CCI: Composition of regulatory capital (continued)

As at 31 December 2025

Notes to the Template

	Description	Hong Kong basis	Basel III basis
	Other intangible assets (net of associated deferred tax liabilities)	-	-
	<u>Explanation</u>		
9	As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights ("MSRs") may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI's financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 9 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.		
	Deferred tax assets (net of associated deferred tax liabilities)	118,755	118,755
	<u>Explanation</u>		
10	As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realized are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.		
	Insignificant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
	<u>Explanation</u>		
18	For the purpose of determining the total amount of insignificant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.		
	Significant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
	<u>Explanation</u>		
19	For the purpose of determining the total amount of significant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 19 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.		
	Insignificant capital investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
	<u>Explanation</u>		
39	The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in AT1 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 39 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.		
	Insignificant capital investments in Tier 2 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	-	-
	<u>Explanation</u>		
54	The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in Tier 2 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 54 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 54 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.		
Remarks:			
The amount of the 10% threshold mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

Points to note:

(i) An AI should report the main features of each outstanding regulatory capital instrument. For any item that is not applicable for a particular capital instrument, "NA" should be entered.

(ii) In order to provide a "main features report" that summarises all of the regulatory capital instruments of the banking group, an AI should report each instrument, including ordinary shares, in a separate column of this template (by adding column (b), column (c) and so on).

(iii) An AI should select one of the standard options in the list as the input for a particular cell, where relevant. The following table provides a more detailed explanation of reporting requirements for each of the cells, and, where relevant, the list of standard options from which the AI should select as the input for a particular cell.

The table above sets out the Company’s CCyB ratio, the risk weighted amounts (“RWA”) of its private sector credit exposures by jurisdiction and the Jurisdictional CCyB (“JCCyB”) ratios as announced by the relevant jurisdictions which are used for calculating the Company’s CCyB ratio. The attribution of the Company’s private sector credit exposures by jurisdiction is determined on an ultimate risk basis pursuant to the HKMA Supervisory Policy Manual module CA-B-3 “Counterparty Capital Buffer (CCyB) – Geographic Allocation of Private Sector Credit Exposures”, considering factors such as country of residence and location of collateral, as applicable.

LR1: Summary comparison of accounting assets against leverage ratio (“LR”) exposure measure

As at 31 December 2025

		(a)
	Item	Value under the LR framework (US\$)
1	Total consolidated assets as per published financial statements	596,604,588

7	Adjustments for eligible cash pooling transactions	-
8	Adjustments for derivative contracts	-
9	Adjustment for SFTs (i.e. repos and similar secured lending)	-
10	Adjustment for off-balance sheet (“OBS”) items (i.e. conversion to credit equivalent amounts of OBS exposures)	26,979,234
11	Adjustment for prudent valuation adjustments and specific and collective provisions that are allowed to be excluded from LR exposure measure	-
12	Other adjustments	4,526,433
13	Leverage ratio exposure measure	628,110,255
Point to note:		
(i) Item 4 represents an item that is not applicable to Hong Kong.		

The difference between the total on balance sheet exposures as reported in the financial statements and on-balance sheet exposures in row 1 of Template LR2 is mainly due to the reason that loans and advances to customers and placements with banks are reported as net amount after impairment in the financial statements while they are reported in their gross amount in row 1 of Template LR2, and also the difference in recognizing Loans and advances to customers at amortized cost using effective interest rate in the financial statement while gross amount of Loans and advances to customers was used in row 1 of Template LR2. For detail of the Template LR2, please refer to the regulatory disclosure for the quarter ended 31 December 2025 of the Company.
