H. LIQUIDITY INFORMATION

For the quarter For the quarter ended 31-Dec-24 52.58% 63.33%

ended 31-Dec-23

Average liquidity maintenance ratio for the period

The average liquidity maintenance ratio for the period is the simple average of each calendar month's average liquidity maintenance ratio. The liquidity maintenance ratio ("LMR") is computed in accordance with the Banking (Liquidity) Rules with effect from 1 January 2015.

Liquidity Risk Management

(1) Goverance of liquidity risk management

The liquidity risk of our branch was managed in accordance with the "Head Office's Liquidity and Interest Rate Risk Management Policy ", "Hong Kong Branch's Liquidity Management Guidelines", "Hong Kong Branch's Stress Testing Standards", "Hong Kong Branch's Contingency Funding Standards" and other related regulations received from our Head Office to ensure maintaining stable and adequate liquidity in order to meet the payment and settlement obligation under the normal and pressure situations. Therefore, the payment and settlement system can be operated smoothly.

(2) Structure and respnsibilities for liquidity risk management

The Risk Management Committee is mainly responsible for the liquidity risk management in our Branch. The Chief Executive is the chairman of the Committee. The members include the Heads of Treasury Department, Deposits Department, Loans Department, Accounting Department, Risk Management Department and Compliance Department. Chief Executive could also invite other staff to attend the Committee meeting if necessary.

(3) Liquidity risk reports

The branch prepares daily LMR report and delivers it to the management, and prepares monthly maturity gap ratio and repricing gap reports to The Investment Management Committee and Head Office. Based on liquidity gap analysis and the changes of the structure, the branch allocates adequate funding to reduce liquidity risk.

(4) Funding strategy

The branch manages the liquidity risk to maintain adequate liquidity level and ensure payment ability under the daily and specific stress scenarios. The liquidity risk management principles includes:

- The funding sources should be diversified, stable and reliable.
- The use of funds should be broad.
- 3. Regularly assess the structure of the asset and liability portfolio.

(5) Liquidity risk mitigation techniques

The minimum liquidity maintenance ratio included in our branch internal policy is higher than the statutory minimum requirement and liquidity position is monitored by the management on a daily basis to ensure that our branch maintains adequate liquidity.

Liquidity stress test should be performed periodically for institution-specific, market-wide and combined stress scenarios and the results will be reported and delivered to the management. The result will be the reference for the improvement of liquidity risk management and contingency funding plan.

(7) Contingency funding plan

The Contingency Funding Plan (CFP) specifies a contingency plan when the market faces abnormal volatility and our branch fails to get funding at reasonable cost or lacks liquidity. The CFP should test periodically.

Our branch's source of funding is mainly from customer deposits and borrowing from banks.
