**BANK JULIUS BAER & CO. LTD.**  
**Hong Kong Branch**  
**Liquidity Information**  
**As at 31 December 2025**

	<b>31 Dec 2025</b>	<b>31 Dec 2024</b>
Average Liquidity Maintenance Ratio	(for 3 months period) 45.66%	(for 3 months period) 46.48%

The Branch has adopted the liquidity maintenance ratio ("LMR") requirement in accordance with the Banking (Liquidity) Rules starting 1 January 2015 onwards. It complies with the minimum requirement of 25% as stipulated by the Hong Kong Monetary Authority.

The average LMR for the period is the arithmetic mean of each calendar month's average LMR calculated in accordance with the Banking (Liquidity) Rules.

#### **Liquidity Risk Management**

The aim of the liquidity risk management is to ensure that the Bank Julius Baer & Co. Ltd Hong Kong Branch ("BJBHK") has sufficient funds to meet all its immediate and future payment obligations in time and to allow its businesses to operate without disruption under normal conditions and in particular under bank specific or market related stress periods.

This objective is reflected in the liquidity risk management framework of the Julius Baer Group Ltd. ("the JB Group") and documented such in its fundamental policies and manuals at Head Office and BJBHK levels.

At the Head Office level, the Board of Directors of the JB Group is ultimately responsible for establishing the Liquidity Risk Tolerance. The JB Group *Asset and Liability Management Committee* ("Group ALMCO") exercises significant management oversight regarding liquidity risk management, which in particular include reviews and approvals of the BJBHK liquidity risk tolerance at least once a year.

At the BJBHK branch level, the Local Asset and Liability Management Committee ("BJB HK ALCO") comprising key members from local branch management as well as the JB Group Treasurer, conducts meetings on a monthly and when necessary basis. Its duties include in particular the review of adherence to limits, monitoring all internal and local regulatory metrics related to liquidity and funding risks and the review of the local Liquidity Manual. The latter defines the quantitative and qualitative measures for managing liquidity and funding risk.

It is BJBHK policy to maintain a conservative level of liquid funds to meet all obligations. As such the BJBHK management has defined internal liquidity buffers in excess of statutory Liquidity Maintenance Ratio (LMR). In addition, Head Office conducts stress tests of BJBHK on a regular basis.

In general BJBHK relies on funding from JB Group, BJB head office and/or other BJB branches. Bank Julius Baer & Co. Ltd. Zurich acts as lender of the last resort supporting its branches according to the Swiss law.

**Liquidity Risk Management (Con't)**  
**As at 31 December 2025**

BJBHK is a full branch of BJB Zurich, which focuses mainly on pure private banking. Major funding sources include client deposits and interbank borrowings. Client deposits comprise current account balances, on-call deposits and fixed term deposits. Interbank borrowings comprise mainly borrowings from Head Office and from nostro bank counterparties. Current accounts and on-call deposits payable on demand or at short notice form a significant part of BJBHK's funding and there is considerable focus on maintaining the stability of such deposits. BJBHK manages and monitors depositors in order to avoid undue reliance on large individual depositors and ensuring a satisfactory overall funding mix and maturity profile.

BJBHK maintains a cushion of unencumbered, high quality, liquid assets mainly comprising of deposits with the central bank, cash and unencumbered sovereign debt, that can be liquidated or repoed in times of stressed liquidity.

According to BJBHK's Liquidity Contingency Plan, in general, BJBHK relies on intragroup and interbank money-market placements for covering its liquidity requirements. BJBHK is always able to cover any funding requirement through BJB head office in Zurich. BJB head office acts as a central liquidity provider (and the lender of the last resort) supporting its branches according to Swiss law.

BJBHK has taken into account of the following to assess the structure of balance sheet and liquidity positions:

- Loan to Deposit Ratio (LDR) – Monitors the extent to which customer advances are covered by customer deposits.
- Liquidity Risk Monitoring (LMR) – Minimum requirement of 25% requiring BJB to hold enough liquid assets which can, if needed, be converted easily into cash in private markets to survive a 30 day stress scenario.

In general, BJBHK relies on intragroup and interbank money-market placements for covering its liquidity requirements. BJBHK is always able to cover any funding requirement through BJB head office in Zurich. BJB head office acts as a central liquidity provider (and the lender of the last resort) supporting its branches according to Swiss law.
