#### 1 Introduction

#### **Unaudited Regulatory Disclosure Statement**

This unaudited quarterly regulatory disclosure statement complies with the Banking (Disclosure) Rules ("Rules") under section 60A of the Banking Ordinance and the disclosure templates issued by the Hong Kong Monetary Authority ("HKMA").

These banking disclosures are governed by the Bank's disclosure policy, which has been approved by the Board of Directors. The disclosure policy sets out the approach to determine the content, appropriateness and frequency of the disclosures, the approach to ensure the relevance and adequacy of the disclosures, and the internal control over the process for making the disclosures. The disclosures have been subject to independent review in accordance with the disclosure policy.

Prior period disclosures as required by the Banking (Disclosure) Rules are available on our website: www.livibank.com.

#### Basis of preparation and consolidation

The capital ratios were calculated in accordance with the Banking (Capital) Rules ("BCR") of the Hong Kong Banking Ordinance. In calculating the risk weighted amounts, the Bank adopted the Standardized (Credit Risk) Approach and the Standardized (Market Risk) Approach for credit risk and market risk respectively. For operational risk, the capital requirement is calculated using the alternative approach communicated to HKMA pursuant to section 340 of the BCR.

At 30 September 2022, the Bank does not have any subsidiaries.

#### **Key prudential ratios (KM1)**

The following table sets out an overview of the Bank's key prudential ratios.

Decrease in CET1%, Tier 1% and Total Capital % as of 30 September 2022 was mainly due to the increase in RWAs and operating loss for Q3 2022.

Please refer to note 3 for the key drivers of total RWA.

Decrease in Leverage ratio was mainly due to the decrease in Tier 1 capital base and increase in customer deposits.

Decrease in average LMR% in Q3 2022 was mainly due to the increase in customer deposits outflow.

The LMR disclosed above represents the arithmetic mean of the average value of the LMR for each calendar month within the quarter.

#### 3 Overview of risk-weighted amount ("RWA") (OV1)

The following table sets out an overview of capital requirements in terms of a detailed breakdowns of RWAs for various risks.

<sup>&</sup>lt;sup>1</sup> Increase in credit risk for non-securitization exposures as of 30 September 2022 was mainly due to the increase in retail loan exposures.

<sup>&</sup>lt;sup>2</sup> Increase in market risk exposures was mainly due to more exposures in CNH-denominated customer deposits.

<sup>&</sup>lt;sup>3</sup> Increase in operational risk exposure was due to more gross income than last quarter.

### 4 Leverage ratio (LR2)

The following table sets out a detailed breakdown of the components of the LR denominator.

21	Total exposures after adjustments for specific and collective provisions	3,100,039	2,926,284
Leve	erage ratio		
22	Leverage ratio	22.5%	30.4%

Increase in on-balance sheet exposures (excluding derivative and SFTs) was in line with the trend in customer deposits.

Increase in off-balance sheet exposure at gross notional amount was mainly due to the increase in retail loan exposures.

<sup>&</sup>lt;sup>3</sup> Decrease in Tier 1 capital was mainly due to the operating loss incurred during the reporting period.
