#### 9. Liquidity information

The average liquidity maintenance ratio ("LMR") is being calculated based on the arithmetic mean of the average value of liquidity maintenance ratio for each month during reporting period. The liquidity maintenance ratio is calculated in accordance with the guidelines of the HKMA and the Banking (Liquidity) Rules

2024 2023 Average liquidity maintenance ratio for the period of April to June 46.28% 50.80%

#### IV OTHER INFORMATION

#### 1. DISCLOSURE OF REMUNERATION

#### A. Remuneration system

In accordance with HKMA's Supervisory Policy Manual Guideline on a Sound Remuneration System - CG5 issued on March 12, 2015, Shanghai Commercial & Savings Bank has disclosed the relevant information in 2023 Bank Annual Report.

#### 2. LIQUIDITY RISK MANAGEMENT

#### A. Policy Statement of Liquidity risk management

The purpose of liquidity risk management is to ensure our abilities with sufficient cash flows to meet obligations payable to our customers and interbank counterparties. And our Branch should always hold an adequate quantity of high quality liquid assets in order to handle the situation of liquidity shortfalls.

Our Branch obeys "Hong Kong Branch Liquidity Management Policy", "Recovery Plan" and other related regulations from our Head office to manage the liquidity risk.

Our Branch manages the liquidity on a prudent basis to ensure that we can always maintain a sufficiently high liquidity maintenance ratio relative to the statutory minimum. Otherwise, the internal limit of liquidity maintenance ratio on average for each calendar month is set at 40% and daily limit is set at 37% in order for the Branch to retain sufficient liquidity during its normal course of operation.

#### B. Management Mechanism of liquidity risk management

Asset and Liability Committee ("ALCO") is mainly responsible for the liquidity risk management in our Branch.

Assets and Liability Committee ("ALCO") is in charge of funds sources and asset allocation management, as well as market risk, liquidity risk and interest rate risk management, and other matters related to assets and liabilities management; members include the General Manager, department heads from administration, operation, treasury and business wealth management departments, compliance manager, risk control manager and accounting manager. The ALCO is chaired by the General Manager.

The Branch's liquidity risk management system contains the following factors: effective monitoring by senior management, liquidity risk management strategies, policies and processes, identification of liquidity risk, risk calculation including limit, stress testing and cash flow analysis, internal controls and monitoring mechanisms, IT systems and crisis disposal mechanisms.

Risk control department takes the lead for the Branch's liquidity risk management. For liquidity risk management, it should be separately controlled according to different currencies. However, considering that the total volume of foreign currency liabilities (excluding USD) is small, the Branch consolidates and manages different foreign currencies together.

The Branch's liquidity risk management framework can accurately, continuously calculate, monitor, manage, control and report liquidity risk status in a timely manner. It can calculate cash flow and maturity mismatch every day according to contractual maturities, followed by calculating and analysing related data according to different currencies under liquidity risk management mode. Lastly, it can effectively and timely monitor and control the Branch's large amount find flow
