intends to settle on a net basis or realise the asset and liability simultaneously.

Wrong-way risk

Wrong-way risk occurs when an exposure increase is coupled with a decrease in the credit quality of the obligor. Specifically, as the MTM on a derivative or repo contract increases in favour of the Group, the driver of this MTM change also reduces the ability of the counterparty to meet its payment, margin call or collateral posting requirements. Wrong-way risk mostly arises from FX transactions and financing transactions. The Group employs various policies and procedures to ensure that wrong-way risk exposures are recognised upfront, monitored, and where required, contained by limits on country, tenor, collateral type, and counterparty.

Stress Testing

Stress testing is an integral part of CCR management, complementing potential future exposure (PFE) or other portfolio limits. Single and multi-factor scenarios are regularly applied to the CCR portfolio to identify and quantify exposures that could become a concern for the Group. The stressed exposures are monitored weekly and discussed monthly at regional and global counterparty credit risk exposure forums. The relevance and severity of the stress scenarios are periodically reviewed with cross functional stakeholders.

Exposure value calculation

Exposure calculation used for risk management is based on PFE. The PFE is mostly calculated from simulation models, and from PFE add-ons for the non-simulated products.

Derivatives exposures are calculated using SA-CCR. Under this approach, EAD is calculated as the sum of replacement cost and potential future exposure multiplied by Alpha. Exposure for repurchase transactions and securities lending or borrowing transactions is calculated using the Financial Collateral Comprehensive Method. Supervisory volatility adjustments are applied to both collateral and exposure legs.

The Group has credit policies and procedures setting out the criteria for collateral to be recognised as a credit risk mitigant, including requirements concerning legal certainty, priority, concentration, correlation, liquidity and valuation parameters such as frequency of review and independence. The Group seeks to negotiate Credit Support Annexes (CSAs) with counterparties when collateral is deemed a necessary or desirable mitigant to the exposure. The credit terms of a CSA are specific to each legal document and determined by the credit risk approval unit responsible for the counterparty. The nature of the collateral is specified in the legal document and is typically cash or highly liquid securities.

10 Counterparty Credit risk (continued)

a. Qualitative disclosures related to counterparty credit risk (including those arising from clearing through CCPs) (CCRA) (continued)

Exposure value calculation (continued)

The MTM of all trades captured under CSAs is calculated daily. Additional collateral will be called from the counterparty if total uncollateralised MTM exposure exceeds the threshold and minimum transfer amount specified in the CSA. Additional collateral may be required from the counterparty to provide an extra buffer to the daily variation margin process.

In line with market convention, the Group negotiates CSA terms for certain counterparties where the thresholds related to each party are dependent on their ECAI long-term rating. Such clauses are typically mutual in nature. As a result, a downgrade in the Group's rating would result in some counterparties seeking additional collateral calls to cover negative MTM portfolios where thresholds are lowered. As of 31 Dec 2023, the Group does not require to provide additional collateral in the case of a one-notch credit rating downgrade.

The Group also has policies and procedures in place setting out the criteria for guarantees to be recognised as a credit risk mitigant. Where guarantees meet regulatory criteria, the Group treats the exposure as guarantor risk from counterparty credit risk capital standpoint.

Credit valuation adjustments

Credit valuation adjustments (CVA) measures potential MTM loss associated with the deterioration in the creditworthiness of the counterparty. The Group applies standardized approach to calculate CVA capital charge on over-the-counter derivative contracts.

b. Analysis of counterparty default risk exposures (other than those to CCPs) by approaches (CCR1)

The following table sets out a comprehensive breakdown of default risk exposures (other than those to CCPs), RWAs, and, where applicable, main parameters under the approaches used to calculate default risk exposures in respect of derivative contracts and SFTs.

	(a)	(b)	(c)	(d)	(e)	(f)
At 31 December 2023	Replacement cost (RC) HK\$'M	PFE	Effective EPE %	Alpha (a) used for computing default risk exposure	Default risk exposure after CRM HK\$'M	RWA HK\$'M
1 SA-CCR (for derivative contracts) ¹	14,472	53,390		1.4	94,090	36,088
1a CEM (for derivative contracts)	-	-		1.4	-	-
2 IMM (CCR) approach			-	1.4	-	-
3 Simple Approach (for SFTs)					-	-
4 Comprehensive Approach (for SFTs) ²					230,102	3,761
5 VaR (for SFTs)					-	-
6 Total						39,849

¹ Decrease in default risk exposures was due to decrease in replacement cost of derivative exposures.

² Increase in default risk exposure was due to increase in volume of SFTs.

10 Counterparty Credit risk (continued)

c. CVA capital charge (CCR2)

The following table sets out an information on portfolios subject to the CVA capital charge and the CVA calculations based on standardized CVA method and advanced CVA method.

At 31 December 2023	(a) EAD post CRM HK\$'M	(b) RWA HK\$'M
Netting sets for which CVA capital charge is calculated by the advanced CVA method	-	-
1 (i) VaR (after application of multiplication factor if applicable)	-	-
2 (ii) Stressed VaR (after application of multiplication factor if applicable)	-	-
3 Netting sets for which CVA capital charge is calculated by the standardized CVA method	93,991	17,995
4 Total	93,991	17,995

Decrease in CVA capital charge was mainly due to decrease in replacement cost of derivative exposures.

d. Counterparty default risk exposures (other than those to CCPs) by asset classes and by risk weights – for STC approach (CCR3)

The following table sets out a breakdown of default risk exposures, other than those to CCPs, in respect of derivative contracts and SFTs that are subject to the STC approach, by asset classes and risk-weights (the latter representing the riskiness attributed to the exposure according to the respective approaches), irrespective of the approach used to determine the amount of default risk exposures.

At 31 December 2023	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)	(k) Total default risk exposure after CRM
Risk Weight	0%	10%	20%	35%	50%	75%	100%	150%	250%	Others	Total
Exposure class	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M	HK\$'M
3 Multilateral development bank exposures	78	-	-	-	-	-	-	-	-	-	78
6 Corporate exposures	-	-	-	-	-	-	333	-	-	-	333
12 Total	78	-	-	-	-	-	333	-	-	-	411

Decrease in total default risk exposure after CRM was mainly due to decrease in corporate exposures partially offset by increase in multilateral development bank exposures.

10 Counterparty Credit risk (continued)

e. Counterparty default risk exposures (other than those to CCPs) by portfolio and PD range – for IRB approach (CCR4)

The following table sets out all the relevant parameters used for the calculation of counterparty default risk capital requirements for IRB exposures (other than those to CCPs).

At 31 December 2023 PD scale	(a) EAD post-CRM HK\$'M	(b) Average PD	(c) Number of obligors	(d) Average LGD	(e) Average maturity	(f) RWA HK\$'M	(g) RWA density
Portfolio (i) – Sovereign							
0.00 to < 0.15	15,158	0.04%	20	11.9%	0.44	274	2%
0.15 to < 0.25	-	0.00%	-	0.0%	-	-	0%
0.25 to < 0.50	-	0.00%	-	0.0%	-	-	0%
0.50 to < 0.75	-	0.00%	-	0.0%	-	-	0%
0.75 to < 2.50	-	0.00%	-	0.0%	-	-	0%
2.50 to < 10.00	-	0.00%	-	0.0%	-	-	0%
10.00 to < 100.00	-	0.00%	-	0.0%	-	-	0%
100.00 (Default)	-	0.00%	-	0.0%	-	-	0%
Sub-total	15,158	0.04%	20	11.9%	0.44	274	2%
Portfolio (ii) – Bank							
0.00 to < 0.15	193,371	0.05%	176	13.3%	0.42	8,660	4%
0.15 to < 0.25	39,208	0.22%	38	14.0%	0.79	6,876	18%
0.25 to < 0.50	813	0.39%	19	36.0%	0.57	360	44%
0.50 to < 0.75	5,766	0.60%	24	12.2%	0.39	1,031	18%
0.75 to < 2.50	810	1.89%	15	33.3%	1.00	572	71%
2.50 to < 10.00	29	2.67%	2	5.0%	1.00	4	15%
10.00 to < 100.00	21	13.77%	4	73.4%	1.00	67	325%
100.00 (Default)	-	0.00%	-	0.0%	-	-	0%
Sub-total	240,018	0.10%	278	13.5%	0.48	17,570	7%
Portfolio (iii) – Corporate							
0.00 to < 0.15	36,387	0.11%	347	27.0%	1.03	4,572	13%
0.15 to < 0.25	6,969	0.22%	434	47.7%	1.30	3,178	46%
0.25 to < 0.50	4,049	0.39%	145	43.5%	0.81	1,885	47%
0.50 to < 0.75	12,930	0.53%	150	21.6%	0.49	3,725	29%
0.75 to < 2.50	5,914	1.21%	118	45.6%	1.00	5,175	88%
2.50 to < 10.00	2,260	3.11%	29	53.8%	1.05	3,070	136%
10.00 to < 100.00	20	14.78%	25	71.9%	1.56	67	334%
100.00 (Default)	76	100.00%	3	47.7%	2.63	-	0%
Sub-total	68,605	0.52%	1,251	31.6%	0.94	21,672	32%
Total (all portfolios subject to the IRB approaches)	323,781	0.19%	1,549	17.3%	0.58	39,516	12%

Increase in EAD post-CRM was mainly due to the increase in bank exposures partially offset by decrease in corporates and sovereign exposures.

10 Counterparty Credit risk (continued)

f. Composition of collateral for counterparty default risk exposures (including those for contracts or transactions cleared through CCPs) (CCR5)

The following table sets out a breakdown of all types of collateral posted or recognized collateral received to support or reduce the exposures to counterparty default risk exposures in respect of derivative contracts or SFTs entered into, including contracts or transactions cleared through a CCP.

At 31 December 2023	Derivative contracts				SFTs	
	Fair value of recognized collateral received		Fair value of posted collateral		Fair value of recognized collateral received	Fair value of posted collateral
	(a) Segregated HK\$'M	(b) Unsegregated HK\$'M	(c) Segregated HK\$'M	(d) Unsegregated HK\$'M		
Exposure classes						
Cash – domestic currency	–	200	–	13	1,260	59,418
Cash – other currencies	–	5,508	–	14,734	17,197	134,085
Domestic sovereign debt	–	–	–	–	6,617	1,958
Other sovereign debt	–	5,474	–	8,877	94,740	23,715
Government agency debt	–	–	–	–	9,315	865
Corporate bonds	–	8,791	–	3,968	32,990	9,654
Equity securities	–	–	–	–	58,275	407
Other collateral	–	281	–	–	–	–
Total	–	20,254	–	27,592	220,394	230,102

Movement in collateral received and posted for SFTs was in line with the increased volume of SFTs.

g. Credit-related derivatives contracts (CCR6)

The following table sets out the amount of credit-related derivative contracts, broken down into credit protection bought and credit protection sold.

At 31 December 2023	(a) Protection bought HK\$'M	(b) Protection sold HK\$'M
Notional amounts		
Single-name credit default swaps	–	–
Index credit default swaps	–	–
Total return swaps	105,085	10,707
Credit-related options	–	–
Other credit-related derivative contracts	22,652	3,555
Total notional amounts	127,737	14,262
Fair values		
Positive fair value (asset)	342	230
Negative fair value (liability)	(1,605)	–

Increase in total notional amount were mainly driven by the increase in transaction volume.

10 Counterparty Credit risk (continued)

h. Exposures to CCPs (CCR8)

The following table sets out a comprehensive breakdown of exposures to both qualifying and non-qualifying CCPs and the respective RWAs, covering all types of credit risk exposures (including default risk exposures to the CCPs, credit risk exposures arising from initial margins posted, and default fund contributions made, to the CCPs).

At 31 December 2023	(a) Exposure after CRM HK\$'M	(b) RWA HK\$'M
1 Exposures of the AI as clearing member or client to qualifying CCPs (total)		351
2 Default risk exposures to qualifying CCPs (excluding items disclosed in rows 7 to 10), of which:	14,427	289
3 (i) OTC derivative transactions	–	–
4 (ii) Exchange-traded derivative contracts	14,427	289
5 (iii) Securities financing transactions	–	–
6 (iv) Netting sets subject to valid cross-product netting agreements	–	–
7 Segregated initial margin	–	
8 Unsegregated initial margin	515	10
9 Funded default fund contributions	957	52
10 Unfunded default fund contributions	–	–
11 Exposures of the AI as clearing member or client to non-qualifying CCPs (total)		–
12 Default risk exposures to non-qualifying CCPs (excluding items disclosed in rows 17 to 20), of which:	–	–
13 (i) OTC derivative transactions	–	–
14 (ii) Exchange-traded derivative contracts	–	–
15 (iii) Securities financing transactions	–	–
16 (iv) Netting sets subject to valid cross-product netting agreements	–	–
17 Segregated initial margin	–	–
18 Unsegregated initial margin	–	–
19 Funded default fund contributions	–	–
20 Unfunded default fund contributions	–	–

Decrease in total exposures and RWA were mainly due to the decrease in volume of exchange-traded derivative contracts.

11 Securitization exposures

a. Qualitative disclosures related to securitization exposure (SECA)

Securitization activities are undertaken by the Group for risk-taking purpose by various businesses acting as investors. The Group adopts the SEC-ERBA and SEC-SA to calculate the credit risk for asset securitizations in which it is an investing institution. For the Group's originated positions, these are all reported under the SEC-IRBA.

The Group uses the following external credit assessment institutions to calculate the capital adequacy requirements: S&P, Moody's and Fitch Ratings.

The Group's securitization exposures are measured in accordance with the accounting policy described in note 2(i) of the 2023 consolidated financial statements.

11 Securitization exposures (continued)

a. Qualitative disclosures related to securitization exposure (SECA) (continued)

The securitised assets have appropriate credit and market risk limits in place with exposures being monitored against these limits. There is also a periodic performance analysis of the underlying collateral pools through review of trustee reports, market research and monitoring the changes of their external ratings. In addition, for Corporate & Institutional Banking and Commercial Banking clients, there is an internal credit model in place to measure any change in the performance of the underlying collateral pools.

b. Securitization exposures in banking book (SEC1)

The following table sets out a breakdown of securitization exposures in the banking book.

		(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)
		Acting as originator (excluding sponsor)			Acting as sponsor			Acting as investor		
		Traditional	Synthetic	Sub-total	Traditional	Synthetic	Sub-total	Traditional	Synthetic	Sub-total
1	Retail (total) – of which:	-	-	-	-	-	-	27,213	-	27,213
2	residential mortgage	-	-	-	-	-	-	19,498	-	19,498
3	credit card	-	-	-	-	-	-	2,864	-	2,864
4	other retail exposures	-	-	-	-	-	-	4,851	-	4,851
5	re-securitization exposures	-	-	-	-	-	-	-	-	-
6	Wholesale (total) – of which:	-	5,582	5,582	-	-	-	2,113	-	2,113
7	loans to corporates	-	5,582	5,582	-	-	-	2,113	-	2,113
8	commercial mortgage	-	-	-	-	-	-	-	-	-
9	lease and receivables	-	-	-	-	-	-	-	-	-
10	other wholesale	-	-	-	-	-	-	-	-	-
11	re-securitization exposures	-	-	-	-	-	-	-	-	-

The decrease in exposures during the period was mainly driven by the decrease in investor exposures under retail and wholesale.

c. Securitization exposures in trading book (SEC2)

The following table sets out a breakdown of securitization exposures in the trading book.

		(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)
		Acting as originator (excluding sponsor)			Acting as sponsor			Acting as investor		
		Traditional	Synthetic	Sub-total	Traditional	Synthetic	Sub-total	Traditional	Synthetic	Sub-total
1	Retail (total) – of which:	-	-	-	-	-	-	2,210	-	2,210
2	residential mortgage	-	-	-	-	-	-	1,440	-	1,440
3	credit card	-	-	-	-	-	-	-	-	-
4	other retail exposures	-	-	-	-	-	-	770	-	770
5	re-securitization exposures	-	-	-	-	-	-	-	-	-
6	Wholesale (total) – of which:	-	-	-	-	-	-	933	-	933
7	loans to corporates	-	-	-	-	-	-	594	-	594
8	commercial mortgage	-	-	-	-	-	-	-	-	-
9	lease and receivables	-	-	-	-	-	-	110	-	110
10	other wholesale	-	-	-	-	-	-	229	-	229
11	re-securitization exposures	-	-	-	-	-	-	-	-	-

The increase in exposures during the period was mainly driven by the increase in exposures under loans to corporates and other wholesale partially offset by decrease in other retail exposures.

11 Securitization exposures (continued)

d. Securitization exposures in banking book and associated capital requirements – where the Group acts as originator (SEC3)

The following table sets out the securitization exposures in the banking book where the Group acts as originator of securitization transactions and the associated capital requirements.

	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)	(k)	(l)	(m)	(n)	(o)	(p)	(q)	
	Exposure values (by RW bands)					Exposure values (by regulatory approach)			RWAs (by regulatory approach)			Capital charges after cap						
	<20% RW	>20% to 50% RW	>50% to 100% RW	>100% to <1250% RW	1250% RW	SEC- IRBA (incl IAA)	SEC- ERBA	SEC-SA	SEC-FBA	SEC- IRBA (incl IAA)	SEC-SA	SEC-FBA	SEC- IRBA (incl IAA)	SEC-SA	SEC-FBA	SEC- ERBA	SEC-SA	SEC-FBA
1 Total exposures	5,547	-	-	35	-	5,582	-	-	-	1,043	-	-	-	83	-	-	-	
2 Traditional securitization	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
3 Of which securitization	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
4 Of which retail underlying	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
5 Of which wholesale	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
6 Of which re-securitization	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
7 Of which senior	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
8 Of which non-senior	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
9 Synthetic securitization	5,547	-	-	35	-	5,582	-	-	-	1,043	-	-	-	83	-	-	-	
10 Of which securitization	5,547	-	-	35	-	5,582	-	-	-	1,043	-	-	-	83	-	-	-	
11 Of which retail underlying	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
12 Of which wholesale	5,547	-	-	35	-	5,582	-	-	-	1,043	-	-	-	83	-	-	-	
13 Of which re-securitization	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
14 Of which senior	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
15 Of which non-senior	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	

e. Securitization exposures in banking book and associated capital requirements – where the Group acts as investor (SEC4)

The following table sets out the securitization exposures in the banking book where the Group acts as an investing institution of securitization transactions and the associated capital requirements.

	(a)	(b)	(c)	(d)	(e)	(f)	(g)	(h)	(i)	(j)	(k)	(l)	(m)	(n)	(o)	(p)	(q)	
	Exposure values (by RW bands)					Exposure values (by regulatory approach)			RWAs (by regulatory approach)			Capital charges after cap

14 Of which senior	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	
15 Of which non-senior	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	

Please refer to SEC1 for the main drivers of the exposures

12 Market risk

a. Qualitative disclosures related to market risk (MRA, MRB)

Our approach to Market risk can be found in the Risk Management approach section of the 2023 consolidated financial statements.

The primary categories of market risk for the Group are:

- Interest Rate Risk: arising from changes in yield curves, and implied volatilities on interest rate options.
- Foreign Exchange Rate Risk: arising from changes in currency exchange rates and implied volatilities on foreign exchange options.
- Commodity Risk: arising from changes in commodity prices and implied volatilities on commodity options; covering energy, precious metals, base metals and agriculture.
- Credit Spread Risk: arising from changes in the price of debt instruments and credit-linked derivatives, driven by factors other than the level of risk-free interest rates.
- Equity Risk: arising from changes in the prices of equities, equity indices, equity baskets and implied volatilities on related options.

Trading book

The Trading book contains positions held with trading intent or hedges for such positions. The Traded Risk Framework sets out the Group's standard systematic approach to risk managing market risk. The Market Risk Standard identifies the policies and procedures determining the positions included in the Trading book and their risk management and valuation. All trading book desks are subject to market risk limits. Traded Risk Management, an independent risk control function, monitors the limits and reports daily to senior management.

Valuation frameworks

Valuation of financial assets and liabilities held at fair value is subject to an independent review by Valuation Control within the Finance function. For those financial assets and liabilities whose fair value is determined by reference to externally quoted prices or market observable pricing inputs or to a valuation model, an assessment is made by Valuation Control against external market data and consensus services. Valuation Control also ensures adherence to the valuation adjustment frameworks to incorporate bid/ask spreads, model risk and other reserves, and, where appropriate, to mark all positions in accordance with prevailing accounting and regulatory guidelines.

The HK Valuation Committee (VC) provides oversight and governance of valuation adjustments, price testing and valuation policies, and reviews the results of the valuation control process on a quarterly basis. In addition, the Hong Kong Benchmark Rates Review Committee governs the benchmark rates setting, submission, monitoring and review policies and provides the platform to which issues are escalated.

Management VaR

Management VaR is one of the tools used by management to monitor the total market risk within the trading and non-trading books.

Regulatory VaR

Regulatory VaR is used to estimate the potential loss, from market movements, across trading book positions for which the Bank has received permission to apply the internal model approach (IMM). Regulatory VaR, including Stressed VaR and Risk-Not-in-VaR (RNIV) measures, is used to calculate market risk RWAs for positions falling under the IMM permission.

12 Market risk (continued)

a. Qualitative disclosures related to market risk (MRA, MRB) (continued)

Regulatory VaR vs Management VaR

Variable	Regulatory VaR	Management VaR
Confidence level	99%	97.5%
Historical Observation	Max (260 business days unweighted, 130 business days unweighted)	260 business days unweighted
Liquidity Horizon	1 day scaled to 10-day VaR by multiplying by the square root of 10. A more conservative multiplier is applied if statistical hypothesis testing shows that the square root of 10 multiplier is not sufficiently appropriate.	1 day
Updating Frequency	1 day	1 day
Scope	As approved by HKMA, under Internal Model Approval (IMM)	All non-structural market risk exposures across the trading and non-trading books

Hong Kong Monetary Authority (“HKMA”) has granted SCBHK permission to use the Internal Models Approach (IMM) to calculate its general market risk capital charge from December 2021 onwards in selected asset classes. In addition, SCBHK has agreed with HKMA and started providing a VaR number with a shorter 6-month window to increase its responsiveness to market volatility. The 6-month VaR has been implemented since November 2022.

For December 2023, VaR contributed 16% and stressed VaR contributed 48% for SCBHK general market risk capital charge.

Backtesting

Backtesting is performed to ensure that the VaR model is fit for purpose. It measures the ability of the model to correctly reflect the potential level of losses under normal trading conditions, for a certain confidence level.

A backtesting breach is recorded when the net trading P&L loss in one day is greater than the estimated VaR for the same day.

HKMA regulation specifies that a model with fewer than five backtesting exceptions in the last 250 trading days is deemed to be in the ‘green zone’.

Stressed VaR

Stressed VaR applies the same model as for regulatory VaR but using a one-year historical observation period from a stressed period relevant to the trading book portfolio.

For SCBHK the stressed period applied was the 260 business days ending 30 June 2009 reflecting the Global Financial Crisis. This is the same period used for the Group stressed VaR calculation.

Risks-not-in-VaR framework

The Risks-not-in-VaR (RniV) framework is used to supplement the main VaR model in the context of estimating risks that are not captured in the model. An example of this is the use of proxies where market data is not available during the stressed period. In such instances, the RniV approach is used to quantify the capital requirement.

12 Market risk (continued)

a. Qualitative disclosures related to market risk (MRA, MRB) (continued)

Stress testing

Group-wide stress testing is performed to measure the potential loss on a portfolio of financial positions due to low probability market events or risk to the Group posed by a breakdown of risk model assumptions.

So stress testing supplements the use of VaR as the primary measure of risk. The roles and responsibilities of the various functions are set out in the Traded Risk Stress Testing standard.

Market risk changes

The global rate hiking cycle from the major central banks was coming to an end as inflation is slowing down. However, the global growth projections are revised down for 2024 as geopolitical tension and higher borrowing costs continue to weigh on the broader economy.

Management VaR allows SCB to manage the market risk across the trading book and most of the fair valued non-trading books. There was a spike in market volatility in March 2023 due to the collapse of some large financial institutions which has sent shockwaves through the financial market. The extreme movements contributed to a larger VaR as the tail risk scenarios became the major driver in the VaR window in 2023. In addition, there were fewer diversification benefits in VaR as similar risk exposures were being warehoused for the clients across the major currencies.

Trading and Non-trading (VaR at 97.5%, 1 day)

Value at risk:	2023				2022			
	Average HK\$'M	High** HK\$'M	Low** HK\$'M	Actual* HK\$'M	Average HK\$'M	High** HK\$'M	Low** HK\$'M	Actual* HK\$'M
Total	177.7	242.4	105.2	192.9	120.8	150.5	95.9	128.0

Trading (VaR at 97.5%, 1 day)

Value at risk:	2023				2022			
	Average HK\$'M	High** HK\$'M	Low** HK\$'M	Actual* HK\$'M	Average HK\$'M	High** HK\$'M	Low** HK\$'M	Actual* HK\$'M
Interest rate risk	62.4	106.4	34.1	59.0	39.1	57.9	23.2	36.4
Foreign exchange risk	18.6	37.8	7.3	21.4	15.7	29.5	8.3	18.6
Credit spread risk	35.4	46.9	26.0	33.2	27.8	45.7	16.0	36.6
Total [^]	75.7	134.6	40.4	82.0	45.7	75.4	30.7	45.8

Non-trading (VaR at 97.5%, 1 day)

Value at risk:	2023				2022			
	Average HK\$'M	High** HK\$'M	Low** HK\$'M	Actual* HK\$'M	Average HK\$'M	High** HK\$'M	Low** HK\$'M	Actual* HK\$'M
Interest rate risk ^{^^}	136.8	167.7	88.7	138.6	94.0	134.0	69.5	107.3

* Actual one day VaR at period end date.

** Highest and lowest VaR for each risk factor are independent and usually occur on different days.

[^] Total Trading VaR shown in the tables above is not a sum of the component risks due to offsets between them.

^{^^} Includes credit spread risk arising from fair value through profit or loss ("FVTPL") and fair value through other comprehensive income ("FVOCI") securities.

Total trading VaR includes Commodity risks which are immaterial in exposure

12 Market risk (continued)

b. Market risk under STM approach (MR1)

The following table sets out the components of the market risk capital requirements calculated using the standardized (market risk) approach (STM approach).

At 31 December 2023		(a) RWA HK\$'M
Outright product exposures		
1	Interest rate exposures (general and specific risk)	9,642
2	Equity exposures (general and specific risk)	-
3	Foreign exchange (including gold) exposures	4,989
4	Commodity exposures	2,649
Option exposures		
5	Simplified approach	-
6	Delta-plus approach	-
7	Other approach	-
8	Securitization exposures	13,669
9	Total	30,949

Decrease in market risk RWA under STM approach was mainly due to decrease in securitization exposures and foreign exchange (including gold) exposures.

c. RWA flow statements of market risk exposures under IMM approach (MR2)

The table below shows the RWA under IMM model as of December 2023.

	(a) VaR HK\$'M	(b) Stressed VaR HK\$'M	(c) IRC HK\$'M	(d) CRC HK\$'M	(e) Other HK\$'M	(f) Total RWA HK\$'M
1	RWA as at end of previous reporting period	11,898	26,059	N/A	N/A	37,957
2	Movement in risk levels	2,454	15,915	N/A	N/A	18,369
3	Model updates/changes	(8)	(70)	N/A	N/A	(78)
4	Methodology and policy	-	-	N/A	N/A	-
5	Acquisitions and disposals	-	-	N/A	N/A	-
6	Foreign exchange movements	(12)	(33)	N/A	N/A	(45)
7	Other	-	-	N/A	N/A	-
8	RWA as at end of reporting period	14,332	41,871	N/A	N/A	56,203

12 Market risk (continued)

d. IMM approach values for market risk exposures (MR3)

Internal Models Approach

The results reflect only the portfolio covered by the internal model approach and are calculated at a 99 per cent confidence level, excluding RNIV and Capital add-on that also contributes to the capital charge.

(a)
HK\$'M

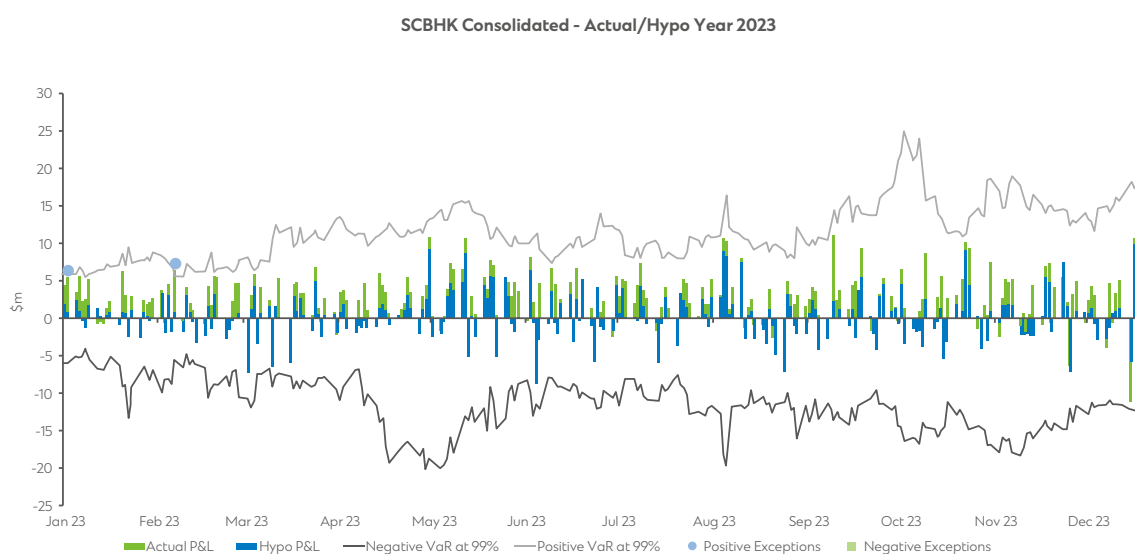

VaR (10 days – one-tailed 99% confidence interval)		
1	Maximum Value	496
2	Average Value	286
3	Minimum Value	103

12 Market risk (continued)

e. Comparison of VaR estimates with gains or losses (MR4)

The graphs below illustrate the performance of the VaR model used in the SCBHK Group capital calculations. They compare the 99 percentile loss confidence level given by the VaR model with the Hypothetical and Actual P&L of each day given the real market movements. Actual backtesting P&L excludes the following from trading P&L: brokerage expense, fees & commissions, non-market-related accounting valuation adjustments and accounting debit valuation adjustments. Hypothetical backtesting P&L further excludes P&L from new deals and market operations.

Backtesting chart for Internal Model Approach regulatory trading book at SCBHK Consolidated level with profit and loss (P&L) versus VaR (99 per cent, one day)

In total, there have been zero SCBHK regulatory backtesting negative exceptions in the previous 250 business days which is within the 'Green zone' applied according to HKMA's regulation. The positive exceptions in Actual P&L occurred on 13th January and 17th February 2023: Client Income, Intraday trades, and reserve adjustments.

f. Market risk exposures on guaranteed retirement funds

The capital requirement for the Group's guaranteed retirement funds is calculated based on the potential shortfall between the estimated returns from the funds and the guaranteed returns after considering accounting provisions. The projected returns are estimated using a simulation approach with a 99% confidence level. The model is backtested against actual results. As of 31 December 2023, the accounting provisions exceed the potential shortfalls, hence there are no additional capital requirements.

13 Interest rate risk

a. Interest rate risk in banking book – risk management objectives and policies (IRRBBA)

Overview

The Group defines Interest Rate Risk in the Banking Book (“IRRBB”) as the potential for a reduction in future earnings or economic value due to changes in interest rates. This risk arises from differences in the repricing profile, interest rate basis, and optionality of banking book assets, liabilities, and off-balance sheet items. IRRBB represents an economic and commercial risk to the Group and its capital adequacy. The Group monitors IRRBB against Board-approved Risk Appetite.

IRRBB is managed at country level by the ALCO and at regional level by the RALCO, is monitored by Regional Treasury, subject to independent oversight and challenge from Treasury Risk and Group Internal Audit. IRRBB models are independently validated and approved by a designated model approval body.

Measurement of IRRBB

The Group uses two key metric types for measuring IRRBB: Net Interest Income (“NII”) Sensitivity, an income measure which quantifies the potential change in projected net interest income over a one-year horizon from defined movements in interest rates; and Economic Value of Equity (“EVE”), a value measure which estimates the potential change in the present value of the Group’s Banking Book assets and liabilities from defined movements in interest rates. Both NII and EVE are monitored monthly against defined Risk Appetite limits.

Methodology

NII and EVE are calculated under various interest rate scenarios, including parallel and non-parallel shifts and a range of internally designed scenarios that assess vulnerabilities in the Group’s business model and key behavioural assumptions under interest rate shocks and stresses. Risk Appetite limits are monitored with respect to six interest rate scenarios prescribed by the HKMA.

The model assumptions used internally do not differ from the ones set by the HKMA.

The EVE is calculated based on the assumption that expired interest rate sensitive positions are not replaced. The cash flows include commercial spread components and financial investments consider credit dependent spread components. Cash flows including commercial margins and other spread components are discounted with a risk-free rate curve per currency, such as Interbank Offered Rates (“IBORs”)/Alternative Reference Rates (“ARRs”) and Swap market rates. The NII is computed based on the assumption of a constant balance sheet excluding non-rate-sensitive items.

The average repricing maturity of non-maturing deposits (“NMD”) has been determined based on the stability of deposits, relationship between market interest rate and interest rate offered to the customer with consideration of the historical run off behavior. As of 31 December 2023, the Group’s average and longest repricing maturity assigned to non-maturing deposits are 0.64 year and 4.5 years respectively.

Prepayment model has been used to forecast prepayment rates on retail fixed rate loans and floating rate mortgage portfolios without prime rate cap. The redemption rates of the term deposits have been determined via the parametric time series model.

The Group has identified certain automatic options positions in the banking book. Quantitative interest rate model has been used for computing the values of the automatic options for EVE calculation. The optionality is split out and priced in isolation using applicable method.

Adverse currency impacts on EVE are aggregated for significant currencies following HKMA’s standardized framework.

Stress tests are performed regularly to identify structural risks to NII or EVE under adverse but plausible interest rate scenarios.

13 Interest rate risk (continued)

a. Interest rate risk in banking book – risk management objectives and policies (IRRBBA) (continued)

Management of IRRBB

The Group uses Funds Transfer Pricing (“FTP”) to transfer repricing risk from the business to Treasury Markets, including that arising from structural positions such as the investment of equity and non-maturity deposit balances. For non-maturity deposits, the assumed duration is dependent on the portion that can be considered stable and the degree to which these balances are considered price sensitive.

Certain structural balances have been approved by RALCO and ALCOs to be risk managed directly under the SC PLC’s structural hedging programme, with impact on local risk metrics being closely monitored. Other repricing risks transferred to Treasury Markets are managed on an integrated basis with a securities portfolio maintained for liquidity and investment management purposes. Any basis risk that is not transferred and cannot be hedged by Treasury Markets is reported and overseen at RALCO and ALCO.

Repricing risk arising within Treasury Markets is managed using a combination of on-balance sheet and derivative hedges; derivative hedges are subject to Fair Value and Cash Flow Hedge accounting treatment where available under Hong Kong Financial Reporting Standards. Banking books’ fair valued interest rate risk positions and limits are independently monitored by the Traded Risk Management (“TRM”) function.

b. Quantitative information on interest rate risk in banking book (IRRBB1)

The interest rate risk sensitivity figures presented in the IRRBB1 table represent the effect of six interest rate scenarios defined by HKMA on the expected present value of the banking book as well as the impact of the two parallel shock scenarios on the net interest income of the banking book.

HK\$'M	Period	ΔEVE		ΔNII	
		Change in economic value of equity ¹	Change in net interest income ¹	Change in net interest income ¹	Change in net interest income ¹
		31 December 2023	31 December 2022 ²	31 December 2023	31 December 2022
1	Parallel up	7,229	3,291	(3,143)	(3,619)
2	Parallel down	4,290	5,201	3,324	3,875
3	Steepener	1,421	1,684		
4	Flattener	1,106	2,269		
5	Short rate up	2,171	1,034		
6	Short rate down	2,939	4,288		
7	Maximum	7,229	5,201	3,324	3,875
	Period	31 December 2023		31 December 2022	
8	Tier 1 capital	164,968		161,939	

¹ Positive values of ΔEVE and ΔNII indicate losses under the respective scenarios, in accordance with HKMA’s disclosure requirement

² Comparative data have been re-presented to align with the submission to the HKMA for the revision of non-binding scenarios.

As of 31 December 2023, the most adverse of the six HKMA interest rate scenarios with regard to EVE was changed from “Parallel down” to “Parallel up” scenario (a constant parallel shock up across all time buckets), resulting in an adverse change of economic value of equity of HK\$7,229 million (2022: HK\$5,201 million), representing an effect equal to 4.4% (2022: 3.2%) of Tier 1 capital.

The more adverse of the two parallel interest rate scenarios with regard to NII over the next 12 months was the “Parallel down” scenario, resulting in a potential loss of HK\$3,324 million (2022: HK\$3,875 million).

The increase in EVE loss under parallel up worst case scenario and decrease in NII loss under parallel down worst case scenario was mainly due to lengthening of net asset duration.

14 Remuneration (REMA/REM1/REM2/REM3)

Pursuant to Section 3 of CG-5 on Guideline on a Sound Remuneration System of the Supervisory Policy manual issued by the HKMA and to comply with the Banking (Disclosure) Rules Section 16ZS-16ZV, the following disclosures are required:

- a) Information relating to the governance structure of the remuneration system
- b) Information relating to the design and structure of the remuneration processes
- c) Description of the ways in which current and future risks are taken into account in the remuneration processes
- d) Description of the ways in which the Group seeks to link performance during a performance measurement period with levels of remuneration
- e) Description of the ways in which the Group seeks to adjust remuneration to take account of longer-term performance
- f) Description of the different forms of variable remuneration that the Group utilises and the rationale for using these different forms
- g) Number of meetings held by the PLC Remuneration Committee during the financial year and remuneration paid to the staff

The Group adopts the remuneration policy and systems of SC PLC. Please refer to the Directors' Remuneration Report, which starts from Page 182 of the 2023 Annual Report of SC PLC for details of the PLC Remuneration Committee, the major characteristics of the remuneration system, and how risks are taken into account in the remuneration processes.

- h) Aggregate quantitative information on remuneration for Senior Management and Key Personnel (Note 1) for the years ended 31 December 2023 and 31 December 2022 are as follows:

REM1: Analysis of remuneration split between fixed and variable remuneration

1 In the HKMA CG-5 module Guideline on a Sound Remuneration System published in July 2021, Senior Management is defined as individuals who are responsible for oversight of the Group's firm-wide strategy or activities or those of the Group's material business lines (including, but not limited to, the chief executive and alternate chief executive(s), executive directors, and other senior executives with a role in the Group's business who report directly to the chief executive). Key Personnel is defined as individuals whose duties or activities in the course of their employment involve the assumption of material risk or the taking on of material exposures on behalf of the Group. The lists of Senior Management and Key Personnel are reviewed annually as per HKMA CG-5 requirement to reflect the prevailing organization structure.

2 From the 2023 year-end disclosure onwards, the Group aligns with the remuneration disclosure guidance of SC PLC. Amounts shown in REM1 would include the variable remuneration awarded for the performance year in question, rather than the variable remuneration actually paid or vested during the financial year.

In order to demonstrate a meaningful year-on-year comparison, the amounts for both financial years 2022 and 2023 in REM1 and REM3 adopted the revised disclosure approach. Therefore, the amounts for financial year 2022 displayed this year would be different from the ones shown in REM1 and REM3 of the 2022 year-end disclosure.

15 Operational Risk

The Group adopts the standardized (operational risk) approach for assessing capital requirements for operational risk.

Further information regarding operational risk governance and management is set out in note 33(f) on pages 116 to 117 of the 2023 consolidated financial statements.

16 International claims

International claims are on-balance sheet exposures of counterparties based on the location of those counterparties after taking into account the transfer of risk. Recognized risk transfer refers to the reduction of exposure to a particular country by an effective transfer of credit risk to a different country. For a claim on the branch of a bank or other financial institution, the risk will be transferred to the country where its head office is situated.

International claims on individual countries or segments, after risk transfer, amounting to 10% or more of the aggregated international claims are shown as below:

At 31 December 2023	<i>Banks</i> <i>HK\$'M</i>	<i>Official sector</i> <i>HK\$'M</i>	<i>Non-bank financial institution</i> <i>HK\$'M</i>	<i>Non-financial private sector</i> <i>HK\$'M</i>	<i>Total</i> <i>HK\$'M</i>

17 Advances to customers analysed by industry sector

The analysis of gross loans and advances to customers by industry sector is based on the categories used by the HKMA.

	At 31 December 2023 HK\$'M	% of loans and advances covered by collateral or other securities
Gross loans and advances for use in Hong Kong		
<i>Industrial, commercial and financial</i>		
– Property development	14,802	56%
– Property investment	20,978	79%
– Financial concerns	49,925	17%
– Stockbrokers	3,008	48%
– Wholesale and retail trade	15,231	14%
– Manufacturing	13,978	7%
– Transport and transport equipment	8,936	33%
– Recreational activities	34	–
– Information technology	7,905	–
– Others	21,578	10%
<i>Individuals</i>		
– Advances for the purchase of flats in the Home Ownership Scheme, Private Sector Participation Scheme and Tenants Purchase Scheme	986	100%
– Advances for the purchase of other residential properties	244,167	100%
– Credit card advances	32,997	–
– Others	29,319	33%
<i>Total gross loans and advances for use in Hong Kong</i>	463,844	64%
Trade finance	64,181	9%
Trade bills	3,594	1%
Gross loans and advances for use outside Hong Kong	503,561	51%
Gross loans and advances to customers	1,035,180	54%

The above balances do not include inter-company loans and advances.

17 Advances to customers analysed by industry sector (continued)

The amount of impaired and overdue loans and advances to customers and expected credit loss provision for industry sectors which constitute not less than 10% of the Bank and its subsidiaries' total advances to customers are as follows:

	<i>Impaired loans and advances to customers</i> HK\$'M	<i>Overdue loans and advances to customers</i> HK\$'M	<i>Stage 3 expected credit loss provision</i> HK\$'M	<i>Stage 1 & 2 expected credit loss provision</i> HK\$'M	<i>Provision charge/ (release)</i> HK\$'M
At 31 December 2023					
Advances for the purchase of other residential properties	388	191	9	8	9
Gross loans and advances for use outside Hong Kong	12,428	5,375	7,523	1,700	3,505

18 Loans and advances to customers by geographical location

The analysis of gross loans and advances to customers by geographical location is in accordance with the location of counterparties, after taking into account of any recognised risk transfer.

	<i>Gross loans and advances to customers</i> HK\$'M	<i>Impaired loans and advances to customers</i> HK\$'M	<i>Overdue loans and advances to customers</i> HK\$'M	<i>Specific provisions</i> HK\$'M	<i>General provisions</i> HK\$'M
As at 31 December 2023

19 Overdue assets**(i) Overdue loans and advances to customers**

	<i>At 31 December 2023</i>	
	<i>HK\$'M</i>	<i>% of loans and advances to customers</i>
Gross loans and advances to customers which have been overdue with respect to either principal or interest for periods of:		
6 months or less but over 3 months	925	0.09%
1 year or less but over 6 months	983	0.09%
Over 1 year	6,388	0.62%
	8,296	0.80%

19 Overdue assets (continued)**(i) Overdue loans and advances to customers (continued)**

	<i>At 31 December 2023 HK\$'M</i>
Fair value of collateral held against the covered portion of overdue loans and advances to customers	<u>2,487</u>
Covered portion of overdue loans and advances to customers	1,114
Uncovered portion of overdue loans and advances to customers	<u>7,182</u>

The covered portion of overdue loans and advances to customers represents the amount of collateral held against outstanding balances. It does not include any collateral held over and above outstanding exposures.

The collateral held in respect of overdue loans and advances to customers consists of cash, properties, securities and government guarantee.

	<i>At 31 December 2023 HK\$'M</i>
Stage 3 expected credit loss provision against loans and advances to customers overdue more than 3 months	<u>6,692</u>

(ii) Overdue loans and advances to banks

	<i>At 31 December 2023</i>	
	<i>HK\$'M</i>	<i>% of loans and advances to banks</i>
Gross loans and advances to customers which have been overdue with respect to either principal or interest for periods of:		
6 months or less but over 3 months	-	-
1 year or less but over 6 months	1	-
Over 1 year	<u>23</u>	<u>0.01%</u>
Total	<u>24</u>	<u>0.01%</u>

There is no collateral held against overdue loans and advances to banks.

	<i>At 31 December 2023 HK\$'M</i>
Stage 3 expected credit loss provision against loans and advances to banks overdue more than 3 months	<u>-</u>

As at 31 December 2023, there were no debt securities and other assets overdue more than 3 months.

20 Rescheduled assets

	At 31 December 2023	
	HK\$'M	% of loans and advances to customers
Rescheduled loans and advances to customers	4,560	0.44%

Rescheduled loans and advances are those loans and advances, which have been restructured or renegotiated because of a deterioration in the financial position of the borrowers, or the inability of the borrowers to meet the original repayment schedule and for which the revised repayment terms are non-commercial to the Group. Rescheduled loans and advances to customers are stated net of any loans and advances that have subsequently become overdue for over 3 months and reported as overdue loans and advances in note 19.

As at 31 December 2023, there were no rescheduled loans and advances to banks, debt securities and other assets.

21 Mainland Activities

	On-balance sheet exposure HK\$'M	Off-balance sheet exposure HK\$'M	Total HK\$'M
At 31 December 2023			
(i) Central government, central government-owned entities and their subsidiaries and joint ventures ("JVs")	137,972	20,160	158,132
(ii) Local governments, local government-owned entities and their subsidiaries and JVs	8,917	2,085	11,002
(iii) PRC nationals residing in Mainland China or other entities incorporated in Mainland China and their subsidiaries and JVs	161,488	40,340	201,828
(iv) Other entities of central government not reported in item (i) above	7,698	1,666	9,364
(v) Other entities of local governments not reported in item (ii) above	106	63	169
(vi) PRC nationals residing outside Mainland China or entities incorporated outside Mainland China where the credit is granted for use in Mainland China	16,541	1,822	18,363
(vii) Other counterparties where the exposures are considered by the reporting institution to be non-bank Mainland China exposures	16,118	3,637	19,755
Total	348,840	69,773	418,613
Total assets after provision	2,049,362		
On-balance sheet exposures as percentage of total assets	17.02%		

The off-balance sheet exposure represents the amount at risk should the contract be fully drawn upon and the client default. As the facilities may expire without being drawn upon, the contractual amounts do not represent future cash flows.

The note is compiled in accordance with the completion instructions of the return of Mainland activities ("MA(BS)20"), and hence only relates to the Bank and SCB China.

22 Off-balance sheet exposures

Contingent liabilities and commitments

	At 31 December 2023 HK\$'M
Contractual or notional amounts	
Direct credit substitutes	12,947
Transaction-related contingencies	51,507
Trade-related contingencies	13,520
Forward asset purchases	197
Forward forward deposits placed	1,875
Other commitments:	
which are not unconditionally cancellable:	
with original maturity of not more than one year	8,945
with original maturity of more than one year	141,392
which are unconditionally cancellable	762,449
	<u>992,832</u>
Credit risk weighted amount (before 1.06 scaling factor)	<u>73,392</u>

Contingent liabilities and commitments are credit-related instruments, which include letters of credit, guarantees and commitments to extend credit. The risk involved is similar to the credit risk involved in extending loan facilities to customers. These transactions are, therefore, subject to the same credit application, portfolio maintenance and collateral requirements as for customers applying for loans. The contractual amounts represent the amounts at risk should the contract be fully drawn upon and the client defaults. As the facilities may expire without being drawn upon, the contractual amounts do not represent expected future cash flows.

Acronyms

AI	Authorized institution	PD	Probability of default
AIRB	Advanced internal ratings-based approach	PF	Project finance
