The Branch can obtain funding from the market by means of money market funding or selling bonds to raise cash quickly to meet short-term liquidity needs. If necessary, the Branch would activate the Contingency Funding plan to recover from liquidity shortage. Mitigation options in the Contingency Funding Plan and the liquidity risk management framework are facilitated to ease the Branch from stress and recover to the usual business position.

#### Governance

Liquidity risk management of Taiwan Shin Kong Commercial Bank, Hong Kong Branch ("The Branch") is governed by policies as established by the Board of Directors of the Head Office. The Branch has established an Asset and Liability Committee ("ALCO"), which is responsible for the management of liquidity and funding risk of the Branch, ensuring that it is managed within the approved policies and procedures, risk tolerance and limits, and complies with regulatory requirements. ALCO members comprise Branch senior management, head of compliance, risk management, treasury, business and support functions

The Branch's qualitative liquidity risk tolerance is to maintain a balanced asset and liability structure to ensure that it is capable of sustaining business growth while meeting various obligations under normal and certain stressed scenarios. Internal liquidity reporting is compiled and monitored on a regular basis for various level of the governance.

The Branch maintains diverse funding sources, including customer deposits, interbank money market, repo facilities and funding support from the Head Office. Controls and measures are in place to avoid over-reliance on interbank funding and intra-group funding.

Liquidity stress testing covers general market, institution-specific and combined stress scenarios and the results are reviewed on a quarterly basis at ALCO meeting to identify the Branch's potential vulnerabilities and its capacity to withstand stressed circumstances.

The Branch's contingency funding plan makes use of both qualitative and quantitative early warning indicators on different internal and external factors. Any early signs of significant impact on the Branch's liquidity position will be discussed in ALCO. Testing on the plan is conducted on an annual basis and the plan is also subject to regular review by ALCO.
