## 1 INTERNATIONAL CLAIMS

## 國際債權

International claims are classified by the type and location of the counterparties after taking into account the ultimate risk lies for assessing country credit risk exposures. In general, such transfer of risk takes place if the claims are guaranteed by a party in a country which is different from that of the counterparty or if the claims are on an overseas branch of a bank whose head office is located in another country. Regions that constitute 10% or more of the aggregate international claims after taking into account any recognized risk transfer are disclosed.

本行根據交易對手類別及交易對手所在地所披露之國際債權，已計入最終風險額之轉移，藉此評估所承受的國家信貸風險。在一般情況下，若債權之擔保人所在地有異於該客，或該債權的履行對象是某銀行的海外分行，則風險會轉移至擔保人之所在地區，或至該銀行的總辦事處區域。經考慮任何已確認之風險轉移後，構成國際債權總額10%或以上之區域方作出披露。

**I. Quantitative Disclosure (Continued)****Funding Strategy**

The implementation of LMR and CFR imposes a more stringent regulatory regime for liquidity risk management on the Bank. To ensure compliance with the enhanced regulatory requirement, internal targets for LMR and CFR have been set above regulatory required levels, making reference to the Bank's liquidity risk appetite. In addition, material changes in the LMR and CFR will be reviewed regularly by the Asset and Liability Management Committee together with proposed mitigation actions to cope with adverse changes arising from, but not limited to, composition of the deposit base and remaining tenor to maturity, lending activities with respect to different maturity tenors, and the Bank's asset and liability mix strategy. In planning the asset and liability mix strategy, the Bank assesses the impact of asset growth and funding structure on the LMR and CFR with support from relevant business units for the Asset and Liability Management Committee's review and decision.

In addition to observing the statutory LMR and CFR, the Bank has established different liquidity metrics – including but not limited to the loan-to-deposit ratio, maturity mismatch ratio – to measure and analyze the Bank's liquidity risks. As at 31 December 2021, the loan-to-deposit ratio of the Bank was 86.27%. The Bank maintains sufficient high quality liquid assets as a liquidity cushion that can be accessed in times of stress. The high quality assets for fulfilling the CFR consist of cash, exchange fund bills and notes, high quality government debt securities and other equivalent liquid marketable assets with External Credit Assessment Institution (ECAI) ratings.

**Minimum Liquid Assets Holding**

The Bank manages liquidity risk by holding sufficient high quality assets (such as, cash, short term funding and investment grading debt securities.) as liquidity cushion to ensure that the short term funding requirements are covered within prudent internal limit.

Starting from 2019, the Bank is required to calculate LMR and CFR in accordance with the regulatory requirements, and to maintain these ratios not less than 25% for LMR and 75% for CFR.

As part of Bank efforts to manage the LMR and CFR effectively, emphasis is placed on strengthening the deposit base by retaining loyal customers and maintaining customer relationships. The Bank balances funding among business and wholesale funding to avoid concentration in any one source. The Bank also diversifies its tenors of funding over various time horizons to avoid significant maturity mismatch in any time bucket. Professional markets are accessed through the issuance of certificates of deposit, Euro medium term notes, money market placement and borrowing for the purposes of providing additional funding, maintaining a presence in local money markets, and optimizing asset and liability maturities.
