1. Items marked with an asterisk (\*) will be applicable only after their respective policy frameworks take effect. Until then, "Not applicable" should be reported in the rows.

**Explanation of significant drivers behind differences in reporting periods T and T-1.**  
Increase of credit exposures is due to increase in loans and advances and debt securities investment.

**When minimum capital requirements in column (c) do not correspond to 8% of RWA in column (a), the AI must explain the adjustment made.**  
Not applicable.

**If the AI uses the internal models method under the market-based approach to calculate its equity exposures in the banking book pursuant to the BCR, it should provide a description of its internal models used in an accompanying narrative.**  
KEXIM Asia Limited uses Basic approach to measure equity exposures in the banking book. The internal models method under the market-based approach does not apply.
